Pharmacy Technology

PAY

The median annual wage for pharmacy technicians was \$31,750 in May 2017.

JOB OUTLOOK

Employment of pharmacy technicians is projected to grow 12 percent from 2016 to 2026, faster than the average for all occupations. Several factors will lead to increased demand for prescription medications. As a result of advances in pharmaceutical research, more prescription medications are being used to fight diseases. Also, the number of older people is growing, and older people use more prescription drugs than younger people.

ABOUT THE PROGRAM

The Pharmacy Technology Associate of Applied Science Degree and Certificate Programs are designed to prepare students for entry-level positions in general pharmaceutical services under the direct supervision of a licensed pharmacist.

WHAT DO PHARMACY TECHNICIANS DO?

The pharmacy technician's responsibilities may include the preparation of medicines, the dispensing of medicines, transcription of physician orders, preparation of intravenous medications, and maintaining inventory and patient profiles. Pharmacy technicians working in hospitals and other medical facilities prepare a greater variety of medications, such as intravenous medications. They may make rounds in the hospital, giving medications to patients.

WHERE DO THEY WORK?

Pharmacy technicians held about 402,500 jobs in 2016. They worked primarily in pharmacies, including those found in grocery and drug stores, and in hospitals. Pharmacy technicians spend most of the workday on their feet.

As shown in the following tabulation, more than half of pharmacy technicians were employed in pharmacies and drug stores in 2016.

- | | |
|---------------------------------------|-----|
| • Pharmacies and drug stores | 52% |
| • Hospitals; state, local and private | 16% |
| • Grocery stores | 8% |
| • Other general merchandise stores | 10% |
