Digital Photography Technology

PAY

The median annual wage for photographers was \$32,490 in May 2017. About 3 in 10 photographers worked part time in 2017. Hours often are flexible so they can meet with current and potential clients or visit the sites where they will work. Demand for certain types of photographers may fluctuate with the season. For example, the demand for wedding photographers typically increases in the spring and summer.

JOB OUTLOOK

Employment of photographers is projected to decline by 6 percent from 2016 to 2026, slower than the average for all occupations. Salaried jobs in particular may be more difficult to find as companies and agencies may hire freelancers rather than hire their own photographers. Job prospects will be best for candidates who are multi-talented and possess related skills such as picture editing and capturing digital video. There is a demand for individuals that have the skills and talents as a photographer or a computer-based digital imaging specialist.

Bureau of Labor Statistics, U.S. Department of Labor, Occupational Outlook Handbook, April 2018, Photographers, on the Internet at <http://www.bls.gov/ooh/media-and-communication/photographers.htm>

ABOUT THE PROGRAM

The Digital Photography Technology College Certificate program is designed to provide students with in-depth instruction in the field of Digital Photography. Students will gain a theoretical grasp of the implications of digital photography through various digital photography courses, hands-on experience with cameras and lighting, and digital post production of images. This certificate in Digital Photography Technology will prepare students to enter a number of professional photography fields, such as portrait and commercial studios, and in computer-based processing labs. Emphasis is placed on digital photography and computer-based media imaging.

WHAT DO DIGITAL PHOTOGRAPHERS DO?

Photographers use their technical expertise, creativity, and composition skills to produce and preserve images that visually tell a story or record an event. Photographers typically market and advertise services to attract clients. They analyze and decide how to compose their subjects using various photographic techniques and equipment.

WHERE DO THEY WORK?

In 2012, about 60 percent of photographers were self-employed. The work environment for photographers can vary considerably, depending on their specialty. Portrait photographers may work in studios, but they also often travel to take photographs at a client's location, such as a school, a company office, or a private home. News and commercial photographers may travel locally or internationally.
