CHANCELLOR’S MESSAGE
Wayne County Community College District has experienced tremendous growth during the past 15 years. However, facilities that were acquired and constructed during the 70’s and early 80’s were not adequate to support the needs of the communities we serve. Circumstances dramatically changed in November 2001 with a voter-approved millage to both strengthen operations and fund capital improvement projects. This vote of confidence by our stakeholders allowed the District to attain parity in funding with other regional community colleges. Through the Pathways to the Future initiative, WCCCD move quickly to begin the necessary building repairs, deferred maintenance, upgrades to facilities, technology and infrastructure that had been neglected for decades. This ambitious district-wide program has allowed WCCCD to transform programs, services, facilities, and systems resulting in significant value and benefit for students and constituents.

As a major dimension of the Pathways to the Future program, WCCCD had for the first time in its history the resources to “jumpstart” a massive investment in capital projects. Initially, the focus was on long-neglected and urgent needs such as repairing structural damage, replacing aging roofs, resurfacing parking lots, and replacing obsolete technology and equipment. This early phase was followed by the designing and construction of new and upgraded facilities on the five campuses. Major new construction projects have been completed on the Western and Downriver campuses, and the Northwest Campus replacement project, which involves matching capital outlay funds from the State of Michigan, is nearing completion. A facility in the Harper Woods area has been renovated to house WCCCD’s University Center. Campus upgrading and space reallocation projects have been completed on the Downtown and Eastern campuses, although significant facility upgrading and site redevelopment work still remains at the Eastern Campus.

We are very grateful that the support of our citizens and the State of Michigan has made possible the transformation of the facilities on our five campuses. The new and upgraded buildings on each campus have been a significant factor in advancing student success and satisfaction at WCCCD. However, the district now faces a crossroads in terms of the sustainability of facility operations and campus services as we adjust to new financial realities caused by a dramatic loss in property tax and state aid revenue during the past three years. To deal with the outlook for a long-term period of significantly reduced revenue levels, WCCCD launched the District Design Initiative (DDI) as a component of the Pathways to the Future program. Through DDI, the district is implementing a new business model that seeks to maintain a focus on student success and completion, but with increased emphasis on organizational redesign and financial sustainability, productivity, and capacity building. We are addressing fundamentally important questions about the future of WCCCD and its campuses in response to these new financial realities:

• What is the sustainable level of student enrollment?
• What is the sustainable scope of the curriculum?
• What is the sustainable level of student support services?
• What is the sustainable level of staffing?
• What is the sustainable level of campus services?
• What is the sustainable level of facility operations?

To provide for an in-depth and comprehensive review of all of the factors to be considered as the district leadership addresses the issue of the sustainable levels of facility operations and campus services, WCCCD will develop an updated facility and site master plan during 2013. The conclusions of this master planning process will be driven by the answers to the issues listed above: sustainable levels of student enrollment, curriculum, student support services, and staffing. Options to be considered during the master planning process will include the designation of certain campuses as full-service centers and other campuses as specialized service or community centers. To the extent possible, we will seek to honor the “neighborhood college” image of the campuses in recognition of the lack of adequate transportation systems to permit students to travel long distances to an alternative campus.

In spite of the hardships presented by the adjustment to the long-term outlook for reduced revenues, WCCCD must continue to invest in facility and site upgrades in order to keep pace with the changing educational needs of the students, businesses, and communities that we serve.

Sincerely,

Dr. Curtis L. Ivery, Chancellor
EXECUTIVE SUMMARY
EXECUTIVE SUMMARY

This updated five-year capital improvement plan describes the facilities needed by the Wayne County Community College District in the years and decades ahead to support present and future enrollment growth and to house the higher education and career advancement programs of the future. The plan outlines the major new facility construction, building renovation and retrofitting, and site development projects that will provide WCCCD with the physical resources necessary to serve the expanding higher education and career advancement needs of students, businesses, and communities in the college’s service area.

Following is a summary of major capital improvement projects completed at WCCCD since 2001 and of projects that are underway and planned for the future:

A. Major Projects Completed Since 2001
1. Emergency repair and urgent renovation projects (five campuses)
2. Michigan Institute for Public Safety Education (Downriver Campus)
3. Entrepreneurial Institute and Resource Center (Eastern Campus)
4. Educational Multipurpose Center (Western Campus)
5. Information Technology Data Center (Central Administration Building)
6. Renovation and upgrading of science labs and other instructional spaces (all campuses)
7. Performing Arts and Educational Center (Downriver Campus)
8. University Center (Grosse Pointes/Harper Woods location)
9. Northwest Campus replacement project (Completion and occupancy January 15, 2013)

B. Major Projects Currently in Progress
1. Facility condition analysis and building systems upgrades

C. Major Projects Planned for the Future
1. Eastern Campus facility upgrade and site re-development project
2. Five-campus library and learning technologies upgrade project
3. Development of a Sustainability Program at WCCCD (Energy and Environmental Design-LEED-certification; green building standards for construction, renovation, and retrofitting; student involvement; environmental studies curriculum; recycling program; sustainability policies; sustainability advisory committee, etc.)
4. Expansion of University Center
5. Continuation of facility condition analysis and building systems upgrades

D. Facility and Site Development Areas for Exploration and Review of Options
1. Future development of the Downtown Campus
2. Options for future housing of central administration functions
3. Options for designated spaces to house workforce development and continuing education programs
4. Upgrading of technology-oriented instructional laboratories (e.g. information and computer technologies, business, manufacturing technology, and health education, implementation of an Advanced Technology Education Center at the Western Campus)
Wayne County Community College District (WCCCD) has completed more than forty years of uninterrupted operation and development of comprehensive educational services. Both directly and indirectly, our students and the nearly two million people living within the College's service district have enjoyed the benefits of constantly improved instructional programs and community services.

The story of Wayne County Community College District is one of continuing growth and innovation in providing higher education and career advancement programs for the metropolitan region which it was created to serve. The College was established in 1967 by the Legislature of the State of Michigan, and its initial seven-member Board of Trustees was elected the following year. The first operating budget was based on a $1,000,000 grant from the State of Michigan, as well as a $300,000 stipend from New Detroit, Inc., and anticipated student tuition payments at that time. The new College had no buildings or facilities of its own, but with the cooperation of local school boards, classrooms were made available throughout the County of Wayne. In the summer of 1969, the Board of Trustees directed the staff to set up classes for the first fall semester. Instructors were hired, curricula were designed and the College opened its doors.

In 1992, WCCCD passed its first voter-approved property tax levy of 1.00 mill, which was then approved as a permanent millage rate by voters in 1998. In 2001, voters approved an additional 1.5 mill levy for a ten-year period, bringing the college’s total millage levy to 2.50 mills. In November 2008, voters approved the college’s proposal to extend to 2021 the 1.5 mill levy at a reduced rate of 1.25 mills, resulting in a current total millage rate of 2.25 mills.

In 1998, the term “District” was added to WCCCD’s name (from Wayne County Community College to Wayne County Community College District) to reflect the college’s multi-campus structure and its service to a Wayne County geographic district of 32 townships and communities and nearly two million citizens.

During the 2009-2012 period, WCCCD experienced a major decline in property tax and state aid revenues due to the economic downturn in Michigan and collapse of property values in Wayne County. WCCCD is currently developing a new business model focused on productivity, performance, quality, and revitalization of public financial support.

WCCCD currently serves approximately 70,000 students each year in credit and non-credit programs and services.

WCCCD’S MISSION IS TO EMPOWER INDIVIDUALS, BUSINESSES, AND COMMUNITIES TO ACHIEVE THEIR GOALS THROUGH EXCELLENT AND ACCESSIBLE SERVICES, CULTURALLY DIVERSE EXPERIENCES, AND GLOBALLY COMPETITIVE HIGHER EDUCATION AND CAREER ADVANCEMENT PROGRAMS.

### Average Age of WCCCD Students

<table>
<thead>
<tr>
<th>Gender</th>
<th>Average Age</th>
</tr>
</thead>
<tbody>
<tr>
<td>Female</td>
<td>30.86</td>
</tr>
<tr>
<td>Male</td>
<td>29.84</td>
</tr>
<tr>
<td>All</td>
<td>30.6</td>
</tr>
</tbody>
</table>

It is typical for community colleges across the country to attract an older, nontraditional college-age student. The chart above shows the average age of females is 30.86 while the average age of males is 29.84.

### Student Enrollment by Gender

- **Male**: 33.1%
- **Female**: 66.9%

It is also typical at community colleges across the country for females to far exceed male enrollment. The chart above shows 66.9 percent female compared to 33.1 percent male enrollment for WCCCD.
WAYNE COUNTY COMMUNITY COLLEGE DISTRICT AT A GLANCE

• Serves 32 cities and townships encompassing 500 square miles and nearly two million citizens in Wayne County, Michigan, including Detroit. The taxing district is Wayne County with the exception of the Henry Ford Community College and Schoolcraft College districts and the Highland Park Public School District.

• One of 28 community colleges in Michigan.

• Nine-member Board of Trustees elected from nine regions of the district.

• Six service locations: Downriver Campus (Taylor), Downtown Campus (Fort Street in downtown Detroit), Eastern Campus (Conner and Highway 94 in eastern Detroit), Northwest Campus (Outer Drive and Southfield Road in northwest Detroit), Western Campus (Belleville), University Center (Grosse Pointe/Harper Woods area—Vernier Avenue).

• Northwest Campus relocated in fall 2008 from original Greenfield Road site to 32-acre site acquired from the University of Detroit/Mercy at Outer Drive and M39 Southfield Freeway in northwest Detroit.

• District Office: 801 West Fort Street, Detroit, Michigan 48226.

• General telephone number: 313-496-2600. Website: www.wcccd.edu

• Total credit and non-credit student enrollment: nearly 74,000 students in 2012. Diverse student body with students from over sixty countries. More than 70 percent of WCCCD’s students receive some form of financial aid or assistance.

• Degrees: Associate of Arts, Associate of Science, Associate of Applied Science, and Associate of General Studies. More than 80 career education and university transfer programs and to about 50 one-year certificate programs.

• Distance education modalities include online, interactive television, and live interaction online.

• 2012-2013 operating budget: in excess of $103,000,000. Major sources of funding: district-level property tax levy, State of Michigan appropriations, student tuition and fees, federal and state grants and private contributions.
MISSION / VISION / STRATEGIC GOALS
Wayne County Community College District Mission, Vision, Values and Functions Statement

**MISSION**
Why WCCCD Exists

Wayne County Community College District's Mission is to empower individuals, businesses, and communities to achieve their goals through excellent and accessible services, culturally diverse experiences, and globally-competitive higher education and career advancement programs.

**VISION**
The Future Toward Which WCCCD is Moving

Wayne County Community College District’s Vision WCCCD will be recognized as an institution that has achieved national and international recognition for enduring excellence as a comprehensive multi-campus community college district. WCCCD will focus on continuous self-evaluation and improvement; preparation of a highly-skilled workforce in support of the Wayne County economy; student academic and career success, and leadership in strengthening the open door philosophy of educational opportunity.

**VALUES**
What beliefs are important to WCCCD

Wayne County Community College District abides by the Values of:

- Supporting excellence in teaching and learning
- Honoring diversity
- Serving the common good (contributing to community improvement)
- Being accountable
- Operating with integrity

**FUNCTIONS**
What WCCCD does to carry out its mission

Wayne County Community College District fulfills its mission by conducting these Educational Functions:

- Career Education
- University Transfer and General Education
- Workforce Development and Continuing Education
- Developmental Education
- Student Services
- Community Engagement
Wayne County Community College District activates its mission through its strategic goals for the 2009-2014 period:

**A. Goal One: Advancement of the Open Door of Educational Opportunity**
1. Implement student success interventions.
2. Continue WCCCD’s role as a national open door leader.
3. Advance educational opportunities (integration of diversity initiatives)
4. Enhance and re-design Student Services.

**B. Goal Two: Expansion of Community Engagement**
1. Implement the use of regular environmental scan reports.
2. Enhance WCCCD’s community leadership role.
3. Expand the marketing and community relations program.
4. Implement targeted national and international initiatives.

**C. Goal Three: Advancement of Instructional Innovation**
1. Support curricular and teaching/learning change.
2. Establish a premier Health Sciences Center.
3. Expand distance learning opportunities.
4. Implement and develop university partnerships.

**D. Goal Four: Strengthening of Processes to Support Effective Student Learning**
1. Increase faculty/staff participation in annual review of student learning outcomes.
2. Increase use of assessment results to improve student learning.
3. Implement a web-based assessment management system.

**E. Goal Five: Development of Institutional Resources**
1. Enhance faculty and staff professional development.
2. Assure WCCCD’s financial viability and sustainability.
3. Sustain technology resources.
4. Continue facility and site development initiatives on the five campuses.

**F. Goal Six: Enhancement of District-Wide Continuous Self-Evaluation and Self-Improvement**
1. Promote a culture of evidence.
2. Strengthen the annual Plan/Do/Measure/Learn continuous improvement cycle.
3. Implement an annual year-end achievement report system.
4. Strengthen the individual planning and performance appraisal system.

**G. Goal Seven: Advancement of Operational and Management Excellence**
1. Implement an annual systems improvement cycle.
2. Continue district/campus alignment initiative.
3. Implement an expanded program of point-of-service customer evaluation.
INSTRUCTIONAL PROGRAMMING
Overview of Instructional Programs

Wayne County Community College District (WCCCD) is committed to developing and delivering innovative programming solutions to meet the needs of students and the demands of business and industry. All courses and programs meet the standards established by faculty, the District, and various regulatory agencies. Both external and internal factors and community stakeholders help to shape the District's curriculum.

The credit curriculum is delivered through on-site and on-line class sections offered during three semesters each year (fall, spring, and summer). The District offers degrees in the Associate of Arts, Sciences, Applied Sciences and General Studies. These transferrable programs are designed for students who plan to transfer to a four year college or university and for those who plan to earn a professional degree. Over 80 career education and university transfer programs and about 50 one-year certificate programs are offered. Each career certificate or program is designed to meet specific skills and competencies articulated by local employers and various professional accreditating bodies. Associate degree and certificate program development is currently underway or planned in areas such as environmental sustainability (green careers – see below), allied health, food service, advanced technology education, alternative energy, computer information systems, film production, advanced automotive systems, renewable and sustainable energy, and web developer.

WCCCD's University Center is located in Harper Woods near the Eastern Campus, and hosts the advanced educational programs offered by baccalaureate-level colleges and universities. The University Center has the purpose of expanding the opportunity for WCCCD students and other citizens to continue their education beyond the associate degree level, thus empowering them to earn a baccalaureate degree in a supportive and convenient collegiate environment. The University Center currently has partnerships in place or in progress with Ferris State University, The University of Michigan-Flint, Walsh College, and Michigan State University.

WCCCD's commitment to energy conservation and environmental sustainability is expressed in its WCCCD Green Initiative. Through this initiative, WCCCD will strengthen its stewardship of the earth's climate and environmental sustainability by engaging students, faculty, and staff in energy efficiency planning, energy conservation efforts such as waste minimization and power management, development of LEED certified campus buildings, offering of green career education programs (e.g. wind and solar energy technologies, green building construction and retrofitting, hybrid vehicle manufacturing), and infusion of environmental studies into general education and university transfer programs.

The Corporate College was launched in 2009 to position WCCCD as a regional leader and primary provider of workforce education programs and services in support of county, regional, and state economic recovery and growth. The mission of the Corporate College is to “partner with employers and other community organizations to create the workforce of the future”. The Corporate College is housed at the Eastern Campus, sharing that location with the ongoing career education, university transfer, student services, and other community college programs offered at the campus. Corporate College programs include employer-sponsored customized employee training, federally-funded and state-funded job training, on-line workforce education, small business and entrepreneurial development, software certification, and corporate retreat and workshop support services.
Overview of Instructional Programs (continued)

WCCCD’s School of Continuing Education designs and delivers innovative non-credit programs and courses that address the diverse needs of the community. Courses and workshops are offered to assist professionals in meeting the mandatory continuing education requirements for certification such as State Board Continuing Education Units (SB-CEU) for licensure. Through the School of Continuing Education, the District also provides personal enrichment and leisure courses specifically designed to meet the learning needs of our students. These courses are designed for personal growth and development, or the attainment of personal goals. The Distance Education Center develops and offers credit and non-credit programs through distance teaching/learning modalities such as on-line, hybrid on-line and in-class, interactive TV, web-assisted courses, and other modalities in which instruction is mediated through technology. Distance education is the fastest growing instructional sector at WCCCD.

WCCCD will continue to maximize the efficient utilization of current and new campus facilities to the extent possible given current and projected fiscal constraints. In addition, the District has been exploring the possibility of continued partnerships with K-12 school districts, community groups, businesses and industry to find new and inventive ways to partner and facilitate instruction at off site locations or shared spaces. By partnering with groups and organizations such as these, educational opportunities can be offered in the work place, schools, hospitals or medical complexes, or wherever a need is present. These partnerships also benefit students in that they may receive real world training on industry standard equipment or be exposed to industry practices at the hands of industry experts. Access is enhanced through the ability of high school students to get college credit at their school or close to home, avoiding the frequent problems of transportation or family-time.

As the needs of the constituents that WCCCD serves continue to grow, the physical capabilities will need to be considered. Partnership opportunities may be the only way in which some of these needs can be addressed. Therefore, WCCCD will continue to place a high degree of priority upon developing new partnerships and strengthening existing ones.
Organizational Development

Registration

Staffing and Enrollment
Staffing and Enrollment

Wayne County Community College District (WCCCD) enrollment increased significantly over the last 12-years based on innovative program offerings, student service enhancements, facility improvements, and community engagement. Student enrollment has stabilized during the past two years due to many factors that are decreasing overall growth potential district-wide. As with many institutions, WCCCD faced an unforeseen economic climate that warranted rapid adjustments in resources that influenced campus and District enrollment growth. The District continues to research overall capacity to redesign processes, programs, and structures for sustainability and effective use of its resources. To that end, the enrollment overview represents a six year forecast as it relates to current projected and potential enrollment patterns as well as overall institutional capacity.

In response to the financial realities, WCCCD has launched a comprehensive effort to redesign and transform the District for the future. Through forecasting, planning and implementation of plans to address a devastating collapse of property tax valuations and collections within the region as well as continued challenges with State funding, much has already been accomplished to control staffing cost and address financial sustainability. WCCCD has a long history of careful stewardship of its resources. In 2002, the Pathways initiative recognized that the transformation of programs, services, and systems could not be achieved through the resources of a limited permanent staff. Through the Pathways initiative, WCCCD installed a dual structure which involved adding temporary full-time staff, part-time staff and contracted services employees to achieve the mission and goals of the District while maintaining the flexibility to adjust with the changing economy and changing demand for services.

Today, through the District Design Initiative, WCCCD continues to transform and redesign the institution to address financial sustainability, productivity and capacity while achieving its vision of enduring excellence through a focus on student success and institutional effectiveness. A large number of staff positions have been eliminated in recent years, necessitating the redesign of programs, services, structures, and systems to increase efficiency and to redirect resources to student success and completion and other high priority goals.

*Recognizing that the transformation of programs, services, and systems could not be achieved through the resources of a limited permanent staff, the District installed a dual structure which involved adding temporary full-time staff, part-time staff, and contract employees to jumpstart a variety of the high priority initiatives. This dual structure interacts with the permanent structure through the Office of the Chancellor and the senior executive team.*
FACILITY ASSESSMENT
Campus Descriptions

Downriver Campus:
Located on approximately 100 acres of former farmland and woods at 21000 Northline Road in Taylor, Michigan, the Downriver Campus was completed in 1978, and includes a 7-acre woodland preserve. In 2005, the District constructed the Michigan Institute for Public Safety Education (MIPSE) a state-of-the-art, 10-acre facility, which houses a 5-story fire training tower, a 12,000 square-foot training center, a 50,000 square-foot driver training area, and a man-made lake for water rescue simulations. The MIPSE facility also includes simulators for aircraft, vehicle, and ship rescue missions. Construction of the Heinz C. Prechter Educational and Performing Arts Center was completed in early 2010. This facility includes an 800 seat multipurpose auditorium with full stage and scenery loft.

Downtown Campus:
Constructed in 1979, this 11-acre campus was originally the site of the Penn Central Railroad Station near the Detroit River. The campus was built around the existing facility resulting in a 180,000 square foot complex. The Downtown Campus is adjacent to the District Office Building separated by a landscaped courtyard over the US-10 freeway.

Eastern Campus:
The Eastern Campus was completed in 1982 occupying 26 acres at the corner of Conner Road adjacent to I-94. The 192,000 square foot building supports general and career technical instruction along with the CVS Regional Training Center, Workforce Development Career Center and entrepreneurial programs. The Eastern Campus serves the eastside of the City of Detroit, the five Grosse Pointes and the cities of Hamtramck and Harper Woods.

University Center:
The University Center is a 22,000 square foot facility on 3.2 acres in Harper Woods which opened in 2008. This regional center offers community college courses as well as courses offered by partner universities or colleges leading to baccalaureate and masters degrees. The facility contains general use classrooms, technology labs, interactive television (ITV) labs, science lab, student support services, and faculty office areas.

Northwest Campus:
The Northwest Campus is located on a 32 acre site at West Outer Drive and Southfield. The Northwest Campus has five buildings: Welcome Center; General Arts Building; Laboratory Science Building; Academic Administrative Building; and Health Sciences Center. The campus serves as the center for the Health Sciences in the District and supports classrooms and labs for Dental Hygiene, Dental Assisting, Dental Laboratory Technology, Dietetics, Nursing, Emergency Medical Technology, Surgical Technology and Phlebotomy. Construction of a new facility began in May 2011 and will be completed and occupied in January, 2013. This facility will house a Student Services Center which will provide a one-stop-shop atmosphere to aid in activities from enrollment to advising and financial aid. Building classrooms and Instructional Labs in the new building will support not only the Health Sciences but other career and technical programs in high demand such as Childcare, Computer Information Systems, Criminal Justice/Corrections, Law Enforcement, Food Service Management, and Pre-Service Education/Urban Teaching.

Western Campus:
The Western Campus is located on 117 acres north of the Haggerty Road/Interstate 94 intersection in Belleville. This campus was completed in 1981, and a large portion of the site remains in its natural wooded state. A 43,000 square foot expansion of the campus was completed in 2008 featuring state of the art computer labs, a large multi-purpose room, 100-seat lecture hall and additional technical career program space.

SPACE U TILIZATION
SPACE UTILIZATION STUDY

The Space Utilization Study was revised again for Fall 2012 and is used to guide the recommendations made for the Implementation Plan. This study covered other areas besides utilization and efficiency of room and space usage. Studies were conducted to determine the adequacy of spaces and buildings at each campus in meeting the needs of the staff and students. These studies encompassed adequate size of spaces, content of spaces and buildings, and the condition of these spaces such as image, technology and the ability to meet program requirements. Organization of the buildings, departments, labs and classrooms were also studied to determine functionality, adaptability, and flexibility.

In order to calculate Space Utilization on the campuses, information was collected pertaining to lecture room / laboratory usage during a typical week. A 48-hour demand time for a typical week is assumed for each and lecture room / laboratory on a campus. These 48 hours are made up of Monday - Thursday, 8:00 a.m. to 3:00 p.m. and 5:30 p.m. to 9:30 p.m. and Friday, 8:00 a.m. to 12:00 p.m. or 32 daytime hours and 16 evening hours. This 48-hour demand time is based on historical experience. These WCCCD Space Utilization Summaries are just one of the guides used to determine recommendations for new spaces or reconfigurations.

Darker color on charts denotes current space utilization; lighter color denotes planned enrollment growth.

Downriver Campus (Note 1): Laboratory rooms are well utilized. The new 2010 addition, with 14 new lecture rooms, provides adequate space for program growth.

Downtown Campus (Note 2): Both lecture and laboratory rooms are well utilized. Future building expansion will be addressed in upcoming detailed planning studies.

Eastern Campus (Note 3): The Eastern Campus has adequate space for further enrollment growth. Facility upgrading and site redevelopment of the Eastern Campus is a high priority.

Northwest Campus (Note 4): Both laboratory and lecture rooms are well utilized. Substantial future growth is anticipated for this campus, and the new academic building will provide for this growth with an additional 19 lecture rooms and 10 computer laboratories.

University Center (Note 5): Laboratory rooms are well utilized and lecture rooms have adequate space for further enrollment growth. The University Center opened 3 years ago and is continuing the process of building partnerships with universities that will utilize the available spaces.

Western Campus (Note 6): This campus, with the 2008 new addition, has adequate space for anticipated further enrollment growth.

Total space utilization (Note 7): In the past twelve years, WCCCD has been the fastest growing community college in Michigan, and one of the fastest growing in the United States. The space utilization study indicates that instructional spaces are being effectively utilized, and that recent building projects have provided the intended space for anticipated future enrollment growth.
WCCCD Laboratory Room Utilization Summary-Fall 2012

Darker color on charts denotes current space utilization; lighter color denotes potential enrollment growth.
Darker color on charts denotes current space utilization; lighter color denotes potential enrollment growth.
State Office Guidelines

The standards for state offices with full-height structural partitions only have been based on an average of approximately 125 square feet per full-time equivalent employee. Significant cost savings are achieved with open office space planning methods. Systems furniture allows a lower average of approximately 80-120 square feet per full-time equivalent employee.

State agencies are encouraged to consider flexible and innovative space arrangements to minimize space usage. Employees’ functional needs may be met through alternative and flexible design strategies. Conference rooms should be shared whenever possible and scheduled through the network for efficient occupancy. Teaming spaces, hoteling cubicles, and common filing areas are recommended. Avoid duplication of common spaces such as break, mail, and copy rooms, storage, toilets, lobbies, and reception/waiting areas.

If a specific business or functional need requires variation from these guidelines, discuss the need with the DMB-FA Project Director.

**UNIVERSITY AND COLLEGE SPACE STANDARDS:** Various higher education facilities planning guides exist and may provide guidance for standards of space allocation. The following tables of space utilization standards are provided as a guide.

**CLASSROOMS:** Assignable square feet (ASF) per station.
- For classrooms averaging 20 stations: approximately 21 ASF per station
- For classrooms averaging 30 stations: approximately 17 ASF per station
- For classrooms averaging 40 stations: approximately 15 ASF per station
- For classrooms averaging 80 stations: approximately 12 ASF per station
- For classrooms averaging 120 stations: approximately 11 ASF per station.
CLASS LABORATORIES: Assignable square feet (ASF) per station, including the floor area of related service rooms (workload support space).

### Interdisciplinary

Combine the factors of the various academic programs from which the interdisciplinary courses are combined.
**Research and Graduate Training Facilities:** Includes service (workload support) space.

<table>
<thead>
<tr>
<th>Academic Program</th>
<th>Assignable Square Feet per Faculty Member Engaged in Research</th>
</tr>
</thead>
<tbody>
<tr>
<td>Agriculture and Natural Resources, Engineering, Biological Sciences, Physical Sciences</td>
<td>900-1,300</td>
</tr>
</tbody>
</table>

**OFFICE AND CONFERENCE FACILITIES:**

<table>
<thead>
<tr>
<th>Organizational Unit</th>
<th>Type Of Institution</th>
<th>Assignable Square Feet per FTE Staff Requiring Space*</th>
</tr>
</thead>
<tbody>
<tr>
<td>Academic Units (see note below)</td>
<td>University</td>

</tr>
<tr>
<td></td>
<td>2-year</td>
<td>110-130 ASF/FTE Staff</td>
</tr>
<tr>
<td>Non-Academic Units</td>
<td>All Institutions</td>
<td>140-170 ASF/FTE Staff</td>
</tr>
</tbody>
</table>

- These values include allowances for office, office service, conference room, and conference room service types of facilities.

Note: This system does not provide differential values of the criterion for different groups of employees. However, suggested differential values for academic offices are as follows:

- Single faculty member or equivalent: 110 +\- 10 net square feet
- Double faculty member or equivalent: 165 +\- 15 net square feet
- Department chairpersons or equivalent: 165 +\- 15 net square feet
- Deans or equivalent: 200+\- 20 net square feet

Although faculty and professional staff usually are given larger offices and generate the requirements for conference room space, the other groups of employees create the demand for most office service facilities. The overall factors thus tend to even out.
Study Facilities, Libraries:

**Stack Space:** If “volume” is arbitrarily defined as a bound volume, the single value of 0.10 ASF per volume is appropriate. The calculation of volume equivalents is so complex as to be inappropriate as a required step in a generalized planning system. Therefore, it is suggested that a planning criterion of 0.10 ASF per bound volume be used with the recognition that use of this factor carries with it an implied assumption concerning the mix of library resources.

**Study (Seating) Spaces:** A value of 25-35 ASF per station for library study is appropriate for most institutions. However, a higher value for library study space may be required in those instances where private study cubicles are provided for faculty and/or graduate students. The number of stations to be provided is determined on the basis of a policy decision which should be explicit in the program. The requirements for a law library, for instance, may be such that a station for each student may be required.

**Library Service Processing Space:** This space (recommended at 5% of the sum of stack and study areas) should include only such areas as card catalogs or catalog stations, circulation desks, or other direct processing space. Library office space requirements should be calculated in accordance with space requirements for similar office spaces in other organizational units.

If library office space is not calculated separately, then the sum of the office and other library processing areas will range from 20% (for large libraries) to 25% (for smaller libraries) of the total amount of space in the study and stack categories.

**Special, General, and Support Uses:** Space requirements for such spaces will be individually assessed.

- **Special Use:** Armories, athletic, physical education, audio/visual, clinic (non-medical), demonstration and field-service facilities.
- **General Use:** Assembly, exhibition, food, student health, lounge, merchandising, and recreation facilities.
- **Support:** Central food store, central laundry facilities, data processing and computer, shop, storage, and vehicle storage.
FACILITY CONDITION ANALYSIS
Downriver Campus – Taylor

The Downriver Campus building was originally built in 1978. The major structural system is composed of steel columns on a concrete foundation. The concrete second floor is supported on metal decking and joists. A similar system supports the built-up roof. The exterior of the building is clad in corrugated metal siding and concrete block. A 60,000 square foot theatre and classroom addition was opened in 2010.

The following list includes items that have been completed over the past year or will be addressed. The list pertains only to the original building and does not refer to the new addition portion of the building.

• The bookstore remodeling with new furniture and finishes was completed in 2012.
• Sidewalks have been repaired at building entrances and parking lots.
• The Learning Resource Center remodeling and furniture upgrading was completed in 2012.
• Fluorescent lighting fixtures updated all tubes and high-efficiency type ballasts in 2012.
• Many classrooms, the Learning Resource Center and the Art/Ceramics rooms have updated lighting levels and quality.
• Restrooms have been renovated to make them compliant with code.
• Heat exchanger replacement completed.
• De Aerator tank replacement completed.
• Air conditioning chiller replacement/conversion (in process spring 2013).
• Change pneumatic controls to Direct Digital Control System (in process spring 2013).
• The emergency lighting system is in process of being upgraded.

Downtown Campus – Detroit

The Downtown Campus building was constructed in 1979. Concrete beams and columns with a concrete slab floor system compose the superstructure of the building. The substructure consists of a concrete slab on grade in collaboration with concrete block walls and a poured concrete foundation retained by a poured concrete wall along the north façade of the building. The floor/roof construction consists of concrete slabs. A built-up roof system on concrete, with a ribbed metal roof system in some areas, completes the roof enclosure. The exterior wall composition is constructed of precast concrete panels integrated with an exterior glazing system.

The following list includes items that have been completed over the past year or will be addressed.

• Eliminate steam as heat source completed in 2012.
• Replace absorption system with chiller and boilers completed in 2012.
• Change pneumatic controls to Direct Digital Control System completed in 2012.
• A $200,000 Grant from Smart Buildings Detroit (shared with the District Administration Building) was received to assist with the above items.
• Renovate restrooms to meet ADA requirements partially completed in 2012.
• Renovate linear metal ceiling system in the Learning Resource Center and along the corridors of the atrium where ceiling pieces have been damaged.
• Update elevator is complete.
• Upgrade lighting completed in 2012.
• Parking lot replacement project starting in fall 2012.

**Eastern Campus – Detroit**

The Eastern Campus was constructed in 1982. The major structural system is composed of concrete columns in collaboration with structural steel tubes acting as minor support members. The foundation consists of grade beams and caissons. The existing floor/roof construction includes a precast concrete tee system with concrete topping. Membrane roofing on the concrete topping (membrane roofing on metal deck in some areas) completes the overall roof construction.

The following list includes items that have been completed over the past year or will be addressed.

• Mechanical air handling units and chillers have been repaired and upgraded.
• Variable speed drive motors to HVAC Systems have been repaired and upgraded.
• Change pneumatic controls to Direct Digital Control System scheduled for 2013.
• A $100,000 Grant from Smart Buildings Detroit was received to assist with the above items.
• Update lighting in training labs, LRC and some classrooms completed.
• Update elevator is complete.
• Upgrade main entrances and lobby completed.
• Welding laboratory, HVAC laboratory, and Manufacturing/Machining laboratory have been upgraded with new equipment.
• North parking lot resurfacing complete.
• South parking lot resurfacing complete.

**Northwest Campus – Detroit**

WCCCD was able to renovate a purchased property from the University of Detroit Mercy, located at Southfield Road and Outer Drive. This campus includes several buildings that have been renovated to fit WCCCD’s curriculum as well as open land for building expansion and additional parking.

The Northwest Campus Capital Outlay Project New Academic Building completion and occupancy is scheduled for January 15, 2013. The project also addressed many existing facility condition issues. The following list includes items that have been completed or need to be addressed.

• A $500,000 Grant from Smart Buildings Detroit was received to assist connecting the mechanical systems of the existing buildings to the New Academic Building central boilers system.
• Elevator doors will be replaced in December 2012 in Administration Building and Welcome Center.
University Center – Harper Woods

In 2008, the District opened a 20,000 square foot facility to house the University Center in Harper Woods. This new center offers community college courses as well as courses offered by partner universities and colleges leading to baccalaureate and masters degrees. The facility was completely renovated to WCCCD specifications and contains general use classrooms, technology labs, interactive television (ITV) labs, science lab, student support functions, and faculty offices. In 2012, spaces were renovated to create a new Faculty Center and a new Student Work Center.

Western Campus – Belleville

The original Western Campus building was built in 1981. The structural system is steel on a concrete foundation. The concrete second floor is supported on metal decking and joists. A similar system supports the roof. The built-up roofing was replaced in 2001 and is in good condition. The exterior of the building is clad in stainless steel corrugated siding above glass block. The siding is in good condition. The interior walls and ceilings are in good shape. A 43,000 square foot addition was completed in 2008 and includes six new seminar rooms, a computer classroom wing and a technical laboratory wing.

The following list includes items that have been completed over the past year or will be addressed.

- A Community Soccer Park in partnership with the Van Buren Soccer Association was created with the grand opening on September 8, 2012.
- Restrooms in the older portion of the building should be renovated to be consistent with the new addition.
- Add variable speed drive motors to HVAC Systems scheduled for 2013.
- Change pneumatic controls to Direct Digital Control System scheduled for 2013.
- Refurbish air conditioning cooling tower is complete.
- Overhaul of both air conditioning chillers is scheduled for 2013.
Energy Plan
Wayne County Community College District Energy Plan

The Wayne County Community College District has the ongoing WCCCD Green Initiative, strengthening their stewardship of the earth’s climate and environmental sustainability. Although not just an Energy Plan, all elements of energy are included.

The Objectives of the WCCCD Green Initiative are as follows:
1. To underscore WCCCD’s commitment to the stewardship of the earth’s climate and environmental sustainability.
2. To optimize WCCCD’s energy performance, energy conservation measures, and verification of energy performance.
3. To minimize the impact of district operations on carbon emissions.
4. To prepare students for careers in green occupations.
5. To deepen student understanding of the economic, health, social, ecological, and ethical dimensions of climate change and environmental sustainability.
6. To create living/learning laboratories on environmental sustainability for students, faculty and staff, and community groups.
7. To provide demonstration projects on environmental sustainability.
8. To create model green campuses, starting with the Eastern Campus.
9. To participate at the local, state, and national level in activities to strengthen the stewardship of the earth’s climate and environmental sustainability, and to participate in a national movement to place institutions of higher education in a leadership role in addressing climate change and environmental sustainability.

The following elements of the WCCCD Green Initiative have been completed or started in 2012:

1. Perform an energy audit of all facilities.
2. Design new facilities for the Northwest Campus to meet LEED (Leadership in Energy and Environmental Design) Platinum certification standards. Construction completion and occupancy will occur in January 2013.
3. Strengthen green career education programs (renewable energy production and distribution, green building construction, water and wastewater management, agriculture, biofuels, electrical and hybrid vehicle manufacturing, transportation, air quality, energy auditing, supply chain, etc.). The following specialized academic classes are being offered:
   a. Downriver Campus
      i. AUT 114-117-Electrical/Electronics I-IV
      ii. AUT 150-Introduction to Alternative Fuels
      iii. AUT 151-Light Duty Diesel Engines
      iv. AUT 152-Introduction to Electric and Fuel Cells
      v. AUT 153-Introduction to Gaseous Fuels
      vi. AUT 154-Introduction to Hybrid Fuel Technology
      vii. AUT 155-Introduction to Hydrogen Applications and Safety
   b. Downtown Campus
      i. WET 101-Water Treatment Technologies
      ii. WET 102-Wastewater Treatment Technologies
      iii. WET 210-Advanced Waste Water Treatment Technologies
iv. WET 212-Advanced Water Treatment Technologies
v. WET 215-Water Quality Analysis and WET Instrumentation
vi. WET 220-Water Quality Analysis and Microbiology
vii. WET 224-Water/Waste Water Utility Equipment Maintenance
viii. WET 265-Praticum

c. Eastern Campus
i. HVA 101-Basic Refrigeration
ii. HVA 102-Hermetic Systems
iii. HVA 104-105-Power Energy Air Conditioning I-II
iv. GTT 101-Principles of Thermalgeology
v. GTT 105-Applications of Geothermal System
vi. GTT 201-Geothermal REHC Technology
vii. GTT 220-GHEX Accreditation Exam Prep
viii. RET 100-Renewable Energy/Alternative Energy Principles
ix. SED 100-Principles of Sustainable Environmental Design
x. SED 120-Residential and Commercial Sustainable Design

d. Western Campus
i. RET 100-Renewable Energy/Alternative Energy Principles
ii. RET 120-Conventional Energy Sources and Application
iii. RET 140-Energy and Electricity
iv. RET 142-Wind Power
v. RET 144-Solar Power
vi. RET 146-Geothermal and Hydropower
vii. SED 100-Principles of Sustainable Environmental Design
viii. SED 120-Residential and Commercial Sustainable Design
ix. SED 140-Sustainable Materials
x. SED 142-Sustainable Sites
xi. SED 144 Ecologically Aware Interiors
xii. SED 146-Sustainable Project Management
xiii. SED 148-Sustainable Systems
xiv. SED 160 Sustainable Community Principles
xv. SED 200 LEED Certification Exam Preparation
xvi. SED 220-Sustainable Environmental Design Capstone
The following elements of the WCCCD Green Initiative are to be addressed in the years ahead:

1. Sign the Chancellor’s Climate Commitment (American College and University Presidents Climate Commitment).
2. Continue to develop a district-wide plan of action for energy efficiency and environmental sustainability.
3. Complete and review the energy audit of all facilities.
4. Develop and implement an energy efficiency improvement plan for all facilities.
5. Implement conservation measures such as recycling, waste minimization, water management, power management, uses of alternative energy, reduction in paper consumables, and use locally grown food and locally manufactured supplies.
6. Use high efficiency equipment, IT devices (Energy Star), and vehicles.
7. Redesign and reconstruct the Eastern Campus as a model green campus (living/learning laboratory for students, faculty and staff, and the community).
8. Redesign, reconstruct, and retrofit all facilities to meet LEED (Leadership in Energy and Environmental Design) certification standards.
9. Verify ongoing energy performance with periodic sustainability progress reports to the public.
10. Continue to strengthen green career education programs (renewable energy production and distribution, green building construction, water and wastewater management, agriculture, biofuels, electrical and hybrid vehicle manufacturing, transportation, air quality, energy auditing, supply chain, etc.).
11. Incorporate environmental sustainability topics into general education and academic programs (economic, health, social, ecological, and ethical dimensions).
FIVE YEAR CAPITAL IMPROVEMENT IMPLEMENTATION PLAN
**MAJOR BUILDING PROJECTS INTRODUCTION**

**Introduction**

Wayne County Community College District includes six campus locations throughout Wayne County and one main administration building within the district boundary. Three campuses and the Administration Building are located within the City of Detroit; the Downtown Campus and Administration Building located at Fort Street and the Lodge Expressway, the Northwest Campus located at Outer Drive and Southfield Road, and the Eastern Campus located at Conner Avenue and Interstate 94. The Downriver Campus is located on Northline Road in the City of Taylor and the Western Campus is located on Haggerty Road in Van Buren Township. The newest University Center is located on Vernier Road in Harper Woods.

As stated in the Wayne County Community College District’s 2000 New Century Facility and Campus Master Plan, the over arching goal is to provide adequate and consistent facilities in order to educate and empower students to compete in the 21st century.

Since that publication, WCCCD’s capital improvements not only successfully achieved this goal, but established a high quality, diverse, and technologically advanced atmosphere within which individuals, businesses, and surrounding communities continue to flourish. Building upon the momentum of the past twelve years of capital improvements and looking towards long term needs, WCCCD has identified several new construction and renovation projects. Once completed, these projects will reinforce the previously established partnership focus for each campus and strengthen the district as a whole. An overview of all projects is as follows:

**Completed projects since 2001**
- Emergency repair and urgent renovation projects (five campuses)
- Michigan Institute for Public Safety Education (Downriver Campus)
- Entrepreneurial Institute and Resource Center (Eastern Campus)
- Educational Multipurpose Center (Western Campus)
- Information Technology Data Center (Administration Building)
- Renovation and upgrading of science labs and other instructional spaces (all campuses)
- Performing Arts and Educational Center (Downriver Campus)
- University Center (Grosse Pointes/Harper Woods location)
- Northwest Campus replacement project (Completion and occupancy January 15, 2013)

**Major Projects Currently in Process**
- Facility condition analysis and building systems upgrade - See Appendix A

**Major Projects planned for the future**
- Eastern Campus Facility and Site Re-development project - See Appendix B
- Five-Campus Library and Learning Resources Update - See Appendix C
- Development of a Sustainability Program at WCCCD (Energy and Environmental Design-LEED certification; green building standards for construction, renovation, and retrofitting; student involvement; environmental studies curriculum; recycling program; sustainability policies; sustainability advisory committee; etc.)
- Expansion of University Center
- Continuation of facility condition analysis and building systems upgrades

**Facility and Site Development Areas for Exploration and Review of Options**
- Future development of the Downtown Campus
- Options for future housing of central administration functions
- Options for designated spaces to house workforce development and continuing education
- Upgrading of technology-oriented instructional laboratories (e.g. information and computer technologies, business, manufacturing technology, and health education, implementation of an Advanced Technology Center at the Western Campus)
Implementation Plan

a. The District’s priority capital project for which funds are requested from the state is the Eastern Campus Facility Upgrade and Site Re-development Project.

b. Over the past few years, the District has made significant progress in addressing outstanding deferred maintenance issues. Some of the areas addressed include roof repairs, mechanical equipment replacements, electrical and lighting system replacements, grounds renovations and structural deficiencies. Although additional issues continue to arise with the aging of the facilities, the District continues to make significant progress as it attempts to cope with years of under funded deferred maintenance issues. See Facility Assessment Section.

c. Construction completion and occupancy will be on January 15, 2013 for the Northwest Campus Replacement Project.

d. While difficult to quantify, it is expected that the revitalization of the Eastern Campus would provide a return on investment in a number of appreciable ways, including the following:

1. Improved layout design would enable the campus to serve more students.

2. New facility additions will permit the campus to be more responsive to the changing needs of businesses and communities in the region.

3. An upgraded facility designed with state of the art laboratories and learning technologies will better prepare students for employment.

4. A new facility will permit the campus to play a more pivotal role in the economic and workforce development of the Eastern region.

e. The District is investing in on-line technologies, especially distance learning, as an alternative to traditional instructional delivery.

f. On an annual basis, Wayne County Community College District has no projected maintenance items in excess of $1,000,000.

g. Each fiscal year, the annual District Facilities and Maintenance operating budget is developed based upon historical actual budget expenditures as well as anticipated scenarios requiring budget adjustments. As a result, routine operational maintenance issues are budgeted for as well as unplanned projects that are non-routine in nature.
APPENDIX A: FACILITY CONDITION ANALYSIS AND BUILDING SYSTEMS UPGRADE

Part of the New Century Facility and Campus Master Plan 2000 project was to assess the condition of each campus building and property. This was used to identify any necessary emergency repairs, such as structural damage and roof leaks, which were dealt with immediately. In 2008, a brief facility condition analysis was done at Northwest Campus to assess its facilities. This analysis was part of the Northwest Campus Replacement Project.

By and large, the District’s existing campus buildings and the District administration building operate with original building systems such as electrical and mechanical systems and equipment, furnaces, lighting systems, security systems, and toilet rooms. The goal of the project is to bring these existing buildings, which are approximately 30 years old (constructed during the 1978 to 1982 period), up to par with the recent new construction in terms of basic building systems. Some mechanical and electrical upgrades have already been completed. See Facility Assessment - Facility Condition Analysis. As well, there is a need for surface repair and painting, computer support infrastructure upgrades, and parking lot resurfacing in a number of cases. Because these basic building systems will become more efficient after the upgrades have been accomplished, this project will also assist the district in implementing its new sustainability program. The project would consist of the following phases:

Perform a Capital Asset and Full Reserve Study. This will include a capital needs study for a deferred maintenance plan as well as financial analysis and budgeting for long-term facilities operations and maintenance.

Undertake a comprehensive facility condition analysis for all existing buildings on each of the campuses and in the District administration building.

Determine the funding for the upgrade projects as a part of developing the financial strategy for other major projects such as the Eastern Campus Upgrade and Site Re-Development Project and the Five-Campus Library and Learning Technologies Project.

During the following five years, undertake the specific building systems upgrade projects indicated by the facility condition analysis and as outlined in a long-term financial strategic plan.
APPENDIX B
APPENDIX B: EASTERN CAMPUS FACILITY UPGRADE AND SITE REDEVELOPMENT PROJECT

Condition of Existing Campus and Project Description
The Eastern Campus is located on Conner Avenue adjacent to and directly southeast of Interstate 94 (the Edsel Ford Freeway) in the City of Detroit. Although interchange ramps provide access to Conner Avenue from both northbound and southbound lanes of Interstate 94, the access to the campus and campus parking lot is somewhat difficult and confusing. The main campus entrance from Conner Avenue routes traffic past building service areas and through a congested drop-off area in order to reach the parking lot. Direct access to the parking is provided to St. Jean Street via Hern Street, but this route can only be accessed from southbound Conner Avenue.

The site is irregular in shape and consists of two parcels separated by St. Jean Street and small industrial sites. One parcel contains the campus building and the other the parking lot. There is approximately 1300 feet of frontage on Conner Avenue, the major street serving the campus. The total area of both campus parcels is approximately 26.7 acres. All campus programs and facilities are housed in a single building containing 192,625 gross square feet of floor area on three levels. Parking consists of one paved lot containing 799 spaces. The campus functions poorly from an organizational standpoint with confusing vehicular circulation and a parking lot separated from the building by a public street. The pedestrian/vehicular conflict that exists at St. Jean Street is a serious safety concern for pedestrians crossing from the parking lot to the building entrance where injury accidents have been reported in the past. The best long-term solution to the problem would appear to involve the removal of St. Jean Street to provide uninterrupted pedestrian access from the parking lot to the campus building.

Little potential exists for expansion of the existing building given the size and configuration of the site parcels. The New Century Facility and Campus Master Plan, dated June 21, 2000 identified four small industrial parcels on St. Jean Street contiguous to the current campus property and recommended acquisition of these properties. These acquisitions would result in an improved site configuration and the only good potential for any expansion. In addition, the acquisitions will also provide the potential to relocate St. Jean Street to the outer campus boundary and allow a safe pedestrian link between the building and the parking area.

Implementation
The tentative schedule for the planning and completion of Eastern Campus Site Redevelopment and Facility Upgrade Project is as follows:

1. Purchase of private properties on St. Jean Street between campus building and parking lot to unify campus properties. The estimated market value of the properties is $1,825,000 - $3,000,000.
2. Relocate St. Jean Street to outside edge of the parking lot to eliminate automobile and pedestrian conflicts and provide better relationship between parking and main building entrance - estimated cost for approximately 1700 feet of road is $500,000.
3. Reconstruct campus parking lot; establish dense landscape buffer along the Detroit City Yard property; construct lighted covered walkway from building entrance into parking lots; enhance building area landscaping; reconfigure/reconstruct campus drop-off area; refinish areas of property acquisition not being developed into new parking lot area – total estimated cost is $2,200,000.
4. Construct building additions and renovations at existing building to respond to increase of student enrollment – estimated cost is $13,500,000.
APPENDIX C: FIVE-CAMPUS LIBRARY AND LEARNING TECHNOLOGIES UPGRADE PROJECT

Introduction

The District’s five campus libraries each have conventional library facilities that have primarily remained the same since the campus buildings were constructed during the 1974 to 1982 period. Since the original construction of the library spaces, some improvements in wireless access, computer services, furniture, and lighting have been achieved. However, library services, spaces, technologies, and staffing at the district and campus levels are in need of a general transformation in order to meet the present and emerging future needs of the students, businesses, and communities that the college serves.

An internal study of library services in 2007-08 indicated a need for upgrading and updating in areas such as small group study areas, computer access, district- and campus-wide Internet connectivity, de-centralized library kiosks, seminar spaces, teleconferencing capability, library orientation classrooms, exhibit space, instructional technology services center for faculty use, “smart” classrooms linked to library electronic services, and study carrels.

General Plan of Action

The general plan of action for the five-campus library and learning technologies upgrade project has these major programmatic components:

- The creation of a central district library, possibly on the Northwest Campus.
- The re-development of service libraries on the five campuses.
- Further development of district- and campus-wide learning technologies.
- Further development of smart classrooms.
- Re-development of library linkages with the Distance Education Division, the Educational Affairs Division, and the Student Services Division, and the Continuing Education Division.

The first step in implementing this general plan of action will be to develop a detailed program statement and a library services master plan. This process will be guided by a steering team appointed by the chancellor. The preparation of the program statement and the services master plan will be enhanced by visits by WCCCD personnel to other multi-campus community college districts that have recently built outstanding library facilities and the use of external library consultants. Based on the program statements and the library services master plan, a funding strategy will be developed, an implementation timetable will be established, chancellor and Board of Trustees approvals obtained, and implementation will proceed. Through this process, decisions will be made and implemented regarding the new construction (new buildings, additions to existing buildings), re-allocation and retrofitting of existing spaces, and space renovation needed to carry out the goals of this capital project.
Central District Library

A key component of this library and learning technologies upgrade project will be the re-development of district-level library services in the form of a central district library. This central library will possibly be housed on the Northwest Campus, although a final decision on location will be made during the program statement and service master planning phase of the project. Some functions of the central library will include library acquisitions, faculty and staff professional development, management of library systems, marketing, administration (planning, budgeting, staff supervision, etc.), electronic and on-line support services, database development, library website development, virtual library development, linkages with the instructional and student services divisions of the college, and interlibrary cooperation.

Campus Service Libraries

Each of the five campuses will have a service library with functions to be determined in detail during the program statement and service master planning phase of the project. Functions of campus service libraries may include reference desk services, circulation, search stations, quiet study areas, student study carrels, electronic and on-line support services, inventory management, Internet and other connectivity services to faculty and students, exhibit spaces for Art and other displays, faculty instructional development support services, computer commons, services to students with disabilities, Internet cafe features, de-centralized library kiosks, student orientation classrooms, and meeting and seminar spaces.

Learning Technologies

In cooperation with the instructional divisions and the Student Services Division, a comprehensive upgrade of learning technologies will be undertaken. Building on the substantial progress that has been made in advancing learning technologies at WCCCD since 2001, the learning technologies upgrade component of this project will include an updated program statement and service master plan in areas such as conversion of all classrooms and labs to appropriate levels of “smart” classrooms; increases in teleconferencing capability, multi-media production capability, wireless connectivity, district- and campus-wide electronic networking, interactive TV, faculty professional development services; access to Web 2.0 technology; and increases in web-assisted instruction, on-line, and Internet services.
