Student Learning Outcomes Assessment Cycle

**PLAN**
Identify learning outcomes and measures of achievement at class, course, and program levels.

“When students complete our program/course, students will be able to…(student learning outcome).”

**DO**
Collect data and evidence that demonstrate how well students meet each student learning outcome.

Examples of Assessment: Tests, quizzes, rubrics, surveys, papers, assignments, group projects, presentations, & portfolios.

**LEARN**
Use data and evidence from student learning outcomes to make improvements.

Example: Revise curriculum, pedagogy, and assessment methods to improve student learning.

**MEASURE**
Use evidence to review and analyze student performance based on achievement measures of student learning outcomes.

Example: Of all students that completed WCCCD 101, 80% of students completed the course with C or better.
