CREDIT HOURS: 3.00

CONTACT HOURS: 45.00

COURSE DESCRIPTION:
In this course, students will analyze the historical concepts, modern applications, and future utilization of wind power. The usages of small, medium, and large wind turbines in urban, rural and industrial settings will be examined. Students will gain general knowledge on the economic and environmental issues associated with wind energy sources and they will also become familiar with site assessments for project planning.

PREREQUISITES: NONE
CO-REQUISITE: RET 100

EXPECTED COMPETENCIES:
Upon successful completion of this course, the student will be able to:

1. Understanding of wind, development and principals
2. Calculate load requirements to determine system sizing wind
3. Familiarize with wind system wiring
4. Illustrate the components of wind system.
5. Types of wind systems
6. How wind can be applied for world applications
7. Work with wind data and charts to determine optimum site selection

ASSESSMENT METHODS:
Student performance may be assessed by examination, quizzes, case studies, oral conversation, group discussion, oral presentations. The instructor reserves the option to employ one or more of these assessment methods during the course.

GRADING SCALE:
90%-100% = A
80%-89.9% = B
70%-79.9% = C
60%-69.9% = D
<60% = E
