Fusing Health, Wellness and Opportunity
**City Center:**

*The crossroad between health, wellness, education and real-world career opportunity*

The Wayne County Community College District City Center was designed for a new era in health science education and student community life. Focused on building connections across disciplines and providing real-world training for our students that create career opportunity, City Center consolidates practice, training, and academic spaces, with dynamic programs for community engagement. City Center is a hybrid facility that will allow WCCCD to deliver an integrated set of health and wellness programs, as well as unique experiences – at the epicenter of premier health systems, sports and entertainment venues.
Health Science
The WCCC City Center allows our health science students to expand their training beyond our clinical academic facilities to new settings, building connections and skills in programs such as physical therapy, kinesiology, and foundational academic training for sports medicine fields.

Wellness
With state-of-the-art equipment and facilities, WCCC students can build stackable knowledge in programs as diverse as nutrition, athletic or fitness training, exercise physiology and more. And because City Center is WCCC’s Town Square for health and wellness training, students can exercise their mind and body to ensure peak performance.
+ Balance + Opportunity

**Partnership**
WCCCD’s City Center provides a venue for creative collaboration, training and growth with existing and new partners across the region. Located in the heart of Detroit’s sports, health care, and entertainment districts, City Center fuses entertainment, workplace training, and growth opportunity in one dynamic setting.

**Community Connections**
WCCCD City Center gives area residents a place to take in a basketball game, participate in community programs, learn about preventive care and overall health, and exciting events like competitive eSports, robotics, and more.
Building discipline, earning respect and overcoming adversity are all parts of a winning game plan. When I’m talking about a game plan, I’m talking about being the best player you can be and how you go about being successful in life.

- Walt Frazier -
