Computer Information Systems: Website Developer

PAY

The median annual wage for web developers was \$64,970 in May 2015.

JOB OUTLOOK

Employment of website developers is projected to grow 27 percent from 2014 to 2024, much faster than the average for all occupations. Demand will be driven by the growing popularity of mobile devices and e-commerce.

Bureau of Labor Statistics, U.S. Department of Labor, Occupational Outlook Handbook, 2016-17 Edition, Web Developers, on the Internet at <http://www.bls.gov/ooh/computer-and-information-technology/web-developers.htm>

ABOUT THE PROGRAM

The Computer Information Systems Website Developer College Certificate program is designed to prepare students for employment in the area of web design. Students will learn web design, XHTML coding, image editing, validation, CSS, GUI editors, server-side and client-side languages. Website developers are responsible for day-to-day site creation, design and all technical aspects of a website.

WHAT DO WEBSITE DEVELOPERS DO?

Website developers create visual concepts, by hand or using computer software, to communicate ideas that inspire, inform, or captivate consumers. They help to make an organization recognizable by selecting color, images, or logo designs that represent a particular idea or identity to be used in advertising and promotions. Website designers and developers create websites to help firms have a public face.

WHERE DO THEY WORK?

Many of these workers are employed in computer systems design and related services firms. Most information security analysts, web developers, and computer network architects work full time.
