PREFACE

The Wayne County Community College District (WCCCD) provides educational resources to the residents of Wayne County and to those of many other communities. The District has five campuses and one course site, the University Center located throughout Wayne County. Each campus is located near a major freeway. WCCCD serves 32 cities and townships. The District has more than 90 programs leading to either an associate degree or certificate in various disciplines.

From its beginning in 1967, WCCCD has viewed education as one of the most important factors for achieving success in today’s dynamic and technologically driven work environment.

The District provides a step-by-step approach to a career path by providing students with the ability to reach their career potential through an "open door" policy and affordable tuition. Because WCCCD is committed to “Make Education First,” every student has the chance to fulfill his or her educational goals.

This catalog is for informational use only and does not constitute a contract. Wayne County Community College District reserves the right to add or delete, without notice, any course offering or information contained in this catalog.

Note: The District reserves the right to assign instructional staff other than those listed in the "Academic Schedule of Classes" and to eliminate, cancel, phase out or reduce courses and programs for financial, curricular or programmatic reasons.

VISION STATEMENT

Wayne County Community College District’s vision is to be recognized as an institution that has achieved national and international recognition for enduring excellence as a comprehensive multi-campus community college district. WCCCD will focus on continuous self-evaluation and improvement, preparation of a highly skilled workforce in support of the Wayne County economy; student academic and career success; and leadership in strengthening the open door philosophy of educational opportunity.

MISSION STATEMENT

Wayne County Community College District's mission is to empower individuals, businesses, and communities to achieve their goals through excellent and accessible services, culturally diverse experiences, and globally competitive higher education and career advancement programs.

VALUES STATEMENT

- Supporting Excellence In Teaching and Learning
- Honoring Diversity
- Serving The Common Good
- Being Accountable
- Operating With Integrity

GENERAL EDUCATION

The foundation of the College’s degree programs is in general education and is described by the “Philosophy of General Education,” a broad statement of the knowledge, skills, and attitudes that students are expected to achieve and that have always been a part of the College’s programs of study. The “Philosophy of General Education” was adopted in principle by the college’s faculty at the Faculty Organization Day, held in March 1997 and reaffirmed by the Board of Trustees on November 24, 2009. It reflects the curricula describing the academic group requirements listed under the catalog descriptions of specific degrees. It also reflects the faculty’s belief that the values of general education are infused throughout the curricula and are often defined in practice by the discipline in which instruction and learning take place.
WAYNE COUNTY COMMUNITY COLLEGE DISTRICT'S 2009-2014 STRATEGIC GOALS

The District has established the strategic goals listed below for District-Wide development and improvement as outlined in the 2009-14 strategic plan. The theme of this strategic plan is Leading WCCCD to Enduring Excellence through a Focus on Student Success and District-Wide Effectiveness.

Goal #1 - ADVANCEMENT OF THE OPEN DOOR OF EDUCATIONAL OPPORTUNITY

Expand its Open Door model by focusing on student access, diversity, equity, multicultural experiences, campus inclusiveness, and community engagement.

Goal #2 - EXPANSION OF COMMUNITY ENGAGEMENT

Serve as an active educational resource for problem-solving and economic development efforts at the community and state levels, and will enhance its engagement in national and international educational initiatives.

Goal #3 - ADVANCEMENT OF INSTRUCTIONAL INNOVATION

Advance curricular, co-curricular, and teaching/learning innovations in response to the dynamic needs of a diverse student body and changes in community and workforce educational needs.

Goal #4 - STRENGTHENING OF PROCESSES TO SUPPORT EFFECTIVE STUDENT LEARNING

Strengthen the assessment of student learning outcomes by increasing faculty and staff participation in (1) ongoing assessment of student learning outcomes at the course, program, discipline, and District levels, (2) analysis of student learning outcomes data, and (3) bringing about improvements in curricula, teaching and learning, and institutional practices based on the assessment data.

Goal #5 - DEVELOPMENT OF INSTITUTIONAL RESOURCES

Increase its capacity to meet changing student, business, and community educational needs through the advancement and sustainability of its human, financial, physical, and technological resources.

Goal #6 - ENHANCEMENT OF DISTRICT-WIDE CONTINUOUS SELF-EVALUATION AND SELF-IMPROVEMENT

Continue to enhance the measurement of its effectiveness in serving students, regional employers, and communities, and will increase the use of measurement data to inform decisions on continuous institutional improvement.

Goal #7 - ADVANCEMENT OF OPERATIONAL AND MANAGEMENT EXCELLENCE

Advance the process of continuously improving operational systems in all divisions and campuses of the district.

A BRIEF HISTORY OF WAYNE COUNTY COMMUNITY COLLEGE DISTRICT

WCCCD has completed more than 42 years of uninterrupted operation committed to the development and delivery of comprehensive educational services. Those living and working in the 32 cities and townships served by the District throughout the southeast Michigan region have enjoyed the benefits of high quality instructional programs, continuing education offerings, and community-based services.

The story of Wayne County Community College District is one of continuing growth and innovation in providing educational training and leadership for the metropolitan region. The District was established in 1967 by the Legislature of the State of Michigan and its initial seven-member Board of Trustees was elected the following year. In 1984, the number of trustees increased to nine (9).

The first operating budget was based on a $1,000,000 grant from the State of Michigan, as well as, a $300,000 stipend from New Detroit, Inc. and anticipated student tuition payments at that time. The new institution had no buildings or facilities of its own, but with the cooperation of local school boards, faith-based organizations and non-profits, classrooms were made available throughout the County of Wayne.

In the summer of 1969, the Board of Trustees directed staff to plan and begin operations for the first fall semester. Instructors were hired, curricula designed and the “District without Walls” opened its doors with an overwhelming response by community members.

Presently, the District’s five state-of-the-art campuses and University Center are located in industrial, suburban and metropolitan areas where a major share of Michigan’s technical and skilled occupations are located. Because of the diversity of its service areas, WCCCD places a strong emphasis on occupational and career programs and traditional college and university transfer programs.
THE STUDENT BODY

The Wayne County Community College District practices an “open door” admission policy, and provides an educational experience to students who desire the opportunity. The District has a rich and diverse student population; approximately 70% are women and more than 50% are members of minority groups. While some 90% are Michigan residents, citizens from more than 30 countries are also enrolled in programs of study at the District. Nearly 70% of all WCCCD students attend part-time.

The student body is reflective of the diverse constituency served by the District. Approximately 70% of the student body receives financial aid or participates in work-study programs. Each semester, more than 300 veteran students also take advantage of the G.I. Bill.

Each year, the District graduates more than 1,000 students. While a majority of students are enrolled in two-year transfer programs, the District has expanded career/technical course offerings to meet the demands of new and emerging technologies. Currently one-third of the College’s enrollment is in career occupations. Many will continue their education at four-year institutions, while others focus on terminal degrees and professional certificates allowing entry into rewarding careers.

ALUMNI

Since its founding, graduates of the District have had a profound impact on the professional, political and economic development in Wayne County, the State of Michigan, the nation and world.

Our alumni hold positions as teachers, dentists, doctors, lawyers, entrepreneurs, journalists, nurses, corporate business professionals, law enforcement officers, administrators, elected officials and a variety of other positions in professional and technical areas. The District has graduated more than 30,000 students, and approximately 550,000 have furthered their careers or enriched their lives through continuing education programs offerings.

ENROLLMENT MANAGEMENT, STUDENT SERVICES AND ACADEMIC POLICIES

ADMISSIONS

Admission Procedures for New Students

Admission to Wayne County Community College District is “open door” and automatic for those who are 18 or older. Admission to specific programs is not automatic. New students are required to complete an Application for Admission and submit it to the Office of Admissions. Students are encouraged to apply for admission online at www.wcccd.edu. Those who have attended other post-secondary institutions should have all previous academic credentials (transcripts) forwarded to the District Records Office.

After completing an application and the COMPASS assessment, students will meet with an academic advisor to discuss their educational goals and select appropriate courses. Upon registration for any academic class students will automatically be provided with a WCCCD student e-mail account. Students can access their email by logging into their WebGate account at https://webgate.wcccd.edu and clicking on View Your WCCCD email Address under Main Menu. All official college communication to students will come through WCCCD student e-mail accounts. WCCCD students will be responsible for communications sent to this address by the District as we switch our student communication process from a paper system to e-mail. It is the student’s responsibility to frequently check both their email and WebGate accounts for important announcements and updates.

For those under 18 years of age, the possession of a high school diploma or approval of a parent or guardian is required to accompany the Application for Admission. Persons under age 16 must re-apply and be approved for each semester for which they intend to enroll regardless of previous enrollments. Applications for persons under the age of 16 are submitted to the District Office of Student Services, 801 W. Fort St., Detroit, MI 48226. These classes may be available at no cost to the high school student who qualifies under the State School Aid Act, PA.148, Section 216. Students should contact their high school principal or academic advisor.

Transfer Students

Students transferring to Wayne County Community College District from other colleges or universities who wish to have credit transferred to their WCCCD record should request the previous institution to forward official copies of their transcripts to the District Records Office. Generally, credit earned from regionally accredited institutions and from all publicly supported junior and community colleges is acceptable if earned with a grade of “C” or better and is appropriate to the student’s program of study. Transfer students are also encouraged to apply online at www.wcccd.edu. Students who have a bachelor’s or graduate degree are not required to take a placement test to enroll.

Former Students (Returning)

A returning student is an individual who has not attended the District for the last two years. All students in this category must complete an application for re-admission. All students re-admitted to the District after missing four or more regular semesters or two years will be responsible for the curricula and regulations published in the current catalog and other official publications which are in effect at the time of their re-admission.
**Program Admission**

Certain programs at the District have prerequisite courses and other criteria required for admission. In addition to meeting the official admissions/registration requirements, students are required to apply for official program admission to their program of study. Students must complete an official Program Admission Form that may be obtained from the Student Services Office, the Office of Admissions and Records or from the Campus Academic Officer. Program admission is required for technical degrees and certificate programs.

**PLEASE NOTE:** All students re-admitted to the District after missing two years will be responsible for the curricula and regulations published in the current Catalog and other official publications which are in effect at the time of their re-admission. In certain cases, dates of program admission may take precedence over dates of college admission for purpose of meeting program requirements for graduation.

**International Students**

Wayne County Community College District encourages applicants for admission from qualified persons around the world and values the diversity that international students bring to campus. A vibrant international student population translates to a stronger multicultural experience for all students.

The District is authorized under Federal law to enroll non-immigrant alien students on the “F-1” student visa. Wayne County Community College District follows requirements forth by the United States Department of Homeland Security. Each requirement must be satisfied before admission as an International Student is considered. International applicants should visit the website for application deadlines and a list of credentials needed for a complete application to be considered at: [www.wcccd.edu/students/inter_admission.htm](http://www.wcccd.edu/students/inter_admission.htm)

**Senior Citizens**

Citizens who are residents of the district and 60 years of age or older may enroll in academic classes at Wayne County Community College District tuition-free. Senior Citizen Tuition Waivers will be granted on a seat-availability basis in regularly scheduled academic classes. Continuing Education classes or classes leading to Continuing Education Certificates are not included in this tuition waiver. Although student activity fees shall be waived for senior citizens, they are responsible for all other fees such as the cost of books and class supplies. Senior citizen students are expected to adhere to the same academic standards, rules and regulations that are in place for other students. Proof of age and residency is required at the time of registration.

**Native American Students**

Free tuition is available to eligible Native American students. Students, however, are responsible for all fees, books and class supplies. Students claiming this exemption must present appropriate documentation at the time of enrollment. For more information visit the Office of Admissions & Records at your campus.

**Michigan Community College Virtual Learning Collaborative**

The Michigan Community College Virtual Learning Collaborative (MCCVLC) among Michigan’s community colleges. Wayne County Community College District is a member of the MCCVLC. The MCCVLC is designed to allow current Michigan community college students to take courses from other member colleges while still receiving support services and maintaining their academic record at the designated home college. For further information please visit [vcampus.mccvlc.org/](http://vcampus.mccvlc.org/).

**Student Assessment**

All first-time students with intent to pursue a degree or certificate must be assessed for skills in reading, writing, and mathematics prior to registering for classes. The assessment used is COMPASS and the process takes approximately two hours to complete. If a student has attended another college or university they may be exempt from assessment testing. Official transcripts must be submitted proving that certain courses in English, writing and mathematics have been completed.

The results of your assessment testing do not affect your admission to WCCCD. Students who meet the “open door” admission requirements are automatically admitted to the college. However, the results of your assessment testing will be used by the District to assure that you are placed in courses appropriate for your skill level, particularly in English and mathematics.

To arrange for the COMPASS assessment, contact the Student Services Office at the campus of your choice. Please plan to stay at least two hours for your testing session. It is suggested that you prepare for assessment prior to your test day. The Student Services Office can provide you with sample test questions and practice tests to help you prepare. Please bring a photo ID when testing. Students are encouraged to call the campus to confirm the testing schedule.

**Assessment Requirements and Institutional Priorities**

WCCCCD is committed to creating a holistic learner-centered environment in which students, faculty, and administrators collaborate to improve student learning. To that end, WCCCCD focuses on (1) assessing the degree to which students achieve their stated goals and learning outcomes for courses, programs, and disciplines and (2) sharing assessment results among students, faculty members, and administrators to inform decisions regarding the improvement of student learning, teaching, curricula, and institutional practices.

**English as a Second Language Testing (ESL)**

Once admitted to Wayne County Community College District, students with limited English proficiency will be assessed using the COMPASS Test. This service is limited only to students who have applied and been accepted by the College. Results from the Compass Test will be used by District staff to assist students with placement in courses that are appropriate to the student’s skill level.

**Program Testing**

The Office of Career Planning and Placement administers a number of assessment services for students, faculty, advisors and staff. Testing services include:

- Test of Essential Academic Skills (TEAS): administered for all students applying for admission to the Nursing program.
- Health Occupations Basic Entrance Test (HOBET): administered for the Allied Health programs. The results of this assessment are used depending on the program, and for admissions or advisory purposes. Testing registration packets for the TEAS and HOBET are available from the Student Services department on each campus.

**Online Orientation**

An online orientation is available at [www.wcccd.edu](http://www.wcccd.edu) and includes information about District policies, procedures, programs and services. It is interactive and recommended for both first-time college students and students new to the District.
Academic Advisement and Guidance Services

Each campus is staffed with advisors and support staff who provide advising services as an integral part of the instructional process. As well, advisors are available in many locations. In assisting students to achieve their academic goals, our advisors and other staff are committed to an effective entry-exit college experience. Services provided include:

- Educational guidance
- Academic advising
- College transfer information
- Scholarship information
- Personal/social/career advising

Jointly, advisement staff and the student may develop a plan which gives a student the opportunity to gain competencies in:

- Program selection
- Goal setting
- Career focus
- Stress management
- Time management

Financial Aid

Students must complete the Free Application for Federal Student Aid (FAFSA), online at www.fafsa.gov, each academic year to be considered for any type of Financial Aid.

Financial Aid is available to those who qualify. Students are encouraged to apply as early as January 2nd of each calendar year.

To receive Federal Student Aid funds, a student must be qualified to study at the postsecondary level. A student meets this requirement if they have a high school diploma; completed secondary level homeschooling in accordance with State laws; a General Education Development (GED) certificate; pass an independently administered test (ATB) approved by the U.S. Department of Education or satisfactorily complete six credits of college work that are applicable to a degree or certificate offered by WCCCD that are paid for with non-financial aid funds. Please visit the financial aid web site at www.wcccd.edu for additional information on eligibility.

Student financial aid funds are made available only for the purposes directly related to Wayne County Community College District’s educational expenses. The use of these funds for any other purposes may jeopardize your eligibility to continue to receive these benefits.

The District Financial Aid Office has the right to review, adjust or cancel the financial aid award at any time due to notification from the U.S. Department of Education, a change in the student’s FAFSA, financial, marital or academic status, or because of adjustments (changes) in federal or state regulations, funding or computational errors. Students may accept any number of awards or other financial assistance from public or private sources or both. However, the total assistance may not exceed the cost of attendance.

The terms and conditions for each type of financial assistance are available online by clicking on the Financial Aid tab on the District’s website at www.wcccd.edu. A student may decline all or any portion of a financial aid award in writing.

Financial Aid Satisfactory Academic Progress Policy

In order to receive Federal Financial Aid, regulations require that all students make continued progress in their educational program. This requirement is called Satisfactory Academic Progress and will be monitored by the District Financial Aid Office. In accordance with Federal Regulations the District Financial Aid Office’s policy will be to evaluate Satisfactory Academic Progress each academic term.

At each evaluation, a student’s progress will be measured on the following elements:

Qualitative Requirement

Cumulative GPA Requirements:

- Credit Hours Attempted
- Required Cumulative GPA

1-15 1.6 or greater
16-30 1.8 or greater
31 or more 2.0 or greater

Quantitative Requirements

Maximum Timeframe:

Students must complete an undergraduate or eligible certificate program of study within 150% of the published credit hours required to complete the program. If the program requires 60 credit hours for completion, the maximum time frame is 90. If the program requires 44 credit hours, the maximum time frame is 66 credit hours.

Pace of Progression:

Students should earn at least 67% of the credit hours attempted. If a student earns 67% of all credit hours attempted, the student should complete the program within the maximum time frame. The pace that a student completes their program is calculated by dividing the cumulative hours the student successfully completed by the cumulative hours they attempted.

Additionally, transfer credit hours from another school, as well as repeated and developmental classes, are counted as credit hours attempted and completed. Withdrawal grades and incomplete grades are counted as credit hours attempted. Students seeking a second Associates Degree who are not meeting the quantitative standard, and want to be considered for financial aid eligibility, will need to submit a Satisfactory Academic Progress (SAP) appeal.

SAP Evaluation

The first semester a student fails to meet SAP, the student is notified and placed on a warning status. Students with this status are encouraged to quickly re-evaluate their academic progress and seek academic support to improve their results. Students who have been placed on a warning status and fail to meet SAP standards at the end of the warning semester will be disqualified for financial aid.

Appeal Process

Students who have been disqualified for financial aid are ineligible to receive financial aid and will not be admitted to the following, or future semesters. Students that were impacted by significant circumstances that caused them to be unable to meet satisfactory academic progress standards which resulted in their disqualification may file an appeal with the SAP Committee for reconsideration for approval and reinstatement of aid eligibility. The SAP Committee considers the student’s written appeal, supporting documentation, and federal regulations when making their decision.
The Department of Veteran Affairs requires that all recipients of veteran educational benefits make progress toward their stated academic degree. Therefore, all veterans receiving benefits must maintain an accumulated grade point average (GPA) of 2.0 to remain eligible for Veterans Administration benefits. A veteran who allows his or her accumulated GPA to fall below 2.0 will be placed on probation. A veteran will be allowed two semesters to bring his or her accumulated GPA to 2.0 or higher. If the veteran fails to do so, the Department of Veterans Affairs will be notified of his or her unsatisfactory progress.

A signed statement acknowledging these requirements will be required from each veteran student at the beginning of each enrollment period.

Regaining Eligibility

Students who lose their financial aid eligibility because they fail to meet satisfactory academic progress will regain eligibility when it is determined that they are again meeting both the qualitative and quantitative standards. They are responsible for the payment of tuition and fees until financial aid eligibility is regained. When satisfactory academic progress standards are met, eligibility is regained for subsequent terms of enrollment.

Veteran Affairs

The Veteran Affairs office is located in the District Records Office, 801 W. Fort, Detroit, MI 48226 or www.wcccd.edu.

The main purpose of Veteran Affairs is to certify enrollment of those veterans and dependents that are using their educational benefits. The staff is a liaison between the Department of Veterans Affairs and Wayne County Community College District. The staff assists the veteran in filling out forms, explaining the various degree programs the District has to offer and directing the student to the various academic departments for advising and ongoing support services.

The Department of Veteran Affairs requires that all recipients of veteran educational benefits make progress toward their stated academic degree. Therefore, all veterans receiving benefits must maintain an accumulated grade point average (GPA) of 2.0 to remain eligible for Veterans Administration benefits. A veteran who allows his or her accumulated GPA to fall below 2.0 will be placed on probation. A veteran will be allowed two semesters to bring his or her accumulated GPA to 2.0 or higher. If the veteran fails to do so, the Department of Veterans Affairs will be notified of his or her unsatisfactory progress.

A signed statement acknowledging these requirements will be required from each veteran student at the beginning of each enrollment period.

Registration

There are specific registration procedures for new students, former students and for students who are currently enrolled. A detailed description of the enrollment and registration procedures is published in the Schedule of Classes which is available at www.wcccd.edu and at all WCCCD locations prior to each registration period.

Residency

Students residing within the District service area at the time of registration will be charged resident tuition rates. The District is defined as all of Wayne County with the exception of the following cities and townships: Dearborn, part of Dearborn Heights, Garden City, Highland Park, Livonia, Northville, Plymouth and part of Canton Township. Residency can be verified by voter registration card, driver’s license, tax or rent receipts, or state identification card.

Special Residency

Children of deceased, 100% disabled, or missing Michigan veterans, between the ages of 16 and 22 and who are state resident for 12 months, per the State of Michigan statutes, may receive free tuition and fees for 36 months at State-supported colleges.

Change of Name or Address

A student who changes his or her name or address at any time after registration must immediately report such a change to the Office of Admissions and complete a change of data form. A veteran who changes address after certification must also report such a change to the District Student Services Division.

Deferred Tuition Plan

A minimum payment of 65% of all tuition and fees must be paid at the time of registration.

Outstanding Balances

Outstanding balances that are not paid in full on or before the published due date will be placed on Financial Hold and charged a default fee. All student accounts remaining delinquent at the end of the semester (please refer to the District calendar for specific date) will be charged an additional semester delinquency fee. All refunds will be applied to the student’s account. Students who cancel or withdraw from classes after all refund periods have ended will be charged prior to receiving a refund.

*Refer to the current Academic Schedule for fees.

Payment by Check

Personal checks must be drawn on a bank in Michigan and must have a preprinted name and account number on them. If the writer of the check is a person other than the student, the student must present the writer’s ID. The student must have adequate picture identification and endorse the check. Any one of the following identification is accepted: driver’s license, military service ID, picture charge cards, employment picture ID card, state picture ID card or passport.

Payment of Tuition and Fees

All tuition, fees and deposits are due at the time of registration. Students that choose the deferred tuition payment plan must pay a minimum of 65% of total tuition and fee(s) for the current term. Payments may be made by money order, check, debit card, Visa, MasterCard, Discover Card, American Express or ATM debit card.

*Refer to the current Academic Schedule for fees.

Wayne County Community District reserves the right to cancel the registration of any student who does not make required tuition and fees payment within the specified timeframe.
RETURNED CHECK POLICY (cont.)

ALL CHECKS WRITTEN TO THE DISTRICT ARE VERIFIED BY AN EXTERNAL CHECK GUARANTEE AGENCY. ALL RETURNED CHECKS ARE SUBJECT TO THE AGENCY’S COLLECTION FEES.

STOP PAYMENT OF CHECK DOES NOT INITIATE CANCELLATION OF CLASSES. YOU MUST OFFICIALLY WITHDRAW FROM YOUR CLASSES BY COMPLETING AN ADD/DROP FORM.

Important Registration Information

You are officially registered when the registration staff enters your courses into the registration system or once you click the “submit” button for those registering online. You are responsible for all tuition and fees incurred including the non-refundable registration fee. You must officially withdraw from your class(es) within the refund period to be eligible for any refund. The unpaid balance of tuition and fees is still due when you drop a course after the refund period ends. Therefore, any course dropped after the 50% refund period must be paid for in full.

Disclaimer

The schedule of classes is for information only and does not constitute a contract. The District reserves the right to change, modify or alter the system or once you click the “submit” button for those registering online. You are responsible for all tuition and fees incurred including the non-refundable registration fee. You must officially withdraw from your class(es) within the refund period to be eligible for any refund. The unpaid balance of tuition and fees is still due when you drop a course after the refund period ends. Therefore, any course dropped after the 50% refund period must be paid for in full.

Adding or Dropping Classes

Students may add or drop classes through the registration period. Please consult the current Schedule of Classes for applicable add/drop dates. Students desiring to add/drop classes may do so online through Webgate or complete and process the appropriate form in the office of records/registration at the campus of their choice. Classes dropped after the refund period will be reflected as a “W” grade on the student transcript.

WITHDRAWING FROM CLASSES

Officially withdrawing from classes may entitle students to full or partial refunds. For more information, refer to the current Academic Schedule book.

Refunds

Classes cancelled by the District will result in a 100% refund. The District reserves the right to cancel classes. The District will attempt to notify students whose classes are cancelled. Students who do not wish to substitute another course, a refund is automatic and there is no need to process a drop/add form. The refund will be mailed to the student approximately 3-5 weeks after the first day of the semester. THERE IS NO REFUND FOR HEALTH REASONS. Classes dropped by the student after the refund deadlines will result in “NO REFUND.”

Auditing Classes

Students desiring to audit courses for no credit must indicate “audit” on the Registration Form for the appropriate classes prior to registering. Students auditing courses pay regular tuition and fees. Credit is not given for an audited course, nor may a change to credit status be made after the student has registered to audit a course. Students who desire to change from credit status to audit status in a course must do so before the class begins. The course is included on the official transcript as an audit and denoted by the letter V.

Repeating Courses

Students may not repeat for credit any course for which they have earned a “C” or better. Exceptions may be made in special circumstances at the discretion of the Vice-Chancellor or his/her designee.

Military Refund Policy

A student belonging to the Armed Forces or the Michigan National Guard who is called to active duty will be allowed to withdraw from classes without penalty and receive a 100% refund of the student’s tuition and fees provided the student has not completed the course(s) for which the student is seeking a refund.

Military Refund Policy

A student belonging to the Armed Forces or the Michigan National Guard who is called to active duty will be allowed to withdraw from classes without penalty and receive a 100% refund of the student’s tuition and fees provided the student has not completed the course(s) for which the student is seeking a refund.

Career Planning and Placement

The Career Planning and Placement Office offers students and graduates an opportunity to explore employment opportunities in conjunction with their educational and personal goals. Professional staff is available at each campus to provide a variety of employment related services.

Students and graduates may explore career options using such resources as the Michigan Occupational Information System (MOIS), a statewide information system which provides detailed occupational information and related education and training data. Students and graduates receive assistance in preparing resumes, cover letters, and improving their interviewing skills through the use of employability development software programs located at Campus Career Planning and Placement Offices. Referrals are made to testing and counseling services where students can receive assistance in identifying interests, aptitudes, and abilities; relating to career choices. As a member of the Community College District Employment Network, each campus has access to a computerized job sharing, job posting, and record keeping system. WCCCD subscribes to a leading recruitment website, College Central Network. Through this site, students can view jobs posted locally and nationally, and also post, update and forward their resume.

Student Activities

The Office of Student Activities coordinates a variety of programs and services intended to enhance the educational purpose and philosophy of the District. Formal education is only one facet of a student’s total educational experience while attending Wayne County Community College District. With this in mind, participation in student activities encourages and challenges students to get involved in other facets of the District community by planning or participating in student organizations and activities. The educational opportunities, development of leadership, social and interpersonal skills, personal satisfaction and enjoyment gained from participating in student activities will make the personal investment well worth the effort.

Each campus has student activities. Activities include recreational, social, and family activities. This may include guest speakers and special events. Phi Theta Kappa is the District’s student honor society. Student activities at WCCCD are student driven. For information about specific student organizations and activities, contact the administrative office at the WCCCD location of your choice.

It is the students’ responsibility to provide individual liability, health and accident insurance coverage. The District accepts no responsibility for insurance coverage for participation in any student activity.
Student Executive Council
The Student Executive Council is a governing body of students who represent the interests of the student body. As the official "student voice" the Wayne County Community College District Student Executive Council is the liaison between the student population, faculty, and administration to promote the rights, education, and general welfare of all students at the college. The Student Executive Council consists of five students each appointed by a Campus President/Provost to serve a term of one academic year.

Academic Honesty
The expectation at Wayne County Community College District is that the principles of truth and honesty will be practiced in all academic matters. Therefore, acts of academic dishonesty, including such activities as plagiarism or cheating, are regarded by the District as very serious offenses. In the event that cheating, plagiarism or other forms of academic dishonesty on the part of students are discovered, each incident will be handled on an individual basis as deemed appropriate by the instructor.

Care should be taken that students' rights are not violated and that punitive measures are instituted only in cases where documentation of violations exists. A description of all such incidents handled on an individual basis as deemed appropriate by the instructor.

Final Examinations
Final examinations are held regularly at the end of each semester or session. Students are required to take the final examination at the time and place scheduled in order to receive credit for the course, unless otherwise indicated by the instructor.

Grading System
The following is the grading system used at Wayne County Community College District. All courses in which the student enrolls and earns grades are recorded on the official transcript. Grade points are used to measure a student's academic achievement for the total number of credit hours attempted. Final course grades are accessible online by the third business day following the end of the semester through Webgate. Students must make sure that their grades are recorded on the official transcript.

Class Attendance
Students are expected to attend all class sessions. When absence from class is unavoidable, it is the student's responsibility to make arrangements for make-up work, and to determine if announcements relevant to the course were missed during the absence. Make-up work is permitted at the instructor's discretion. Excessive absence may result in failure.

Students may not bring children to class or leave them unattended at the campus.

PLEASE NOTE: Class attendance can only be monitored and verified by the instructor.

Grade Point Average (GPA)
The grade point average is calculated by multiplying the grade points by credit hours attempted. The cumulative grade point average is the total number of grade points earned divided by the total number of credit hours attempted. Attempted credit hours include "E" grades, even though grade points are not earned. THE HIGHEST GRADE IS USED TO CALCULATE GRADE POINTS FOR ANY REPEATED CLASS.

Example:

\[
\text{C} = 2 \times 3 \text{ credits} = 6 \text{ grade points} \\
\text{Biology} = 3 \times 4 \text{ credits} = 12 \text{ grade points} \\
\text{E} = 0 \times 3 \text{ credits} = 0 \text{ grade points} \\
\text{Political Science} = 4 \times 3 \text{ credits} = 12 \text{ grade points} \\
\]

To calculate the grade point average:

\[
\text{Equation} = \frac{\text{total number of grade points earned}}{\text{total number of credit hours attempted}}
\]

\[
\text{Example:} \quad \frac{6 + 12 + 0 + 12}{9} = 2.31 \text{ GPA}
\]

Note **While NEITHER GRADES W, XW, W ARE CALCULATED AS PART OF THE OFFICIAL GRADE POINT AVERAGE, they are counted in determining satisfactory progress for students receiving financial aid and continuing eligibility.**

Grades are added to the official transcript at the end of the semester or session. A grade may not be changed unless an error was made in recording the grade, the grade points were inaccurately multiplied by the credit hours, or the grade was not recorded on the official transcript. The grade point average is calculated by multiplying the grade points by credit hours attempted. The highest grade is used to calculate grade points for any repeated class. The grade point average is calculated by dividing the total number of grade points earned by the total number of credit hours attempted. The grade point average is used to determine satisfactory progress for students receiving financial aid and continuing eligibility. The grade point average is calculated by dividing the total number of grade points earned by the total number of credit hours attempted.
Standards of Academic Progress

The Board of Trustees of Wayne County Community College District hereby authorizes the Chancellor to develop and promulgate standards for admission to and satisfactory progress in academic programs which vary from the general admissions and progress standards now in force. The Chancellor shall ensure that any such standards are appropriately published and communicated to students affected. In addition, the administration shall clarify to students that the General Standards for Admission and Satisfactory Progress already in force shall be applicable to all students unless separate standards have been promulgated for specific academic programs.

It is hereby policy that requirements for graduation include a cumulative GPA of 2.0 or higher. No degree will be granted to any student who has less than a 2.0 cumulative GPA.

The District maintains that all students should make continued progress toward an educational goal. In an effort to assist students, the following standards of academic progress have been established:

- **Good Standing**: A student maintaining a 2.0 or above cumulative GPA.
- **Total credits utilized in computing the cumulative GPA will not include**:
  - Credit for classes which have been repeated. The lower grade will not be used in determining the GPA
  - Classes with a grade of CR, CRE or V and withdrawals (WI, W, WX).
- **Probationary Status**: A student who has a cumulative GPA below 2.0 is placed on probationary status. A student is notified of probationary status on the semester grade report. When a student is placed on probation, the following steps must be followed:
  - The student will be assigned an academic advisor for prescriptive assessments and the determination of the appropriate courses to pursue in the future. Note: It will be the student’s responsibility to contact the advisor to schedule an appointment
  - A probationary student may not elect more than nine (9) credit hours for the fall/spring semesters; six (6) credit hours in the summer unless that student has the written authorization of the advisor.
  - The student must schedule regular meetings with an academic advisor during the academic probationary period.
  - Continued Probationary Status: A student is placed on continued probationary status when the student’s GPA for a semester is 2.0 but the cumulative GPA remains below 2.0.
  - Exclusion: If a student maintains a cumulative GPA of less than 2.0 for three consecutive semesters, the student may be excluded from future enrollment at the District for one semester. Re-entry is not automatic. A student may apply for re-entry through a campus Office of Admissions.

Student Complaints

Students who have a complaint concerning a course, an instructor or other staff should discuss the problem with the instructor or staff person first. If the student is still dissatisfied after this discussion, student should complete a formal, written inquiry/complaint form, available in the student services office at the campus of choice. Refer to the Student Code of Conduct in the WCCCCD Student Handbook.

Credit for Pre-College Learning

Wayne County Community College District recognizes that many of our students come to us with a wealth of learning which was achieved through experiences outside a college classroom. The District sponsors several programs which are directed toward helping students convert those learning experiences into college credit that may be applied toward a certificate or degree. These include the Articulation Program, Credit by Examination, the College Level Examination, Credit for Experiential Learning and Credit for Specialized Experience. Contact the Campus Admissions Office.

Articulation Programs

High Schools

High School articulation agreements are cooperatively planned and operated by the District and several secondary schools. Students who graduate from a participating school’s career and technical preparation program may be eligible to receive college credit for competencies successfully completed in high school.

Colleges/Universities

The purpose of college/university articulation agreements is to allow students to complete an associate degree program, or in some cases, a certificate program, and transfer to a related bachelor’s degree program with minimum loss of credit and duplication of coursework. Every articulation agreement describes the specific courses to be taken at WCCCD in order to complete the associate degree at WCCCD and successfully matriculate into a four year college or university program of study.

Credit by Examination

Upon the recommendation of the Chief Academic Officer, credit may be earned for some courses in the current catalog through special examination. Credit earned in this manner will satisfy degree and certificate requirements. An academic officer can provide students with the direction and the forms necessary to apply for credit by examination.

College Level Examination Program (CLEP)

The CLEP test is based on the premise that individuals acquire knowledge informally throughout their lives. The test allows them to convert this knowledge into college credit. This opportunity may be particularly useful to the occupational career student, adult student, and the student who did not graduate from high school but who has acquired some special expertise.

There are two types of CLEP tests available: the General Examinations, which measure knowledge in basic liberal arts areas (English composition, humanities, mathematics, and social science/history), and the Subject Examinations, which measure achievement in 37 specific course college courses. When prior college credit has been earned on a formal basis in the subject area, no CLEP credit will be allowed. Credit is granted for tests with scores which rank at the 50th percentile or higher based on sophomore norms presented in tables of percentile ranks provided by the College Entrance Examination Board, which developed and standardized the CLEP test.

A maximum of one year of credit (30) credit hours may be allowed for pre-college learning. This credit will apply toward WCCCD degrees and certificates. Most examinations are given once each month and may be taken by WCCCD.
CLEP (continued)

students at the Counseling and Testing Bureau of Wayne State University. Descriptive brochures and applications are available at Wayne State University, 5050 Cass Avenue, Detroit, Michigan 48202.

Credit for Experiential Learning

If you wish to receive credit for learning you have achieved through experience but do not wish to use the CLEP or Credit by Examination programs, you may take advantage of our experiential learning program. To do this, you prepare a portfolio which includes the following information:

1. Courses for which you want to receive credit
2. Learning goals that you have achieved
3. Documentation of the achievement of the learning goals

This portfolio is then reviewed by faculty to determine if credit may be awarded. Several things about experiential learning are important to understand as students consider using this opportunity to earn credit. First, credit is granted for learning achieved from experience, not for the experience itself. In developing the portfolio, students will need to demonstrate that their experiences have helped them gain both theoretical and practical knowledge at the same level as they would have achieved by taking the course. Second, the process of developing a successful portfolio is as time consuming as the course itself. Therefore, we recommend that students consider this option only if they wish to receive credit for a group of courses. Credit for a single course is earned more efficiently through credit by examination or the CLEP program.

The fee for this service is an amount equal to half the normal tuition for the courses in addition to a fee* for processing. The Campus Chief Academic Officer can provide students with the directions and the forms necessary to receive credit for experiential learning.

Credit for Specialized Experience

Wayne County Community College District will grant four credit hours of credit, without fee payment, for Fire Academy, Police Academy, military, conscientious objector, Peace Corps, or Volunteers in Service to America (VISTA) service and experience, subject to the following stipulations:

1. Credit will be granted only for one of these training or service experiences.
2. Credit for military service will be granted only for active duty service of one year or more.
3. Credit for Fire and Police Academy experience will be granted only after completion of academy training, and one year of active duty with a public fire protection or law enforcement agency.
4. Credit for Peace Corps and VISTA experience will be granted only after completion of the appropriate tour of duty.
5. Credit for conscientious objector service will be granted only for those objectors who rendered service to the community as a result of their legally determined conscientious objector status.
6. This credit will not satisfy any part of the 15 credits at WCCCD required for graduation.
7. This credit is general elective credit and does not apply toward the fulfillment of any general education requirement for a degree.
8. This credit will be recorded on the student’s academic record, without grade, as follows:
   Virtual Emergency Medical Training experience.
   • Peace Corps Experience
   • VISTA Experience

9. To obtain this credit, students must meet the following criteria:
   a. Be currently registered or have earned credit for at least one WCCCD credited course
   b. Present official certificates to the Registrar attesting to the Fire Academy training (diploma or other official verification); military service (DD 214 preferred); or Peace Corps, VISTA, Police Academy, or Emergency Medical Training experience. Contact 313-496-2862 for further information.

Transfer College Information

Planning for Transfer

Many students attending WCCCD are beginning a journey toward a bachelor’s degree program, taking their freshman and sophomore requirements here while planning to transfer to a senior college or university. Many students will choose to obtain an associate degree prior to transfer to their chosen senior institution.

Getting an associate degree is encouraged because it equips students with a marketable degree should interruptions occur in completing a bachelor’s degree.

Some tips that will ensure that you make an easy transition from the community college to the university setting include:
• Begin planning early – meet with a WCCCD advisor to explore senior colleges and universities.
• Once you have selected a transfer institution, make contact with an advisor at that school as well.
• Make certain you understand the freshman and sophomore level requirements of your chosen university.
• If you are uncertain about where to attend upon completing your program at WCCCD, explore college web sites, write for information about programs you are interested in, and/or plan a trip to one or more colleges to become familiar with their environment, faculty and programs.
• WCCCD hosts “College Night” programs where representatives from senior colleges and universities will be on-site to speak with students. Plan to attend one of these events.

Transfer Support

The Office of Student Services on each campus can provide information about which WCCCD courses will transfer to universities in the area. It is the student’s responsibility to consult an academic advisor to plan a program of study based on the specific university and appropriate academic major. Academic advisors can help students select the right courses for transferring to a four-year institution or college.

MACRAO Transfer Student Agreement

Wayne County Community College District is a member of the Michigan Association of College Registrars and Admission Officers (MACRAO). Members of this association represent both two- and four-year colleges who have worked together to formulate a transfer student agreement.

The MACRAO transfer student agreement ensures that a student who completes the MACRAO Common Core courses at a participating two-year college will have satisfied general education requirements at the participating four-year college. The MACRAO Common Core of general courses includes the following:
• English Composition (6 credit hours).
• Natural Science/Mathematics (8 credit hours). (Courses must be from a minimum of two subject areas. At least one science course must include a laboratory.)
• Social Science (6 credit hours). (Courses must be from a minimum of two academic disciplines.)
• Humanities (8 credit hours). (Courses must be from a minimum of two academic disciplines.)
WAYNE COUNTY COMMUNITY COLLEGE DISTRICT

MACRAO TRANSFER STUDENT AGREEMENT (cont.)

The inclusion of specific courses within a given category is determined by WCCCD. In general, technical, vocational, development and enrichment courses will not be included in the MACRAO Common Core. Special circumstances may allow for select vocational course acceptance if agreed to by a participating four-year college.

It is important for students wishing to take advantage of this agreement to work closely with an advisor at any WCCCD campus to insure that the courses they select fulfill the WCCCD general education requirements and are eligible for the MACRAO agreement.

• WCCCD, upon student request, will evaluate a student’s transcript for completion of the MACRAO Transfer Agreement. A “MACRAO Transfer Agreement Satisfied” endorsement will be placed on the student’s transcript if the MACRAO Common Core has been fulfilled.
• The four-year college will determine the transferability, equivalency, and applicability of the MACRAO Common Core courses in meeting additional baccalaureate requirements. No additional General Education Common Core courses will be required by the four-year college of any student who completes the associate of arts (A.A.) or associate of science (A.S.) degree.

Waiver of Program Requirements

When a student is preparing to register for the final semester of his or her program or degree and unable to complete the requirements because a course (1) has not been offered recently at any campus, and (2) is not offered for the upcoming semester or has been cancelled due to lack of enrollment, the student may petition the District to have the required course waived and a related course substituted. No course will be waived without the substitution of another course.

Petitions for a waiver of course requirement must be submitted within the first two weeks of the enrollment period for the semester in which the waiver is to apply, except in the case of cancelled classes. Students should go to the Campus Chief Academic Officer to initiate a petition to waive program requirements. Some program requirements are absolute and cannot be waived. Nothing in this policy shall be construed to create an obligation on the part of the District to waive any program requirements.

Campus Presidents Honor List

Students completing 12 or more credits during the fall or spring semesters with a minimum grade point average of 3.5 are eligible to be recognized by the President of their respective campus.

Graduation with Honors

Students who complete degree requirements with exceptionally high scholastic averages are eligible to receive degrees with honors. Those who have earned the following grade point averages are eligible to be graduated:

• 3.75-4.00 summa cum laude
• 3.50-3.74 magna cum laude
• 3.25-3.49 cum laude

In computing the grade point average, all courses taken (with the exception of developmental educational courses) at Wayne County Community College District are considered.

Graduation

Students must adhere to the following graduation requirements:

1. Be officially admitted to the program or declare their major within the first 12 credit hours of coursework at the District.

Prior to the semester in which the students intend to graduate, they must:

2. Obtain and complete an application for graduation.
3. Submit the completed form to the appropriate advisor or program director for review.
4. Complete exit counseling at www.nslds.ed.gov (only for student loan recipients)

Students are expected to follow the program outlined in the catalog in effect at the time of admission to the college. After an enrollment break of two or more years, students must follow the program requirements of the catalog at the time of re-enrollment.
ACADEMIC SUPPORT AND DEGREE REQUIREMENTS

PLANNING YOUR PROGRAM OF STUDY

The most important thing to do to ensure your success at WCCCD is to carefully plan your progress through your program of study, whether that is several specific courses or an entire certificate or degree. This plan should include consideration of family or job commitments, as well as the college’s requirements and course offerings.

Student services staff are available on all campuses Monday through Friday, both day and evening, to help you in planning your program of study. In addition, faculty members, campus academic staff, and student services staff are available to assist you in making sound academic decisions in your program of study.

These individuals are valuable resources and you should consult them any time you have a question. Students are encouraged to meet with an advisor each semester prior to registering.

CLASS SCHEDULING

The District strives to meet the scheduling needs of all students, whether they choose to study full-time, part-time, or less than part-time. Since earning a degree requires at least 60 academic credits, the length of time it takes to complete a degree depends on the number of credits a student successfully completes each semester.

Most WCCCD courses are three academic credits and require three hours of class time per week. Some courses require more academic credits and longer hours for laboratory and/or practicum assignments. Generally, classes are in session 15 weeks for the fall and spring terms, and 12 or 7.5 weeks for summer terms. Fast-Track and other academic sessions may vary in duration.

ACADEMIC SUPPORT SERVICES

Students are encouraged to meet regularly with their student services staff or advisors when entering WCCCD and throughout their stay at the District for assistance in educational planning and self-development. Advisors and other staff are available to assist students with educational, vocational, and personal concerns. Individual and group experiences are available through a variety of District resources for students who wish to increase their effectiveness as learners and to improve their social skills.

LEARNING CENTERS

The District provides supportive services through its Learning Centers located at each campus. The centers provide academic skill building for individuals and groups. Each Learning Center houses a wide range of equipment and materials to address various levels of learning difficulties. Students can access learning assistance technologies to support academic success.

FULL-TIME STUDY

Full-time study is 12 or more academic credit hours. To be successful, students are required to spend additional time each week (outside of class) in study and preparation.

PART-TIME STUDY

Part-time study is defined as 6-11 credit hours of study. Less than six (6) credit hours is not considered part-time. To be successful, students are required to spend additional time each week (outside of class) in study and preparation.

DEVELOPMENTAL EDUCATION

Developmental education coursework is designed to build upon existing skills in order to facilitate student success in the core curriculum at Wayne County Community College District. Developmental education courses are offered in writing, reading, and mathematics for students needing review in these areas. The courses emphasize individual attention, personalized teaching, and learning in small support groups. Each course carries full college credit at WCCCD. Developmental education courses are not transferable to four-year institutions for academic credit. The Developmental Education courses that are offered are as follows:

- ENG 111 Introduction to Reading Skills
- ENG 112 Career and Technical Reading I
- ENG 113 Career and Technical Reading II
- ENG 114 Career and Technical Writing I
- ENG 115 Career and Technical Writing II
- MAT 100 Basic Mathematics
- MAT 105 Pre Algebra
- MAT 112 Elementary Algebra
- MAT 113 Intermediate Algebra

LEARNING RESOURCE CENTERS

Learning Resource Centers (LRC) are located at all campuses. Services in each of our Learning Resource Centers include: computers and photocopiers/printers, course reserves, interlibrary loan, reference services, virtual chat reference help, access to an Online Public Access Catalog (OPAC), and circulation services for students, faculty, and staff. Students, faculty, and staff have access to library resources in electronic and hardcopy formats that were selected to support study, research and recreational reading. The general and reference collections are arranged by Library of Congress call numbers. The LRC’s also maintain a collection of scholarly journals, newspapers, and popular magazines. Other resources include multi-media equipment,
LEARNING RESOURCE CENTERS (cont.)

instructional videos, collection of e-books and access to the Library databases.

WCCCD is a member of the Detroit Area Library Network (DALNET), a multitype library and information network servicing the seven counties in the Southeast Michigan/Detroit Metropolitan area. The current DALNET members, along with WCCCD, are:

- Adam Cardinal Maida Alumni Library
- Arab American National Museum
- Beaumont Hospitals

DALNET provides links to the information gateway, which include: access to DALNET member library catalogs, Digital Projects, access to health Information links, reciprocal borrowing agreements, access to research links, and DALNET news. DALNET also provides WCCCD libraries with access to a fully integrated library management system that is used to automate and manage library operations.

The WCCCD LRC web pages provide current information about the Learning Resource Centers. The web pages provide access to the library catalog; articles and databases including WCCCD licensed Full Text article databases; internet search links to search engines, internet guides, and links to online help with APA and MLA style; frequently asked questions; and library services for faculty, students, staff and community. WCCCD students, faculty and staff can search these resources from any college network-connected PC or remotely from home or any off campus location. WCCCD instructors may schedule Bibliographic Instruction Sessions, class assignments and instruction in the use of equipment with campus LRC Coordinators for their classes.

Students must have the WCCCD Student One Card (which is also the library card) to use printing machines and access other LRC resources and services. Community members may purchase a cash card for printing in the LRC’s.

Contact Information for the LRC’s are as follows:

- Downriver LRC
  - John Dingell Library 734-374-3228
- Downtown LRC
  - Arthur Cartwright Library 313-496-2358

CONTINUING EDUCATION

The School of Continuing Education provides the District with quality services that foster personal enrichment and professional development for individuals and the community to upgrade skills thereby increasing competitiveness. Courses and workshops are offered to assist professionals in maintaining the mandatory continuing education requirements for certification and licensure. Programs are offered to enrich the intellectual, physical, and emotional aspects of an individual regardless of age. The District is committed to the design and delivery of innovative programs and courses that address the diverse needs of business and the community and contribute to the economic development of Wayne County. District goals are achieved through the successful delivery of non-credit programs for special target populations.

The Career and Professional Training component is comprised of the School of Continuing Education professional development programs. These programs offer diversified, short-term skills training programs designed to provide individuals with the skills necessary for employment, skills upgrade, career advancement, certification/re-certification, and licensure. Some of the occupational-based programs include:

- Advanced computer technology
- Customer service training
- Government regulations
- Innovative training solutions
- Leadership development
- Measurable training results
- Performance improvement
- Safety and health training

Personnel enrolling in Personal Enrichment and Leisure programs offered through the School of Continuing Education are able to enjoy a variety of programs intended for their personal growth and development, and/or the attainment of personal goals, i.e.: fitness and yoga courses, computer training, photography, gardening, cooking, and music and dance.

The School of Continuing Education also provides children and youth with the opportunity to enroll in programs designed to assist them with the extra motivation necessary to do well in school, while creating a foundation for continuous life-skills building. Parents may enroll children in courses to strengthen academic and test-taking skills, nurture interests in dance, music, science, mathematics and art, discover new recreational skills or enhance existing ones.

Community members and organizations enroll in Continuing Education special guest lectures, seminars and workshops intended to address a specific need or topics of interest. Certain programs provide the flexibility of distance learning; allowing program participation online.

CORPORATE COLLEGE

The Corporate College provides customized training that assures the maximum outcome for a high-skilled and high-demand workforce. This service helps to energize business, industry, and professional corporations/organizations in today’s economic market.

Services are tailored to include the following:

- E-Learning and interactive classes
- Formatative and summative evaluation
- Needs assessment and analysis
- Onsite training and support services
- Program and course design and delivery

The Corporate College provides affordable customized occupational training as well as educational and learning opportunities that meet individualized requirements of employers in a globalized marketplace. Management/leadership training, team building, process improvement, and front-end analysis programs are detailed specific to meet the needs of business and industry.
**CENTER FOR DISTANCE EDUCATION**

The District’s distance learning offerings are designed to provide students with greater access to the District’s programs and are available to all students. Distance learning opportunities are available through online courses, ITV course offerings and Live-Interactive online courses.

**Online Courses:** These courses enable students to earn course credit through Internet connections. Students must have access to a computer with an Internet connection and relevant computer peripherals. A majority of online course work occurs in a virtual environment that is accessible 24 hours a day, seven days a week. Most online courses are 100% online. However, some courses require periodic face-to-face sessions.

**Interactive Television (ITV):** ITV courses are offered in specially-equipped classrooms which are linked by two-way audio/two-way video conferencing technology to other campuses. This initiative links the campuses such as Downtown, Downriver, Eastern, Northwest, and Western to each other live. ITV makes it possible for students to participate in the same course simultaneously. This technology allows students and faculty to interact between the campuses and allows them to see and hear each other live. ITV allows students and faculty to interact between the campuses and allows them to see and hear each other live. ITV allows students to participate in courses that were limited to face-to-face sessions.

**Live-Interactive Online (LIO):** This technology allows students to access their course from any location with access to the Internet. Students need a computer with an Internet connection and relevant computer peripherals. An instructor sends text, graphics, and audio to students’ computers simultaneously for interactive learning experiences. Whether working from home, work, or on-campus, all of the LIO students have the ability to ask “live” questions of the instructor and fellow students.

For more information concerning any of the District’s distance learning opportunities, please contact The Center for Distance Education at distancelearning@wcccd.edu.

**CATALOG-IN-FORCE**

Each student’s catalog-in-force for degree or certificate requirements is the College Catalog which is in effect when a student first enrolls in credit courses at Wayne County Community College District.

A student, who has been away from the College for four (4) or more regular semesters, or the last two (2) years, must complete an application for re-admission. Students will follow the Catalog-in-force requirements (degree or certificate program requirements) effective the term the student re-enrolls in credit courses.

For programs that have selective admission, a student's catalog-in-force requirements (degree or certificate program requirements) are those that are in effect the term a student is accepted into the program and enrolls in program courses. **CATALOG-IN-FORCE (cont.)**

In addition, the District reserves the right to change course offerings and academic requirements as deemed necessary.

**DEGREE REQUIREMENTS**

**Requirements for All Degrees**

Candidates applying for an associate degree at Wayne County Community College District must meet the following basic requirements:

- Complete at least 60 credit hours
- A minimum of 15 credits of program requirements at WCCCD
- PS 101 - American Government
- Program course with a “C” or higher

Note: English 119 is required for all degrees

- Have a minimum grade point average of 2.0 upon completion.
- Student must complete program courses with a “C” or better.

**REQUIREMENTS FOR SPECIFIC DEGREES**

**Associate of Arts (A.A.) Degree**

The associate of arts (A.A.) degree is designed for students who plan to transfer to a four-year college or university and for those who plan to earn a professional degree. Programs leading to the A.A. degree are designed for students who plan to major in such areas as English, humanities, or social sciences and for students who are preparing for professional programs in areas such as law, journalism, business administration, teaching and computer information systems.

In order to receive the A.A. degree, students must:

1. Complete the “Requirements for All Degrees” as listed in each program
2. Complete the following academic group requirements:
   - General Education Courses:
     - English 119 and ENG 120
     - PS 101 - American Government
     - Humanities
     - Natural Science
     - Social Science
   - “Natural Science course must include a laboratory requirement.

Note: Students must complete a minimum of three (3) courses from the following areas of concentration:

- Anthropology
- Philosophy
- Economics
- Political Science
- English
- Psychology
- History
- Sociology
- Mathematics
- Speech

Total General Education Credits: 35 credits

Electives 25 credits

Associate of Arts Degree

Program Total: 60 credits
Associate of Science (A.S.) Degree:
This degree is designed for students who plan to transfer to a four-year college or university with a major in the natural or physical sciences including chemistry, mathematics, biology and physics. Courses leading to an A.S. degree are designed for students enrolled in pre-professional studies for such areas as medicine, dentistry, engineering, dietetics, and environmental and natural resources.

In order to receive the A.S. degree, students must:
1. Complete the “Requirements for All Degrees” as listed in each program
2. Complete the following academic group requirements:
   - English 119 and ENG 120 ......................6 credits
   - PS 101 - American Government ..............3 credits
   - Humanities .....................................9 credits
   - Natural Science .................................9 credits
   - Total General Education Credits: ........47 credits
   - Electives .......................................13 credits
   - Program Total: .................................60 credits

Note: Humanities, Natural Sciences and Social Science courses must be taken in more than one discipline.

Associate of Applied Science (A.A.S.) Degree:
This degree is designed to prepare students for immediate employment in specialized areas such as mechanical and engineering technologies, health, business and office technologies and human services.

The A.A.S. degree is usually considered for vocational technological and occupational fields leading directly to employment in such areas as nursing, criminal justice, aviation mechanics, child care, gerontology, mental health, addiction studies, drafting or computer technology. However, many WCCCD students with the A.A.S. degree transfer to four-year colleges to continue their education while working.

In order to receive the A.A.S. degree, students must:
1. Complete the “Requirements for All Degrees” as listed in each program
2. Refer to the specific A.A.S. degree program for the required credits.
3. Adhere to the program course requirements for the specific A.A.S. degree desired

Associate of General Studies (A.G.S.) Degree:
This degree program helps students who plan to study a variety of areas without committing themselves to a specific field as they prepare for employment or additional academic work. In order to receive the A.G.S. degree, students must:
1. Complete the “Requirements for All Degrees” as listed in each program
2. Complete the following academic group requirements:
   - English .........................................3 credits
   - select any one (1) course from ENG 111- ENG 115
   - ENG 119 ........................................3 credits
   - Humanities .....................................3 credits
   - Mathematics ....................................3 credits
   - Natural Science ................................3 credits
   - *ANT 153, DT 130 OR any course from AST, BIO, GEL, CHM, PHY
   - PS 101 - American Government ..............3 credits
   - Total General Education Credits: ........18 credits
   - Electives .......................................42 credits
   - Program Total: .................................60 credits

Note: Humanities, Natural Science and Social Science courses must be taken in more than one discipline.

Additional Associate Degrees:
A student who has received an associate degree from WCCCD may obtain an additional associate degree in another area. However, students should seek academic advising before pursuing an additional associate’s degree. This provision is subject to the following stipulations:
- For each additional associate degree, a minimum of 15 semester credit hours must be completed at WCCCD. These credit hours may not repeat previously earned credit.
- All academic group requirements for the associate of arts or associate of science degree may be met by credit previously earned, or by credit additionally earned, or both.
- All courses required by any specific program must be completed.
- An associate of arts degree may be earned following an associate of science degree or vice versa. However, no additional degree will be granted in the same program in which the first degree was earned.
- An additional degree must be within a specific program if the first degree was not.
- Students must complete their last semester at WCCCD.
- Students may not receive a certificate and an associate degree in the same career program within the same semester.
Certificate Requirements (CERT)
The certificate programs are designed for students who are seeking job-entry skills and for those who wish to improve their performance on their present job or who wish to qualify for advancement. In order to receive a certificate, students must satisfy the specific program requirements. The specific course requirements are listed in the academic program section of this Catalog. Refer to the table of contents for page listings of certificate programs. In addition, contact the Workforce Development Department at the District for information on specialized certificate training programs offered throughout the academic year.

- Short-Term Certificate: minimum 10 credits, maximum 29 credits*
- One-Year Certificate: minimum 30 credits, maximum 35 credits*
- Two-Year Certificate: *minimum 60 credits, maximum 72 credits
  *At least 70 percent of courses must be occupational specific courses.

Courses that Satisfy the Academic Group Requirements
The courses listed below may be used to satisfy the specific degree requirements. The specific course requirements are listed in this catalog to be sure that you select the correct courses.

I. Courses that satisfy English requirements:

   Options:
   - ENG 119: English I (required for all degrees plus one other English (ENG) course)
   - ENG 120: English II
   - ENG 134: Technical Communications
   - ENG 260: Introduction to African-American Literature
   - ENG 261: African-American Literature in the Twentieth Century
   - ENG 270: Professional and Technical Report Writing
   - ENG 280: Creative Writing

II. Courses that satisfy the humanities requirements:

   Options:
   - AAS 253: African-Caribbean Literature
   - ARA 101: Introduction to Arabic I
   - ARA 102: Introduction to Arabic II
   - ART 101: Drawing I
   - ART 102: Drawing II
   - ART 103: Drawing III
   - ART 111: Design I
   - ART 112: Design II
   - ART 115: Basic Drawing for Animation
   - ART 121: Painting I
   - ART 122: Painting II
   - ART 123: Painting III
   - ART 131: Ceramics I
   - ART 132: Ceramics II
   - ART 151: Sculpture I
   - ART 152: Sculpture II
   - ART 171: Printmaking I
   - ART 172: Printmaking II
   - ART 173: Printmaking III
   - ART 174: Printmaking IV
   - CHN 101: Introduction to Chinese
   - DAN 101: Modern Dance I
   - DAN 102: Modern Dance II
   - DAN 103: Modern Dance III
   - DAN 111: Ballet I

III. Courses that satisfy the natural sciences requirements (cont.):

   Options:
   - BIO 175+: Zoology
   - BIO 165+: Botany
   - BIO 155+: Introductory Biology
   - MUS 101: Introduction to Music
   - MUS 102: Fundamentals of Music I
   - MUS 103: Fundamentals of Music II
   - MUS 104: Organ
   - MUS 105: Piano
   - PHL 101: Comparative Religions I
   - PHL 102: Comparative Religions II
   - PHL 201: Introduction to Philosophy
   - PHL 211: Introduction to Logic
   - SPA 101: Elementary Spanish I
   - SPA 102: Elementary Spanish II
   - SPA 201: Intermediate Spanish I
   - SPA 202: Intermediate Spanish II
   - SPH 101: Fundamentals of Speech
   - SPH 105: Improving the Speaking Voice
   - SPH 111: Interpretative Reading
   - SPH 131: Introduction to Radio, Television and Mass Communications
   - SPH 161: Play Production

   For the A.A. degree and the A.S. degree:
   - At least one (1) of the natural sciences must be a laboratory course.

   Mathematics courses numbered 155 or above may be used to meet the non-laboratory natural science requirement.

Options:
- Note: *designates a science course with a laboratory

Natural Sciences:
- ANT 153: Introduction to Physical Anthropology
- AST 101: Astronomy I: New Solar System
- BIO 125: Biology for Non-Science Majors
- BIO 151: Human Ecology
- BIO 155+: Introductory Biology
- BIO 165+: Botany
- BIO 175+: Zoology

PROGRAM CURRICULA

DEGREE PROGRAMS

ACCOUNTING

• College Certificate
  Associate of Applied Science

About the Program
The Accounting Associate of Applied Science degree and College Certificate programs prepare students presently employed in the accounting field and seeking advancement, and for those seeking a position in the field immediately upon graduation. Areas where a student may find employment include but are not limited to, auditing, payroll, cost, budget and tax. In addition to the course work in Accounting, the student will complete courses in various other business disciplines and the liberal arts.

This program offers:
Associate of Applied Science
• College Certificate: 34 credit hours

Program Goals
• To provide students, with a background in the accounting field, an advanced foundation of accounting principles and concepts for entry-level positions with accounting tax services firms, CPA firms and other small businesses. Certificate is designed for rapid entry into the workforce while maximizing transfer credit into the Associate of Applied Science Degree in Accounting.

• To prepare students to successfully pass the National Certified Bookkeeping Exam and Individual Income Taxation Enrolled Agent Exam.

• To provide students, with a foundation in principles and concepts related to the accounting field.

• Articulate, apply and practice ethical parameters of the profession to include federal and state regulatory guidelines for generally accepted accounting principles.

Certificate Goals
• To provide students, with a foundation in principles and concepts related to the accounting field.

• To prepare students to successfully pass the National Certified Bookkeeping Exam and Individual Income Taxation Enrolled Agent Exam.

• To articulate, apply and practice ethical concepts in the preparation of financial statements and the reporting documents.

Certificate Outcomes
• Students will be able to demonstrate use of technology, software and integrated computerized accounting software to perform basic accounting and bookkeeping tasks.

• Demonstrate competency in the preparation of financial statements, payroll reports, tax returns and other related financial documents.

Admission Requirements
Students are required to do the following:
• Fulfill all WCCCD admission requirements
• Fulfill course placement requirements based on COMPASS test.
• Students must complete ACC 100 with a “C” or better
• Students must complete WCCCD Program Application and submit to the Campus Academic Officer.

Degree Requirements
• Students must complete all course work with a grade of “C” or better to meet graduation requirements.

**Demonstrate knowledge of critical thinking concepts to adapt intervention and assessment skills to a variety of agency settings e.g. crisis counseling, employment services, children’s protective services, self-sufficiency, housing, mental health, corrections and advocacy.**

**Admission Requirements**

Students are required to do the following:

- Fulfill all WCCCD admission requirements
- Fulfill course placement requirements based on COMPASS test.
- Students must complete WCCCD Program Application and submit to the Campus Academic Officer.

**Degree Requirements**

- Students must complete all course work with a grade of “C” or better to meet graduation requirements.

### ADDICTION STUDIES

**College Certificate**

**About the Program**

The Addiction Studies College Certificate program prepares graduates to work as entry level professionals in centers and facilities serving persons who are dependent upon addictive substances. Job functions include interviewing, conducting group sessions and behavior management.

**College Certificate Goals**

- To prepare students for and/or advancing their careers in the field of addictive addiction disorders including gambling, drug and alcohol dependency treatment, prevention and education through successful completion of the State of Michigan Certified Addiction Counselor exam.
- Understand and apply fundamental concepts of biological, psychological and social aspects of dependency addiction and disorders.
- As necessary, enhance the psychosocial functioning of clients in addiction disorder treatment programs.

**College Certificate Outcomes**

- Students will be able to understand causes of addiction dependency and its effects on individuals, families, groups and communities.
- Prepare students for successful completion of the State of Michigan Certified Addiction Counselor (CAC-M, CAC-R and CAAC) certification process with a 70% proficiency rate or higher.
- Prepare and plan an appropriate community resources profile plan for clients and customers.
- Analyze, identify, plan, implement and evaluate interventions.

- Demonstrate knowledge of critical thinking concepts to adapt intervention and assessment skills to a variety of agency settings e.g. crisis counseling, employment services, children’s protective services, self-sufficiency, housing, mental health, corrections and advocacy.

**Admission Requirements**

Students are required to do the following:

- Fulfill all WCCCD admission requirements
- Fulfill course placement requirements based on COMPASS test.
- Students must complete WCCCD Program Application and submit to the Campus Academic Officer.

**Degree Requirements**

- Students must complete all course work with a grade of “C” or better to meet graduation requirements.

About the Program
The Alternative Fuel College Certificate prepares students for career areas utilizing alternative energy and fuel cell technology. Students will be taught and prepared to work on gas-electric hybrids, hydrogen, compressed natural gas, biodiesel, propane, methanol, ethanol and even garbage-powered vehicles and other power units. Students will learn preventive maintenance, safety, procedures refueling, troubleshooting, and problem solving techniques on a wide range of technologies to insure a solid career with a multitude of possibilities in this new emerging industry. Additionally, students will be instructed on the fundamental principles in the production, processing, storage, distribution and utilization of energy. This program addresses the need for the development of alternative sources of energy and conventional fossil fuels.

College Certificate Goals
• To prepare students for careers utilizing development and reliance on alternative energy and fuel cells and repair of automotive alternative fuel vehicles.
• To teach and prepare students as a precursor for a declared four-year baccalaureate degree.

College Certificate Outcomes
• Students will be able to demonstrate basic electrical, mechanical, and chemical, mathematics, science and computer skills knowledge to identifying solutions for alternative energy.
• Apply critical thinking and analytical skills to determine where and when alternative energy and fuel cells are appropriate and effective for repair.

• Select and use appropriate tools and equipment to perform repairs according to industry standards.
• Identify the types of automotive alternative fuels available.
• Identify, diagnose, and repair malfunctions of light duty diesel engines, electric vehicles, fuel cells and hybrid electric vehicles.
• Identify and understand the properties of natural gas, propane, and hydrogen and their use as a fuel for internal combustion engines or fuel cells.
• Describe and demonstrate safe work habits and protocol for quality and safety procedures with alternative fueled vehicles.

Admission Requirements
Students are required to complete the following:
• Fulfill all WCCCD admission requirements.
• Declare intent to enter the Alternative Fuels Technology Program on the WCCCD Application for Admission or change intent at the admissions office.
• Fulfill course placement requirements based on COMPASS test results.
• Students must complete WCCCD program admission applications during the semester they are enrolled in AUT 117, and then submit the application to the Campus Academic & Student Services Office.

Degree Requirements
• Students must complete all course work with a grade of “C” or better to meet graduation requirements.

About the Program
The American Sign Language College Certificate program at Wayne County Community College District provides language training and cultural enrichment for people who wish to learn American Sign Language and the uniqueness of deaf culture. This program will not prepare students to become interpreters but is designed to introduce students to the language and culture. This program is a complement to other degrees and is particularly useful for parents of deaf children and students pursuing careers such as allied health, nursing, early childhood education and teaching, where clients may be deaf.

AMERICAN SIGN LANGUAGE
continued

• Demonstrate the appropriate use of classifiers through directionality, word signs, noun placements and non-manual signs with a 75% proficiency level or higher.
• Exhibit an awareness, support and respect for ASL as the visual language of the Deaf community.

Admission Requirements
Students are required to do the following:
• Fulfill all WCCCD admission requirements
• Possess a high school diploma or GED
• Fulfill course placement requirements based on the COMPASS test.
• Declare intent to enter the American Sign Language program and indicate intent on the Application for Admission form.

Degree Requirements
• Students must complete all course work with a grade of “C” or better to meet graduation requirements.

ASSOCIATE OF ARTS - A.A.
Associate of Arts

About the Program
The District offers a two-year course of study leading to the Associate of Arts degree. This degree is designed for students who plan to complete their first two years of college at Wayne County Community College District and transfer to a baccalaureate degree granting institution. Programs leading to the A.A. degree are designed for students who plan to major in such areas as performing arts, English, humanities or the social sciences. It is also for students who are preparing for professional programs in areas such as law, journalism, business administration, teaching and computer information systems.

Program Goals
• To provide a general foundation of an associate of arts studies as the precursor for a declared four-year degree.

Program Outcomes
• To successfully complete the Associate of Arts program with a “C” average or higher as a foundation to transfer to a four-year baccalaureate institution.

Degree Requirements
• The Associate of Arts degree consists of a minimum of sixty (60) semester hours of credit, of which fifteen (15), must be earned at WCCCD.
• Course work must be completed with a grade of “C” or better.
• Thirty-five (35) credit hours are used to satisfy the general education and academic group requirements.
• Twenty-five (25) credit hours are needed to satisfy the elective requirements.
• Consult a transfer coordinator at the campus for course requirement advising.

Students are required to complete:
A total of twenty-five (25) elective credit hours, including a minimum of three (3) courses in one of the following areas of concentration:
• Humanities
• English
• Speech
• Social Science
• African-American Studies
• Anthropology
• Economics
• Sociology
• Life and Physical Science
• Mathematics
• Human and Community Development
• Philosophy
• Psychology

### ASSOCIATE OF GENERAL STUDIES

**Associate of General Studies Degree**

**About the Program**

This degree program helps students who plan to study a variety of areas without committing themselves to a specific field as they prepare for employment or additional academic work.

**Program Goals**

- To provide a general foundation of liberal arts studies as the precursor for a declared four year baccalaureate degree.

**Program Outcomes**

- To successfully complete the Associate of General Studies degree program of study with a “C” average or higher as a foundation to transfer to a four-year baccalaureate institution.

**Degree Requirements**

- The Associate of General Studies degree consists of a minimum of sixty (60) credit hours of credit, of which fifteen (15), must be earned at WCCCD.
- Course work must be completed with a grade of “C” or better.
- Complete the “Requirements for All Degrees”
- Complete all academic group requirements
- Consult a transfer coordinator at the campus for course requirement advising.

ASSOCIATE OF SCIENCE - A.S.

Associate of Science

About the Program
The District offers a two-year course of study leading to the Associate of Science (A.S.) degree. This degree is designed for students who plan to complete their first two years of college at Wayne County Community College District and transfer to a baccalaureate degree granting institution. Students pursuing this degree plan to transfer and major in the natural or physical sciences including chemistry, mathematics, biology and physics. Courses leading to an A.S. degree are designed for students enrolled in pre-professional studies for such areas as medicine, dentistry, engineering, and dietetics and environmental and natural resources.

Program Goals
- To provide a general foundation of an associate of science studies as the precursor for a declared four-year degree.

Program Outcomes
- To successfully complete the Associate of Science program of study with a “C” average or higher as a foundation to transfer to a four-year baccalaureate institution.

Degree Requirements
- The Associate of Science degree consists of a minimum of sixty (60) credit hours of credit, of which fifteen (15), must be earned at WCCCD.
- Course work must be completed with a grade of “C” or better.
- Complete the “Requirements for All Degrees”
- Complete all academic group requirements
- Consult a transfer coordinator at the campus for course requirement advising.

PROGRAM CURRICULA

ASSOCIATE OF SCIENCE - A.S.

SOCIAL SCIENCE

Courses must be taken in more than one academic discipline.

At least two (2) courses or six (6) credit hours must be from the following academic disciplines:
- Anthropology
- Economics
- Geography
- History
- Political Science
- Psychology
- Sociology

One course may be taken from the following academic disciplines:
- African-American Studies
- Muslim World Studies

AUTOMOTIVE SERVICE TECHNOLOGY (NATEF) CERTIFIED

- College Certificate
- Associate of Applied Science

About the Program
The Automotive Service Technology Associate of Applied Science degree and College Certificate programs are designed to develop qualified technicians to diagnose, repair and service modern automobiles. The programs provide opportunities for the student to develop their skills and competencies for entry-level positions such as an automotive technician, service manager, parts manager, product test technician and self-employment. The programs prepare students for Automotive Service Excellence (ASE) and State of Michigan certifications for any of the eight (8) automotive areas or “Master” certification.

The instruction, curriculum, facilities and equipment of this program have been evaluated by the National Automotive Technicians Education Foundation (NATEF) and the District received certification from the National Institute for Automotive Service Excellence (ASE) in the following areas:
- Automatic Transmission & Transaxle
- Brakes
- Electrical/Electronic Systems
- Engine Performance
- Engine Repair
- Heating and Air Conditioning
- Manual Drive Train & Axles
- Suspension & Steering

This program offers:
- Associate of Applied Science: 61 credit hours
- College Certificate: 30 credit hours

Continued on next page.
### AUTOMOTIVE SERVICE TECHNOLOGY (NATEF) CERTIFIED continued

**Program Goals**
- To prepare students for employment in the auto service industry through applied knowledge of automotive technology machinery, software and its applications.
- To teach students the basic principles of automotive technology safety as it applies to tool and equipment operations.
- To prepare students for individual credentialing by recognized skill standards established by the National Automotive Technicians Education Foundation (NATEF).
- To prepare students for individual credentialing by recognized skill standards established by the State of Michigan certifications of any of the eight (8) automotive areas and/or “Master” certification.

**Certificate Goals**
- To provide a basic foundation of the automotive service industry through applied knowledge of machinery, software and its applications.
- To prepare students for individual credentialing by recognized skill standards established by the National Automotive Technicians Education Foundation (NATEF).
- To prepare students for individual credentialing by recognized skill standards established by the State of Michigan certifications of any of the eight (8) automotive areas and/or “Master” certification.

**Program Outcomes**
- Students will be able to obtain individual credentialing in any of the eight (8) automotive areas and/or “Master” certification by the State of Michigan with a 70% or better proficiency rate.
- Students will be able to demonstrate basic repair services according to industry standards in a safe manner.
- Work independently and professionally as a member of an automotive service technology team.
- Students are required to do the following:
  - Fulfill all WCCCD admission requirements
  - Declare intent to enter the Automotive Service Technology Program on the WCCCD Application for Admissions or change intent at the admissions office.
  - Fulfill course placement requirements based on COMPASS test.

**Certificate Outcomes**
- Students will be able to demonstrate basic math and use of appropriate tools and equipment to perform basic maintenance and repair services.
- To teach students the basic principles of automotive technology safety as it applies to tool and equipment operations.
- Work independently and professionally as a member of an automotive service technology team.

**Admission Requirements**
Students are required to do the following:
- Fulfill all WCCCD admission requirements
- Fulfill course placement requirements based on COMPASS test.

**Degree Requirements**
- Students must complete WCCCD Program Application during the semester they are enrolled in AUT 114 - Electrical/Electronics Systems I course, and then submit the application to the Campus Academic & Student Services Officers.

**Automotive Service Technology: College Certificate**

AVIATION MECHANICS: AIRFRAME

• College Certificate
  Associate of Applied Science

About the Program
The Aviation Mechanics Associate of Applied Science and College Certificate degree program offers two options: Airframe and Powerplant.

This program offers:
- Aviation Mechanics Airframe Associate of Applied Science: 100 credit hours
- Airframe Aviation Technician College Certificate: 48 credit hours

Airframe Program Outcomes
• Students will demonstrate an understanding of and proficiency in the basic principles to analyze, troubleshoot and repair servicing all systems of the airframe to include; nonmetallic, sheet metal, wood, fabric and finishing coverings, aircraft welding, communication and navigation systems, electrical, hydraulics, pneumatic lines and fittings systems, landing gear systems, position and warning systems, instrument, cabin atmosphere control systems, fuel, ice, rain control and fire protection systems.
• Demonstrate proficiency in performing aircraft weight and balance, major and minor repairs and alterations, cleaning and corrosion control and ground operations.
• Demonstrate an applied understanding of basic math concepts and use of appropriate tools and equipment to perform maintenance and repair services in accordance with the federal aviation industry standards and guidelines.
• Demonstrate proficiency in completing airframe maintenance forms and records.
• To prepare students for individual credentialing by the Federal Aviation Administration (FAA) Certificate in airframe or powerplant technician.

Program Goals
• To teach and prepare students for individual certificate credentialing by the Federal Aviation Administration (FAA) to be licensed as an airframe technician.
• To teach the basic principles of aviation mechanical safety as it applies to airframe repair.

Admission Requirements
Students are required to do the following:
• Fulfill all WCCCD admission requirements
• Fulfill course placement requirements based on COMPASS test.
• Students must complete WCCCD Program Application and submit to the Campus Academic Officer.

Degree Requirements
• Students must complete all course work with a grade of “C” or better to meet graduation requirements.
AVIATION MECHANICS: AIRFRAME continued

OCCUPATIONAL SPECIFIC COURSE
(Courses from the following required to achieve a Federal Aviation Administration (FAA):

Air Science Section
ATP 101 Introduction to Aviation I ........ 8
ATP 102 Introduction to Aviation II ........ 8
ATP 103 Basic Electricity .................... 8
ATP 104 Materials, Fuel, Fire and Corrosion .................... 8
AIR SCIENCE SECTION TOTAL ........ 32

Airframe Section
AFM 201 Basic Sheet Metal .................... 8
AFM 202 Non-Metallic Structures and Finishes .................... 8
AFM 203 Airframe Electrical .................... 8
AFM 204 Aircraft Navigation and Communications .................... 8
AFM 205 Assembly and Rigging and Aircraft Systems .................... 8
AFM 206 Landing Gear Systems and Airframe Inspections .................... 8
AIRFRAME SECTION TOTAL ........ 48
AIRFRAME AAS PROGRAM TOTAL: ........ 100

Note: Program totals may not include prerequisites.

AVIATION MECHANICS: POWERPLANT

• College Certificate Associate of Applied Science

About the Program
The Aviation Mechanics Associate of Applied Science and College Certificate degree program offers two options: Airframe and Powerplant.

The program is designed to prepare students for entry into a variety of occupations, which require competence in the two basic areas of airframe and powerplant technology. Students completing the certificate or the Associate of Applied Science Degree program will be qualified to obtain a Federal Aviation Administration (FAA) Certificate to be licensed as an airframe or powerplant technician. Students seeking career advancement in the field or transfer to a four-year institution should elect the Association of Applied Science Degree. Students who wish to prepare only for the FAA license should select the Certificate.

This program offers:
- Aviation Mechanics Associate of Applied Science: 96 credit hours
- Powerplant Aviation Technician College Certificate: 48 credit hours

Powerplant Program Goals
• To teach and prepare students for individual credentialing by the Federal Aviation Administration (FAA) to be licensed as an airframe technician.
• To teach students the basic principles of aviation mechanical safety as it applies to airframe and powerplant repair.

Powerplant Program Outcomes
• Students will demonstrate proficiency in analyzing, troubleshooting and repair servicing all systems of the powerplant to include; reciprocating and turbine engines, auxiliary power units, instruments, fire protection systems, electrical systems, cleaning and lubrication systems, fuel metering and fuel systems, ignition, starting and systems, cooling induction systems, exhaust and reverse systems and propeller and unducted fans.
• Demonstrate proficiency in performing aircraft weight and balance, major and minor repairs and alterations, cleaning and corrosion control and ground operations.
• Demonstrate advanced math concepts and use of appropriate tools and equipment to perform powerplant maintenance and repair services in accordance with the federal aviation industry standards and guidelines.
• Identify, describe and proficiently complete powerplant maintenance forms and records.
• To prepare students for individual credentialing by the Federal Aviation Administration (FAA) General Powerplant written, oral and practical exams with a 70% or better proficiency rate and attain a mechanics certificate with powerplant ratings.

Airframe & Powerplant Certificate Goals
• To teach and prepare students for individual certificate credentialing by the Federal Aviation Administration (FAA) to be licensed as an airframe technician.
• To teach students the basic principles of aviation mechanical safety as it applies to airframe and/or powerplant.

Airframe & Powerplant Certificate Outcomes
• Students will be able to demonstrate an applied understanding of the basic principles to analyze, troubleshoot and repair servicing systems of the airframe and/or powerplant.

Admission Requirements
Students are required to do the following:
• Fulfill all WCCCD admission requirements
• Fulfill course placement requirements based on COMPASS test.
• Students must complete WCCCD Program Application and submit to the Campus Academic Officer.

Degree Requirements
• Students must complete all course work with a grade of “C” or better to meet graduation requirements.

Aviation Mechanics (Powerplant): College Certificate

Recommended Course Sequence
Note: Courses from the following are required to achieve a Federal Aviation Administration (FAA) Certificate in Aviation Mechanics Powerplant:

Powerplant Section
PPM 201 Reciprocating Engine Operation ........ 8
PPM 202 Reciprocating Engine Systems ........ 8
PPM 203 Reciprocating Engine Overhaul and Troubleshooting ........ 8
PPM 204 Propellers and Turbine Engine Operation ........ 8
PPM 205 Turbine Engine Designs, Accessories and Instruments ........ 8
PPM 206 Turbine Engine Overhaul and Troubleshooting ........ 8

POWERPLANT SECTION TOTAL ........ 48

## Business Administration

**Associate of Arts Degree**

**Associate of Applied Science Degree**

### About the Program

The Business Administration Associate of Arts AND Associate of Applied Science degree programs are suitable for students presently employed in business and industry and seeking advancement, those seeking such a position immediately upon graduation and those anticipating transfer to a four-year institution. The student will complete a core liberal arts and business courses. Those anticipating transfer should coordinate their studies with the transfer policies of the institutions to which they intend to transfer. In some instances, these students may find it more advantageous to pursue a more general associate degree.

### This program offers:

- Associate of Arts Degree: 62 credit hours
- Associate of Applied Science: 61 credit hours

### Program Goals

- To teach and provide a general foundation of the field of business administration as a precursor for a declared four-year degree.

### Associate of Arts AND Associate of Applied Science Program Outcomes

- Students will be able to employ effective oral, written and presentational techniques consistent with the business and management environment.
- Demonstrate and apply ethical values, global awareness and technological skills to identified problems and issues making appropriate decisions related to business problems.
- Assess, identify and apply critical thinking skills to formulate viable solutions to business problems by using basic accounting, business and financial concepts.
- Proficiently articulate and communicate business information and data utilizing word processing, spreadsheet applications, slide presentations and database software.

### Admission Requirements

Students are required to do the following:

- Fulfill all WCCCD admission requirements
- Fulfill course placement requirements based on COMPASS test
- Students must complete WCCCD Program Application and submit to the Campus Academic Officer.

### Degree Requirements

- Students must complete all course work with a grade of “C” or better to meet graduation requirements.

CERTIFIED NURSE AIDE (CNA)
Short-Term College Certificate

About the Certificate
The Certified Nurse Aide (CNA) is a short-term certificate comprised of one (1) ten credit hour course:

NURSING AND HEALTH CARE SKILLS:
NHS 100 Nursing Assistant .............. 10

Course Description:
The Nursing Assistant: Acute and Chronic Care course will help students master the theory and skills necessary to assist professional health care providers in giving patient care. The students will have the opportunity to develop care-giving skills consistent with those outlined by the State of Michigan for nursing assistants.

Students will learn to assist in various health care settings such as long term care facilities, hospitals, and home care. Upon successful completion of the course, students are eligible to take the Michigan Certified Nurse Aide Examination for CNA Certification.

Admission Requirements
- A high school diploma or equivalent GED is required as well as a health exam, immunizations, criminal background check and two letters of reference. The Nursing Assistant course is offered each semester. It is a 10 credit course consisting of 270 contact hours over a seven, eleven, or fourteen week period of time. Clinical experience is provided in 128 contact hours in a laboratory setting and 52 hours in a Long Term Care facility.

Degree Requirements
- Students must complete all course work with a grade of “C” or better to meet graduation requirements.

COMPUTER INFORMATION SYSTEMS
Associate of Applied Science

About the Program
The Computer Information Systems Associate of Applied Science degree program is designed to provide a solid foundation in the fundamental skills that are generally required to analyze system requirements and design solutions or, to support and manage the application of technology resources. The degree includes core courses of information systems fundamentals, core courses of information systems fundamentals, and allows for the selection of courses in specialized areas of concentration to complete the degree option requirements.

Program concentrations are designed to meet the educational needs of most segments of the IT field in a client-server environment, and microprocessor platform along with web and server applications. The training blends general education courses with the required IT skills for programmer/analyst in government, insurance, manufacturing, service, sales, utilities and banking. Additional education and job experience lead to work in systems analysis and project management.

Students seeking a degree in computer Information Systems have the following options: Associate of Arts Degree: 60 credit hours
College Certificate:
1. Computer Support Specialist: 29 credit hours
2. Network Administrator: 30 credit hours
3. Video Game Design & Animation: 34 credit hours
4. Website Designer: 32 credit hours

Program Goals
- To teach students foundation skills and to apply that knowledge to meet the needs of the computer information systems field.
- Provide general education coursework with technical competence required in IT skills for programmers and analysts and other aspects of the profession.

Program Outcomes
- Students will be able to apply knowledge of computing and mathematics appropriate to the discipline.
- Analyze a problem, and identify and define the computing requirements appropriate to its solution.
- Demonstrate applied knowledge in the design, implement, and evaluate a computer-based system, process, component or program to meet desired needs.
- Demonstrate an applied understanding of processes that support the delivery and management of information systems within a specific application environment.
- Effective use of written, oral, and interpersonal communication skills operating as a member of a diverse team of individual support interacting with a broad range of audiences.
- An understanding of professional, ethical, legal, security and social issues and responsibilities related to the profession.

Admission Requirements
To be admitted into the CIS program students must:
- Fulfill all WCCCD admission requirements.
- Declare program intent to the WCCCD admission office.
- Fulfill course placement requirements based on COMPASS test.
- Obtain an Educational Development Plan of Work, outlining the student’s plan for program completion from an academic advisor.

Degree Requirements
- Students must complete all course work with a grade of “C” or better to meet graduation requirements.

COMPUTER INFORMATION SYSTEMS: COMPUTER SUPPORT SPECIALIST

• College Certificate

About the Program
The Computer Information Systems Computer Support Specialist College Certificate program is designed to provide a solid foundation in the fundamental skills that are generally required to analyze system requirements and design solutions or, to support and manage the application of technology resources. Degree concentrations include core courses of information systems fundamentals, database systems, networking, web systems and software development.

Description: Computer Support Specialists provide technical assistance, support, and advice to users. These troubleshooters diagnose problems and provide technical support for hardware, software, and IT systems.

A person in this occupation applies computer software and technology to business related activities and problems. Typical support specialist tasks include analyzing and solving business problems by creating a computerized system using microcomputer application software (e.g. word processor, spreadsheets, databases, presentation, web development, etc.) by writing a custom program or integrating multiple software applications. Students are also prepared to interface with users and functions as an integral part of an IT support team.

Certificate Goals
• Provide a basic foundation and practical experience in computer systems concepts with an emphasis in microcomputer applications.

Certificate Outcomes
• Demonstrate ability to manage workgroup resources to include file shares, print shares and physical connections.
• Proficiently install, configure and support industry required applications.
• Proficiently use integrated software packages to analyze and support business problems related to the IT infrastructure.

Admission Requirements
Students are admitted to the program each semester. Students must have the program approval, a completed application, and other required information submitted by the due date. If there are openings after the application deadline, any remaining openings will be filled on a “first-come” basis. To be admitted into the CIS program students must:
• Fulfill course placement requirements based on COMPASS test.
• Obtain an Educational Development Plan of Work, outlining the student’s plan for program completion from an academic advisor.

Degree Requirements
• Students must complete all course work with a grade of “C” or better to meet graduation requirements.

COMPUTER INFORMATION SYSTEMS: NETWORK ADMINISTRATOR

• College Certificate

About the Program
The Computer Information Systems Network Administrator College Certificate is designed to provide a solid foundation in the fundamental skills that are generally required to analyze system requirements and design solutions or, to support and manage the application of technology resources.

The Network Administrator concentration prepares students as network systems administrators who can design, install, and support an organizations LAN (local-area network), network segment, Internet, or intranet system. Network systems administrators provide day-to-day on-site administrative support for software users in a variety of work environments, including professional offices, small businesses, government, and large corporations. They maintain network hardware and software, analyze problems, and monitor the network to ensure its availability to system users. These professionals gather data to identify customer needs and then use that information to identify, interpret, and evaluate system and network requirements. Network systems administrators also plan, coordinate, and implement network security measures.

Description: Provide day-to-day on-site administrative support for software users in a variety of work environments.

Certificate Goals
• To teach students foundation skills and to apply that knowledge to meet the needs of the computer information systems field.
• Provide general education coursework with technical competence required in IT skills for programmers and analysts and other aspects of the profession.

Continued on next page.
Students are admitted to the program each semester. Students must have the program approval, a completed application, and other required information submitted by the due date. If there are openings after the application deadline, any remaining openings will be filled on a "first-come" basis. To be admitted into the CIS program students must:

- Fulfill all WCCCD admission requirements.
- Declare program intent on the WCCCD admission application or change program intent at the campus admission office.
- Fulfill course placement requirements based on COMPASS test.

**Certificate Goals**

- To provide students a basic foundation to the video game design, animation and programming field.

**Certificate Outcomes**

- Students will be able to produce quality work in a video game design and animation environment.
- Effective use of written, oral, verbal and interpersonal communication skills operating as a member of a diverse team of individual support interacting with a broad range of audiences.
- Demonstrate an applied understanding of processes that support the design, animation and production environment.

**Admission Requirements**

Students are admitted to the program each semester. Students must have the program approval, a completed application, and other required information submitted by the due date. If there are openings after the application deadline, any remaining openings will be filled on a "first-come" basis. To be admitted into the CIS program students must:

- Fulfill all WCCCD admission requirements.
- Declare program intent on the WCCCD admission application or change program intent at the campus admission office.
- Fulfill course placement requirements based on COMPASS test.

**Degree Requirements**

- Prior to beginning the Video Game Design and Animation concentration of the Computer Information Systems program, students must have computer competencies which include the ability to key text at a minimum rate of 35 words per minute. These necessary skills can be obtained from your life experiences or by taking any of the following courses: Keyboarding, Keyboarding Fundamentals and Intermediate Keyboarding.

**Prerequisite Work**

- Prior to beginning the Video Game Design and Animation concentration of the Computer Information Systems program, students must have computer competencies which include the ability to key text at a minimum rate of 35 words per minute. These necessary skills can be obtained from your life experiences or by taking any of the following courses: Keyboarding, Keyboarding Fundamentals and Intermediate Keyboarding.

**Certificate Outcomes**

- Students will be able to produce quality work in a video game design and animation environment.
- Effective use of written, oral, verbal and interpersonal communication skills operating as a member of a diverse team of individual support interacting with a broad range of audiences.

COMPUTER INFORMATION SYSTEMS: WEBSITE DESIGNER

College Certificate

About the Program

The Computer Information Systems Website Designer Associate of Applied Science degree and College Certificate programs are designed to prepare students for employment in the area of web design. Students will learn web design, XHTML coding, image editing, validation, CSS, GUI editors, server-side and client-side languages.

Description: Web designers are responsible for day-to-day site creation, design and all technical aspects of a web site.

Certificate Goals

- Students will be able to demonstrate competencies in the development and deployment of website design.

Certificate Outcomes

- Demonstrate ability to code the features necessary for Web site development and deployment.
- Demonstrate ability to solve problems related to the program content.
- Develop proficiencies in modifying a website.

Degree Requirements

- Students must complete all course work with a grade of “C” or better to meet graduation requirements.

Admission Requirements

Students are admitted to the program each semester. Students must have the program approval, a completed application, and other required information submitted by the due date.

If there are openings after the application deadline, any remaining openings will be filled on a “first-come” basis. To be admitted into the CIS program students must:

- Fulfill all WCCCD admission requirements.
- Declare program intent on the WCCCD admission application or change program intent at the campus admission office.

- Fulfill course placement requirements based on COMPASS test.
- Obtain an Educational Development Plan of Work, outlining the student’s plan for program completion from an academic advisor.

Prerequisite Work

Prior to beginning the program, students must have computer competencies which include the ability to key text at a minimum rate of 35 words per minute. These necessary skills can be obtained from your life experiences or by taking any of the following courses: Keyboarding, Keyboarding Fundamentals and Intermediate Keyboarding.

Degree Requirements

- Students must complete all course work with a grade of “C” or better to meet graduation requirements.

CRIMINAL JUSTICE:
LAW ENFORCEMENT
ADMINISTRATION AND
CORRECTIONS

Associate of Applied Science

About the Program
The Criminal Justice Law Enforcement Administration and Corrections Associate of Applied Science degree programs are designed to provide the academic and professional training necessary for careers in Law Enforcement. The Law Enforcement Administration option is designed to prepare students for entry or advancement in the criminal justice system. The Corrections option prepares students for employment in correctional institutions or fields related to probation and parole.

This program offers two degree concentrations: 1. Law Enforcement Administration Associate of Applied Science: 61 credit hours 2. Corrections Associate of Applied Science: 61 credit hours

Program Goals
- To teach students the principles of community law enforcement and corrections vocation.
- To instruct students on how to apply critical thinking and analytical problem solving in the law enforcement profession.

Program Outcomes
- Students will be able to apply academic knowledge to a field of training program designed to assimilate one into a policing vocation.
- Demonstrate critical thinking decision making and problem solving competence as it applies to the vocation.
- Comprehend, evaluate and synthesize information related to the area of responsibility by demonstrating expertise.

- Utilize effective verbal and written communication with the public, staff and administration by documenting activities, maintaining databases and effective performance.
- Demonstrate knowledge of and apply ethical values, cultural awareness and technological skills when making appropriate decisions related to the vocation.

Admission Requirements
Students are required to do the following:
- Fulfill all WCCCD admission requirements
- Declare intent to enter the Criminal Justice Program on the WCCCD Application for Admission or change intent at the Admission Office.
- Fulfill all course placement requirements based on COMPASS test.
- Obtain an Educational Development Plan (Plan of Work), outlining the student’s plan for program completion.

Degree Requirements
- Students must complete all course work with a grade of “C” or better to meet graduation requirements.

DENTAL ASSISTING

• College Certificate

About the Program

The Dental Assisting College Certificate program provides students with the necessary training to perform the duties of a dental assistant, including assisting the dentist (chair side), providing patient education, performing laboratory procedures, exposing and processing x-rays and performing office management tasks such as billing and scheduling appointments.

In addition, the dental assistant who becomes licensed can provide expanded functions as delegated by Michigan law. Instruction runs concurrently with the laboratory instruction throughout the program. Students gain clinical experience in clinical facilities and dental offices.

Apart from that, students are taught the necessary training to perform the duties of a dental assistant, including assisting the dentist (chair side), providing patient education, performing laboratory procedures, exposing and processing x-rays and performing office management tasks such as billing and scheduling appointments.

Upon completion of the program, students are eligible to take the Dental Assisting National Board Examination to become a Certified Dental Assistant (CDA). In addition, they are eligible to take the State of Michigan’s Registered Dental Assistant Examination to become a licensed Registered Dental Assistant (RDA).

The program in Dental Assisting is accredited by the Commission on Dental Accreditation. The Commission is a specialized accrediting body recognized by the Commission on Recognition of Post-Secondary Accreditation and the United States Department of Education.

College Certificate Goals

• To teach and prepare students as dental assistants to competently preform a variety of clinical and support treatments to include collecting diagnostic and treatment data.

College Certificate Outcomes

• Students will be able to detail, plan and demonstrate competency in performing comprehensive and routine dental laboratory procedures, assist in managing medical emergencies and perform expanded functions legal in the State of Michigan.

• Demonstrate competency in performing clinical and support treatments to include collecting diagnostic and treatment data.

• Demonstrate with competency managing proper infection control and hazard management protocol.

• Demonstrate with competency taking diagnostic radiographs proficiently related to exposure, processing, mounting and evaluation.

• Understand and demonstrate proficiency in carrying out routine dental office procedures to include computer data entry, scheduling, and records management.

• Understand regulations governing the legal and ethical boundaries of the profession as they apply to ADAA Code of ethics and HIPAA guidelines while modeling professional behaviors, ethics and appearance.

• Demonstrate competency in providing patient oral health instructions

Admission Requirements

The program begins each Fall semester and part-time students are accepted on a space availability basis. Student must have the Program’s approval, a completed application, and other required information submitted by the due date.

If there are openings after the application deadline, any remaining openings will be filled on a first come basis to qualified applicants.

Students must complete the following:

• Must be 18 years of age or older.

• Declare intent to enter the Dental Assisting Program on the WCCCD Application for Admission form or change intent at the Admission’s Office.

• Declare intent to enter the Dental Assistant Program by submitting an Allied Health Application.

• Demonstrate reading and math comprehension at Freshman English and Math levels via the COMPASS test. Based on the results of the test pre-requisite courses may be required.

• Documentation of current immunizations or immunity for tetanus, MMR and Varicella.

• Receive the Hepatitis B vaccination or declare intent to receive or decline the vaccination.

• Must test negative on a TB test.

• Documentation of current medical examination.

• Complete CPR training for the Health Care Provider (A CPR course is offered by the College).

• Obtain a Criminal Background Check (through the program).

• Demonstrate reading and math comprehension at Freshman English and Math levels via the COMPASS test.

Degree Requirements

Students must complete all course work with a grade of “C” or better to meet graduation requirements.

DENTAL HYGIENE
Associate of Science Degree

About the Program
The Dental Hygiene Associate of Science degree program at Wayne County Community College District is a prominent career for individuals interested in working as an important part of the dental healthcare team. The dental hygienist learns specialized clinical skills providing direct patient care and may be responsible for community distribution of information related to the prevention of oral diseases and the maintenance of oral health. The demand for dental services will continue to grow due to the success of preventive dentistry in reducing the incidence of oral diseases. Dentists will need to employ more dental hygienists to meet the increased demand for dental services.

Dental Hygienists are important members of the dental health care team. Their primary duties include the following: oral prophylaxis, including scaling, root planning and polishing, recording medical/dental history, diagnostic data collection, dental charting, oral cancer screening, oral examinations, treatment planning, root planning, expose, develop and interpret dental radiographs, apply fluoride, apply dental sealants, teach patients proper oral hygiene techniques, counsel patients about plaque control, develop individualized at home oral hygiene programs, counsel patients on the importance of good nutrition for maintaining optimal oral health and perform other clinical dental hygiene services. The Dental Hygiene program is designed to prepare students to become competent oral health clinicians and educators. Admission to the program is limited and competitive. Upon completion of this program, students are eligible to take the National Dental Hygiene and Northeast Regional Board Examinations. The Michigan Board of Dentistry may deny dental hygiene licensure to an applicant who has been convicted of a crime or is addicted to drugs or alcohol.

This program offers:
Associate of Science Degree: 82 credit hours

Program Goals
• To teach and prepare students to assume responsibility of caring for the dental patient in the prevention of dental disease in a clinical setting.
• To prepare students to successfully pass the state and national licensing examinations, as prescribed by the State Board of Dentistry, with proficiency scores that qualifies the graduate for licensure as a Registered Dental Hygienist (RDH).

Program Outcomes
• Students will be able to discern and manage ethical issues of dental hygiene practice in a rapidly changing environment.
• Synthesize information in a critical, scientific and effective manner in order to provide dental hygiene care to promote patient health and wellness.
• Provide planned educational services using interpersonal communication skills and educational strategies to promote optimal health.
• Initiate and assume responsibility for health promotion and disease prevention activities for diverse populations including patients with special needs.
• Students will be able to provide accurate, consistent and complete documentation, systematically collect, analyze and accurately record baseline data on the general, oral and psychosocial health status of a variety of clients using methods consistent with medicolegal principles.
• Collaborate with the patient and/or other health professionals to formulate a comprehensive dental hygiene treatment plan that is patient centered and based on current scientific evidence.
• Provide specialized treatment that includes preventive and therapeutic services designed to achieve and maintain oral health.
• Evaluate the effectiveness of the implemented clinical, preventive and educational services and modify as necessary.

• Understand and continually improve the knowledge, skills and values of the profession.

Admission Requirements
Admission is competitive and based on previous academic performance, test scores, letters of recommendation, an interview and fulfillment of admission requirements. Deadline for application to the program is June 1st and admission is granted prior to the Fall semester.

Students must complete the following:
• Fulfill all WCCCD admission requirements
• Possess a high school diploma or GED
• Declare intent to enter the Dental Hygiene program by submitting an Allied Health Application
• Demonstrate reading comprehension at Freshman English level via the COMPASS test after acceptance and before clinical participation students must show:
• Documentation of current immunizations or immunity for tetanus, MMR and Varicella.
• Receive the Hepatitis B vaccination or declare intent to receive or decline the vaccination
• Must test negative on a TB test
• Complete CPR training (A CPR course is offered by the College)
• Obtain a Criminal Background Check
• Documentation of a standardized dental and health examination

Degree Requirements
• Students must complete all course work with a grade of “C” or better to meet graduation requirements.

DIETETIC TECHNOLOGY

Associate of Applied Science

About the Program
The Dietetic Technology Program is an Associate of Applied Science degree program that is currently granted “initial accreditation” status by the Commission on Accreditation for Dietetics Education of the American Dietetic Association (ADA). 120 South Riverside Plaza, Suite 2000 Chicago, IL 60606-6995 (312) 899-0040 ext 5400

It is designed to prepare technicians with entry level competency in clinical nutrition, community nutrition and foodservice management. WCCCD’s Dietetic Technicians are employed in health care, business, industry and the community. Successful completion of the program enables graduates to establish eligibility to take the registration examination administered by the Commission on Dietetic Registration (CDR).

Additionally, this program is a Manage First Foundation of the National Restaurant Association. Eligible students may take national certification examinations as dietetic technicians. Certification in this field requires the completion of a bachelor’s degree in addition to graduation from a dietetic technician program.

Program Goals
• To teach and prepare students for dietetic technician positions in foodservice management and/or medical nutrition therapy.

Program Outcomes
• Students will be able to apply knowledge of body systems, medical data and nutrition research to develop nutrition strategies for clients in foodservice management and/or medical nutrition therapy.
• Use appropriate medical data, knowledge of body systems and evidence based research to design and implement nutrition care plans, conduct nutrition screenings, nutrition assessments and make appropriate referrals monitoring diverse individuals, populations and community groups within the scope of the practice.
• Apply supervisory concepts to food production including procurement, distribution/service and menu development.
• Demonstrate applied knowledge of mathematics to develop and analyze recipes, formulas and diets.
• Use appropriate written, verbal and interpersonal communication skills, medical terminology and technology when interacting with patients, clients, family members and staff.
• Understand, articulate and perform to the professional and ethical care standards and regulations governing the profession.

Admission Requirements
Admission is competitive and is based on previous academic performance, COMPASS and HOBET test scores, and the completion of all prerequisite courses with a grade of “C” or better.

To be admitted into the Dietetic Technology Program students must complete the following:
• The Dietetic Technology program requires that students complete a competency exam at the end of each program course with 80% or higher.
• Declare program intent on the WCCCD Application for Admission or change program intent at the Campus Admissions Office.
• Schedule an interview with the Faculty Discipline Coordinator at (313) 943-4054.
• Submit a program application with a declaration of intent for your career option.
• Submit a transcript (copy) or copies of grades earned for transfer and any courses completed at WCCCD.
• All courses toward the degree program must be completed with a grade of “C” or better. The deadline for applications for Fall admission is July 15; Spring admissions deadline is December 15. The program admissions committee will review applications. Students will be notified by mail within one month of the admission committee’s decision.

Degree Requirements
• Students must complete all course work with a grade of “C” or better to meet graduation requirements.

### DIGITAL MEDIA PRODUCTION

**Program Goals**

- College Certificate
  - Associate of Applied Science

**About the Program**

The Digital Media Production Associate of Applied Science degree and College Certificate program will provide students with a broad survey of the digital production tools. The students will gain a theoretical grasp of the implications of digital mass communications through various digital media production courses and hands-on experience in digital video and sound production, web design layout and design. The program may be pursued as a full-time or part-time study.

**Program Outcomes**

- To teach and provide students with a foundation in the field of Digital Media Productions as a precursor for a declared four-year degree.
- To produce students that can work with and visualize the direction of digital media.

**Certificate Outcomes**

- To provide student’s a basic foundation in digital media production.
- To develop capability in developing media projects that incorporate web design and development, computer graphics and digital video.
- To demonstrate proficiency in editing, streaming media, web animation, motion graphics, and dimensional animation.

**Admission Requirements**

- The student is required to do the following:
  - Fulfill course placement requirements based on COMPASS test.
  - Students must complete WCCCD Program Application and submit to the Campus Academic Officer.

**Degree Requirements**

- Prior to beginning the Major Requirements the student must test at the level or complete English 119 and be computer literate or complete OIS 101.

**Certificate Outcomes**

- Students will be able to create art and design projects utilizing digital media technology software.
- Demonstrate competency in developing media projects that incorporate web design and development, computer graphics and digital video.
- Demonstrate proficiency in editing, streaming media, web animation, motion graphics, and dimensional animation.

**Certificate Total Hours**

- 33 credits

**Early Childhood Education: Child Development Associate (CDA)**

- College Certificate
  - Associate of Applied Science

**About the Program**

The Early Childhood Education Program offers a College Certificate as a Child Development Associate (CDA) and an Associate of Applied Science degree in Early Childhood Education. The program at Wayne County Community College District prepares students to work as child care administrators and to be teachers and caregivers in an early childhood settings. It combines hands-on fieldwork in area centers with related academic work at the College.

The CDA Training program is designed for the childcare worker wishing to become a Child Development Associate (CDA). The CDA Credential is independently awarded by the National Council for Professional Recognition to those demonstrating competence in their work with children in early education and childcare programs. Formal training is required for this credential.

**Child Development Associate (CDA) - Focuses on child development methods and strategies to motivate learning in the five developmental areas. Graduates become responsible for the care and education of children up to five years old by creating and maintaining a safe and healthy learning environment, guiding behavior, planning curricula, implementing learning activities, and working cooperatively with staff and parents.**

**This program offers:**

- Credential Certificate: **18-21** credit hours
  - Early Childhood Education Associate of Applied Science: **21** credit hours

*Selected WCCCD courses will transfer to some colleges and universities to meet minor requirements for an Elementary Education Certification — Early Childhood Endorsement. (See a counselor or academic advisor for more information)*

**Child Development Associate (CDA) Certificate Goals**

- To prepare students individual credentialed towards the State of Michigan’s Early Childhood Education Permit.
- To provide students with a foundation in child development theory to examine program philosophy goals, classroom design, teacher/child interaction, curriculum planning and implementation, assessment of the young child, involvement of the family/community as well as issues of diversity.
- To teach students methods of formulating lesson plans that fosters children’s personal, social, physical, cognitive and creative development.
- To teach students elements of designing and assessing a learning environment using teaching strategies based upon child development and learning theory.

**Early Childhood Program Outcomes**

- Students will be able to successfully pass the State of Michigan’s Early Childhood Education Permit exam with a passing score of 70% or higher.
- Demonstrate knowledge of child development theory and its application to Early Care and Education by identifying key developmental theorists and recognizing children’s developmental stages.
- Demonstrate competence in facilitating the development of an individual child’s stages of progression that promotes physical, cognitive and or socio-emotional development.

**Admission Requirements**

- To be admitted into the Child Care program a student must:
  - Fulfill all WCCCD admission requirements.
  - Declare program intent on the WCCCD admission application or change program intent at the campus admission office.
  - Fulfill course placement requirements based on COMPASS test.
  - Submit a Program application to the Campus Academic Officer before the ninth week of the fall or spring semester.
  - Students must complete all course work with a grade of “C” or better to meet graduation requirements.

*Continued on next page.*

### ELECTRICAL ELECTRONICS ENGINEERING TECHNOLOGY

**College Certificate**

**Associate of Applied Science Degree**

**About the Program**

The Electrical Electronics Engineering Technology Associate of Applied Science and College Certificate degree program prepares students for a wide range of job opportunities in the installation and maintenance of electronic equipment in manufacturing, research, development, medicine and communications.

The Electrical Electronics Engineering Technology program prepares students for various International Society of Certified Technician (ISCET) certification exams.

**This program offers:**

1. Electrical Electronics Engineering Technology A.A.S. Degree: 64 credit hours
2. Electrical Electronics Engineering Technology College Certificate: 32 credit hours

Concentrations in the Electrical Electronics Engineering Technology include:

- Computer Technology A.A.S. Degree: 65 credit hours
- Industrial Electronics & Control Technology A.A.S. Degree: 64 credit hours
- Telecommunications Technology A.A.S. Degree: 64 credit hours

Program Goals

- To assure that students are provided educational experiences in the areas of electrical and electronics installation and maintenance.
- To prepare students to successfully pass the International Society of Certified Technician (ISCET) certification exams.
- To provide transferability to four-year universities offering BS in electrical electronics, engineering technology and vocational teaching certificates.

**Program Outcomes**

- Students will be able to successfully pass the International Society of Certified Technician (ISCET) certification exams with a passing score of 70% or better.
- Demonstrate proficiency in reading and interpreting electrical drawings, electronic schematics and building and machinery blueprints.
- Repair, maintain, install, upgrade, lay out and modify industrial electrical/electronic equipment and manufacturing control systems.
- Identify, troubleshoot and repair hardware and software problems.
- Effectively communicate through verbal, written and drawing documentation in a team environment.
- Students with prior electrical electronics, licenses, training and experience may be qualified to waive certain classes.
- Electrical Electronics Programs are approved by FAA (Federal Aviation Administration) as one of the #1 CT colleges in the country.

**Certificate Goals**

- Students will be able to successfully pass the International Society of Certified Technician (ISCET) certification exams with a passing score of 70% or better.
- To provide students a foundation in electrical and electronics installation and maintenance.

**Certificate Outcomes**

- Prepare students to successfully pass the International Society of Certified Technician (ISCET) certification exams with a passing score of 70% or better.
- Proficiently make basic installation, repair and maintenance.
- Communicate effectively through verbal, written and drawing documentation in a team environment.

PROGRAM CURRICULA

ELECTRICAL ELECTRONICS ENGINEERING TECHNOLOGY

Admission Requirements

- Individuals interested in the Electrical Electronics Engineering Technology program are required to fulfill the following requirements:
- Fulfill all WCCCD admission requirements.
- Declare intent to enter this program on the WCCCD Application for Admission or change intent at the Admissions Office.
- Fulfill course placement requirements based on COMPASS test.
- Students must complete WCCCD Program Application and submit to the Campus Academic Officer during the semester they are enrolled in EE 101 Direct Current Fundamentals – 4 credit hours.
- Students with prior electrical electronics, licenses, training and experience may be qualified to waive certain classes.

Degree Requirements

- Students must complete all course work with a grade of “C” or better to meet graduation requirements.

Electrical Electronics Engineering Certificate Total: 32

Note: Certificate total hours may not include prerequisites.

About the Program

The Electrical/Electronics Engineering Technology, Computer Technology, Associate of Applied Science degree program prepares students for several IT industry careers by providing in-depth exposure to computer hardware and operating systems. Students learn the functionality of hardware and software components as well as suggested best practices in maintenance, and safety issues. Through hands on activities and labs, students learn how to assemble and configure a computer, install operating systems and software, and troubleshoot hardware and software problems. This program helps students prepare for CompTIA’s A+ certification, Microsoft Certified Systems Administrator exams.

This program offers:

- Associate of Applied Science: 65 credit hours

Program Goals

- To assure that students are provided educational experiences in the areas of electrical and electronic computer technology.
- To teach students the functionality of computer hardware and software components maintenance and safety.
- To produce students who can critically think and troubleshoot hardware and software problems.
- To prepare students to successfully pass the CompTIA’s A+ certification, Microsoft Certified System Engineer, and Microsoft Certified Systems Administrators exams.

ELECTRICAL ELECTRONICS ENGINEERING TECHNOLOGY: COMPUTER TECHNOLOGY

About the Program

The Electrical/Electronics Engineering Technology, Computer Technology, Associate of Applied Science degree program prepares students for several IT industry careers by providing in-depth exposure to computer hardware and operating systems. Students learn the functionality of hardware and software components as well as suggested best practices in maintenance, and safety issues. Through hands on activities and labs, students learn how to assemble and configure a computer, install operating systems and software, and troubleshoot hardware and software problems. This program helps students prepare for CompTIA’s A+ certification, Microsoft Certified Systems Administrator exams.

This program offers:

- Associate of Applied Science: 65 credit hours

Program Goals

- To assure that students are provided educational experiences in the areas of electrical and electronic computer technology.
- To teach students the functionality of computer hardware and software components maintenance and safety.
- To produce students who can critically think and troubleshoot hardware and software problems.
- To prepare students to successfully pass the CompTIA’s A+ certification, Microsoft Certified System Engineer, and Microsoft Certified Systems Administrators exams.

Continued on next page.
ELECTRICAL ELECTRONICS ENGINEERING TECHNOLOGY: COMPUTER TECHNOLOGY continued

Program Outcomes

- Students will be able to successfully pass the CompTIA’s A+ certification, Microsoft Certified System Engineer, and Microsoft Certified Systems Administrators exams.
- Identify, describe and explain the steps and procedures for setting up and managing a Windows Server Active Directory Environment including identification of the Policies and Procedures associated with implementation.
- Identify, troubleshoot and repair hardware and software problems.

Admission Requirements

Individuals interested in the Computer Technology program are required to fulfill the following requirements:
- Fulfill all WCCCD admission requirements.
- Declare intent to enter this program on the WCCCD Application for Admission during the semester they are enrolled in EE 101 Direct Current Fundamentals – 4 credit hours.
- Students must complete WCCCD Program Application and submit to the Campus Academic Officer during the semester they are enrolled in EE 101 Direct Current Fundamentals – 4 credit hours.
- Students with prior electronic electives, licenses, training and experience may be qualified to waive certain classes.

Degree Requirements

- Students must complete all course work with a grade of “C” or better to meet graduation requirements.
- Identify, troubleshoot and repair hardware and software problems.

Program Outcomes

- Students will be able to identify and solve technology problems related to the development, manufacturing, installation and service of computer integrated manufacturing systems, semiconductor and microelectronic manufacturing equipment, process control equipment, robotic and other electro-mechanical systems.
- Demonstrate the ability to analyze, design, implement and maintain instrumentation, and control
- Demonstrate analysis and design proficiency in electrical circuits and analog/digital/microprocessor electronics.
- Analyze, identify and troubleshoot motor control circuits utilizing electrical diagrams.
- Identify, explain and demonstrate structured techniques used to programmable logic controller

Admission Requirements

Individuals interested in the Industrial Electronics and Controls Technology program are required to fulfill the following requirements:
- College admission requirements
- Declare their intent to enter the Industrial Electronics and Controls Technology program on the WCCCD Application for Admission Office or change their intent at the Admission Office.
- Course placement requirements based on COMPASS test results.
- Students must complete WCCCD Program Application during the semester they are enrolled in EE 101 Direct Current Fundamentals, 4 credit hours and submit to the Campus Academic Officer.

Degree Requirements

- Students must complete all course work with a grade of “C” or better to meet graduation requirements.

Program Goals

To teach and prepare students for career fields associated with the design, development, implementation, application, manufacturing, and maintenance of electrical and electronic systems. To provide students with a broad foundation in digital circuitry, programmable logic controllers, robotics, and industrial automation.

Continued on next page.
About the Program
The Telecommunications Technology is designed for students interested in all electronic media, including broadcasting, cable, satellite, internet and telephone industries. Telecommunications dominates many facets of our lives, including how we: communicate, conduct business, entertain and inform ourselves, and participate in democracy. The telecommunications curriculum explores the structure and operation of these industries as well as laws and policies that regulate their use. Graduates go on to careers in radio, broadcast cable and satellite networks; internet service providers; wired and wireless telephone companies; and other related industries.

Program Goals
- To teach students basic proficiency in the application of electric circuits, computer programming, associate software, analog and digital electronics, voice and data communications.
- To provide students with a broad foundation in designing and implementing telecommunications systems.

Program Outcomes
- Students will be able to demonstrate proficiency in the application of electric circuits, computer programming, associate software, analog and digital electronics, voice and data communications.
- Demonstrate the ability to analyze, design and implement telecommunications systems.

Admission Requirements
Individuals interested in the Telecommunications Technology program are required to fulfill the following requirements:
- Fulfill all WCCCD admission requirements.
- Declare intent to enter this program on the WCCCD Application for Admission or change intent at the Admissions Office.
- Fulfill course placement requirements based on COMPASS test.
- Students must complete WCCCD Program Application and submit to the Campus Academic Officer during the semester they are enrolled in EE 101 Direct Current Fundamentals – 4 credit hours.

Degree Requirements
- Students must complete all course work with a grade of “C” or better to meet graduation requirements.
- Program total hours may not include prerequisites.

EEE: INDUSTRIAL ELECTRONICS AND CONTROL TECHNOLOGY

Program total hours may not include prerequisites.
### EMERGENCY MEDICAL TECHNOLOGY

**About the Program**
The Emergency Medical Technology (EMT) Associate of Applied Science degree and College Certificate of Completion curriculum stresses the integration of knowledge and skills required to competently perform pre-hospital basic, limited, and advanced life support. Wayne County Community College District is a State of Michigan, Michigan Department of Community Health (MDCH) EMS & Trauma Systems approved Education Sponsor. Therefore, students that successfully meet the completion criteria for Medical First Responder, Basic EMT, EMT-Specialist or Paramedic will also receive a certificate of completion and are eligible for Emergency Medical Technology (EMT) Program certification and the National Registry for EMT's certificate of completion.

**Program Outcomes**
- Students will be able to demonstrate appropriate level of technical capability and proficiency with psychomotor skills and assessment.
- Recognize the nature and seriousness of the patient’s condition or extent of injuries to assess requirements for emergency medical care.
- Administer appropriate emergency medical care based on assessment findings of the patient’s condition.
- Properly and safely lift, move, position and transport emergency patients in the out-of-hospital setting.

**Degree Requirements**
- Successfully complete a minimum of 12 credit hours
- A felony conviction or conviction for an attempt or conspiracy to commit a felony within the past fifteen (15) years.
- Any misdemeanor conviction involving abuse, neglect, assault, battery or criminal sexual conduct within the past fifteen (15) years.

**Admission Requirements**
Students are admitted to the program each year for the Fall and Spring semesters. Students must have the Program’s approval, a completed application, and other required information submitted by the due date. If there are openings after the application deadline, any remaining openings will be filled on a first come basis to qualified applicants. Students are required to do the following:
- Fulfill all WCCCD admission requirements
- Successfully complete a minimum of 12 college credits with a “C” or better and/or have COMPASS scores that fulfill program requirements.
- Declare intent to enter the Emergency Medical Technology program on the WCCCD Application for Admission.
- Must be 18 years of age or older.
- Must complete physical exam and other health requirements.

**College Certificate Total Credits: 53**

**Emergency Medical Technology: Associate of Applied Science**

- **Program Outcomes**
  - Students will be able to demonstrate appropriate level of technical capability and proficiency with psychomotor skills and assessment as delineated in basic patient care practices in an emergency room setting.
  - Apply therapeutic and professional communication skills when working with patients, families, colleagues and other health care providers and members of the community.

**EMERGENCY ROOM MULTI-SKILL HEALTHCARE TECHNOLOGY**

- **College Certificate: Associate of Applied Science Degree**

**About the Program**

The Emergency Room Multi-Skill Health Care Technology (ERT) Associate of Applied Science Degree and College Certificate program is designed to prepare the student to work within the hospital and urgent health care environment. Students will find employment opportunities with various hospital emergency departments, special care units and urgent care centers. Emergency Room Technicians receive specialized training in hospital procedures and protocols. Practical skills include insertion of Foley catheters, EKG, phlebotomy, 12 lead cardiac monitoring, sterile procedures, insertion of nasal gastric tubes and many other skills.

**Program Goals**

- To teach and prepare students for advanced responsibilities in the emergency room assisting nurses and health care professionals in providing basic patient care.

**Program Outcomes**

- Students will be able to demonstrate appropriate level of technical capability and proficiency with psychomotor skills and assessment as delineated in basic patient care practices in an emergency room setting.
- Apply therapeutic and professional communication skills when working with patients, families, colleagues and other health care providers and members of the community.

*Continued on next page.*
To provide the Basic EMT with the principle and techniques necessary to provide additional patient care within a hospital, urgent care, or primary health care environment.

- Prepare graduates to successfully obtain employment in a hospital, urgent care or primary health care environment.
- Support the profession by preparing graduates who are competent Emergency Room Multi-Skilled Technicians and as members of the health care team.

Admission Requirements

Students are admitted to the program each year for the Fall and Spring semesters. Must have the Program’s approval, a completed application, and other required information submitted by the required due date. If there are openings after the application deadline any remaining openings will be filled on a first come basis to qualified applicants.

Students are required to do the following:

- Fulfill all WCCCD admission requirements
- Successfully complete a minimum of 12 college credits with a “C” or better and/or COMPASS scores that fulfill program prerequisites.
- Declare intent to enter the Emergency Medical Technology on the WCCCD Application for Admission.
- Must be 18 years of age or older.
- Must complete physical exam and other health requirements.
- Complete and pass background check.

Degree Requirements

- Students must complete all course work with a grade of “C” or better to meet graduation requirements.

Entrepreneurship College Certificate

About the Program

The Entrepreneurship College Certificate program is designed for those individuals who have, or desire to have, their own business. Emphasis is on successfully creating and sustaining a competitive advantage in starting, managing and growing a small business. This program focuses on the preparation needed for small business ownership.

College Certificate Goals

- To teach students basic principles, concepts and procedures necessary to start a business and/or grow an existing small business.
- To provide students a foundation of strategic planning, decision making, critical thinking, communication skills and resources in starting and/or growing an existing small business.

College Certificate Outcomes

- Students will be able to apply knowledge of what it takes to start a new business including the basics of finance, marketing and management.
- Demonstrate and apply leadership and workplace relationship skills when communicating with customers, employees, suppliers, etc. specific to the field.
- Understand and apply a working knowledge of legal issues of operating a small business.
- Understand and demonstrate knowledge in completing a comprehensive business plan that will enable the business to secure adequate funding.
- Effective use of written, oral, listening and electronic communication skills in interactions within the office environment.

ENROLLMENTSHIP continued

Admission Requirements
Students are required to do the following:
• Possess a high school diploma or GED
• Fulfill all WCCCD admission requirements
• Declare intent to enter this program on the WCCCD Application for Admission or change intent at the Admissions Office
• Fulfill course placement requirements based on COMPASS test.
• Students must complete WCCCD Program Application and submit to the Campus Academic Officer.

College Certificate Requirements
• Students must complete all course work with a grade of “C” or better to meet graduation requirements.

FACILITY MAINTENANCE

• College Certificate
  Associate of Applied Science Degree

About the Program
The Facility Maintenance Associate of Applied Science degree and College Certificate program prepares the student for immediate employment as a facility maintenance technician, maintenance and stationary engineer, and facility maintenance manager at health care institutions, large office towers, apartment complexes, professional buildings, multiuse facilities, plants, government and educational building, etc.

Students will be able to perform work pertaining to carpentry, plumbing, ground maintenance, electrical, general maintenance of heating, ventilation and air conditioning, refrigeration (HVA/R) and operation and complete maintenance of boiler plants. The program also prepares students to take local and State of Michigan examinations for obtaining license(s) as Mechanical Maintenance and Mechanics Education and Certification for Health care (MECH) State of Michigan. The certificate will fulfill the competency requirements for the Joint Commission on Accreditation of Hospital Organization (JCAHO) for facility maintenance training and background may be eligible to waive certain courses.

This program offers:
Associate of Applied Science: 60 credit hours
College Certificate: 30 credit hours

Program Goals
• To teach students to proficiency in performing electrical and HVAC/R (heating, ventilating, air conditioning and refrigeration) systems maintenance and repairs in multi-purpose buildings and facilities.

Program Outcomes
• Students will be able to demonstrate proficient use of hand tools, equipment and gauges commonly used in the repair and troubleshooting of commercial HVAC/R (heating, ventilating, air conditioning and refrigeration) systems.
• Describe, demonstrate and apply the principles of operation of basic components and systems used in meeting specific needs in conditioning air, heating air, providing ventilating and refrigerating objects.
• Interpret and apply the EPA regulatory laws in properly handling refrigerants and other environmentally hazardous materials used with HVAC/R systems.
• Demonstrate the proper selection and application of HVAC/R components in maintenance of a commercial system.
• Solve basic technical problems encountered in commercial refrigeration, cooling and heating equipment.
• Effectively demonstrate proficient verbal communication skills with individuals and teams.

Certificate Goals
• To provide students a basic foundation in performing electrical and HVAC/R (heating, ventilating, air conditioning and refrigeration) systems maintenance and repairs.

Certificate Outcomes
• Demonstrate proficient use tools, equipment and gauges commonly used in the repair and troubleshooting of commercial HVAC/R (heating, ventilating, air conditioning and refrigeration) systems.
• Demonstrate applied competency in the proper selection and application of HVAC/R components in maintenance of a commercial system.
• Solve basic technical problems encountered in commercial refrigeration, cooling and heating equipment.

Admission Requirements
Students are required to do the following:
• Fulfill all WCCCD admission requirements
• Declare intent to enter this program on the WCCCD Application for Admission or change intent at the Admissions Office.
• Fulfill course placement requirements based on COMPASS test.
• Students must complete WCCCD Program Application and submit to the Campus Academic Officer.

Degree Requirements
• Students must complete all course work with a grade of “C” or better to meet graduation requirements.

FIRE PROTECTION TECHNOLOGY

- College Certificate
  Associate of Applied Science Degree

About the Program
The Fire Protection Technology Associate of Applied Science degree program addresses the constant change and growing complexities of modern living and the environment as it pertains to fire suppression. There is a demand for college-trained people in the various fields of Fire Protection. The degree addresses the needs of a person wanting to be an entry level firefighter, those desiring advancement within their fire career as well as those individuals seeking fire related jobs within companies. The program adheres to the National Fire Academy’s Fire and Emergency Services Higher Education (FESHE) model curriculum. WCCCD is a Regional Training Center certified through the Michigan Fire Fighters Training Council.

Admission Requirements
Students are admitted to the program each year for the Fall, Spring and Summer semesters. Students must have the Program’s approval, a completed application, and other required information submitted by the due date. If there are openings after the application deadline, any remaining openings will be filled on a first come basis to qualified applicants.

Students are required to do the following:
- Fulfill all WCCCD admission requirements.
- Complete any prerequisite course with a “C” or better.
- Declare intent to enter the Fire Protection Technology program on the WCCCD application.
- Must be 18 years old on the first day of the Fire Suppression class (FPT 110).
- Successfully complete a minimum of 12 college credits with a “C” or better and/or have COMPASS scores that fulfill program requirements.
- Must submit a completed “Public Safety Program Application” packet.
- Have access to a computer and the internet.

This program offers:
- Associate of Applied Science: Fire Administration 62 credit hours
- Associate of Applied Science: Fire Suppression 62 credit hours
- College Certificate: Fire Protection Technology 30 credit hours

Program Goals
- To instruct students on the competencies and skills implored in the principles of fire development, cause and prevention.
- To teach students advanced principles of fire chemistry, arson and investigation and fire health and safety according to the National Fire Protection Association (NFPA) guidelines.
- To prepare entry level students to successfully pass the State of Michigan Fire Fighter Certification exam with a proficiency score of 70% or higher.

Program Outcomes
- Students will be able to articulate and apply the principles of fire control through the utilization of personnel, equipment and technological agents in fire management.
- Demonstrate an understanding of the principles of fire development, cause and prevention.
- Demonstrate a working knowledge of fire ground strategy and tactics.
- Effectively use written, oral, listening and electronic communications consistent with the fire service and related professional environment.
- Understand and articulate the regulations governing legal and ethical boundaries of the profession.
- Provide students with general education courses to competently and effectively use written/oral communication, computation, governmental systems, general science and humanities skills.

Certificate Goals
- To provide basic instruction on the competencies and skills in the principles of fire protection technology.

Certificate Specialty Degree Program Outcomes
- Demonstrate basic and advance fire fighter competencies and skills.
- Demonstrate knowledge of fire protection systems.
- Demonstrate knowledge of hazardous materials.
- Identify elements of building construction and how fire will effect construction.
- Demonstrate basic communication skills.
- Exhibit professional and ethical behavior consistent with the profession.

Admission Requirements
Students are admitted to the program each year for the Fall, Spring and Summer semesters. Students entering the Fire Suppression track must have the Program Director’s approval, a completed application, and other required information submitted by the due date. If there are openings after the application deadline, they will be filled on a “first-come” basis to qualified applicants.

Continued on next page.
Students are required to complete the following:

- Fulfill all WCCCD admission requirements.
- Possess a high school diploma or GED and/or successfully complete prerequisite courses with a grade of "C" or better.
- Declare intent to enter the Fire Protection Technology program on the WCCCD admission application.
- Fulfill course placement requirements based on COMPASS test OR have completed 12 credits or more of college courses with a grade of "C" or better.
- Must be 18 years of age or older on the first day of class for Fire Suppression.
- Access to the Internet.
- Ability to access a Fire Department. (does not require employment or membership, only the ability to contact for information, if necessary).

**FIRE PROTECTION TECHNOLOGY continued**

**FOODSERVICE SYSTEMS MANAGEMENT**

- College Certificate Associate of Applied Science Degree

**About the Program**

The Foodservice Systems Management Associate of Applied Science degree and College Certificate program offers career opportunities across a broad spectrum of options that includes schools, hotels and restaurants, hospitals, nursing homes, extended care and assisted living communities, correction facilities, casinos, resorts, etc. Whenever people eat in groups, there is an opportunity for a position as a foodservice manager. The Foodservice Systems Management program is designed to train the beginning student, as well as those presently employed individual who is seeking advancement in the foodservice industry. Prepare yourself for a management position by gaining the knowledge and skills in volume food preparation, menu design; cost control, HAACP purchasing and management of human and material resources. Graduates qualify to take the examination for the Foodservice Management Professional (FMP) credential and level-one certification through the American School Foodservices Association (ASFSA).

**Program Goals**

- To teach and prepare students to comprehend, apply and integrate principles of foodservice production and management.

**Program Outcomes**

- Students will be able to demonstrate a mastery of the knowledge, techniques, skills and standards in foodservice management.
- Effectively integrate and apply foodservice occupational specific competencies e.g. product and menu development, facilities design and marketing within a problem solving context.

*Continued on next page.*
FOODSERVICE SYSTEMS MANAGEMENT continued

- Demonstrate accuracy in applying competencies in purchasing, cost control management and labor cost control.
- Demonstrate knowledge and application of sanitation, safety and personal hygiene.
- Demonstrate ability to work as a team member in a group setting towards a common goal.
- Effective use of written, oral, listening and electronic communication in a foodservice management environment.

Certificate Goals
- Students will be able to proficiently apply foodservice sanitation principles as it relates to the profession.
- Demonstrate the proper application and understanding of cooking methods.
- Demonstrate an applied understanding of calculating costs and apply procedures in order to run a cost effective foodservice establishment.

Certificate Outcomes
- Demonstrate the proper application and understanding of cooking methods.
- Demonstrate an applied understanding of calculating costs and apply procedures in order to run a cost effective foodservice establishment.
- Demonstrate ability to work as a team member in a group setting towards a common goal.
- Effective use of written, oral, listening and electronic communication in a foodservice management environment.

Admission Requirements
Admission to certificate or short-term training courses is granted on a “first come” basis. Students are required to do the following:
- Fulfill all WCCCD admission requirements
- Possess a high school diploma or GED
- Fulfill course placement requirements based on COMPASS test results
- Complete any required prerequisite courses with a grade of “C” or better.

In addition, students who wish to complete the requirements for the Associate of Applied Science degree must do the following:
- Declare intent to enter the Foodservice Systems Management program on the WCCCD admission application.
- Schedule an interview with the Discipline Chairperson
- Pass required sections of the Health Occupation Basic Entrance Test (HOBET)
- Submit a Program Application form with a declaration of intent for your career option.
- Submit a transcript (copy) of grades earned for transfer and any courses completed at WCCCD
- Complete required sections of the Health Occupation Basic Entrance Test (HOBET)
- All courses toward the degree program must be completed with a grade of “C” or better.

The deadline for applications for Fall admission is July 15; Spring admissions deadline is December 15. The program admissions committee will review applications. Students will be notified by mail within one month of the admission committee’s decision.

**PROGRAM TOTAL | 63 |
FORENSIC PHOTOGRAPHY

• College Certificate

About the Program
The Forensic Photography College Certificate program is designed to provide students with the technical skills necessary to photographically preserve crime scenes and items of evidence, from both technical and legal standpoints. The Forensic Photography program provides students with the necessary skills needed in the principles of composition, focus, exposure, color theory, and lighting. The program enables students to work in front of the camera, photography studio, and computer based processing lab. The program addresses the need for an alternative career track for students that work in crime scene investigation, criminal justice, homeland security, fire safety, as well as, other evidence gathering related occupations. There is a demand for individuals that have the skills and talents as a photographer or a computer based digital imaging specialist.

College Certificate Goals
• To provide students with the general principles involved in the scientific approaches involved in the recognition, documentation and evidence production of forensic photography.
• To expose students to the legal constraints and ethical issues of the criminal justice system.
• To provide students with basic training and hands-on experience related to the fundamental techniques of forensic photography as it relates to career tracks including criminal justice, homeland security and others.

College Certificate Outcomes
• Students will be able to analyze, interpret and demonstrate the anthropological ability to properly collect, preserve and document specimens via forensic photography.
• Demonstrate an applied understanding of the role of the forensic entomologist in the moral and legal systems of our society.
• Identify, detail and explain the process for preparing case reports with a 70% proficiency rate or higher.

Certificate Requirement
• Students must complete all course work with a grade of “C” or better to meet graduation requirements.

GEOTHERMAL SYSTEMS TECHNOLOGY

• College Certificate

About the Program
The Geothermal Systems Technology Certificate is designed to provide students with theoretical knowledge and practical application experiences necessary for a sustainable career in the Heating, Ventilation and Air Conditioning, (HVAC) industry where ground source heat energy is used for heating and cooling the interior of a building. Students acquire hands-on skills in troubleshooting, maintenance, installation, operation, and repair and replacement of related equipment.

Students will focus on exterior field work and interior mechanical equipment installations. Exterior work includes boreholes, ground heat exchangers, header systems, and excavation. Interior work includes pressure testing, manifolds and connections to the ground source heat pump equipment. Student will also be introduced to load calculations and blueprint reading for designing geothermal systems.

Certificate credits may be combined with additional coursework to enhance the traditional HVAC (Heating, Ventilation & Air Conditioning) degree, transfer and associate programs at WCCCD. Certificate credits also may be combined with additional training, job experience and/or professional examinations to qualify for certification by national renewable energy institutions. Students completing the WCCCD Geothermal Systems Technology Certificate Program are eligible for certification with the International Ground Source Heat Pump Association as an Accredited Installer.

Incumbent HVAC workers and other technical professionals are encouraged to investigate how a Geothermal REHC Certificate may relate to their current work or business practices.

College Certificate Goals
• To teach and provide students with the knowledge and skills for entry-level employment opportunities as technicians in the Heating, Ventilation and Air Conditioning, (HVAC) industry.
• To provide current practitioners with continued learning education in renewable energy/energy efficiency field as a precursor towards a two-year associates degree or four-year baccalaureate degree program.

College Certificate Outcomes
• Students will be able to demonstrate basic principles of energy efficiency and conservation in the areas of Heating, Ventilation and Air Conditioning, (HVAC) industry.
• Identify, troubleshoot, repair and maintain proper equipment efficiency in the efficient maintenance, installation, operation, repair and replacement of related equipment.

Admission Requirements
Students are required to do the following:
• Fulfill all WCCCD admission requirements
• Fulfill course placement requirements based on COMPASS test.
• Students must complete WCCCD Program Application and submit to the Campus Academic Officer.

Degree Requirements
• Students must complete all course work with a grade of “C” or better to meet graduation requirements.

Continued on next page.
## Geothermal Systems Technology

**About the Program**

The Geothermal Systems Technology program is designed to prepare students for direct service occupations in the care of seniors. Students are trained for positions in counseling, case management, and program administration. The job opportunities are available in diverse locations, such as housing complexes, nursing and congregate care facilities, adult day care centers, and mental and health agencies. This program explores the normal processes of aging and related social, legal, and economic issues.

### Program Goals

- To prepare students to competently and ethically serve the gerontology community as a highly skilled care provider.
- To provide students with a multidisciplinary approach to understanding aging from a social, psychological, economic, physical, and applied practice perspective.

### Program Outcomes

- Students will have knowledge of the health and biological aspects of aging, wellness strategies, and chronic illnesses common to the elderly.
- Understanding and knowledge regarding mental health as related to aging, later life transitions, mental illness, and treatment.
- Work effectively as an advanced care provider with diverse individuals and/or groups of older adults with cognitive decline, dementia, and other challenging behavioral and cognitive conditions in long-term care, adult care, home, and community settings.
- Demonstrate knowledge of critical thinking skills when applying best practice services and intervention techniques for dealing with challenging cognitive and behavioral issues.

## Gerontology

**About the Program**

The Gerontology Associate of Applied Science Degree and Certificate programs are designed to prepare students for direct service occupations in the care of seniors. Students are trained for positions in counseling, case management and program administration. The job opportunities are available in diverse locations, such as housing complexes, nursing and congregate care facilities, adult day care centers, and mental and health agencies. The program explores the normal processes of aging and related social, legal, and economic issues.

### Program Goals

- To proficiently prepare students to competently and ethically serve the gerontology community as a highly skilled care provider.

### Program Outcomes

- Students will have an understanding and knowledge regarding mental health as it relates to aging, later life transitions, mental illness, and treatment.
- Effectively use written, oral and listening skills when following care plans, providing appropriate documentation and working collaboratively with all stakeholders, e.g., multidisciplinary teams, medical and healthcare professionals, family and community members.
- Understand, articulate and adhere to the professional and ethical care standards and regulations governing the profession.
- Effectively use written, oral and listening skills when following care plans, providing appropriate documentation and working collaboratively with all stakeholders, e.g., multidisciplinary teams, medical and healthcare professionals, family and community members.

### Admission Requirements

Students are admitted to the program each year in the fall, spring, and summer semesters. Students must have the Program’s approval, completed application, and other required information submitted by the due date. If there are openings after the application deadline, any remaining openings will be filled on a “first-come” basis to qualified applicants. Students are required to do the following:

- Declare intent to enter the Gerontology Program on the WCCCD Application for Admission or change intent at the Admissions office.
- Fulfill course placement requirements based on COMPASS test.
- Students must complete WCCCD Program Applications during the semester they are enrolled in the GER 110, Introduction to Study of Aging course and submit to the Campus Academic Officer.

### Degree Requirements

- Students must complete all course work with a grade of “C” or better to meet graduation requirements.

**Certificate Outcomes**

- Students will have an understanding and knowledge regarding mental health as it relates to aging, later life transitions, mental illness, and treatment.
- Effectively use written, oral and listening skills when following care plans, providing appropriate documentation and working collaboratively with all stakeholders, e.g., multidisciplinary teams, medical and healthcare professionals, family and community members.
- Understand, articulate and adhere to the professional and ethical care standards and regulations governing the profession.

### Admission Requirements

Students are admitted to the program each year in the fall, spring, and summer semesters. Students must have the Program’s approval, completed application, and other required information submitted by the due date. If there are openings after the application deadline, any remaining openings will be filled on a “first-come” basis to qualified applicants. Students are required to do the following:

- Declare intent to enter the Gerontology Program on the WCCCD Application for Admission or change intent at the Admissions office.
- Fulfill course placement requirements based on COMPASS test.
- Students must complete WCCCD Program Applications during the semester they are enrolled in the GER 110, Introduction to Study of Aging course and submit to the Campus Academic Officer.

### Degree Requirements

- Students must complete all course work with a grade of “C” or better to meet graduation requirements.

**GRAPHIC DESIGN TECHNOLOGY**

- **College Certificate**

**About the Program**

The Graphic Design Technology College Certificate program has been developed to prepare students for entry-level positions in various industries that require computer-aided desktop publishing and graphic design applications. This program gives students a solid foundation in basic concepts and parallels today's latest graphic design technology. After receiving the foundations in art, computer literacy and basic math, the student will receive extensive training in all aspects of Adobe Creative Suite 2.

**College Certificate Goals**

- To develop student's oral, written and visual communication skills in graphic design technology.
- To provide a basic foundation of the principles of computer-aided desktop publishing design in print and visual media.

**College Certificate Outcomes**

- Students will be able to demonstrate sound principles of basic visual perception evident in their graphic design work.
- Define, identify and produce denotative and connotative messages in graphic designs, logos, illustrations and photographs.
- Define, identify and implement design strategy and critical thinking techniques for visual problem solving in visual communication that addresses client needs.
- Demonstrate proficiency in various graphic design, publishing and Web design technologies.

**Admission Requirements**

- Fulfill all WCCCD admissions requirements.
- Possess a high school diploma or GED.
- Submit a transcript (copy) of grades earned for transfer in any course completed at WCCCD.
- Submit a Program Application form with a declaration of intent for the career option in Graphic Design.
- Fulfill course placement requirements based on the COMPASS Test.

**Certificate Requirements**

- Students must complete all course work with a grade of “C” or better to meet graduation requirements.

**HEATING, VENTILATION, AIR CONDITIONING (HVAC)**

- **College Certificate**

**Associate of Applied Science Degree**

**About the Program**

The Heating, Ventilation and Air Conditioning (HVAC) Associate of Applied Science degree and College Certificate degree program provides an opportunity for students to develop their skills and competencies for entry-level positions in a variety of related fields. The curriculum focuses on the ability to maintain, install and repair climate control devices in residential, industrial and commercial buildings. The program provides students with training in the layout and design of cooling and heating systems, the use of the latest tools, gauges and testing equipment used in the field, troubleshooting and inspection of equipment. The program prepares students for state and local licensing exams. Students with prior HVAC training and experience background may be eligible to waive certain courses.

**This program offers:**

- Associate of Applied Science: 67 credit hours
- College Certificate: 30 credit hours

**Program Goals**

- To teach students the principles and technical application of installing, air and cooling systems according to Energy Service Company (ESCO) industry standards.

**Program Outcomes**

- Students will be able to exhibit knowledge of basic principles of electricity, electrical current, circuitry and air conditioning devices.
- Complete the Environmental Protection Agency certification to handle refrigerants.
- Describe and apply refrigeration theory and refrigeration cycle, troubleshooting, diagnose and repair sealed systems.

Continued on next page.
HEATING, VENTILATION, AIR CONDITIONING (HVAC) continued

Certificate Goals
- Demonstrate proper application and use of tools, test equipment, safety procedures, safety techniques of basic shop tools used in the refrigeration and air condition industry.
- Apply mathematical, reading, and communication skills essential to the HVAC service industry.
- Apply and describe the sequence of operation for industrial systems.
- Exhibit knowledge and hands-on ability to perform electrical repairs in an efficient and safe manner.
- Exhibit knowledge and hands-on ability to perform soldering and brazing techniques in a safe manner.
- Demonstrate proper application and use of tools, test equipment, safety procedures, safety techniques of basic shop tools used in the refrigeration and air condition industry.
- Exhibit knowledge of safety and equipment used in HVAC field.
- Distinguish quality standards of products commonly used in professional HVAC operations and install HVAC equipment compliant with local codes.

Certificate Outcomes
- Students will be able demonstrate knowledge of basic principles of electricity, electrical current, circuitry and air conditioning devices.
- Describe and apply refrigeration theory and refrigeration cycle, troubleshoot, diagnose and repair sealed systems.
- Demonstrate proper application and use of tools, test equipment, safety procedures, safety techniques of basic shop tools used in the refrigeration and air condition industry.
- Exhibit knowledge of safety and equipment used in HVAC field.

Admission Requirements
Students are required to do the following:
- Fulfill all WCCCD admission requirements
- Declare intent to enter the HVAC Program on the WCCCD Application for Admission or change intent at the Admissions office.
- Fulfill course placement requirements based on COMPASS test.
- Students must complete WCCCD Program Application during the semester they are enrolled in any HVA course to the Campus Academic Officer.

Degree Requirements
- Students must complete all course work with a grade of “C” or better to meet graduation requirements.

HEMODIALYSIS PATIENT CARE SPECIALIST

• College Certificate

About the Program
The HPCS program is designed to provide a comprehensive overview of the roots of terrorism and various international and national historic examples to understand this complex problem. Focusing on converting theory and awareness into pragmatic strategies designed to help practitioners develop informed responses to the threat of terrorism. The program will emphasize on the public, private, and legal responses to this threat and specific skills designed to help students respond strategically to real situation emergencies. Students will apply their knowledge and skills to develop specific plans at the local level to enhance public awareness and local security.

The Homeland Certificate Program in Homeland Security is designed for managers, administrators, officials and those responsible for developing and implementing strategies and procedures in Homeland Security.

College Certificate Goals
• To educate and prepare students and in-service emergency management providers on how to mitigate human physical consequences of natural and technological disasters.
• To teach and provide a general foundation of the field of homeland security management as a precursor towards the associate in applied science degree.

Continued on next page.
HOMELAND SECURITY

continued

College Certificate Outcomes

• Students will be able to apply critical thinking and decision-making concepts to emergency and disaster management issues.
• Demonstrate knowledge of critical thinking concepts to adapt intervention and assessment skills to support and supervise comprehensive, integrated and effective management in the event of natural, system-wide, or human-induced crisis.
• Develop competence in applying a code of behavior consistent with the professional attitudes and ethical standards expected of homeland security management professionals.
• Demonstrate an understanding of the importance of maintaining effective communication and collaborative relationships with all federal, state and local criminal justice organizations, human service agencies, area communities and community-based organizations.

Certificate Requirements

• Students must complete all course work with a grade of “C” or better to meet graduation requirements.

HOTEL AND RESTAURANT MANAGEMENT

About the Program

The Hotel and Restaurant Management College Certificate program prepares students for immediate employment in the hotel industry. Students will learn about the different departments within the hotel. The areas of front desk, food and beverage, housekeeping, facility management, catering and sales will be explored. The course objectives are reached by the use of case analysis, technology, leadership and marketing training. The Hotel and Restaurant Management Program is designed to prepare students for a broad range of positions across the hospitality industry. This is a 31 credit hour college certificate.

College Certificate Goals

• To prepare students for careers in the hospitality field by providing a foundation for advancement and professional development.

College Certificate Outcomes

• Students will be able to perform all entry-level functions in the rooms division, housekeeping area and food and beverage service departments.
• Apply knowledge of the hospitality industry, within a specific career track within the industry, and demonstrate the unique professional requirements pursuant to a successful career.
• Communicate effectively using written, oral and nonverbal skills including the use of technology in the gathering and presenting of information.
• Interpret and analyze information to engage critical thinking and problem solving with regard to business performance of hospitality operations and budgeting.

• Understand, articulate and demonstrate the practice of ethical, legal and safe professional behavior.
• Demonstrate effective and competent use of necessary computer and software systems specific to the industry.
• Knowledge and application of accounting principles, including, but not limited to budgets, labor, menu planning and inventories.
• Demonstrate knowledge of and proficiency in completing security audits.
• Demonstrates and presents an image of a self-confident, knowledgeable employee with excellent interpersonal skills interacting with guests, clients, and colleagues.

Admission Requirements

Students are required to do the following:

• Fulfill all WCCCD admission requirements.
• Possess a high school diploma or GED.
• Submit a transcript (copy) of grades earned for transfer in any course completed at WCCCD.
• Declare intent to enter this program on the WCCCD Application for Admission or change intent at the Admissions Office.
• Students must complete WCCCD Program Application and submit to the Campus Academic Officer.
• Fulfill course placement requirements based on COMPASS test.

Degree Requirements

• Students must complete all course work with a grade of “C” or better to meet graduation requirements.

INDUSTRIAL COMPUTER GRAPHICS TECHNOLOGY

- College Certificate
- Associate of Applied Science Degree

About the Program

The Industrial Computer Graphics Technology program provides students with career-based training in mechanical design using computer-aided drafting/design technology. To provide the necessary technical education base, the program also includes education and training in applied technical mathematics, engineering drawing, and geometric dimensioning and tolerance skills. Basic training in computer technology is included to prepare students for the two-dimensional, three-dimensional and solid modeling computer-aided design technology in the program.

All technical manufacturing and engineering design in today's high-technology business and industry uses computer-based, computer-aided design technologies that integrate the design, engineering and manufacturing design analysis, and manufacturing of complex products and product parts, subassemblies, and assemblies into a single, technically coherent process.

The Industrial Computer Graphics Technology program provides the skills and knowledge required for entry-level employment in industrial drafting, computer-aided drafting, and mechanical design fields. Emphasis is placed on the applications, procedures and techniques of principles involved in industrial drafting and design techniques. Areas include layouts and detailing in product design, tool design, die design, machine design, and advanced computer-aided design. Laboratory work in an integral part of the program for all technical courses.

This program offers:

- Associate of Applied Science: 63 credit hours
- College Certificate: 30 credit hours

Program Goals

- To provide students a foundation of the basic principles of mechanical design technology utilizing computer integration in the manufacturing industry.
- To teach students knowledge in producing engineering drawings related to manufacturing.

Program Outcomes

- Students will be able to utilize computer-based simulation and programming tools for system design and analysis.
- Demonstrate and apply knowledge of machines' principles and operation, tools and materials, requisite mathematics and physics, to select operations parameters in order to program, setup, and operate production manufacturing equipment.
- Demonstrate and apply knowledge of machines' principles and operation, tools and materials, requisite mathematics and physics, to select operations parameters to troubleshoot and diagnose both numerically/computer numerically (NC/CNC) controlled machines and programmable logic controlled (PLC) equipment.
- Demonstrate and apply knowledge of material science, machining tolerances, blueprint/schematics, and hands on skills in welding, burning, pipefitting, rigging, the use of basic hand tools and mobile equipment for the fabrication of designed parts incorporating accepted industry methods.
- Demonstrate knowledge and application of the principles of drafting, the communication of ideas, designs and visualization skills as the language of the engineering field, including the creation and interpretation of drawings using proper dimensioning and tolerancing for size and geometry, use of computer-aided drawing programs to incorporate proper industry acceptable standards and conventions.
- Apply the basic principles of equipment maintenance, troubleshooting and problem solving techniques to maintain industrial machines that ensures the production of quality products.
- Incorporate safety awareness, principles and practices of machine safety, environmental safety, chemical safety and personal/employee protection.

Certificate Goals

- To provide students a basic foundation of the principles of mechanical design technology in the manufacturing industry.

Certificate Outcomes

- Demonstrate and apply knowledge of machines’ principles and operation, tools and materials to program, setup, and operate production manufacturing equipment.
- Demonstrate and apply knowledge of machines’ principles and operation, tools and materials, requisite mathematics and physics, to select operations parameters to troubleshoot and diagnose both numerically/computer numerically (NC/CNC) controlled machines and programmable logic controlled (PLC) equipment.
- Apply the basic principles of equipment maintenance, troubleshooting and problem solving techniques to maintain industrial machines that ensures the production of quality products.
- Incorporate safety awareness, principles and practices of machine safety, environmental safety, chemical safety and personal/employee protection.

**International Business**

**About the Program**

The International Business College Certificate program provides students with the technical skills for entry-level positions as specialists in importing and exporting for the significant and growing international trade community. Most students pursue a career in import-export trading, international transportation and logistics, global supply chain management, international marketing, or various international business support services. The program offers courses that can prepare students to take the National Association of Small Business International Trade Educators Certified Global Business Professional Exam.

**College Certificate Goals**

- To teach students an applied knowledge of global concepts to assist an organization’s international strategy.
- To prepare students to successfully pass the National Association of Small Business International Trade Educators Certified Global Business Professional Exam.

**College Certificate Outcomes**

- Students will be able to apply knowledge of global concepts including geography, current affairs, history, travel and infrastructures to assist an organization’s international strategy.
- To prepare students to successfully pass the National Association of Small Business International Trade Educators Certified Global Business Professional Exam with proficiency score of 70% or higher.
- Use listening, verbal, non-verbal, written and appropriate cross-cultural communication skills utilizing appropriate technology with internal and external stakeholders to meet an organization’s global objectives.

Continued on next page.
INTERNATIONAL BUSINESS
continued

- Effectively utilize personal management skills such as project management, organization, leadership, professionalism, networking and time management to meet or exceed an organization’s global objectives.
- Use various international systems, certification, standards and software to maximize the efficiency of today’s global trade environment.
- Use listening, verbal, non-verbal, written and appropriate cross-cultural communication skills utilizing appropriate technology with internal and external stakeholders to meet an organization’s global objectives.

Admission Requirements

Students are admitted to the program each year for the Fall, Spring and Summer semesters. Students must have the Programs’ approval, a completed application, and other required information submitted by the due date. If there are openings after the application deadline, any remaining openings will be filled on a “first-come” basis to qualified applicants. Students are required to do the following:
- Fulfill all WCCCD admission requirements.
- Declare intent to enter this program on the WCCCD Application for Admission or change intent at the Admissions Office.
- Students must complete WCCCD Program Application and submit to the Campus Academic Officer.
- Fulfill course placement requirements based on the COMPASS Test.

Certificate Requirements

- Students must complete all course work with a grade of “C” or better to meet graduation requirements.
- Fulfill all WCCCD admissions requirements.
- Declare intent to enter this program on the WCCCD Application for Admission or change intent at the Admissions Office.

Library Technology: College Certificate

About the Program

The Library Technology Certificate program prepares students for employment in the library industry. Students will learn about the different departments, library types and issues within the library science. The areas of service including circulation, reference and technical services will all be explored. The course objectives are reached by the use of case analysis, research papers, technology, tours and group projects. This program offers: WCCCD certificate – 30 credit hours.

College Certificate Goals

- To provide skills for paraprofessional technicians in library and information services as a foundation of exploring the elements within library science and the users it serves.
- To enable students to critically explore and understand the roles of information technologies and resources as it relates to information access, retrieval and dissemination.

College Certificate Outcomes

- Students will be able to evaluate oral, written and electronic communication used in library and information services.
- Apply knowledge of basic technology skills including online computer automation systems; productivity software, Internet, and database searching.
- Identify, define and describe basic reference, information resource and referral procedures.
- Demonstrate mastery of, apply critical thinking solutions to and explain basic library classification systems, their use and how to catalog and retrieve materials.
- Analyze and evaluate information and utilize a variety of resources in making decisions or solving problems.
- Demonstrate appropriate methods and techniques for material processing, storage and preservation.

Admission Requirements

- Students must complete all course work with a grade of “C” or better to meet graduation requirements.
- Fulfill all WCCCD admissions requirements.
- Declare intent to enter this program on the WCCCD Application for Admission or change intent at the Admissions Office.
- Students must complete WCCCD Program Application and submit to the Campus Academic Officer.
- Fulfill course placement requirements based on the COMPASS Test.

Certificate Requirements

- Students must complete all course work with a grade of “C” or better to meet graduation requirements.
- Fulfill all WCCCD admissions requirements.
- Declare intent to enter this program on the WCCCD Application for Admission or change intent at the Admissions Office.

LOGISTICS MANAGEMENT

• College Certificate

About the Program

Logistics Management College Certificate program is a unique business management program that prepares graduates for employment in the areas of logistics management, inventory control, materials management, and distribution. The field of logistics management includes occupations such as supervisors and/or managers of transportation, storage, and/or distribution; helpers, laborers, and/or hand material movers; and transportation/machine and vehicle material movers.

The program combines core education courses with specific occupational courses in the area of customer service, supervision, supply chain management, and logistics which are designed to provide an overview of the process from product idea conception to the delivery of the product to the consumer.

College Certificate Goals

• To provide foundational understanding of the logistics support process as it pertains to product management and consumer distribution.

College Certificate Outcomes

• Students will be able to utilize purchasing vocabulary and marketing concepts related to source selection, pricing, quality, and negotiating strategies to effectively procure goods and services.
• Demonstrate, establish and maintain systems to track and control inventory.
• Evaluate and effectively translate oral, written and electronic communication in a variety of business and manufacturing environments.
• To prepare students for individual credentialing by recognized skill standards established by companies involved in various metal manufacturing trades.
• To prepare students for individual employment in the manufacturing and machine tool industry through applied knowledge of machine capabilities, material properties and computer assisted design/computer assisted manufacturing (CAD/CAM) software and its applications.
• To teach students the basic principles of industrial safety as it applies to tool operations.
• Students will be able to read, interpret and apply blueprints for production and inspection of manufactured work pieces with a 70% or better accuracy rate.
• Demonstrate setup and operation of conventional machine tools.

Admission Requirements

Students are admitted to the program each year for the Fall, Spring, and Summer semesters. Students must have the Director’s approval, a completed application, and other required information submitted by the due date. If there are openings after the application deadline, they will be filled on a “first come” basis by qualified applicants.

• Fulfill all WCCCD admission requirements.
• Declare intent to enter the Logistics Management Technology program on the WCCCD Application for Admission.
• Must be 18 years old on the first day of class.

Certificate Requirements

• Students must complete all course work with a grade of “C” or better to meet graduation requirements.

MACHINE TOOL TECHNOLOGY

• College Certificate

Associate of Applied Science Degree

About the Program

The Machine Tool Technology Associate of Applied Science degree and College Certificate programs are designed for students who will be employed in metal manufacturing related occupations. Program content will cover orientation to manufacturing, industrial blueprint reading, basic math, measurement, bench work and material science. Industrial safety will be emphasized. Operation of lathes, mills, saws, drill presses and other machine tools will be included.

This program offers:

• Associate of Applied Science: 64 credit hours
• College Certificate: 32 credit hours

Program Goals

• To prepare students for employment in the manufacturing and machine tool industry through applied knowledge of machine capabilities, material properties and computer assisted design/computer assisted manufacturing (CAD/CAM) software and its applications.
• To teach students the basic principles of industrial safety as it applies to tool operations.
• To prepare students for individual certification by recognized skill standards established by companies involved in various metal manufacturing trades.

Program Outcomes

• Students will be able to read, interpret and apply blueprints for production and inspection of manufactured work pieces with a 70% or better accuracy rate.
• Demonstrate setup and operation of conventional machine tools.

Continued on next page.
MACHINE TOOL TECHNOLOGY
continued

- Describe and demonstrate the correct application and use of precision measuring equipment commonly found in a manufacturing setting.
- Accurately perform technical math calculations (algebra, trigonometry) to establish machining conditions.
- Plan and produce accurate workpieces on a manual drill press, manual engine lathe and milling machine to required blueprint specifications using common industry methods.
- Demonstrate, explain and apply CNC/CAD/CAM machine tools and software to produce workpieces to required blueprint specifications.
- Read and comprehend technical manuals and written work instructions.
- Describe and apply occupational health and safety standards (OSHA) related to the safe work habits related to the machine tool and manufacturing industry.
- Evaluate machined components utilizing current ASME standards.

Admission Requirements
Individuals interested in the Machine Tool Technology program are required to fulfill the following requirements:
- Complete all College Admission Requirements.
- Declare their intent to enter the Machine Tool Technology program on the WCCCD Application for Admission or change their intent within the Admission Office.
- Course placement requirements based on COMPASS test results.
- Students must complete WCCCD Program Application during the semester they are enrolled in MAN 100, Shop Equipment & Tools and submit to the Campus Academic Officer.

Degree Requirements
- Students must complete all course work with a grade of "C" or better to meet graduation requirements.

Certificate Goals
- To teach students the basic principles of industrial safety as it applies to tool operations.
- To prepare students for individual credentialing by recognized skill standards established by companies involved in various metal manufacturing trades.

Certificate Outcomes
- Students will be able to read, interpret and apply blueprints for production and inspection of manufactured workpieces with a 70% or better accuracy rate.
- Demonstrate setup and operation of conventional machine tools.
- Describe and demonstrate the correct application and use of precision measuring equipment commonly found in a manufacturing setting.
- Read and comprehend technical manuals and written work instructions.
- Describe and apply occupational health and safety standards (OSHA) related to the safe work habits related to the machine tool and manufacturing industry.
- Evaluate machined components utilizing current ASME standards.

Certificate Outcomes

Degree Requirements
- Students must complete all course work with a grade of "C" or better to meet graduation requirements.
MANUFACTURING TECHNOLOGY

Associate of Applied Science Degree

About the Program
The Manufacturing Technology Associate of Applied Science program provides instruction that allows students to become familiar with and use the tools, materials, and processes needed in the manufacturing phase of industry. Students are also exposed to occupations in the manufacturing field. Program courses cover structure of industry, elements of manufacturing, mass production and automation, primary metals industry, casting metal, forging and forming metal, measuring and layout (English and/or metric), machining and finishing metal, fastening and finishing metal, cutting and shaping, assembling and finishing, and opportunities in manufacturing. Each unit includes specific objectives, student competencies and related student activities.

Program Goals
• To teach the skills necessary for the interpretation of blueprints and efficient production of manufactured parts using both numerically/programmatically controlled (NC/CNC) machinery and programmable logic controlled (PLC)

Program Outcomes
• Students will be able to demonstrate and apply knowledge of machining principles to operate, troubleshoot, diagnose both numerically/programmatically controlled (NC/CNC) machinery and programmable logic controlled (PLC) equipment.

Degree Requirements
• Students must complete all course work with a grade of “C” or better to meet graduation requirements.
• Demonstrate applied knowledge of material science, use of basic hand tools and mobile equipment for the fabrication of designed parts incorporating accepted industry methods.
• Demonstrate applied knowledge of drafting principles, interpretation of drawings and use of computer-aided drawing programs to incorporate proper industry acceptable standards and conventions.
• Perform diagnostic troubleshooting and problem solving techniques to repair and maintain industrial machines that ensures the production of quality products.
• Utilize quality system, principles, concepts and measurement and statistical tools and technology to improve quality control production and processes.
• Effective use of written, oral and interpersonal communication skills operating as a member of a diverse team of individual support and management.
• Incorporate the safety principles, practices and standards regulations as governed by the profession.

Admission Requirements
Individuals interested in the Manufacturing Technology program are required to fulfill the following requirements:
• College admission requirements.
• Declare their intent to enter the Manufacturing Technology program on the WCCCD Admission Application or change their intent within the admission office.
• Course placement requirements based on COMPASS test results.
• Students must complete WCCCD Program Admission application during the semester they are enrolled in MAN 100, Shop Equipment & Tools and submit to the Campus Academic Officer.

Degree Requirements
• Students must complete all course work with a grade of “C” or better to meet graduation requirements.

MECHATRONICS TECHNOLOGY

• College Certificate

About the Program
The Mechatronics Technology College Certificate is designed to prepare technicians through cross-training to work in the diverse fields of mechanical, electrical, and industrial automation. Mechatronics technology and industrial automation is a combination of mechanical systems, electrical systems, fluid power control systems and computer control technology with sensors, transducers and actuators which are integrated to perform some facet of manufacturing. Robot sensors, conveyor systems and software are all components of Computer Integrated Manufacturing (CIM) which is an outcome of Mechatronics. Students with this diverse set of skills are better prepared for the evolving manufacturing industry and will be trained to manufacture a product or perform a task with minimal human intervention through automation that best meets the changing needs of a global economy.

Students who complete the program are prepared for work in a variety of industries to include food processing, pulp and paper metals manufacturing and automated warehousing.

Certificate Goals
• To prepare students for employment in the manufacturing industry through applied knowledge of manufacturing a product and/or perform a task with minimal human intervention through automation.

Certificate Outcomes
• Students will be able demonstrate their knowledge and application of mechanical systems, electrical systems, thermal systems and computer control technology to manufacturing technology design problems.
• Identify and demonstrate the ability to analyze and interpret the behavior of a physical system through experimentation.

Continued on next page.
PROGRAM CURRICULA

MECHATRONICS TECHNOLOGY

continued

• Utilize computer software and hardware tools to create, predict and develop solutions to manufacturing industrial engineering problems.
• Design, model and manufacture components, systems and/or processes necessary to meet product specifications for a competitive industrial industry.

Admission Requirements
Students are required to do the following:
• Fulfill all WCCCD admission requirements
• Fulfill course placement requirements based on COMPASS test.
• Students must complete WCCCD Program Application and submit to the Campus Academic Officer.

Degree Requirements
• Students must complete all course work with a grade of “C” or better to meet graduation requirements.

MENTAL HEALTH

College Certificate Associate of Science Degree

About the Program
The Mental Health Associate of Science degree and College Certificate programs studies the fundamentals of mental health with a concentration in such areas as group process, social science, psychopathology and preventive and rehabilitative therapies. Clinical and classroom training familiarizes students with the delivery of services to adult clients. Students also study interviewing techniques and the dynamics of interpersonal relationships. The curriculum is designed for those who desire employment in human service settings.

This program offers:
Associate of Applied Science: 66 credit hours
College Certificate: 47 credit hours

Program Goals
• To prepare students to effectively serve Human Service clients and/or support human service agencies as paraprofessionals.

Program Outcomes
• Students will be able to demonstrate an applied understanding of the mental health profession to include trends in the delivery of human services and effective practices.
• Identify, analyze and suggest appropriate strategies, services or intervention strategies when developing proper case evaluation plans.
• Effectively communicate in written, verbal and interpersonal skills when managing information and utilizing data to support client services.

Admission Requirements
Students are required to do the following:
• Fulfill all WCCCD admission requirements
• Fulfill course placement requirements based on COMPASS test.
• Students must complete WCCCD Program Application and submit to the Campus Academic Officer.

Degree Requirements
• Students must complete all course work with a grade of “C” or better to meet graduation requirements.

Certificate Goals
• Provide a basic foundation for students to serve Human Service clients and/or support human service agencies as paraprofessionals.

Certificate Outcomes
• Students will be able to demonstrate an applied understanding of the mental health profession to include trends in the delivery of human services and effective practices.
• Effectively communicate in written, verbal and interpersonal skills when managing information and utilizing data to support client services.

### NUMERICAL CONTROL TECHNOLOGY

Associate of Applied Science Degree

#### About the Program

The Numerical Control Technology Associate of Applied Science degree program prepares students for entry level positions as CNC operators or programmers. Progressive, technologically modern companies need well-trained operators and programmers. Students learn modern technological methods of computer numerical control (CNC) machine tool operation, as well as in writing and editing of CNC machine programs. They also learn practical skills such as: machine setup, cutter diameter and length compensation setting, and on-site modification of existing programs. This program offers extensive hands-on machine shop training demanded by industry.

#### Program Goals

- To prepare students for professional employment in the product development and manufacturing field.
- To instruct students on how to apply critical thinking and analytical problem solving as a machine and tools operator and/or programmer.

#### Program Outcomes

- Students will be able to accurately interpret and apply blueprint readings.
- Accurately and efficiently operate, write and edit CNC machine programs with a 70% or higher proficiency rate.
- Demonstrate basic knowledge of manufacturing processes.
- Integrate CNC programming and computer-aided drafting graphics and drawings.

#### Admission Requirements

Individuals interested in the Numerical Control Technology program are required to fulfill the following requirements:

- Complete all College admission requirements.
- Declare their intent to enter the Numerical Control Technology program on the WCCCD Application for Admission or change their intent within the Admission Office.
- Course placement requirements based on COMPASS test results.
- Students must complete WCCCD Program Application during the semester they are enrolled in NC 111, Numerical Control Concepts and submit to the Campus Academic Officer.

#### Degree Requirements

- Students must complete all core coursework with a grade of "C" or better to meet graduation requirements.

NURSING

Associate of Applied Science Degree

About the Program

The Nursing program at WCCCD offers an Associate of Applied Science degree in Nursing. Graduates of the Nursing program are eligible to take the National Council Licensure Examination for Registered Nurses (NCLEX-RN). Program requirements include specific courses in the nursing major and general education. The Nursing program is designed to prepare graduates to provide nursing care as staff nurses in a variety of health care settings.

Program Goals

The goal of the nursing program is to produce accountable, adaptable generalists who are prepared to successfully take the NCLEX-RN exam and function as registered nurses in diverse care settings.

Program Outcomes

• Students will be able practice nursing with professional accountability.
• Demonstrate communication competency in professional interactions.
• Manage health care resources and use the nursing process to meet the health needs of clients.
• Demonstrate clinical reasoning when planning care for our individuals, families and groups.
• Integrate caring constructs into professional nursing activities.
• Integrate teaching and learning principles into health promotion activities for individuals, families and groups.
• Collaborate with health care team members to promote health of individuals, families and groups.
• Integrate knowledge from nursing and general education courses when providing nursing care to individuals, families and groups throughout the lifespan.

• Outcomes listed are not all-inclusive and are subject to change based on accreditation requirements.

Admission Requirements

Admission is competitive. Selection is based on previous academic performance, test scores, letters of recommendation and fulfillment of admission requirements by deadlines. Students entering this program are required to have either a high school diploma or a General Education Development diploma (GED). Prerequisite courses, the Test of Established Academic Skills (TEAS) and all other admission procedures must be completed before applying to the Nursing Program. This test is offered at WCCCD. Test scores are considered valid for 2 years if scores meet current requirements. The Nursing program admits students twice a year in the Spring and Fall.

Students are required to do the following:
• Fulfill all WCCCD admission requirements.
• Fulfill Nursing Program requirements.
• Pass a background check, drug screen and other health requirements.

Degree Requirements

• Students must complete all course work with a grade of “C” or better to meet graduation requirements.

OCCUPATIONAL THERAPY ASSISTANT

Associate of Applied Science Degree

About the Program

The Occupational Therapy Assistant Associate of Applied Science degree program is a health and rehabilitation profession providing services to people of all ages who have physical, developmental or emotional impairments. The goal of occupational therapy is to use the “occupations” of everyday life such as dressing, cooking or driving as treatment modalities in helping people gain or regain independence. The Occupational Therapy Assistant (OTA) program is designed to prepare students to become Certified Occupational Therapy Assistants (COTA). Employment opportunities include hospitals, community mental health centers, public and private schools, skilled nursing facilities, community agencies and private health care companies.

Graduates of the program are eligible to take the national certification examination given by the National Board for Certification in Occupational Therapy, Inc. (NBCOT). After successful completion of this exam, the individual will be a Certified Occupational Therapy Assistant (COTA). Most states require licensure or registration in order to practice occupational therapy. Michigan currently requires registration and qualifications are based on the results of the NBCOT exam.

The Occupational Therapy Assistant (OTA) program is accredited by the Accreditation Council for Occupational Therapy Education (ACOTE) of the American Occupational Therapy Association (AOTA), located at 4720 Montgomery Lane, P.O. Box 31220, Bethesda, MD 20824-1220. ACOTE’s telephone number c/o AOTA is (301) 652-AOTA. The National Board for Certification in Occupational Therapy, Inc. (NBCOT) address is: 12 South Summit Avenue, Ste. 100, Gaithersburg, M.D., 20877-4150; O: (301) 990-7979.

Program Goals

• To prepare student graduates with the knowledge and skills necessary to practice as an occupational therapy assistant in any of the local multicultural communities served by the District.
• To prepare student graduates that demonstrate attitudes and behaviors that reflect commitment to ethical practices and responsibilities expected of a well-qualified occupational therapy assistant.
• To prepare student graduates that exemplify and support the perspective of occupation as a vehicle to promote health and wellness in client-centered service within a multicultural society.

Program Outcomes

• Students will be able to demonstrate entry-level competency as an occupational therapy assistant when delivering OT services under the supervision of an occupational therapist.
• Demonstrate ability to participate in the assessment of occupations and evaluate positive and adverse effects on occupational performance.
• Collaborate with the occupational therapist to determine the client’s occupational performance desires and needs towards developing an intervention plan.
• Demonstrate ability to provide evidence-based interventions for health promotion, disease prevention, remediation and/or adaption of occupational participation.
• Demonstrate an appreciation of and respectful interaction with clients and co-workers of diverse ethnic/cultural backgrounds.
• Demonstrate the ability to explore and use community resources to promote occupational function of clients in least-restrictive environments.
• Recognize the ongoing professional responsibility for continuing professional development and for providing fieldwork education to future students.

OFFICE INFORMATION SYSTEMS: E-BUSINESS

About the Program
The Office Information Systems E-Business Associate of Applied Science degree and College Certificate programs are designed to prepare students for successful careers as administrative assistants, in an E-Business environment. The program will prepare students to be proficient in the use of advanced computer programs, are capable of assuming some decision-making responsibilities, and are qualified to manage a business Web site. Students in e-Business develop a breadth of knowledge related to developing an e-business, including business-to-business (B2B) and business to customer (B2C) initiatives, and understanding the key e-business technologies.

Students are introduced to a variety of topics including assessing technical infrastructure requirements, understanding the impact of evolving legal and regulatory issues, strategies for obtaining funding, management, marketing and selling.

Description: The students obtain the skill needed to understand the e-commerce world, create e-commerce web sites and conduct business online.

This program offers:
- E-Business: Associate of Applied Science: 61 credit hours
- E-Business: College Certificate: 27 credit hours

Program Goals
- To teach student’s fundamental marketing and management strategies pertaining to e-business.
- To teach students proficiency in operating key e-business technologies.
- To provide students knowledge of the financial, legal and regulatory issues in e-business.

Continued on next page.
Certification Goals
- To teach fundamental marketing and management concepts pertaining to e-business
- To provide the foundation to prepare students for a variety of certifications in the computer related industries
- To provide students knowledge of the finance and legal aspects of the office environment.
- To solve problems.
- To provide the foundation to prepare students to successfully pass the Microsoft Office Specialist certification exam administered by an independent Microsoft Office contractor.

Admission Requirements:
- Students will be able to successfully pass the Microsoft Office Specialist certification exam, given by an independent Microsoft Office contractor, with a proficiency score of 70% or higher.
- Understand and demonstrate proficiency in applying basic application of Microsoft Office suite applications to manage information and solve problems.

Program Goals
- To develop the necessary skills to successfully pass the Microsoft Office Specialist certification exam administered by an independent Microsoft Office contractor.
- To provide the foundation to prepare students to successfully pass the Microsoft Office Specialist certification exam administered by an independent Microsoft Office contractor.
- To provide the foundation to prepare students to successfully pass the Microsoft Office Specialist certification exam administered by an independent Microsoft Office contractor.
- To provide the foundation to prepare students to successfully pass the Microsoft Office Specialist certification exam administered by an independent Microsoft Office contractor.
- To provide the foundation to prepare students to successfully pass the Microsoft Office Specialist certification exam administered by an independent Microsoft Office contractor.
- To provide the foundation to prepare students to successfully pass the Microsoft Office Specialist certification exam administered by an independent Microsoft Office contractor.
OFFICE INFORMATION SYSTEMS: OFFICE SPECIALIST continued

• Demonstrate appropriate competency in interpersonal skills and attitudes for working in a business office environment.
• Select, use and implement Internet and Web search engine tools for locating information for selected projects.
• Apply critical thinking skills to solve problems through creative and appropriate methods.

Certificate Goals
• To prepare students to be proficient in and understand the functionality of Microsoft Office suite applications to manage information and solve problems.

Certificate Outcomes
• Understand and demonstrate competency in applying basic application of Microsoft Office suite applications.
• Apply critical thinking skills to solve problems through creative and appropriate methods.
• Demonstrate knowledge of and ability to implement Internet and Web search engine tools for locating information.

Admission Requirements
Students are required to do the following:
• Obtain an Education Development Plan (Plan of Work), outlining the student’s plan for program completion from an academic advisor.
• Complete 15 credits of required program courses, including BUS 150 or BUS 225.
• Fulfill all WCCCD admission requirements.
• Declare intent to enter this program on the WCCCD Program Application and submit to the Campus Academic Officer.
• Fulfill course placement requirements based on COMPASS test.
• Students must complete WCCCD Program Application and submit to the Campus Academic Officer.

PARALEGAL TECHNOLOGY
Associate of Applied Science Degree

About the Program
The Paralegal Technology Associate of Applied Science degree program provides students with the educational background and training required to become a paralegal, legal assistant or legal aide, able to assist a licensed attorney in providing legal services to their clients. The program provides the knowledge and skills regarding the legal system and substantive and procedural law necessary to perform many routine legal processes under the supervision of a licensed attorney.

Program Goals
• To teach students to articulate the needs and goals of clients relevant to the skills required for a paralegal assistant meeting current and future needs and practices.
• Provide students with an understanding of the roles and functions of paralegals in law firms and occupational settings.

Program Outcomes
Students will be able to:
• Define and properly use terminology relating to areas of legal practice including civil, criminal, family, probate and estate, property, tort and business organizations.
• Apply knowledge, critical thinking and skills in legal research, writing, concepts and terminology to interpret and process simple legal documents.
• Critically evaluate and identify legal problems and procedures in various areas of substantive laws.
• Evaluate and respond appropriately to situations requiring legal, moral and ethical judgment, evidence, facts and legal issues.
• Ability to use electronic software programs and technology, relevant to the profession, to conduct research and develop strategies for legal interpretation.

Admission Requirements
• To be admitted into the Paralegal Technology program students must:
• Fulfill all WCCCD admission requirements.
• Declare program intent on the WCCCD admission application or change program intent at the campus admission office.
• Fulfill course placement requirements based on the COMPASS test.
• Complete and submit the WCCCD Program admission application to the PLT Faculty Discipline Chair or designee.
• Complete the following courses at WCCCD or obtain equivalent transfer credit for the following courses: ENG 119, PS 101, BUS 225, and SPH 101.

Degree Requirements
• Students must complete all course work with a grade of “C” or better to meet graduation requirements.

PHARMACY TECHNOLOGY

• College Certificate
Associate of Applied Science Degree

About the Program
The Pharmacy Technology Associate of Applied Science degree and College Certificate programs are designed to prepare students for entry-level positions in general pharmaceutical services under the supervision of a licensed pharmacist. The pharmacy technician’s responsibilities may include the preparation of medicines and assisting the pharmacist with the dispensing of medicines in accordance with standard procedures, laws, transcription of physicians orders, preparation of instavenous medications, maintaining inventory and patient profiles, and preparing bulk formulations.

The Pharmacy Technology Associate of Applied Science degree is a two-year degree program that allows for transfer to a four-year institution that offers a Bachelor of Science degree in pharmaceutical sciences. Students may choose to complete the certificate program accredited by the American Society of Health System Pharmacists, secure employment, and/or continue their education.

This program offers:
Associate of Applied Science: 80 credit hours
College Certificate: 35 credit hours

Program Goals
• To teach students the policies and procedures governing hospital, retail and industrial pharmacy, to function and perform routine technical and clerical duties as a certified Pharmacy Technician.

Program Outcomes
• Students will be able to demonstrate and apply knowledge of scientific concepts of anatomy, physiology and pharmacology as a pharmacy technician.
• Students must pass coursework with a score of 80% or higher in order to be placed at clinical sites.
• Perform accurate mathematical calculations necessary for the preparation and dispensing of a pharmaceutical product.
• Effectively use computer software and technology, relevant to the pharmacy profession, to gather data, produce documents and process orders.
• Effective use of written, oral and interpersonal communication skills when interacting with a diverse population of healthcare professionals and patients.
• Understand, articulate and adhere to all ethical standards, moral and legal practices governing the profession.
• The student may choose to take the national certification exam given by the Pharmacy Technician Certification Board as an option.

Certificate Goals
• To provide students a foundation into the policies and procedures governing pharmacies, to function and perform routine technical and clerical duties as a Pharmacist Technician.

Certificate Outcomes
• Students will proficiently pass coursework with a score of 80% or higher in order to be placed at clinical sites.
• Perform accurate mathematical calculations necessary for the preparation and dispensing of a pharmaceutical product.
• Effectively use computer software and technology, relevant to the pharmacy profession, to gather data, produce documents and process orders.
• The student may choose to take the national certification exam given by the Pharmacy Technician Certification Board as an option.

About the Program
Continued on next page.

Degree Requirements
• College Certificate
• Associate of Applied Science:

Program Outcomes
• Students will be able to demonstrate and apply knowledge of scientific concepts of anatomy, physiology and pharmacology as a pharmacy technician.
• Students must pass coursework with a score of 80% or higher in order to be placed at clinical sites.

Program Goals
• To teach students the policies and procedures governing hospital, retail and industrial pharmacy, to function and perform routine technical and clerical duties as a certified Pharmacy Technician.

Certificate Goals
• To provide students a foundation into the policies and procedures governing pharmacies, to function and perform routine technical and clerical duties as a Pharmacist Technician.

Certificate Outcomes
• Students will proficiently pass coursework with a score of 80% or higher in order to be placed at clinical sites.

• Effectively use computer software and technology, relevant to the pharmacy profession, to gather data, produce documents and process orders.
• The student may choose to take the national certification exam given by the Pharmacy Technician Certification Board as an option.

Admission Requirements
Admission is competitive and based on academic performance, test scores and personal interviews. A limited number of students are admitted to the program each semester. Applications and other required information must be submitted prior to the start of class. Formal admission status must be achieved prior to enrollment. To be admitted into the Pharmacy Technology Program, students must complete the following:
• Fulfill all WCCCD admission requirements.
• Possess a high school diploma or GED.
• Declare program intent on the WCCCD admission application or change program intent in the campus admissions office.
• Complete the Pharmacy Technician Admission application and turn in the application to the program director.
• Fulfill course placement requirements based on the COMPASS Test.
• Submit two letters of reference: professional or personal.
• Show proof of TB test.
• Meet with a Pharmacy Technology Program representative.
• Pass Pharmacy Technician Assessment Test (PTAT) with a score of 85% or higher.
• Successfully complete a criminal background check. (Source will be specified).
• Successfully pass a drug screening exam.
• Fulfill either of the following prerequisites: Pass Pharmacy Technician Assessment Test (PTAT) with a score of 85% or higher.
• OR- Pass PHT 100 with a grade of “B” or better.
• Successfully complete a criminal background check. (Source will be specified).
• Successfully pass a drug screening exam. (Source will be specified).

Degree Requirements
• Students must complete all course work with a grade of “C” or better to meet graduation requirements.

### PHLEBOTOMY TECHNICIAN

**College Certificate**

**About the Program**

The Phlebotomy Technician College Certificate program introduces students to the chief responsibility’s of the position to include drawing blood and conducting other specimen collections. The phlebotomist must recognize any conditions that might alter collections, correlate types of lab tests to the written diagnosis, and communicate with both the laboratory and the patients to provide the best care possible. Graduates of the phlebotomy program will be competent in multiple skills of specimen collection, have a strong medical terminology background and possess excellent interpersonal skills.

**College Certificate Goals**

- To provide students with the applied knowledge and technical skills to collect and process various blood, specimen and lab collections and procedures.
- To prepare students to successfully pass the national certification exam as a registered phlebotomist.

**College Certificate Outcomes**

- Students will be able to apply proper phlebotomy technique to successfully collect, handle and process blood specimens including venipuncture and capillary punctures.
- Proficiently perform basic laboratory testing procedures under appropriate supervision.
- Effectively utilize appropriate personal protective devices and techniques to operate safely in a healthcare environment.
- Effectively use computer software programs and technology, in a healthcare setting, to accomplish tasks of the profession.
- Effective use of written, oral and interpersonal communication skills when interacting with patients, clients and healthcare professionals.
- Understand, articulate and adhere to all ethical standards, moral and legal practices governing the profession.

- Exhibit proficiency in successfully completing the national certification exam as a phlebotomist with a 75% or better proficiency rate.

**Admission Requirements**

Students are required to complete the following:

- Fulfill all WCCCD admissions requirements.
- Declare intent to enter the Phlebotomy program by completing an allied health program application and indicate intent on the college application form.
- Fulfill course placement requirements based on the COMPASS test.
- Must be 18 years of age and possess a high school diploma or GED (copy required).

**Degree Requirements**

- Students must complete all course work with a grade of "C" or better to meet graduation requirements.
- All science classes must be completed within (5) five years.

**Prerequisite for course**
PROGRAM CURRICULA

**PRE-ENGINEERING**
Associate of Science Degree

**About the Program**
The Pre-Engineering Associate of Science degree program is designed to provide the first two-years of an engineering program whose credits will transfer to a four-year college of engineering program. Adjustments in the listed recommended program may be necessary to meet the requirements of other colleges or universities for special fields of engineering. Students should contact the institution they intend to transfer to ensure that they will have the necessary courses to transfer.

**Program Goals**
- To provide the foundation and prepare engineering science majors to transfer to a four-year baccalaureate degree program.

**Program Outcomes**
- Students will be able to understand the basic principles of the physical sciences.
- Demonstrate an understanding of the major concepts of differential and integrated calculus.
- Prepare, write, document and describe a computer program.
- Complete the general education courses in satisfaction of the associate degree requirements with a 70% or higher course average.

**Admission Requirements**
Students are required to fulfill the following requirements:
- Fulfill all WCCCD admission requirements
- Declare intent to enter the Pre-Engineering program on WCCCD Admission Application or change intent at the Admissions Office.
- Fulfill course placement requirements based on COMPASS test.
- Students must complete WCCCD Program Application during the second semester in which they are enrolled and submit to the Campus Academic Officer.

**PRE-MORTUARY SCIENCE**
Associate of Applied Science Degree

**About the Program**
The Pre-Mortuary Science Associate of Applied Science degree program prepares students for entrance into a mortuary science program and an eventual career as a mortician. This program is designed in accordance with the Mortuary Science program at Wayne State University, which is the only institution in Michigan that prepares students for State certification in mortuary science. Because entrance into the WSU program is competitive, a minimum requirement for application is completion of at least 68 credit hours with a grade of ‘C’ or better as outlined in the WSU graduate bulletin.

**Program Goals**
- To educate and develop students in all phases of funeral service to meet and exceed the standards of care in dealing with health, safety and welfare associated in the preparation and care of the deceased.
- To provide a general in a Pre-Mortuary Science Associate of Applied Science studies as the precursor for a declared four-year degree in Mortuary Science:

### Program Outcomes

- **Recognize the nature and seriousness of the patient’s condition or extent of injuries to assess requirements for emergency medical care.**
- **Administer appropriate emergency medical care based on assessment findings of the patient’s condition.**
- **Properly and safely lift, move, position and handle the patient to minimize discomfort and prevent further injury.**
- **Provide a service in an environment requiring special skills and knowledge in such areas as communications, transportation and record keeping.**

### Degree Requirements

Students must complete all course work with a grade of "C" or better to meet graduation expectations of the position description.

### Admission Requirements

- Fulfill all WCCCD admission requirements.
- Successfully complete a minimum of 12 college credits with a "C" or better and/or COMPASS scores that fulfill program requirements.
- Declare intent to enter the Emergency Medical Technology certificate program.
- Successfully complete a minimum of 12 months of supervised practice experience.
- Complete background check.
- Must complete physical exam and other health requirements.
- Complete background check.
- Provide a service in an environment requiring special skills and knowledge in such areas as communications, transportation and record keeping.

---

**Note:** Program total hours may not include prerequisites.
PRE-SOCIAL WORK
Associate of Arts Degree

About the Program
The Pre-Social Work Associate of Arts degree program provides a broad based two year Associate of Arts (A.A.) degree curriculum. The Pre-Social Work program is designed to:
- Provide a foundation in liberal arts coursework leading to a BSW degree at select four-year institutions.
- Prepare students for culturally competent, ethical, effective and accountable generalist social work practice.
- Provide academic support for the successful completion of the Pre-Social Work Associate of Arts degree while preparing for future educational and employment opportunities.
- Instill a knowledge base of the basic foundations of social work practice: purpose and mission, sanctions, values and ethics, knowledge and methods and skills.

Program Goals
- To teach students to use the Social Work Mission while improving the social functioning and well-being of clients.
- To teach students the Code of Ethics according to the National Association of Social Workers.
- To instill in students the value and knowledge of advocacy for their clients.

Program Outcomes
- Students will be able to implement themes of the Social Work Mission while assessing clients.
- Students will be able to navigate through the Code of Ethics, while employing the most appropriate ethics.
- Students will learn about various social programs, services, activities, agencies, organizations, and institutions which will be useful in advocating for clients.

Admission Requirements
Students are required to do the following:
- Fulfill all WCCCD admission requirements
- Complete all prerequisite requirements
- Possess a high school diploma or GED
- Declare intent to enter the Pre-Social Work Program on the WCCCD Application for Admission
- Fulfill course placement requirements based on COMPASS test.
- Complete prerequisite courses with a grade "C" or better
- Submit a human service program application to the assistant dean or designate who administers the Pre-Social Work Program before the ninth week of the Fall or Winter semesters.
- Students must complete WCCCD Program Application and submit to the Campus Academic Officer.
- Complete an Individual Education Plan

Degree Requirements
Students must complete all course work with a grade of “C” or better to meet graduation requirements.

PROJECT MANAGEMENT

• College Certificate

About the Program
The Project Management Certificate will provide students with the information and skills necessary to secure an entry level position managing projects in business and industries such as IT, business, health care and others. The courses will provide the required contact hours and information needed to take the Project Management Professional (PMP) exam. Upon completion of the certificate program students will understand beginning, intermediate and advance project management software.

Students will learn skills necessary for the occupational positions which include, but are not limited to: Associate Project Manager, Project Manager, Program Manager, Scheduling Technician, and IT Specialist/Project Manager.

College Certificate Goals
- To provide students with a basic foundation of theory and practice of project management as it relates to project management positions in business, IT, healthcare and others.

College Certificate Outcomes
- Students will be able to initiate, plan, execute, monitor, control and close a specified project to completion.
- Meet the educational requirements to become certified by taking the Project Management Professional (PMP) exam with a 70% or higher proficiency score.
- Identify, describe and explain appropriate techniques for oral, written and electronic communication vehicles when communicating with team members and stakeholders.

### RENEWABLE ENERGY

**College Certificate**

**About the Program**
The Renewable Energy College Certificate is designed to provide students with the theoretical knowledge necessary for a career in energy management and renewable energy technology fields. Students acquire hands-on skills in troubleshooting, maintenance, installation, operation and repair of related equipment. The program addresses the need for an alternative career track for students to pursue careers in the renewable energy field.

The certificate requires a minimum of 31 credits of coursework. Students may choose from online and face-to-face courses in several areas of emphasis including, photovoltaic, solar thermal, and wind.

Certificate credits may be combined with additional coursework to enhance traditional Allied Health diploma, degree, transfer and associate programs at WCCCD. The credits also may be combined with additional training, job experience and/or professional examinations to qualify for certification by national renewable energy institutions. Incumbent Allied Health workers and other technical professionals are also encouraged to investigate how a Renewable Energy Certificate may relate to their current work or business practices.

**College Certificate Goals**
- To provide current practitioners with continued learning education in renewable energy/energy efficiency field as a precursor towards a two-year associates degree or four-year baccalaureate degree program.
- To teach and provide students with the theoretical knowledge necessary for a career in energy management and renewable energy technology fields.
- To provide hands-on skills in troubleshooting, installation, operation and repair of related equipment.
- Identify, troubleshoot and repair and maintain equipment efficiency.

**College Certificate Outcomes**
- Students will be able to demonstrate basic principles of energy efficiency and conservation in hospitals and healthcare settings.
- Fulfill course placement requirements based on the COMPASS test.
- Fulfill all WCCCD admissions requirements.
- Complete Background check

**Admission Requirements**
- Students are required to do the following:
  - Fulfill all WCCCD admissions requirements.
  - Declare intent to enter the Renewable Energy Certificate program by completing a program application.
  - Identify intent on the college application form.
  - Fulfill course placement requirements based on the COMPASS test.
  - Fulfill all prerequisites with a grade of “C” or better
  - Must be 18 years of age and possess a high school diploma or GED (copy required).

**Certificate Requirements**
- Students must maintain an overall grade point average of 2.5 and a minimum grade of “C” or better in all core course work in order to meet graduation requirements.
SURGICAL TECHNOLOGY
Associate of Applied Science Degree

About the Program
The Surgical Technology Associate of Applied Science degree is accredited by the Association of Surgical Technologist (AST). The curriculum is designed to enable the student to perform a variety of duties, as well as provide technical support to the surgical team in the operating room before, during and after surgery. The surgical technologist is trained to maintain a sterile and safe surgical environment. Duties may include, but are not limited to, preparing sterile supplies; equipment, instruments, and drapes for surgical procedures, assisting the surgical team with gowning and gloving, and positioning patients for surgery, passing instruments, sponges, sutures and other supplies to the surgeon or the assistant, preparing specimens for laboratory analysis, sterilizing equipment, etc.

The Surgical Technology program offers the following options:
1. Surgical Technology Associate of Applied Science Degree: 68 credit hours
2. Accelerated Alternative Delivery (AAD)
3. Central Service Technician Certificate: 10 credit hours
4. First Assistant College Certificate: 28 credit hours

Program Goals
• To prepare students with the knowledge and technical skills to effectively perform as a team member of the surgical team under the direct supervision of a doctor or registered nurse.
• To prepare students to proficiently exercise the duties and responsibilities including peri-operative preparation, equipment supply, sterilization and post-operative procedures.
• To prepare students to successfully pass the National Certifying Examination for Surgical Technologists.

Program Outcomes
• Students will be able to demonstrate and apply technical competency as it applies to the surgical technology profession.
• Exhibit proficiency in successfully completing the National Certifying Examination for Surgical Technologists with a 80% or better proficiency rate.
• Demonstrate expertise in the application of sterile and aseptic technique.
• Apply principles of pharmacology as related to the Surgical Technologist.
• Demonstrate critical thinking skills during peri-operative procedural management according to the facility policies, procedures and surgeon preferences.
• Perform competently in the Scrub and Circulator role in accordance with AST standards.
• Maximize patient safety by facilitating a safe surgical environment.
• Demonstrate self-direction and responsibility for maintaining surgical competency.
• Effective use of written, oral and interpersonal communication skills operating as a member of a diverse team of medical professionals.
• Incorporate the safety principles, practices and standards regulations as governed by the profession.

Admission Requirements
To be admitted into the Surgical Technology program, students are required to complete the following:
• Fulfill all WCCCD admission requirements.
• Be 18 years of age or older and have a high school diploma or GED.
• If required, fulfill course placement requirements based on the COMPASS scores.
• Declare intent to enroll in the Surgical Technician program by submitting an Allied Health Department application to the program director.
• Must complete criminal background check, physical exam, HBV shots, and other health requirements.

• Complete all prerequisites with a grade of “B” or better.
• Possess current BLS/CPR card.
• Pass required sections of the Health Occupations Basic Entrance Test (HOBET) or Test of Essential Academic Skills (TEAS).
• Submit official transcripts from previous institutions.
• Submit three letters of recommendation: two professional and one personal.
• Valid State Picture I.D.
• Meet with the Program Director to review and complete paperwork.

Note: If COMPASS scores are lower in any area, provide a transcript of the recommended course(s) completed with a “B” or better. All program applications are reviewed by the Surgical Technology Department Admissions Committee. Students who have completed the Central Service Technician program prior to application to the Surgical Technology Program are given preference. Students must submit all paperwork by July 15th for the start of the Fall Semester. Students beginning the program in the Spring Semester should submit all paperwork by November 15th. The COMPASS minimum passing composite score is 60. The reading comprehension sections must be at least 50. Test scores are considered valid for two (2) years if scores meet current requirements. Check the appropriate campus location for adherence to the above submission dates.

Based upon Michigan Law
Students applying for admission to the Surgical Technology Program will be subject to a criminal background check, the results of which could preclude an applicant from admission to Wayne County Community College’s Surgical Technology Program on the basis of any of the following:
• A felony conviction, or conviction for an attempt or conspiracy to commit a felony within the past 15 years.
• Any misdemeanor conviction involving abuse, neglect, assault, battery or criminal sexual conduct within the past 10 years.
• Any misdemeanor conviction involving fraud or theft against a vulnerable person.

Degree Requirements
• Must complete all course work with a grade of “B” or better to meet graduation requirements.

SURGICAL TECHNOLOGY: ACCELERATED ALTERNATE DELIVERY

• College Certificate

About the Program
The purpose of the Surgical Technology Accelerated Alternate Deliver (AAD) Program is to prepare professionals working in the Surgical Technology field to sit for the Accreditation Review Committee on Education in Surgical Technology’s national certification examination. The instructional format for this program is online delivery. The Surgical Technologist delivers care in the operating room before, during and after surgery as a member of the surgery team (Surgeon, Surgical First Assistant, Anesthesiologist, Registered Nurse and other surgical personnel). The Surgical Technologist’s primary responsibility is to maintain a sterile field in the operating room.

The Surgical Technologist must be constantly vigilant to make sure that every member of the surgical team follows aseptic procedures. Duties of a Surgical Technologist include: Setting up sterile supplies, equipment, instruments and drapes for surgical procedures; preparing specimens for laboratory analysis.

Certificate Outcomes
• Students will be able to demonstrate and apply technical competency as it applies to the surgical technician profession.
• Exhibit proficiency in successfully completing the National Certifying Examination for Surgical Technologists with a 80% or better proficiency rate.
• Demonstrate expertise in the application of sterile and aseptic technique.
• Apply principles of pharmacology as related to the Surgical Technologist.
• Demonstrate critical thinking skills during peri-operative procedural management according to the facility policies, procedures and surgeon preferences.
• Perform competently in the Scrub and Circulator role in accordance with AST standards.
• Maximize patient safety by facilitating a safe surgical environment.
• Demonstrate self-direction and responsibility for maintaining surgical competency.
• Effective use of written, oral and interpersonal communication skills operating as a member of a diverse team of medical professionals.
• Incorporate the safety principles, practices and standards regulations as governed by the profession.

Admission Requirements
An applicant for Surgical Technology Accelerated Alternate Delivery (ADD) Certificate Program is required to:
• Fill out a Wayne County Community College District admission application.
• Submit two letters of recommendation from current or former supervisors attesting to competency in surgical technology.
• Complete an online course provided by Distance Learning Department of Wayne County Community College District. Contact distance learning@wcccd.edu or (313) 496-2734 for more information.
• Show proof of a current CPR card. Submit documentation verifying clinical experiences for at least 125 surgical procedures in the first scrub role or that two of the last four years of OR experience were performed in the first scrub role. Upon submission of the documentation, a student will prepare the appropriate paperwork so that experiential credit can be granted as part of the AAD curriculum. Credit will be recorded on the student’s academic record, without a grade as follows:
• Surgical Technology (SUR) 125 – Surgical Technology Clinical I 4 credits hours.
• Surgical Technology (SUR) 145 – Surgical Technology Clinical II 4 credits hours.
• Surgical Technology (SUR) 155 – Surgical Technology Clinical III 6 credits hours.

College Certificate Goals
• To prepare students with knowledge and technical skills to effectively perform as a team member of the surgical team under the direct supervision of a doctor or registered nurse.
• To prepare students to proficiently exercise the duties and responsibilities including peri-operative preparation, equipment supply, sterilization and post-operative procedures.
• To prepare students to successfully pass the National Certifying Examination for Surgical Technologists.

SURGICAL TECHNOLOGY: CENTRAL SERVICE TECHNICIAN

• College Certificate

About the Program
The Surgical Technology Central Service Technician College Certificate is accredited by the Association of Surgical Technologist (AST). The curriculum is designed to enable the students to perform a variety of duties, as well as provide technical support to the surgical team in the operating room before, during and after surgery.

The Central Service Technician is responsible for the procurement of surgical supplies and equipment. Central Service Technicians provide support to all patient care services in the health care facility. They are responsible for decontaminating, cleaning, processing, assembling, sterilizing, storing and distributing the medical supplies needed in patient care, especially during surgery.

The Central Service Technician is responsible for the procurement of surgical supplies and equipment. Central Service Technicians provide support to all patient care services in the health care facility. They are responsible for decontaminating, cleaning, processing, assembling, sterilizing, storing and distributing the medical supplies needed in patient care, especially during surgery.

With the ever-expanding technological advancements in medical supplies, instrumentation, medical devices and equipment, highly trained individuals are needed in the field of central service. Central service technicians are trained in principles, methods and control of sterilization processes; and the cleaning, processing, packaging, distributing, storing and inventory control of sterile supply, instruments, trays and equipment.

College Certificate Goals
• To prepare students with knowledge and technical skills to effectively perform duties that may include, but are not limited to principles, methods and control of sterilization processes; cleaning, processing, packaging, distributing, storing and inventory control of sterile supply, instruments, trays and equipment.
• To prepare students to successfully pass the National Certifying Examination for a Central Service Technician.

Continued on next page.
SURGICAL TECHNOLOGY: CENTRAL SERVICE TECHNICIAN continued

College Certificate Outcomes
• Exhibit proficiency in successfully completing the National Certifying Examination for Central Service Technicians with a 80% or better proficiency rate.
• Demonstrate expertise in the application of sterile and aseptic technique.
• Demonstrate self-direction and responsibility for maintaining central sterilization competency.
• Effective use of written, oral and interpersonal communication skills operating as a member of a diverse team of medical professionals.
• Incorporate the safety principles, practices and standards regulations as governed by the profession.

Admission Requirements
• To be admitted into the Central Service Technician program, students are required to complete the following:
  • Fulfill all WCCCD admission requirements.
  • Be 18 years of age or older and have a high school diploma or GED.
  • If required, fulfill course placement requirements based on the COMPASS scores.
  • Declare intent to enroll in the Surgical Technician program by submitting an Allied Health Department application to the program director.
  • Must complete criminal background check, physical exam, HBV shots, and other health requirements.
  • Complete all prerequisites with a grade of “B” or better.
  • Pass required sections of the Health Occupations Basic Entrance Test (HOBET).
  • Submit official transcripts from previous institutions.
• Submit three letters of recommendation: two professional and one personal.
• Valid State Picture I.D.
• Meet with the Program Director to review and complete paperwork.

Note: If COMPASS scores are lower in any area, provide a transcript of the recommended course(s) completed with a “B” or better. All program applications are reviewed by the Surgical Technology Department Admissions Committee. Students who have completed the Central Service Technician program prior to application to the Surgical Technology Program are given preference.

• Students must submit all paperwork by July 15th for the start of the Fall Semester, or by November 15th for the start of the Spring Semester, or by March 15th for the start of the summer semester. The COMPASS minimum passing composite score is 60. The reading comprehension sections must be at least 50. Test scores are considered valid for two (2) years if scores meet current requirements.

Based upon Michigan Law
Students applying for admission to the Central Service Technician Program will be subject to a criminal background check, the results of which could preclude an applicant from admission to Wayne County Community College District’s Surgical Technology Program on the basis of any of the following:
• A felony conviction or conviction for an attempt or conspiracy to commit a felony within the past 15 years.
• Any misdemeanor conviction involving abuse, neglect, assault, battery or criminal sexual conduct within the past 10 years.
• Any misdemeanor conviction involving fraud or theft against a vulnerable

Degree Requirements
• Students must complete all course work with a grade of “B” or better to meet graduation requirements.

SURGICAL TECHNOLOGY: SURGICAL FIRST ASSISTANT

About the Program
The Surgical First Assistant (SFA) College Certificate program is offered as one of four career options for students admitted into the Surgical Technology program. Enrollment in the program is limited due to the number of clinical-learner positions available at each of the clinical settings. A student’s educational experience in the program includes both classroom course work (didactic) and practical (clinical) instruction in a peri-operative environment. Upon successful completion of the SFA Certificate program, students will also receive a Certificate of Completion and will be eligible to sit for the national certificaiton examination.

A Surgical First Assistant works under the direction and supervision of the surgeon and in accordance with hospital policy and appropriate laws and regulations. The SFA provides aid in surgical and regulated settings. A student’s educational experience in the program includes both classroom course work and learning experiences in a peri-operative environment. Upon successful completion of the SFA Certificate program, students will also receive a Certificate of Completion and will be eligible to sit for the national certification examination.

College Certificate Goals
• To prepare students with the knowledge and technical skills to effectively perform as a team member of the surgical team unit under the direct supervision of a doctor or registered nurse.
• To prepare students to proficiently exercise the duties and responsibilities including peri-operative preparation and post-operative procedures.
• To prepare students to successfully pass the National Certification Examination for Surgical First Assistants.

Continued on next page.
SURGICAL TECHNOLOGY: SURGICAL FIRST ASSISTANT
continued

College Certificate Outcomes

• Students will be able to demonstrate and apply technical competency as it applies to the duties and technical responsibilities of the position.
• Exhibit proficiency in successfully completing the National Certification Examination for Surgical First Assistants with a 80% or better proficiency rate.
• Demonstrate critical thinking skills during peri-operative and post-operative procedural management according to the facility policies, procedures and surgeon preferences.
• Operate all equipment safely, effectively and efficiently while using appropriate protocols.
• Demonstrate self-direction and responsibility for maintaining surgical competency.
• Accurately and effectively demonstrate information literacy skills, written, oral and interpersonal communication skills, operating as a member of a diverse team of medical professionals.
• Incorporate the safety principles, practices and ethical standards and regulations as governed by the profession.

Admission Requirements

To be admitted into the Surgical First Assistant program, students must complete the following requirements for admissions prior to acceptance into the program:

• Students must complete WCCCD Allied Health application.
• Current CPR/BLS certification
• Submit official transcripts from previous institutions.
• Certified surgical technologist (CST), or certified nurse-operating room (CNOR), or physician assistant – current certified (PA-C).
• Proof of liability insurance covering health care activities
• Proof of proficiency in Microbiology, Pharmacology, Anatomy and Physiology.
• Proof of computer literacy
• Work history from employers
• Submit three letters of recommendation: two professional and one personal
• Proof of immunization against Hepatitis B or waiver
• Interview with the Program Director

All program applications are reviewed by Surgical Technology Department Admission Committee. Students must submit all paperwork by November 15th for the start of the Spring Semester.

The Surgical First Assistant program offers a College Certificate and may be completed in 45 instructional weeks. The certificate option is designed to prepare students with necessary skills required for a broad range of surgical specialist positions.

College Certificate Requirements

• Students must complete all course work with a grade of “B” or better to meet graduation requirements.

SUSTAINABLE ENVIRONMENTAL DESIGN: BUILDING AND SITES

About the Program

The Sustainable Environmental Design Sustainable Buildings and Sites College Certificate is designed to prepare students for careers that integrate sustainable construction applications in a variety of business, allied health and industrial environments. Students will gain knowledge on principles of sustainable practices in alternative energy, business, construction, energy usage and natural resource management. This curriculum prepares students to fully understand the Leadership in Energy and Environmental Design (LEED) green building rating system which is the standard for environmentally sustainable construction.

Graduates of the certificate program may complement their studies by pursuing an Associate of Applied Science degree in Sustainable Environmental Design offered at Wayne County Community College District. The associate’s degree serves as a precursor to students pursuing a four-year baccalaureate degree. The increased expansion of green career’s include; Green Engineering and Renewable Energy Production, Sustainable Urban Planning and Design, Sustainable Interior Design, and Sustainable Building Construction.

College Certificate Goals

• Prepare students to understand the moral and ethical implications of environmental design decisions that impact land use, the environment and society as a whole.
• Prepare students to enter a rapidly changing and growing workforce of Green Technology professionals in the Renewable Energy and Sustainable Construction.

Continued on next page.
SUSTAINABLE ENVIRONMENTAL DESIGN: BUILDING AND SITES continued

- Allow students with work experience in related fields (such as HVAC, Construction Project Management, Architecture, Landscape Architecture, Interior Design and Energy Development) the opportunity to obtain needed knowledge and skills in sustainable design and energy efficiency.
- Prepare practicing professionals or individuals in career change situations to gain needed knowledge in order to sit for the U.S. Building Council’s Leadership in Energy and Environmental Design Accredited Professional (LEEDAP) exam.

College Certificate Outcomes
- Demonstrate knowledge of basic concepts and principles of sustainable design, green building practices and alternative energy production.
- Apply critical and analytical thinking skills to determine where sustainable designs, technologies and practices are appropriate and effective.
- Demonstrate the concept of green building basics and how to move from traditional practices towards sustainable design principles.
- Analyze and evaluate energy use patterns for residential and commercial buildings.
- Apply critical thinking and problem solving skills to measure, monitor and recommend actions to reduce and innovate energy in commercial settings.

Admission Requirements
Students are required to do the following:
- Fulfill all WCCCD admission requirements.
- Fulfill course placement requirements based on COMPASS test.
- Students must complete WCCCD Program Application and submit to the Campus Academic Officer.

Degree Requirements
- Students must complete all course work with a grade of “C” or better to meet graduation requirements.

TEACHER EDUCATION: ELEMENTARY EDUCATION

Associate of Arts Degree

About the Program
The Teacher Education Associate of Arts degree in elementary education offers career opportunities to complete the first two years of the baccalaureate degree requirements leading to teacher certification in special, elementary and secondary education. The program is designed to prepare prospective teachers to be innovative role models and leaders in academic environments. In order to acquire the skills and abilities necessary for excellence in teaching, students will participate in classes, fieldwork, support services and workshops.

Program Goals
- To prepare students with the knowledge and foundation necessary as the precursor for a declared four-year degree in Elementary Teacher Education.
- To teach students the social, philosophical, historical perspectives and best practices in educational methodology that impact elementary education.

Program Outcomes
- Students will be able to describe the policies, issues, and trends in the field of elementary education.
- Analyze and identify major historical events in education and its impact with current educational trends.
- Identify the psychological, cognitive, emotional, and physical characteristics of typically developing children, children with disabilities, and children who are culturally and linguistically diverse.
- Demonstrate knowledge of and critically evaluate current instructional practices in elementary education to compare and contrast instructional strategies based on students’ learning style.
- Design and implement individual development learning plans that include cognitive processes associated with critical thinking, creative thinking, problem solving, invention, memorization and recall that are appropriate for all students across the learning continuum.
- Identify and explain the models of classroom and behavior management.
- Identify strategies for working and advocating for families of culturally and linguistically diverse (CLD) students and students with disabilities in order to facilitate a child’s educational program.
- Identify community resources serving students with special needs and their families.
- Demonstrate excellent written, verbal, critical thinking, and problem solving skills, which will allow them to effectively make connections between prior knowledge/experience and new learning.

Admission Requirements
Students are required to complete the following:
- Fulfill all WCCCD admissions requirements.
- Declare intent to enter the TEP by completing a TEP intent application form.
- Fulfill course placement requirements based on the COMPASS test.
- Successfully complete 18 credit hours by taking these courses (or approved equivalents) with a minimum grade of C or better, including:
  - ENG 110 English I
  - HIS 249 U.S. History I 1607-1865 or - HIS 250 U.S. History II 1865 to Present
  - MAT 113 Intermediate Algebra
  - PS 101 American Government
  - PSY 101 Introductory Psychology
  - SPH 101 Fundamentals of Speech
- Earn and maintain a minimum overall 2.5 grade point average.

Continued on next page.
TEACHER EDUCATION: ELEMENTARY EDUCATION continued

- Submit a completed TEP application for admission along with other supporting documentation as specified in the application.
- Schedule a personal interview with a TEP staff member.
- Participate in a TEP orientation workshop.

Students are required to do the following:
- Fulfill all WCCCD admission requirements
- Fulfill course placement requirements based on COMPASS test.
- Students must complete WCCCD Program Application and submit to the Campus Academic Officer.

Degree Requirements
- Students must complete all course work with a grade of “C” or better to meet graduation requirements.

VETERINARY TECHNOLOGY

Associate of Applied Science Degree

About the Program
The Veterinary Technology Program (VTP) offers a well-rounded two year curriculum in veterinary technology. It has the full accreditation status of the American Veterinary Medical Association. Graduates are eligible to take state and national examinations to become Licensed Veterinary Technicians (LVT). Subjects of study include anatomy and physiology of animals, small animal hospital techniques, laboratory animal medicine, small animal disease, large animal medicine, regulatory veterinary medicine, anesthesiology, radiology, surgical assisting, pharmacology, and clinical pathology (hematology, urinalysis, and parasitology). The program offers hands-on experience with a wide variety of animal species including dogs, cats, rats, mice, hamsters, ferrets, gerbils, rabbits, chickens, horses, sheep, guinea pigs, goats, and cattle. For student’s convenience, classes for the program are held on weekday evenings to accommodate those who work while attending college. The program is located at Wayne State University in the Applebaum College of Pharmacy and Health Sciences Building.

Program Goals
- To provide students with entry-level skills in veterinary technology allowing them to enter the field in a wide variety of areas.

Program Outcomes
- Students will be able to provide proficient services to support the health and well-being of animals.
- Identify and understand the pharmacology and effects of drugs and therapeutic substances in various animal species.
- Understand the role and responsibilities in operating and maintaining a veterinary facility.

- Apply organizational principles and practices that provide quality veterinary care and client service.
- Demonstrate knowledge of, ensure compliance with and act in a professional and ethical manner in accordance with state and federal regulations, American Veterinary Medical Association (AVMA) and National Association of Veterinary Technicians in America (NAVTA) guidelines.

Admission Requirements
Admission is granted through a selection process prior to the Fall semester. The program staff will review all applications of admission and will interview qualifying candidates. Written confirmation of admission will be issued to the applicant.

To be admitted into the Veterinary Technology Program students must:
- Declare program intent on the WCCCD application or change program intent in the campus admissions office.
- Complete a program application packet by July 1st of the year you are planning to enter the program. (Includes essay, health form, proof of health insurance)
- Receive a grade of “C” or better in prerequisite courses.
- Fulfill course placement requirements based upon the COMPASS test results. (MAT 105 may be waived based upon the COMPASS test score.)
- Submit transcript of prerequisite coursework, and proof of high school graduation or GED to the program office.
- Applicants are required to spend a minimum of 15 hours in a work or volunteer situation within veterinary clinics, humane societies, nature centers, farms or other animal related areas where veterinary technicians may be observed in a work environment.

Continued on next page.
VETERINARY TECHNOLOGY continued

Degree Requirements

*In addition to regularly scheduled classes, three practical experience classes are required. Each of these courses requires 128 - 180 hours of applied veterinary technology in veterinary hospitals and laboratories. The practical courses are also offered during the Summer semester. This semester may be used to ease the course load if necessary between the first and second year.

WATER AND ENVIRONMENTAL TECHNOLOGY

About the Program
The Water Environment Technology Program (WET) offers the intellectual exposure and on-the-job experience, required to operate and manage a wide range of water-treatment technologies. The program recognizes that the efficient application of water-treatment technologies is essential for the survival of earth’s population and ecosystems, and that the technologist is largely responsible for the day-to-day compliance with treatment requirements. WET students study water and wastewater treatment processes, and are introduced to topics that include water chemistry, microbiology, toxicity and pollution prevention. Coursework and hands-on experience in utility equipment maintenance completes the technical program.

Completion of the program will help prepare graduates to write the entry level water and wastewater certification examinations administered by the Michigan Department of Environmental Quality.

Certificate Goals
• To prepare students with an understanding of methods related to the production of clean water and pollution control.

Certificate Outcomes
• Students will be able to demonstrate an applied understanding of the basic principles of pollution assessment, management and control related to water quality.
• Demonstrate knowledge of the main types and categories of pollution treatment processes and treatment systems.
• Demonstrate critical thinking skills when applying knowledge of common water and wastewater production facilities related to pollution control.

WET 101 Water Treatment Technologies ............. 3

WELDING TECHNOLOGY

- College Certificate
  Associate of Applied Science Degree

About the Program
The Welding Technology Associate of Applied Science degree and College Certificate programs are designed to provide students with in-depth instruction in the field of welding. Core program courses provide students with experience related to design, theory and use of welding equipment. Course learning objectives include: an introduction to welding; safe welding practices; identification of metals; oxygen fuel gas welding; oxygen fuel gas cutting; shielded metal arc welding; gas tungsten arc welding; gas metal arc welding; and fabrication. Each welding course consists of an introduction; competencies; performance objectives and mastery criteria.

Certificate Goals
- To teach students proficiency and apply technical skills required in fabrication, construction, maintenance, apprenticeship and other metal working industries.

Program Goals
- To teach students proficiency and apply technical skills required in fabrication, construction, maintenance, apprenticeship and other metal working industries.
- To prepare students to successfully register and pass the certification exam for Welders.

Program Outcomes
- Students will be able to demonstrate competence in solving weld design problems and creating welding joints and steel welds by applying American Welding Society economic justification and weld connection performance measures and methods.
- Exhibit proficiency in successfully completing the certification exam for Welders with a proficiency score of 75% or better.

Admission Requirements
Students are required to do the following:
- Fulfill all WCCCD admission requirements
- Fulfill course placement requirements based on COMPASS test
- Students must complete WCCCD Program Application and submit to the Campus Academic Officer.

Degree Requirements
- Students must complete all course work with a grade of “C” or better to meet graduation requirements.

Certificate Outcomes
- Students will be able to demonstrate competence in solving weld design problems and creating welding joints and steel welds by applying American Welding Society economic justification and weld connection performance measures and methods.

Note: Certificate total hours may not include prerequisites.

COURSE DESCRIPTIONS

ACCOUNTING (ACC)

ACC 100  
Introduction to Accounting  
Fundamental accounting techniques as related to small business firms. The accounting equation and account classification, journalizing, posting, adjustments and preparation of financial statements. For students desiring a single course in accounting or for students who need to strengthen a limited background prior to pursuing ACC 110.  
3 C/45 CH

ACC 105  
Income Tax Accounting  
Practical approach to fundamental tax laws affecting individuals. Development of proficiency in the preparation of individual, federal, state and municipal tax returns. Some attention given to partnership and corporate returns.  
3 C/45 CH

ACC 111  
Principles of Accounting II  
Current accounting theories and practices, presented from a financial and managerial viewpoint. Journal and ledger techniques, working papers, financial statements, inventory evaluation, depreciation methods, financial resources and cost/revenue matching.  
4 C/60 CH

ACC 110  
Principles of Accounting I  
Current accounting theories and practices, presented from a financial and managerial viewpoint. Journal and ledger techniques, working papers, financial statements, inventory evaluation, depreciation methods, financial resources and cost/revenue matching.  
4 C/60 CH

ACC 210  
Intermediate Accounting I  
Prerequisite: ACC 110  
In depth study of accounting theory, analysis of stockholder’s equity (capital stock, retained earnings, dividends) and assets/cash, receivables, inventories, investments.  
3 C/45 CH

ACC 211  
Intermediate Accounting II  
Prerequisite: ACC 210  
Analysis of fixed assets, liabilities, and reserves, statements, reorganizations, income tax allocations, pension, accounting, parent and subsidiary accounting, and business combinations.  
3 C/45 CH

ADDICTION STUDIES (ADD)

ADD 102  
Addictions Counseling: Theories and Techniques  
Prerequisite: ADD 110  
This course provides theory and skill acquisition by utilizing intervention strategies designed to obtain therapeutic information, support recovery, and prevent relapse.  
3 C/45 CH

ADD 110  
Introduction to Addiction  
This course explores the physical, emotional, psychological, and cultural aspects of the addictive process. Emphasis is placed on addiction to food, sex, alcohol, drugs, work, gambling, and relationships. This course provides foundational knowledge for counseling persons with addictive disorders. The student is introduced to working definitions of substance abuse, addiction, chemical dependency, and process addiction. Competencies and requirements for MCBAP & IC&RC certification are explained.  
3 C/45 CH

Continued on next page.
COURSE DESCRIPTIONS

ADDITION STUDIES (ADD) continued

ADD 130 3 C/45 CH
Assessment, Diagnosis and Treatment of Addictions
This is the first course in the methods sequence with the primary focus being on human service delivery to individual clients. Attention will be given to the development and enhancement of professional skills in social history taking, diagnostic assessment, and the relation of assessment to treatment planning/intervention with clients from various, diverse populations, and populations at risk.

ADD 135 4 C/60 CH
Addiction Field Practicum Methods Seminar I
This is the second clinical course required for the addiction counseling program. Students will have the opportunity to work in community clinical settings that serve clients with addiction problems. They will gain first-hand experience and develop clinical competency in group facilitation, case-management, and system approaches to addiction treatment in a community setting. The course will consist of seminar and clinical experiences. Students will have supervision on-site, and then de-brief their experiences in class, sharing both their learning and their challenges. Students will also prepare for state certification and employment.

ADD 214 3 C/45 CH
Pharmacology of Addiction
This course will acquaint the student with the controversies that surround them. Group and class discussions of the controversies that surround them. Group and class discussions of the role of the black family in the struggle for equality and traditional and contemporary African people. The role of the family will be emphasized in the struggle for equality and liberation is explored.

ADD 235 4 C/60 CH
Addiction Field Practicum/Methods Seminar II
This is the second clinical course required for the addiction counseling program. Students will have the opportunity to work in community clinical settings that serve clients with addiction problems. They will gain first-hand experience and develop clinical competency in group facilitation, case-management, and system approaches to addiction treatment in a community setting. The course will consist of seminar and clinical experiences. Students will have supervision on-site, and then de-brief their experiences in class, sharing both their learning and their challenges. Students will also prepare for state certification and employment.

AFRICAN-AMERICAN STUDIES (AAS)

AAS 120 3 C/45 CH
Sociology and the African-American Community
A survey of basic sociological concepts and theories of social organization from the African-American perspective. Emphasis on the nature of society and the factors affecting the development of culture; groups, and African-American institutions.

AAS 131 4 C/45 CH
American Government & African-American Struggle
Structure and function of American government. Critical inspection of city, state, and federal government operations and their responsiveness to the needs of African-Americans and other minorities.

AAS 140 3 C/45 CH
The Psychology of the African-American Experience
Fundamental concepts and principles of psychology from the African-American perspective. Emphasis on behavioral elements affecting black and white relations, and on linkages between the behavior of traditional and contemporary African people. The role of the black family in the struggle for equality and liberation is explored.

AAS 150 3 C/45 CH
African-American People in Michigan History
A course designed to give the student an historical perspective of the development of Michigan with emphasis on the accomplishments and roles the African-American has played in the development of the State and the surrounding region.

AAS 175 3 C/45 CH
History of African-American Music
This course traces the development of African-American music in America. An analysis of African music and its influence on the western world as well as the contributions and development of the blues, gospel, jazz and classical artists, such as Mahalia Jackson, Marion Anderson, William Grant Still, Charlie Parker, John Coltrane, Duke Ellington, etc.

AAS 180 3 C/45 CH
Introduction to African Politics
Examination of dynamics of African politics and nation-building and a comparison of various post-colonial African governments.

AAS 201 3 C/45 CH
Addictions
Overview of illegal drug traffic and its impact upon the African-American community and the majority community, as well as the criminal justice system. Concentration on the development and functions of local and federal programs, the role of law enforcement and the courts, the rights of the accused, the trafficker and the current situation in the United States.

AAS 237 3 C/45 CH
Illegal Drug Traffic and the African-American Community
Overview of illegal drug traffic and its impact upon the African-American community and the majority community, as well as the criminal justice system. Concentration on the development and functions of local and federal programs, the role of law enforcement and the courts, the rights of the accused, the trafficker and the current situation in the United States.

AAS 253 3 C/45 CH
African Caribbean Literature
Study of African Caribbean literature encompassing the West Indian islands and adjacent countries South America; Guyana, Suriname, French Guiana and Brazil in Central America. Emphasis will be on the linguistic and cultural influences on the prose and poetry of Caribbean literature.

ALLIED HEALTH (ALH)

ALH 110 3 C/45 CH
Medical Terminology
Introduction to the terminology of health professions. Usage, definition, pronunciation and spelling of terms common to the health professions. Computerized study guides and audio cassette tapes are used to enhance student learning.

ALH 115 3 C/45 CH
Medical Computer Systems
Exploration of computer systems used in the health care industry. Laboratory included.

ALH 214 3 C/45 CH
Pharmacology
Introduction to Pharmacology

ALH 230 3 C/45 CH
Medical Ethics
Ethical principles and consideration for the allied health professional. Guidelines for practice and conduct relative to legal, moral and ethical duties and responsibilities.

ALH 240 3 C/45 CH
Health & Wellness Services in the Community
This course is designed to provide students with an introduction to community health. Community health issues and the causes of health inequality will be examined. Power relations among racial, social, cultural and economic groups will also be discussed.

ALH 250 3 C/45 CH
Community Health Issues
This course will examine social, behavioral and environmental community health-related issues and the controversies that surround them. Group and class presentation work will be emphasized.

ALH 260 3 C/45 CH
Community Health Resources
This course examines health issues in the community in terms of organization, resources, programming, and special populations. Field trip experiences designed to connect and integrate theory with specific activities in a “real” environment are required in this course.
### AMERICAN SIGN LANGUAGE (ASL)

</tr>
</tbody>
</table>

**Description:**
This introductory course is designed to develop the basic skills of American Sign Language. It consists of a preparatory phase to attune students to communication in the manual-visual mode, followed by instruction and practice in vocabulary, sentence structure, elementary conversation, and literature.

**Focus:**
- Three aspects of the deaf community
- Initial introductory American Sign Language course

**Linguistic Features:**
- Phonetics
- Phonology
- Morphology
- Syntax
- Semantics

**Objective:**
To develop the students' receptive and expressive sign vocabulary, the use of signing space, non-manual components of ASL grammar including facial expression and body postures, and introduction to conversational regulators.

**Prerequisite:**
- ARA 101

### ANTHROPOLOGY (ANT)

</tbody>
</table>

**Description:**
- This is an international study course that provides students an opportunity to explore many aspects of globalization as a driving force in human life. This interactive class is designed to engage students in a public intellectual conversation that contributes to our common life together and to our understanding of the wider world. This course prepares students for travel overseas after which two to three weeks are spent in the cultural context of a country with opportunities to participate in research, journal writing, creative projects, and group sessions.
- Travel destinations will vary.

**Objective:**
- To develop an awareness and understanding of the nature and diversity of cultural patterns and life-styles within urban America in general and metropolitan Detroit in particular. Various ethnic, religious, social and sexual life-styles and traditions are studied through field experiences and cultural informants.

**Prerequisites:**
- ARA 102 or departmental approval

**Description:**
- This introductory course is designed to introduce the students to the Deaf community as a complex and diverse community with a rich heritage and prosperous future. This course focuses on three aspects of the deaf community and culture: 1) historical perspectives and cultural norms within the Deaf community, 2) diversity within the Deaf community and 3) artistic expression and humor.

**Objective:**
- The physical and cultural nature and development of humans in relationship to their environment. Race and human variation, archaeology and its uses, the nature and function of culture and the relevance and application of anthropology in modern society.

**Prerequisites:**
- ARA 101
- ARA 102

- ART 123 for ART 124
- ART 124 for ART 125
- ART 125 for ART 126
- ART 126 for ART 127

**Course Descriptions:**
- **ART 101: Drawing I**
  - Introduction to perspective, composition, rendering and other fundamental techniques and elements of drawing. Explores the potentials working with various media with emphasis on drawing, value, perspective, rendering, proportion, color, and composition. All of the subject matter areas including still life, the figure and landscape are explored.
- **ART 102: Drawing II**
  - Explores the potentials working with various media with emphasis on drawing, value, perspective, rendering, proportion, color, and composition. All of the subject matter areas including still life, the figure and landscape are explored. Greater emphasis on personal expression.
- **ART 103: Drawing III**
  - Explores the potentials working with various media with emphasis on drawing, value, perspective, rendering, proportion, color, and composition. All of the subject matter areas including still life, the figure and landscape are explored. Greater emphasis on personal expression.
- **ART 111: Design I**
  - An introduction to Design and Composition. An exploration of line, value, texture, shape and space, color and mass through lectures, demonstrations and assignments related to these design elements through various projects.
- **ART 112: Design II**
  - An introduction to Two Dimensional Design and Composition. An exploration of line, value, texture, shape and space, color and mass through a series of lecture/demonstrations and “Hands-On” assignments. Various elements and materials including glass, wood, metals, ceramic and other materials will be investigated through various projects.
- **ART 115: Basic drawing for Animation**
  - This course will introduce students to the fundamental principles of drawing and drawing for animation. The student will learn the basics skill for drawing principles with an emphasis in game development providing the foundation for understanding and creating animation. Topics are how to draw: animals, human anatomy, natural setting and drawing effectively for animation. The student will develop the essential drawing skill necessary to be a successful animator.
- **ART 119: Painting I**
  - An introduction to opaque media painting. Explores the potentials of painting media with emphasis on drawing, value handling, color, and composition. All of the subject matter areas including still life, the figure and landscape are explored.
- **ART 121: Painting II**
  - Continuation of ART 121 with emphasis upon new techniques and materials and more complex subject matter. Explores the potentials of painting media with emphasis on drawing, value handling, color, and composition. All of the subject matter areas including still life, the figure and landscape are explored.
- **ART 122: Painting III**
  - Continuation of ART 122 with emphasis upon personal expression. Composition, individual painting techniques and development of a painting portfolio will be important aspects of the course.
- **ART 123: Painting IV**
  - Continuation of ART 123 with emphasis upon the use of the potter’s wheel and related skills. Supplies cost extra. (Meets six hours per week)
- **ART 124: Sculpture I**
  - Continuation of ART 124 with emphasis upon new techniques and materials. (Meets six hours per week)
- **ART 125: Sculpture II**
  - Additional printmaking methods including multi-color reduction woodcut and linecut, multi-etched etching, photo silk screen and paper lithography.
- **ART 126: Printmaking I**
  - Introduction to basic printmaking, multi-color silkscreen printing, relief printing and engraving.

### ASTRONOMY (AST)

<tbody>
<tr>
<td>AST 101</td>
<td>Astronomy I: New Solar System</td>
<td>3</td>
</tr>
</tbody>
</table>

**Course Descriptions:**
- **AST 101: Astronomy I: New Solar System**
  - A survey course including a study of the solar system, stars and constellations as well as some topics of current astronomical interest.
AUT 114 3 C/60 CH
Electrical/Electronic Systems I
Lab fee
Prerequisite: Program Approval
This course is a required course in the Automotive Technology certificate and associate degree programs. This fundamental course provides students with the necessary skills and understanding to identify, describe, and locate basic parts of major electrical/electronic automotive systems. Electrical theory, operating principles, construction, and maintenance of various components will be applied in this class. Introduction to on-vehicle testing procedures and inspection of electrical components will be performed by students. There will be discussion and testing of on-board computers included. ASE certification requirements will be introduced in this course.

AUT 115 3 C/60 CH
Electrical/Electronic Systems II
Lab fee
Prerequisite: AUT 114
This course is a required course in the Automotive Technology certificate and associate degree programs. This course provides students with the necessary skills and understanding to system construction and operations. Electrical theory, operating principles, construction, maintenance and repair of various components are included in the class. On-vehicle testing, inspection, and diagnosing of electrical components will be performed by students. Students will be expected to perform the necessary service of OBD I & II vehicles with the use of scan tools and analyzers. In addition, ASE certification testing procedures will be implemented and applied in this course.

AUT 117 3 C/60 CH
Electrical/Electronic Systems IV
Lab fee
Prerequisites: AUT 114, AUT 115, AUT 116
This course is a required course in the Automotive Technology certificate and associate degree programs. This advanced course provides students with the necessary skills and understanding of advanced inspection, diagnosis & repair of electrical/electronics in automotive vehicles. The student will perform advanced diagnosing, vehicle testing and repair on today's automobiles using the latest testing equipment. Students will perform the necessary service on OBD I & II vehicles with the use of scan tools and analyzers. In addition, sample ASE certification tests and procedures will be implemented and strongly applied in this course.

AUT 118 3 C/60 CH
Engine Performance I
Lab fee
Prerequisites: AUT 114, AUT 115, AUT 116, AUT 117
This introductory course is designed to help the student identify engine and computer control systems on the modern automobile. Basic troubleshooting procedures will be used to diagnose the engines electrical, ignition, fuel and emissions systems. Other areas such as ASE certification techniques will also be introduced in this course.

AUT 119 3 C/60 CH
Engine Performance II
Lab fee
Prerequisites: AUT 114, AUT 115, AUT 116, AUT 117, AUT 118
This course is a continuation of AUT 118 and is designed to help the student identify the complex engine and computer control systems on the modern automobile. Basic troubleshooting procedures will be used to diagnose the engines electrical, ignition, fuel and emissions systems. Other areas such as ASE certification techniques will also be introduced in this course.

AUT 120 3 C/60 CH
Brakes I
Lab fee
Prerequisites: AUT 114, AUT 115, AUT 116, AUT 117
This course is designed to provide students with the necessary skills and understanding to research, diagnose, repair and maintain the automotive braking systems. In addition, it will provide the necessary skills to be prepared for the ASE certification brakes exam. Hydraulic theory, brake operating principles, anti-locking brake theory & systems, construction, maintenance and inspection will be performed by the student.

AUT 121 3 C/60 CH
Steering & Suspension I
Lab fee
Prerequisites: AUT 114, AUT 115, AUT 116, AUT 117
This course is designed to introduce the student to the basic components and operations of the automotive suspension & steering systems. Troubleshooting, inspection, and diagnosing of suspension & steering problems will be applied in this course. The student is expected to perform these techniques to show competency in this area. In addition, ASE principles for certification will be highly stressed and applied in this course.

AUT 122 4 C/75 CH
Automatic Transmission & Transaxle I
Lab fee
Prerequisites: AUT 114, AUT 115, AUT 116, AUT 117, AUT 126, AUT 209
This course is designed to provide students with the necessary skills and understanding to research, diagnose, repair, overhaul and maintain automatic transmissions, operating principles, hydraulics, power flow, testing and overhaul procedures for transmissions and transaxles. On-vehicle inspection, diagnosis and repair are performed by the student.

AUT 123 3 C/60 CH
Engine Repair I
Lab fee
Prerequisites: AUT 114, AUT 115, AUT 116, AUT 117
Engine repair is the study of basic theory, design, service, and diagnosis of live automotive engines. Practical application of diagnosis, removal, inspection, measurement, repair, installation, and safety procedures will also be taught.

AUT 124 4 C/75 CH
Engine Repair II
Lab fee
Prerequisites: AUT 114, AUT 115, AUT 116, AUT 117
Engine repair is the study of basic theory, design, service, and diagnosis of live automotive engines. Practical application of diagnosis, removal, inspection, measurement, repair, installation, and safety procedures will also be taught.

AUT 125 3 C/60 CH
Heating and Air Conditioning I
Lab fee
Prerequisites: AUT 114, AUT 115, AUT 116, AUT 117
This course is designed to provide students with the necessary skills and understanding to research, diagnose, repair and maintain the automotive Heating, Ventilation, and Air Conditioning systems. In addition, it will provide the necessary skills to be prepared for the ASE certification exam.

AUT 126 3 C/60 CH
Manual Drive Train & Axles
Lab fee
Prerequisites: AUT 114, AUT 115, AUT 116, AUT 117
This course is designed to provide students with the necessary skills and understanding to identify basic characteristics and components of the manual drive train and axle design. On-vehicle inspection, diagnosis, and repair are performed by the student. Identification of special tools used on these systems will also be explained. In addition, ASE principles for certification will be introduced to the student.

AUT 127 4 C/75 CH
Introduction to Alternative Fuels
Lab fee
Prerequisites: AUT 117
Students will use various sources in the alternative fueled vehicle industry to learn what alternative fuels are available, which include an overview of alternative fuel engine technology, compressed natural gas technology, electronic diagnostic and integration methods, system specific electronics, emission testing, cylinder inspection, and driver orientation/safety/vehicle inspection.

Continued on next page.
AUTOMOTIVE SERVICE TECHNOLOGY (AUT) continued

AUT 151 4 C/60 CH
Light Duty Diesels
Lab
Prerequisite: AUT 117
This course covers the operation of light duty diesel engines. Students will diagnose and repair mechanical and electronic fuel injection systems, air induction and exhaust systems, and perform general engine diagnosis according to engine manufacturer standards.

AUT 152 4 C/60 CH
Introduction to Electric and Fuel Cells
Prerequisite: AUT 117
This course is designed to help prepare the student to enter the automotive repair and service industry in the area of alternative fuels and advanced technology vehicle. It is an intensive study of vehicle electric and fuel cell theory, application, installation, diagnosis, service and safety regulations.

AUT 153 4 C/60 CH
Introduction to Gaseous Fuels
Prerequisite: AUT 117
This course is designed to help prepare the student to enter the auto repair and service industry in the area of alternative fuels and advanced technology vehicles. It is an intensive study of three gaseous fuels - natural gas, propane and hydrogen. Theory, application, installation, diagnosis and safety regulations will be covered.

AUT 154 4 C/60 CH
Introduction to Hybrid Fuel Technology
Prerequisite: AUT 117
This course covers the fundamentals of hybrid vehicle technology. The course is intended to give the student an understanding of the types of hybrid vehicles, hybrid vehicle components, how hybrid vehicles operate and basic service procedures; this will enable the student to obtain employment as an advanced technology vehicle technician.

AUT 155 4 C/60 CH
Introduction to Hydrogen Sp
Applications and Safety
Lab fee
Prerequisite: AUT 117
This course will give the student an understanding of the properties of hydrogen, it's use as a fuel for internal combustion engines and fuel cells, and the storage, transportation and safety considerations, enabling the student to obtain employment as an advanced fuel or advanced technology vehicle technician.

AUT 200 3 C/60 CH
Engine Performance III
Lab fee
Prerequisites: AUT 114, AUT 115, AUT 116, AUT 117, AUT 118, AUT 119
This intermediate course is designed to help the student diagnose and repair the complex engine and computer control systems on the modern automobile. Basic diagnostic procedures will be used to troubleshoot and diagnose the engines electrical, ignition, fuel and emissions systems. Other areas such as ASE certification techniques will also be utilized in this course.

AUT 201 3 C/60 CH
Engine Performance IV
Lab fee
Prerequisites: AUT 114, AUT 115, AUT 116, AUT 117, AUT 118, AUT 119, AUT 200
This advanced course is designed to provide the student with hands-on techniques to inspection, diagnose and repair of complex engine and computer control systems on modern automobiles. Advanced diagnostic procedures will be used to troubleshoot and diagnose the engines electrical, ignition, fuel and emissions systems. An understanding of employment opportunities, “pertaining to engine performance”, will be discussed. While utilizing these tasks, ASE certification principles will be highly stressed and applied in this course.

AUT 203 3 C/60 CH
Brakes II
Lab fee
Prerequisites: AUT 114, AUT 115, AUT 116, AUT 117, AUT 120
This course is a continuation of Brakes I and will be used to exercise the student's abilities to perform theory, diagnosis and operations of automotive braking systems. The student will inspect, remove & replace braking system components, perform machining techniques, overhaul and repair braking systems. This automotive brakes class is a combination of (70%) laboratory experiences and (30%) lecture. Every student will be expected to participate in lab exercises and will be evaluated on an individual basis. The ASE certification requirements will be highly stressed in this course.

AUT 204 2 C/45 CH
Steering & Suspension II
Lab fee
Prerequisites: AUT 114, AUT 115, AUT 116, AUT 117, AUT 121
This course is a continuation course of Steering and Suspension I. This course is designed to provide the student with the knowledge and skills to inspect, diagnose and perform repair procedures on automotive steering and suspension systems, as well as introduction to basic inspection and diagnosing of steering and suspension problems will be applied in this course. Identification of special tools used on these systems will also be explained. In addition, ASE principles for certification will be introduced to the student.

AUT 205 3 C/60 CH
Automatic Transmission & Transaxle II
Lab fee
Prerequisites: AUT 114, AUT 115, AUT 116, AUT 117, AUT 126, AUT 209, AUT 122
This course is a continuation of Automatic Transmission and Transaxle I and will be used to exercise the student’s abilities to perform research, diagnose, repair, overhaul and maintain automatic transmissions, operating principles, hydraulics, power flow, testing and overhaul procedures for transmissions and transaxes. On-vehicle inspection, diagnosis and repair are performed by the student.

AUT 207 3 C/60 CH
Engine Repair II
Lab fee
Prerequisites: AUT 114, AUT 115, AUT 116, AUT 117, AUT 124
This course is a continuation of Engine Repair I and will be used to exercise the student’s abilities to perform theory, diagnosis and operations of automotive engines. Students measure, inspect, recondition, disassemble, and assemble various engine components.

AUT 208 3 C/60 CH
Heating, Ventilation, & Air Conditioning II
Lab fee
Prerequisites: AUT 114, AUT 115, AUT 116, AUT 117, AUT 125
This course is a continuation of Heating, Ventilation, and Air Conditioning I and will be used to exercise the student’s abilities to perform theory, diagnosis and operations of automotive heating, ventilation, and air conditioning systems. In addition, it will provide the necessary skills to be prepared for the ASE certification exam.

AUT 209 2 C/45 CH
Manual Drive Train & Axles II
Lab fee
Prerequisites: AUT 114, AUT 115, AUT 116, AUT 117, AUT 126
This course is a continuation of AUT 126 and is designed to provide students with the necessary skills and understanding to diagnose, disassemble, and reassemble a manual transmission. On-vehicle inspection, diagnosis, and repair are performed by the student.

**Notes:**
- **Credits (C)**: The number of credits each course is worth.
- **Contact Hours (CH)**: The total number of hours spent in class and lab.
- **Lecture (HL)**: The number of hours spent in class.
- **Lab (HLB)**: The number of hours spent in lab.
- **Lab fee**: Additional fee for lab materials.
- **Prerequisites**: Courses that must be completed before enrolling in the listed course.
BIOLOGY (BIO) continued

kingdom with representative life cycles and relationships between plant groups. Emphasis is placed on the development, anatomy, physiology and evolution of gymnosperms and angiosperms. (Meets six hours per week; four hours lecture and two hours laboratory)

BIO 155 \(4\) \(CH\) \(HL\) \(HB\)
Prerequisite: BIO 155
Principles of animal biology as they apply to major animal phyla. A survey of the animal kingdom with emphasis on evolutionary and comparative relationships of the various phyla. A comparative study of major animal phyla emphasizing anatomy, physiology and ecological principles. (Meets six hours per week; four hours lecture and two hours laboratory)

BIO 204 \(4\) \(CH\)
Life Science for Elementary School Teachers
Lab fee: $20.00
Prerequisite: ED 111 and BIO 125
Lecture and laboratory course dealing with life science concepts and the variety of strategies used to teach these concepts in elementary schools. Current State of Michigan life science teaching objectives and associated learning activities will be emphasized. In addition, students will develop a life science lesson and teach it to children in an elementary (K-8) school.

BIO 240 \(4\) \(CH\) \(HL\) \(HB\)
Human Anatomy & Physiology I
Lab fee
Prerequisite: BIO 155
Lecture and laboratory course on the structure and function of the human body. The cellular, tissue, organ and systems levels are considered. Emphasis is on the integumentary, skeletal, muscular and nervous systems including the special senses. The laboratory supplements the lecture with the use of microscopes to study the four basic tissues. The use of the torso, models, articulated/disarticulated skeletons, dissection of sheep brain and bovine eyes are used to study the other systems. (Meets six hours per week; four hours lecture and two hours laboratory)

BIO 250 \(4\) \(CH\) \(HL\) \(HB\)
Human Anatomy & Physiology II
Lab fee
Prerequisite: BIO 240
Lecture and laboratory course that is a continuation of the systems found in the human body: circulatory, respiratory, digestive, metabolism, urinary, endocrine & reproductive systems. Body fluid, electrolytes & acid/base balance are also included. The laboratory supplements the lecture topics with the use of the torso, dissection of bovine heart models, charts and slides. (Meets six hours per week; four hours lecture and two hours laboratory)

BIO 252 \(4\) \(CH\)
Pathophysiology
Lab fee
Prerequisite: BIO 250
This course is designed to introduce mechanism and manifestation of different human diseases. The basic science of pathology is concerned with the etiology and pathogenesis of disease. Essential information is provided for understanding the diagnosis of disease in the clinical setting.

BIO 295 \(4\) \(CH\) \(HL\) \(HB\)
Microbiology
Lab fee
Prerequisite: BIO 155
Lecture and laboratory course studying the biology of microorganisms. Lecture topics survey the microbes, their uniqueness of cell structure and function, growth, physiological characteristics, genetics, physical and chemical control and selected communicable diseases. The laboratory emphasizes the use of the microscope, staining procedures, cultural and physiological techniques, use of keys to identify representatives of the various microbes. (Meets six hours per week; four hours lecture and two hours laboratory)

BUSINESS (BUS)

BUS 132 \(3\) \(CH\)
Personal Business Affairs
E, Sp, Sm
Phases of business activity in which the individual or family is normally involved: consumer rights, banking, taxation, among others.

BUS 150 \(3\) \(CH\)
Introduction to Business
E, Sp, Sm
An examination of the legal, economic and organizational environments in which modern business operates, including the global dimension of business. A survey approach to the functional areas of business-accounting, information systems, research, finance, management, supervision, human resources and marketing and how they relate to the overall organization.

BUS 175 \(3\) \(CH\)
Small Business Management
E, Sp
General business concepts with special application to small businesses. Detailed treatment of credit practices, franchising, location, inventory and other topics particularly crucial in a small business setting. Cases will be used to develop the student’s analytical.

BUS 177 \(3\) \(CH\)
Small Business Financing
Sp
Prerequisite: BUS 150
This course is a survey of financing policy for small business. Purchase discounts, borrowing, credit purchases, finance charges, consumer credit, financial management, financial statements, financial ratios and equity leverage are included.

BUS 221 \(3\) \(CH\)
Business Statistics
E, Sp, Sm
Prerequisite: MAT 113
Methods of gathering and presenting statistical data. Basic concepts of probability, sampling and tests of significance for decision making are emphasized.

BUSINESS LAW (BL)

BL 201 \(4\) \(CH\)
Business Law I
E, Sp, Sm
A survey of the American legal system designed to develop an understanding of the fundamentals of business law. Classes are conducted by using text and actual case studies for the purpose of observing the development and application of legal principles in a business activity. Topics covered include the nature of law, courts and court procedures, crimes and torts, contracts, sales and negotiable instruments.
COURSE DESCRIPTIONS

CAREER AND PROFESSIONAL DEVELOPMENT (CPD)

CPD 100 1 C/15 CH
Career and Professional Development
A course designed to assist students in making career choices. Development of self-confidence, motivation, human relation skills and stress reduction in the classroom and the work place are emphasized. Study skills, time management and conflict resolution are emphasized.

CHEMISTRY (CHM)

CHM 105 4 C/60 HL/30 HLB
Introduction to Chemistry F, S, S
Lab fee
An introductory lecture and laboratory course in chemistry for persons without any previous high school chemistry or for those with an inadequate background for CHM 136. Topics include properties of matter, atomic theory and structure, chemical bonds, nomenclature, composition of compounds, chemical equations and calculations from chemical equations and stoichiometry (meets six hours per week; four hours lecture and two hours laboratory).

CHM 136 4 C/60 HL/30 HLB
General Chemistry I F, S, S
Lab fee
Prerequisites: CHM 105, MAT 112
First lecture and laboratory course in a two semester general chemistry sequence. It includes a study of stoichiometry, solutions and concentrations of general chemistry sequence. It includes a study of chemical kinetics, chemical equilibrium, acid-base concepts, acid-base equilibrium solubility and complex ion equilibria, thermodynamics and electrochemistry (meets six hours per week; four hours lecture and two hours laboratory).

CHM 145 4/60 HL/30 HLB
General Chemistry II F, S, S
Lab fee
Prerequisite: CHM 136
This is the second lecture and laboratory course in a two-semester general chemistry sequence. It includes a study of reaction mechanisms and it relates to understanding biochemical reactions. The structure and function of protein, carbohydrates, lipids and nucleic acids are presented. The major metabolic pathways are explored. The role of food nutrition in optimizing metabolism and energy production is discussed (meets six hours per week; four hours lecture and two hours laboratory).

CHM 155 4 C/60 HL/30 HL
Survey Organic & Biochemistry F, S, S
Lab fee
Prerequisites: CHM 105 or CHM 136
A lecture and laboratory course introducing the student to elementary structural organic chemistry as it relates to understanding biochemical reactions. The structure and function of protein, carbohydrates, lipids and nucleic acids are presented. The major metabolic pathways are explored. The role of food nutrition in optimizing metabolism and energy production is discussed (meets six hours per week; four hours lecture and two hours laboratory).

CHM 250 4/60 CH
Organic Chemistry I F, S
Prerequisite: CHM 145 Conquisite: CHM 252
First lecture course of a one-year sequence in organic chemistry designed for chemistry majors and for students planning to attend professional schools. Topics include introduction to the nomenclature of organic compounds, stereochemistry, reaction intermediates, spectroscopy, kinetics, and thermodynamics (meets four hours per week).

CHM 252 4/60 CH
Organic Chemistry II F, S
Prerequisite: CHM 250 Conquisite: CHM 255
Second course of a one-year sequence in organic chemistry designed for chemistry majors and for students planning to attend professional schools. Topics include aromatic structures and nomenclature, a more extensive study of reaction mechanisms and synthesis. The chemical basis of biological compounds will also be introduced (meets four hours per week).

CHM 255 4 C/90 HLB
Laboratory for Organic Chemistry I & II rt fee
Prerequisites: CHM 250 Conquisite: CHM 252
Preparations, properties, and identification of organic compounds provide the student with basic laboratory skills in organic chemistry (meets six hours per week; six hours laboratory).

CHILD CARE TRAINING (CCT)

EARLY CHILDHOOD EDUCATION

CCT 101 3 C/45 CH
Introduction to Early Childhood Care
This is a survey class which will acquaint students with an understanding of early childhood and early childhood education programs. Theories and practices in early childhood curricula: the development of a multicultural approach to learning, pedagogy, and child management; national and state standards for licensing of programs; and NAEC (National Association for the Education of Young Children) recommendations for child development are explored. Class recommended for those who are meeting the State of Michigan Child Care Directors’ 12 credit hours requirement.

CCT 104 4 C/60 CH
Methods & Techniques in Child Care Infant & Toddler Development
Prerequisites: CCT 101 or permission to enroll, ENG 119, HUS 105, PSI 101, EMT 101 program admittance, police clearances, FIA, immunizations, physical exam and food handler’s card
Students will explore methods that meet the needs and stimulate the development of preschool children ages 2 1/2 to 5. Students will learn various child management techniques that ensure an environment that is socially, communicatively, emotionally, cognitively, creatively and physically supportive. A multicultural approach to learning is emphasized. Students will be required to complete a 45 hour field experience in a preschool setting. Course will meet requirements in preparation of the CDA assessment. (One credit hour for practicum and three credit hours of in-class time.) Class is not interchangeable, nor will it be substituted for CCT 105. Class recommended for those who are meeting the State of Michigan Child Care Directors’ 12 credit hours requirement and will work with preschoolers. Students enrolled in CCT 106 must enroll in ENG 285.

Continued on next page.
CHILD CARE TRAINING (CCT)
EARLY CHILDHOOD EDUCATION continued

CCT 111 3 C/45 CH
Child Assessment Techniques E, F, Sp, Sm
Prerequisites: CCT 101, EMT 101, ENG 119, HUS 105, PSY 101
Students will explore tools and techniques utilized in the evaluation of cognitive, creative, communicative, emotional, social and physical development of children birth through five years of age. The course will explore standardized measures and observational techniques to meet CDA course requirement. Class is not interchangeable, nor can it be substituted for CCT 110.

CCT 120 3 C/45 CH
Parent-Child Teacher Relationship Sp, Sm
Prerequisites: HUS 105 and CCT 101 or permission to enroll, ENG 119, PSY 101, ENG 285 or CCT 257 and EMT 101
Students will explore methods and techniques that maintain an open, friendly and cooperative relationship with parents; encourage parental involvement, and support the children’s relationship with her or his family. Class recommended for those who are meeting the State of Michigan Child Care Directors’ 12 credit hours requirement.

CCT 157 4 C/164 CH
Child Care Practicum & Seminar I E, Sp
Prerequisites: ENG 119, HUS 105, HUS 135, CCT 101, CCT 104 or CCT 106, PSY 101 and EMT 101
A supervised practical learning experience in which students work with children (infants and toddlers or preschool ages) in actual facilities under the direction of certified professional staff. Students preparing for the CDA certification will use the field placement to prepare for CDA assessment. Students will meet with their instructor on a weekly basis for a seminar. Class is not interchangeable, nor will it be substituted for CCT 226.

CCT 210 3 C/45 CH
Special Populations E, Sp
Prerequisites: CCT 101, EMT 101, ENG 119, HUS 105, PSY 101, program admittance
A survey class with an emphasis on the identification of the cognitive, communicative, creative, emotional, physical and social growth of infants, toddlers and preschoolers with special needs, accelerated, physical, and emotional; and methods used in the address of these needs to stimulate development. Class will aid CDA students in the completion of the CDA portfolio.

CCT 220 3 C/45 CH
Children, Instruction and the Media E, Sp, Sm
Prerequisites: ENG 119, HUS 105, HUS 135, CCT 101, CCT 104 or CCT 106, PSY 101 and EMT 101
A curriculum design course, students will learn to design curriculum and use content analytical methods to examine various forms of media (i.e., audio recorders, CDs, computers, display boards, film, overhead transparencies, radio, tape recorders, television, text, video and visuals), and utilize media to augment and enhance classroom curricula. Class recommended for those meeting the State of Michigan Child Care Directors’ 12 credit hours requirement.

CCT 227 4 C/164 CH
Child Care Practicum & Seminar II E, Sp
Prerequisites: CCT 101, CCT 157 EMT 101, ENG 119, HUS 105, HUS 135, CCT 101, program admittance
A supervised practical learning experience in which students work with children (infants and toddlers or preschool ages) in actual facilities under the direction of certified professional staff. Students preparing for the CDA certification will use the field placement to prepare for CDA assessment. Students will meet with their instructor on a weekly basis for a seminar. Class is not interchangeable, nor will it be substituted for CCT 226.

CCT 230 3 C/45 CH
Program Management & Supervision E, Sp
Prerequisites: PSY 101, HUS 105, ENG 119, CCT 101 and EMT 101
This course will focus on the administrative program management, and supervision fundamental to the operation of early childhood programs and centers. Includes establishment of an organizational system, budget development and controls, licensing, business proposal writing, staffing, staff evaluation and supervision. CDA course requirement. Class recommended for those who are meeting the State of Michigan Child Care Directors’ 12 credit hours requirement.

CCT 257 3 C/45 CH
Infant Literature: Birth to 36 Months E, Sp, Sm
Prerequisites: ENG 119, CCT 101, PSY 101
The “Infant Literature” course is designed in response to developing literature foundations among infants and toddlers ages two weeks to 36 months, and identifies methods to assist parents. Recommended for CDA students who are seeking certificate upgrade. CCT 104 students must also enroll in this class.

CCT 260 1 C/15 CH
Portfolio - Methods and Techniques E, Sp, Sm
Prerequisites: CCT 101, 104, 106, 110, 120, 157, 210, 220, 230 and ENG 119
Students will construct a portfolio using data collected from previous course work and/or practical experiences. The portfolio can be used to meet CDA requirements. It can serve as a demonstration of knowledge and experience when applying to a university and for employment.

CHINESE (CHN)

CHN 101 4 C/60 CH
Introduction to Chinese Language E, Sp, Sm
This course is designed for beginning students and aimed at developing the four skills of listening to, speaking, reading, and writing Chinese. Emphasis is on grammatical constructions, vocabulary, basic idioms, and phonetics. Special emphasis will be on development of conversational Chinese.

COMMUNITY COLLEGE ORIENTATION (CCO)

CCO 100 1 C/15 CH
Community College Orientation E, Sp, Sm
This course is designed to assist new students in making a successful adaptation to the college environment and enhancing basic study skills. The course emphasis is on improving students’ academic, social and interpersonal skills through introduction to the life and study skills essential for academic success. This course is designed to increase student’s awareness and use of resources both within and outside of the college (meets two hours per week for seven and one-half weeks).

COMPUTER INFORMATION SYSTEMS (CIS)

CIS 110 4 C/60 CH
Introduction to Computer Information Systems
Designed as a first course for Computer Information Systems majors which will introduce the vocabulary and concepts of computer hardware and software. The computer information industry, career paths, systems, concepts, societal impacts and ethical issues will be discussed.

CIS 112 3 C/45 CH
Structured Design
Corequisite: CIS 110
Designed to introduce problem solving methods, algorithm development and designing, coding, debugging and documenting programs using techniques of top-down, structured programming style.

Continued on next page.
CIS 203 3 C/45 CH
Visual Basic Programming Language
Prerequisites: CIS 110, CIS 112
This course is designed to introduce the student to Visual Basic programming language. This course covers Visual Basic concepts, tools, and programming methodology to create user friendly Microsoft Windows Application.

CIS 207 4 C/60 CH
Java Programming Language
Prerequisites: CIS 110, CIS 112
This course is designed to introduce the student to Java programming including providing the knowledge and skills necessary for object-oriented programming. The student will learn how to program in JAVA which includes its syntax, its environment and its support for graphical user interface.

CIS 209 4 C/60 CH
C Programming Language
Prerequisites: CIS 110, CIS 112
This course is designed to develop an understanding of the C programming language. C is a general-purpose programming language widely used in both systems programming and application programming. Student will solve programming assignments using C what is a programming known for its brevity of expression, modern control flow and data structures, and a rich set of operators.

CIS 210 3 C/45 CH
Introduction to Unix Operating Systems
Prerequisites: CIS 110
This course is designed as a first course for computer information systems majors, and novice Unix users with computer skills but no experience with any operating system. This course is a comprehensive overview of the Unix Operating System, and the environment in which it functions. Students will use the college’s desktop computers, ubiquitous network, and Unix Server to facilitate their understanding.

CIS 212 4 C/60 CH
Linux
Prerequisites: CIS 110, CIS 210
In this course students will define and identify origins, benefits, drawbacks, and uses of the Linux operating system. The students will log in, enter commands, shut down and restart your Linux workstation, create and configure users and groups, and manage the file system. The students will use Linux text editors and redirection to create and modify files, archive files with tar, cpio, and other commands. The students will work in the X Window environment, manage print services, and add and update packages through package management utilities.

CIS 213 3 C/45 CH
Web Design Methodology and Technology
Prerequisites: CIS 110, CIS 241
This course teaches students how to create and manage Web sites with Multimedia tools such as Macromedia Dreamweaver and Flash, FrontPage, Dynamic HTML, and various multimedia and CSS standards. Students will also implement strategies to develop third-generation Web sites, evaluate design tools, discuss future technology standards, and explore the incompatibility issues surrounding current browsers. This course also focuses on theory, design and Web construction.

CIS 223 3 C/45 CH
COBOL I
Prerequisites: CIS 110, CIS 112
COBOL I is designed to enable the student to learn the COBOL programming language from algorithm development and designing to coding, debugging, and documenting programs using structured programming methodologies.

CIS 227 7 C/105 CH
Cisco CCNA
Prerequisites: CIS 110, CIS 240
In this class the students will broaden their working knowledge of routing protocols. Through hands on work with Cisco switches and routers the student will install, configure and operate small networks.

CIS 237 4 C/60 CH
Networking Essentials
Prerequisite: CIS 110
This course will be an introduction to network concepts. The students will describe the features and functions of networking components, and possess the knowledge and skills needed to install, configure and troubleshoot basic networking hardware. Protocols and standards, network implementation, and network support are also covered in this course.

CIS 241 4 C/60 CH
Internet Foundations
Prerequisite: CIS 110
This course teaches students about internet connection methods, protocols, hypertext markup language, along with networking technologies. Students will learn about how websites are developed, wireless networking, and troubleshooting.

CIS 242 3 C/45 CH
Web Administration
Prerequisites: CIS 110, CIS 210, CIS 244
This class is a comprehensive course that teaches students how to install a website and keep it in up and running. Students will also learn how to keep the hosting server working in different operating systems. At the end of this course, students will be able to provide essential services for anyone interested in establishing an effective e-business presence.

CIS 243 3 C/45 CH
Network Security Fundamentals
Prerequisites: CIS 110, CIS 210, CIS 240
This course will teach students the latest security industry recommendations and how to properly protect servers from attacks in a variety of settings. Students will learn how to keep servers reconfigure the operating system to fully protect it, and scan hosts for known security problems. By the end of the course, students will have a solid understanding of the security architectures used by Windows and Linux.

CIS 244 3 C/45 CH
TCP/IP Concepts and Practices
Prerequisites: CIS 110, CIS 240
In this course the students will learn Transmission Control Protocol/Internet Protocol (TCP/IP) key concepts and protocols. Network routing, network troubleshooting and network management also will be addressed.

CIS 245 3 C/45 CH
Wireless Networking
Prerequisites: CIS 110, CIS 240
This course will introduce the student to wireless networking over a range of applications, from local area networks to broadband wide area network links. Students will be able to describe the advantages and disadvantages of wireless communication in general, and understand the difference between radio and infrared. The course will cover WLANs, configuration and security problems.

CIS 246 4 C/60 CH
Oracle Database Administrator I
Prerequisite: CIS 285
In this course the student will gain a conceptual understanding of the Oracle database and how its components work and interact with one another. Students will learn how to create a working database and properly manage it including performance monitoring, database security, user management, and backup/recovery techniques.

CIS 247 4 C/60 CH
Oracle Database Administrator II
Prerequisite: CIS 246
In this class, the students will learn how to configure an Oracle database for multilingual applications. Students will practice various methods of recovering the database, using RMAN, SQL, and Flashback technology. Tools to monitor database performance and improve database performance.

CIS 248 3 C/45 CH
Computer Support II
Prerequisites: CIS 110, CIS 240, CT 211
In this class the student will learn how to resolve end-user operating systems problems by phone or, by connecting to the system remotely. It also gives the students skills needed to support end-users from Microsoft windows in a corporate environment or at home.

**Continued on next page.**
COURSE DESCRIPTIONS

COMPUTER INFORMATION SYSTEMS (CIS) continued

CIS 249  3 C/45 CH
Computer Support I
Prerequisites: CIS 110, CIS 240, CT 211
In this course the student will over view the operating systems concept and how to troubleshoot windows. The students will also learn how to answer end-user questions and troubleshoot security settings.

CIS 250  3 C/45 CH
E-Commerce Strategies and Practices
Prerequisites: CIS 110, CIS 241
The E-Commerce Strategy and Practices course teaches students how to conduct business online and how to manage the technological issues associated with constructing an electronic-commerce website. Students will implement a genuine transaction-enabled business-to-consumer website, examine strategies and products available for building electronic-commerce sites, examine how such sites are managed, and explore how they can complement an existing business infrastructure. Students get hands-on experience implementing the technology to engage cardholders, merchants, issuers, payment gateways and other parties in electronic transactions.

CIS 258  4 C/60 CH
JavaScript /PERL
Prerequisites: CIS 110, CIS 112
This course teaches developers JavaScript Fundamentals and how to use the features of the JavaScript language. Students will also learn how to write JavaScript programs, script for the JavaScript object model, control program flow, validate forms, animate images, target frames, and create cookies.

CIS 259  4 C/60 CH
C++ Object Oriented Programming Language
Prerequisite: CIS 209
Designed to foster an understanding of object oriented programming and to develop a working knowledge of the C++ programming language, this course stresses the use of objects and designing and implementing individual classes using C++. Students will be using computers to solve programming assignment which practice the syntax of C++.

CIS 260  3 C/45 CH
System Analysis and Design
Prerequisites: CIS 210, CIS 212
This course is designed to introduce the systems design process in designing systems using project management techniques. Emphasis is placed on systems concepts and systematic thinking. Major topics include the basic tools and methods of traditional systems development, traditional analysis, design, and implementation through the data flow analysis and systems development life cycle approach, and methods for structured analysis and design.

CIS 266  3 C/45 CH
Introduction to Graphic Design
Prerequisite: CIS 110
This course is designed to enhance the computer skills of those using graphics programs to prepare images for the Web or for print in 2D. Students will learn to enhance and create digital images using Photoshop; optimize images for speed of download; place and manipulate type in an image; work with layers and masks; use filters for special effects; work with background images and transparent gifs; create image maps; use Image Ready to create animations, slices, web photo gallery, and rollovers.

CIS 267  3 C/45 CH
Understanding and Developing Multimedia
Prerequisite: CIS 110
Recommended: CIS 266
Students in this course will create dynamic media that communicates effectively through the use of sound, images, motion, and text. The students in this course will also examine in detail the concepts and tools necessary for producing their own interactive projects using a number of professional authoring tools, including Macromedia Flash and Dreamweaver.

CIS 275  3 C/45 CH
Introduction to Database Concepts
Prerequisites: CIS 203, CIS 209, CIS 223, or CIS 259
This course is designed to introduce the student to the concepts of database design. The student will learn the fundamentals of SQL (Structured Query Language) using one of the most popular database management systems available today: Oracle8. The student will learn to create, query, update and change tables in database using SQL commands, as well as create reports, use forms, and embed SQL commands in another programming.

CT 203  4 C/75 CH
Digital Logic I
Lab fee
This course covers Boolean algebra, operation of digital combinational gates, flip-flop circuitry, shift registers and clock circuits and design combinational and sequential circuits. Laboratory is an essential phase of this course, which emphasizes the use of logic probes, logic pulsers and logic clips on gating circuits, flip-flops, counters, shift registers and multiplexers and demultiplexers.

CT 205  4 C/75 CH
Introduction to Microprocessors
Lab fee
Prerequisite: CIS 110
An introduction to microprocessor systems, instruction sets, algorithm development and detail description of microprocessor system hardware. The instruction set of Motorola and Intel family microprocessors are used to write various application programs. Laboratory experience involves program generation and interfacing.

CT 207  3 C/60 CH
Digital Logic II
Prerequisite: CT 203
An advanced course in digital electronics as applied in the modern digital computer. This course covers the various types of memories, ALU’s, interfacing (A/D and D/A), conventional codes and large-scale shift register memories. Laboratory is an essential phase of this course which includes digital counters, multiplexers, memories and multivibrators. Techniques of interfacing and input/output devices are examined.

CT 209  4 C/90 CH
Computer Repair
Prerequisite: CIS 110 or CT 205
This course is designed to provide an in-depth study of various areas that are related to servicing computers and peripheral devices. Areas of study include assembly, disassembly of computers, upgrading hardware, troubleshooting hardware, installation and troubleshooting of operating systems such as DOS, Windows 9x, Windows 2000, Windows XP and Vista. This course and CT 210 prepares students for the A+ certification exams.

CT 210  6 C/90 CH
CompTia A+
Prerequisite: CIS 110
The student will gain the experience required to build, troubleshoot and repair current microcomputer systems. This course provides in-depth troubleshooting of Windows 200/XP, VISTA and Windows 7. This course covers introduction to networking. This course and CT 209 prepare students for the A+ certification exams.

CT 211  4 C/60 CH
Computer Networking I
Prerequisite: CT 209
Installing, Configuring, and Administering Microsoft Windows XP Professional. Also includes user, group, profiles and policies, security and access controls, network protocols, internetworking with groups, printing and faxing, performance tuning, application support, booting, registry, fault tolerance, and troubleshooting of Windows XP.

Continued on next page.
Computer Networking II
Prerequisite: CT 211
This course covers Managing and Maintaining a Microsoft Windows Server 2003 Environment. Topics include: creating and managing users and groups; administering server and web resources; managing hardware, access to files, disk and data storage, backup and disaster and basic security.

Computer Networking III
Prerequisite: CT 211
This course covers Implementing, Managing, and Maintaining a Microsoft Windows Server 2003 Network Infrastructure. Topics include: networking overview; IP addressing; implementing and managing DHCP, DNS, WINS; configuring name resolution; remote access; routing and security templates and active directory overview, planning the active directory structure, directory sites, replication, groups, Directory Services Infrastructure. Topics include: overview; IP addressing; implementing and managing DHCP, DNS, WINS; configuring name resolution; remote access; routing and security templates and active directory overview.

Computer Networking IV
Prerequisite: CT 215
This course covers introduction to Microsoft Windows Directory Services Infrastructure. Topics include active directory overview, planning the active directory structure, directory sites, replication, groups, policies and certificates, planning and implementing active directory connecters, upgrading to Windows NT domain models to active directory.

Correction to Corrections
Introduction to Corrections
Prerequisite: COR 100
Introduction to the history, theory and practice of corrections. The role of probation, parole, prisoner rights in corrections institutions and community based corrections. Course needed to satisfy the requirements to become a State of Michigan Corrections Officer. Before students enroll in COR 100 they should have completed the ENG 115 requirements designated by the COMPASS examination.

COR 101
Introduction to Juvenile Justice
Prerequisite: COR 100
Overview of the juvenile justice system; its history, philosophy and interrelationship with other components in the criminal justice system. Evaluation of major court decisions affecting juveniles and specific diversion programs. Course is recommended for those enrolled in the "Registered Social Work Technician" program and desire to work with juveniles in the criminal justice system.

COR 102
Introduction to Correctional Counseling
Prerequisite: COR 100
The course will differentiate between normal and criminal behavior. Discussions will include psychological influences as it relates to behavior as well as the role of environment and the family on behavior. Various correctional intervention strategies will be discussed. Course needed to satisfy the requirements to become a State of Michigan Corrections Officer.

COR 110
Introduction to Deviant Behavior
Prerequisite: COR 105
Definitions and characteristics of behavior classified as deviant. Overview of theories and schools of thought for understanding deviant behaviors and their diagnosis, discrimination of minorities in Michigan, and formation of attitudes, ethics and values.

COR 200
Social Science for Correctional Personnel
Prerequisite: COR 100
The course will define the personal, psychological and environmental meanings of culture in contemporary society. The impact and meaning of discrimination will be discussed. The student will be expected to identify ways in which the various environments impact the development of attitude formation. Professional responses in the correctional setting will be discussed.

COR 205
Institutional Corrections Personnel
Prerequisite: COR 100 and COR 105
This course will review the history and philosophy of correctional institutions’ personnel and human growth and development. Study of institutional administration, management, supervision and personnel in parole, probation, community intervention strategies, treatment and control. Overview of specific problems of substance, medical and mental abuse. Course needed to satisfy the requirements to become a State of Michigan Corrections Officer.

COR 210
Institutional Corrections Facilities
Prerequisite: COR 100 and COR 105
An in-depth study of the purpose of prisons and correctional institutions. There will be discussion of the management and organization of correctional institutions with specific description of traditional job roles. Custodial care and safety/ security issues will be discussed as well as other institutional concerns in reference to incarceration. Course needed to satisfy the requirements to become a State of Michigan Corrections Officer.

COR 215
Correctional Fieldwork
Prerequisite: COR 200
This course will examine interpersonal relationships in correctional systems and the dynamics of attitude change. The course is a supervised work experience in a correctional setting under the direction of a faculty adviser and a field supervisor, in which students will maintain a log of their work activity and meet weekly with their advisor.

COR 218
Race Relations - COR Personnel
Prerequisite: COR 200
Examines racial tensions as they relate to corrections personnel, including emphasis on case histories of institutional problems and psychological games. Confrontation tactics for attitude change, economic oppression and competition, educational deprivation and social injustices and their relationship to institutional actions are discussed. Examines the woman’s identity, and life choices and position in society in relation to corrections work in the criminal justice system.

COR 255
Legal Issues in Corrections
Prerequisite: COR 200
This course is an overview of the major legal issues, trends and the political and social dimensions of convictions. An analysis of constitutional law, courts decisions, current legislation of the federal and state law affecting prisons and the judicial proceedings. Examines a forum for the legal rights of prisoners and the responsibilities of the legal system and the adjudication of juveniles and the alternatives to incarceration. Course needed to satisfy the requirements to become a State of Michigan Corrections Officer.

Criminal Justice (CJS)

CJS 100
Introduction to Criminal Justice
Prerequisite: COR 200
This course is an overview of the criminal justice system, the police, the legislature, the prosecutor, the public defender, the court, corrections, probation and parole techniques that are essential in addition to decision-making within the system. An analysis of the roles, changes and problems of law enforcement in a democratic society will be conducted.
DANCE (DAN)

**DAN 101** 3 C/45 CH  
Modern Dance I  
F, Sp, Sm  
Prerequisite: DAN 101  
Continuation of DAN 101 with an emphasis on advanced elements of modern dance.

**DAN 102** 3 C/45 CH  
Modern Dance II  
Prerequisite: DAN 101  
Continuation of DAN 101 with an emphasis on advanced elements of modern dance.

**DAN 103** 3 C/45 CH  
Modern Dance III  
Prerequisite: DAN 102  
Continuation of DAN 102 with an emphasis on advanced elements of contemporary dance.

**DAN 111** 3 C/45 CH  
Ballet I  
Training in the fundamental techniques and terminology of classical ballet.

**DAN 115** 3 C/45 CH  
African-American Dance  
An introductory course designed to prepare the dental programs student to become a member of today’s dental health team. Along with basic dental and medical terminology, an orientation to the profession of dentistry, the student is instructed in developing skills necessary for success as a member of the dental health team. Emphasis is placed on professional standards, ethics, assertive communication, empathy training, time management, goal setting and job preparation.

**DAN 211** 3 C/45 CH  
Choreography and Performance  
Prerequisite: DAN 102 or equivalent  
Training in creating large and small group dances with opportunities for performance.

DENTAL (DEN)

**DEN 100** 3 C/45 CH  
Professional Development  
An introductory course designed to prepare the dental programs student to become a member of today’s dental health team. Along with basic dental and medical terminology, an orientation to the profession of dentistry, the student is instructed in developing skills necessary for success as a member of the dental health team. Emphasis is placed on professional standards, ethics, assertive communication, empathy training, time management, goal setting and job preparation.

**DEN 111** 3 C/45 CH  
Ballet I  
Training in the fundamental techniques and terminology of classical ballet.

**DEN 115** 3 C/45 CH  
African-American Dance  
An introductory course designed to prepare the dental programs student to become a member of today’s dental health team. Along with basic dental and medical terminology, an orientation to the profession of dentistry, the student is instructed in developing skills necessary for success as a member of the dental health team. Emphasis is placed on professional standards, ethics, assertive communication, empathy training, time management, goal setting and job preparation.

**DEN 200** 2 C/30 CH  
Dental Radiology Theory  
This course includes lectures on the nature, effects, and use of radiology in dentistry with special emphasis on radiation hazards and protection.

**DEN 201** 1 C/30 CH  
Dental Radiology Lab  
This course concentrates on the practical aspect of exposing, developing, and mounting diagnostic radiographs with emphasis on the two intra-oral techniques: bisecting and paralleling. In addition, students will be able to identify normal radiographs landmarks. It is strongly recommended that this course be taken simultaneously with DEN 202 or after the completion of DEN 200.

DENTAL ASSISTING (DA)

**DA 104** 3 C/45 CH  
Dental Materials  
A lecture and laboratory course which provides the student with a fundamental knowledge of the dental materials commonly used in dental practice. Lecture: Presents physical, chemical, and manipulative characteristics of impression materials, cements, bases, cavity liners, cavities, varnishes, waxes, composites, gypsum products, metals and resins Laboratory: Prepares students to correctly manipulate these materials. Students also acquire the skill to obtain preliminary impressions and occlusal registrations; pour, trim and polish study casts; fabricate custom impression trays from preliminary impressions; clean and polish removable appliances and prostheses; and fabricate provisional restorations.

**DA 106** 4 C/60 CH  
Applied Sciences  
This course provides the student with a basic understanding of the structure and function of the body systems and an in-depth knowledge of oral anatomy including: head and neck anatomy, tooth anatomy and function, and embryology and histology of oral tissues.

**DA 107** 2 C/30 CH  
Introduction to Expanded Functions  
This lecture/laboratory is one of the courses designed to prepare the student to sit for the Registered Dental Assistant examination in the State of Michigan. Topics to be included, but not limited to: infection control basics, disease transmission, hazardous waste management, placement and removal of non-metallic temporary restorations.

**DA 110** 3 C/60 CH  
Clinical Dental Assisting  
This is a lecture and laboratory course with emphasis on clinical infection control procedures and chairside four-handed dental assisting skills. Lecture: Presents concepts of the oral health team including the history of dentistry and the allied dental career fields, dental equipment and maintenance, infection control management, team positioning, medical histories and vital signs, instrument identification and tray set-ups, basics of four-handed technique (four-handed transfer, tissue retraction, irrigation, illumination, and evacuation), and dental charting. Laboratory: Includes experience in working with and maintaining dental equipment, managing aspersis, infection and hazard control protocol consistent with published professional guidelines; team and patient positioning; completing histories, vital signs and dental charting, and practice in four-handed technique and instrument tray setups.

**DA 115** 1 C/15 CH  
Preventive Dentistry  
This lecture course provides students with a basic understanding of patient education with an emphasis on individualized oral health counseling. The course includes instruction in the following topics: dietary considerations for oral health, dental plaque and other deposits, disclosing agents, tooth stains and discolorations, fluorides, periodontal tissues, home care for appliances and techniques for the prevention of oral diseases.

**DA 117** 4 C/35 CH  
Clinical Practice I  
This course is designed to perfect the students’ competencies in performing dental assisting functions. Practice is provided in clinical chairside assisting in a dental setting. There is a one hour weekly seminar in conjunction with the field experience to integrate theoretical, laboratory, and clinical instruction and to provide opportunities for students to share their experiences.

**DA 120** 2 C/30 CH  
Dental Specialties  
Prerequisite: DA 110  
This is a lecture course designed to expose the dental assisting student to the dental specialties. Areas covered are oral surgery, endodontics, orthodontics, pediatrics, prosthetics and periodontics.

Continued on next page.
DENTAL ASSISTING (DA) continued

DA 125 5 C/75 CH
Clinical Practice II
Prerequisite: DA 117
This course is a continuation of Clinical Practice I. Students will be assigned to a dental practice settings for continued practice in chairside clinical dental assisting. There is a 15 hour seminar in addition to the field experience.

DA 126 3 C/45 CH
Pathology, Pharmacology & Medical/Dental Emergencies
Prerequisite: DA 106
The topics discussed during the course include: emergency carts/kits, administration of oxygen, emergency drugs, allergic reactions, syncope emergencies, circulatory emergencies, respiratory emergencies, epilepsy, diabetes and drug related emergencies. The course provides a basic knowledge of the names, uses, and effects of drugs commonly used in dentistry. The course includes concepts of developmental/growth disturbances, diseases of microbiological origin, injury and repair, metabolic and disease disturbances, and oral manifestations of various diseases and conditions.

DA 127 2 C/30 CH
Dental Office Management
Prerequisite: DA 110
This lecture course is an introduction to basic dental practice management procedures. In addition, telephone management, appointment control, maintaining patient treatment records, bookkeeping, inventory and supplies, recall systems, and third party payment plans will be presented.

DA 129 2 C/30 CH
Legal, Ethical & Communication Issues
Prerequisite: DA 110
This lecture course includes basic concepts in oral and written communication and applied psychology. The purpose of this course is to prepare students to work effectively with patients and the allied health team within the law. Content areas include principles of human behavior, patient anxiety, special patients, coping mechanisms, principles of learning, verbal and nonverbal communications, and listening skills. The course will also explore the state and national dental practice acts as they pertain to members of the dental health team as well as explore the ethical role of team members through role-playing situations. Students will also prepare a resume and job search plan.

DA 202 3 C/45 CH
Expanded Functions for the Dental Assistant
Prerequisite: DA 117
This lecture/laboratory course is designed to prepare the student to sit for the RDA examination in the State of Michigan. Expanded functions not already covered as allowed under Michigan law will be taught. Topics include but are not limited to: placement and removal of rubber dam, placement and removal of nonmetallic temporary restorations, removing excess cement from supragingival surfaces of a tooth with non-rotary instruments, applications of anticarcinogens after prophylaxis, mouth mirror inspection and charting of the oral cavity, sizing of temporary crowns and bands, removal of sutures, and the placement and removal of periodontal dressings.

DENTAL HYGIENE (DHY)

DHY 101 3 C/45 CH
Fundamentals of Dental Hygiene
Prerequisite: Program Admission
Corequisite: DHY 120
Fundamentals of dental hygiene is that portion of the dental hygiene curriculum focused on developing the cognitive, affective and psychomotor skills necessary for delivery of preventive, educational and therapeutic services to the public. This course will prepare the dental hygiene student with cognitive, psychomotor and affective skills necessary for continued practice in chairside clinical dental hygiene practice. Also this course will expose the student to selected services and skills performed by the dental hygienist. Fundamentals of Dental Hygiene is an introduction to the principles of dental hygiene practice. The students will be prepared with topics to prepare them to perform basic skills safely and effectively. Theory of taking a complete medical and dental history, intra/extraoral examination, dental charting, periodontal charting, basic instrumentation, scaling and polishing of the teeth and topical fluoride application will be covered. Students will practice procedures in the clinical course DHY 120. Emphasis will also be placed on professional standards, ethics, effective communication and confidentiality.

DHY 110 3 C/60 CH
Oral Anatomy and Physiology
Prerequisite: Program Admission
An introduction to anatomical nomenclature and descriptive gross anatomy of the head, neck, and oral cavity. Topics include tooth morphology, head and neck anatomy and occlusion. Tooth morphology is the area of dental science that deals with the structure and form of the tooth. Head and neck anatomy includes the study of the oral cavity and its surrounding structures, including osteology, muscles, nerves, arterial supply, venous drainage, lymphatics, salivary glands, and sinuses. Occlusion is described as the relationship of the teeth in the maxillary and mandibular arches to each other, focusing on a working knowledge of the dental arch forms, inter- and intra-arch tooth alignment, and intercuspal relationships.

Students are required to complete selected carvings of selected teeth during lab sessions. The first half of the semester will cover in great depth the anatomy of the individual teeth and the functional interrelationship between the individual teeth and the periodontal tissues. The second half of the semester, the course will concentrate on head and neck anatomy which will include an in-depth understanding of the skeletal, muscular, vascular, and neural structures of the human body from a microscopic view. In other words, gross anatomy deals with structures that can be seen with the naked eye, whereas histology deals with structures that require a microscope (whether light or electron) to visualize. In addition to learning about the microscopic anatomy of the afore-mentioned, you will also learn about these structures from a biochemical point of view. Perhaps even more fascinating is the embryology portion of this course that will teach you the basis for the development of the human being. Again when studying the development of the human, you will learn and study this process from a microscopic and biochemical vantage point. Continued on next page.
DENTAL HYGIENE (DHY) continued

DHY 120 3 C/90 CH
Clinical Techniques
Prerequisites: Program Admission
Corequisite: DHY 101
The delivery of comprehensive care is accomplished through adherence to the process of care: assessment of patient needs, formulation of a dental hygiene diagnosis, planning for the prevention and treatment of oral disease, implementation of various dental hygiene interventions (services) and evaluation of both the patient and practitioner efforts and oral health outcomes. Clinical Techniques is designed to develop skills in the techniques utilized for dental hygiene practice. Students will practice techniques on typodonts and student partners. Assessment of competency is performed on student partners. Each topic covered in the didactic course DHY 101 will be practiced and assessed in this course. Clinical practice is provided in collaboration with the clinical dental hygiene faculty through an assessment of patient needs, planning for treatment and disease control. Treatment includes implementation of various clinical dental hygiene services and an evaluation of treatment effectiveness based on the patient/clinical and practitioners efforts. Sequential courses are designed to increase the student’s speed and ability. Assessment of student progress in attaining program and clinical competency is ongoing.

DHY 121 3 C/45 CH
Oral Pathology
Prerequisites: DHY 110, DHY 111, DHY 131, DHY 132
Oral Pathology will focus on the study of disease and the disease process with an emphasis on the detection, symptoms and treatment of diseases of the oral region and the oral manifestations of systemic diseases.

DHY 129 2 C/30 CH
Clinical Dental Hygiene I – Lecture
Prerequisites: DHY 101, DHY 120
Corequisite: DHY 130
Clinical dental hygiene is that portion of the dental hygiene curriculum focused on developing the cognitive, affective and psychomotor skills necessary for delivery of preventive, educational and therapeutic services to the public. This course will prepare the dental hygiene student with cognitive, psychomotor and affective skills for entry into clinical dental hygiene practice. Also this course will expose the student to all of the selected services and skills performed by the dental hygienist.

DHY 130 3 C/120 CH
Clinical Dental Hygiene I – Lab
Prerequisites: DHY 101, DHY 120
Corequisite: DHY 129
The delivery of comprehensive care is accomplished through adherence to the process of care: assessment of patient needs, formulation of a dental hygiene diagnosis, planning for the prevention and treatment of oral disease, implementation of various dental hygiene interventions (services) and evaluation of both the patient and practitioner efforts and oral health outcomes. Clinical dental hygiene focuses on developing the cognitive, affective and psychomotor skills necessary for the delivery of preventive, educational and therapeutic services to the public. Clinical practice is provided in collaboration with the clinical dental hygiene faculty through an assessment of patient needs, planning for treatment and disease control. Treatment includes implementation of various clinical dental hygiene services and an evaluation of treatment effectiveness based on the patient/clinics and practitioners efforts. Sequential courses are designed to increase the student’s speed and ability. Assessment of student progress in attaining program and clinical competency is ongoing.

DHY 131 2 C/30 CH
Clinical Dental Hygiene II – Lecture
Prerequisites: DHY 129, DHY 130
Corequisite: DHY 132
Clinical dental hygiene is that portion of the dental hygiene curriculum focused on developing the cognitive, affective and psychomotor skills necessary for delivery of preventive, educational and therapeutic services to the public. The course will prepare the dental hygiene student with cognitive, psychomotor and affective skills for entry into clinical dental hygiene practice. Also this course will expose the student to all of the selected services and skills performed by the dental hygienist. Clinical Dental Hygiene Lecture II will introduce additional topics to enhance the student’s ability to provide comprehensive dental hygiene services to clients.

DHY 132 3 C/72 CH
Clinical Dental Hygiene II – Lab
Prerequisites: DHY 129, DHY 130
Corequisite: DHY 131
The delivery of comprehensive care is accomplished through adherence to the process of care: assessment of patient needs, formulation of a dental hygiene diagnosis, planning for the prevention and treatment of oral disease, implementation of various dental hygiene interventions (services) and evaluation of both the patient and practitioner efforts and oral health outcomes. Clinical dental hygiene focuses on developing the cognitive, affective and psychomotor skills necessary for the delivery of preventive, educational and therapeutic services to the public. Clinical practice is provided in collaboration with the clinical dental hygiene faculty through an assessment of patient needs, planning for treatment and disease control. Treatment includes implementation of various clinical dental hygiene services and an evaluation of treatment effectiveness based on the patient/clinical and practitioners efforts. Sequential courses are designed to increase the student’s speed and ability. Assessment of student progress in attaining program and clinical competency is ongoing.

DHY 209 2 C/30 CH
Clinical Dental Hygiene III – Lecture
Prerequisites: DHY 130, DHY 131, DHY 132
Corequisite: DHY 210
This course is a continuation of Clinical Dental Hygiene II lecture with emphasis on the process of utilizing assessment, diagnosis and planning, implementation, and evaluation and maintenance as they relate to the development and revision of a dental hygiene care plan. In addition, general and dental dietary habits are discussed as part of the overall health of the patient.

DHY 210 5 C/240 CH
Clinical Dental Hygiene III – Lab
Prerequisites: DHY 130, DHY 131, DHY 132
Corequisite: DHY 209
The delivery of comprehensive care is accomplished through adherence to the process of care: assessment of patient needs, formulation of a dental hygiene diagnosis, planning for the prevention and treatment of oral disease, implementation of various dental hygiene interventions (services) and evaluation of both the patient and practitioner efforts and oral health outcomes. Clinical dental hygiene focuses on developing the cognitive, affective and psychomotor skills necessary for the delivery of preventive, educational and therapeutic services to the public. Clinical practice is provided in collaboration with the clinical dental hygiene faculty through an assessment of patient needs, planning for treatment and disease control. Treatment includes implementation of various clinical dental hygiene services and an evaluation of treatment effectiveness based on the patient/clinical and practitioners efforts. Sequential courses are designed to increase the student’s speed and ability. Assessment of student progress in attaining program and clinical competency is ongoing.

DHY 211 3 C/45 CH
Pharmacology
Prerequisites: DHY 129, DHY 130
Pharmacology may be defined as the science of drugs. As a biomedical science, pharmacology embraces the physical and chemical properties of drugs, the preparation of pharmaceutical agents, the pharmacokinetics of drug, and the effects of drugs on living systems. As a clinical discipline, pharmacology encompasses the therapeutic application of medicines, toxicity, and practical and legal issues pertaining to the development, marketing, and dispensing of drugs. Pharmacology is clearly a complex and dynamic subject with new drugs entering the market place very frequently.

Continued on next page.
DENTAL HYGIENE (DHY) continued

DHY 213 2 C/30 CH
Periodontology
Prerequisites: DHY 129, DHY 130
Periodontology is the scientific study of the periodontium in health and disease. This course covers the diagnosis, treatment, and prevention of pathologic conditions affecting the supporting and surrounding tissues of the teeth, the gingiva, periodontal ligament, alveolar bone and cementum.

DHY 214 3 C/45 CH
Local Anesthesia and Pain Control
Prerequisites: Program Approval, DHY 211, DHY 131, DHY 209, DHY 210
This course is designed to provide students with the basic and current concepts of local anesthetics, nitrous oxide sedation and pain control. Systemic effects, tissue diffusion and the toxicity of anesthetics and dental therapeutic agents used in dentistry will be reviewed. Assessment of the patient’s health status, level of apprehension and pain threshold will be included in determining the indications and contraindications of pain control and alleviation of pain. Selection and administration of appropriate anesthetic agents and evaluation of the proper technique will be evaluated. The student will learn to administer local anesthesia, safely, effectively and painlessly. The student will learn to safely administer and monitor nitrous oxide oxygen sedation in the clinical setting in compliance with Michigan Law. Utilization of fail-safe equipment and scavenger systems will be employed.

DHY 219 2 C/30 CH
Clinical Dental Hygiene IV – Lecture
Prerequisites: DHY 209, DHY 210
Corequisite: DHY 220
This course is a continuation of Clinical Dental Hygiene III (DHY 209) with an in-depth study of specific medical and dental conditions as they relate to dental hygiene care, including but not limited to: diabetes, asthma, HIV, chemical dependencies, eating disorders, and pregnancy and menopause.

DHY 220 5 C/240 CH
Clinical Dental Hygiene IV – Lab
Prerequisites: DHY 209, DHY 210
Corequisite: DHY 219
The delivery of comprehensive care is accomplished through adherence to the process of care: assessment of patient needs, formulation of a dental hygiene diagnosis, planning for the prevention and treatment of oral disease, implementation of various dental hygiene interventions (services) and evaluation of both the patient and practitioner efforts and oral health outcomes. Clinical dental hygiene focuses on developing the cognitive, affective and psychomotor skills necessary for the delivery of preventive, educational and therapeutic services to the public. Clinical practice is provided in collaboration with the clinical dental hygiene faculty through an assessment of student progress in attaining program and clinical competency is ongoing.

DHY 221 3 C/60 CH
Dental Biomaterials
Prerequisites: DHY 101, DHY 120
Biomaterials is the science and technology of materials used in dentistry. Chemical, physical and manipulative characteristics of various restorative and procedural materials will be explored in the prevention and treatment of oral disease. Laboratory experiences develop skills in working with these materials. Laboratory experiences develop skills in working with these materials and illustrate the characteristics and uses of dental materials.

DHY 222 3 C/45 CH
Dental Health Education
Prerequisites: DHY 130, DHY 131, DHY 132
Dental health education is concerned with the knowledge, attitudes, skills and behaviors necessary to promote oral health and prevent oral disease through educational efforts. This course will explain the principles and theories of education which will enhance the ability of the dental hygiene student as an oral health educator. The approach taken will provide students with the knowledge and skills necessary to meet the needs of community groups as distinct from the traditional clinical approach designed to meet the needs of individual patients. Students are required to assess, plan, implement and evaluate an oral health educational plan giving them a sense of responsibility and commitment toward improving oral health in the community.

DHY 225 3 C/45 CH
Management of Special Patients
Prerequisites: DHY 209, DHY 210
Introduces the characteristics and unique dental health needs of patients with medical, physical, mental, social, emotional, the elderly, and selected medical and compromising conditions. Emphasis is placed on modified dental hygiene treatment for these special populations. Dental hygiene care of the individual with special needs deals with the special requirements of persons with developmental and/or acquired conditions.

DHY 226 1 C/15 CH
Advanced Periodontology
Prerequisite: DHY 213
Advanced Periodontology is designed to acquaint the dental hygiene student with the clinical diagnosis and treatment of periodontal diseases with special emphasis on the surgical techniques utilized.

DHY 227 1 C/15 CH
Radiology II
Prerequisites: DEN 200, DEN 201
Continuation of the science and clinical practice of oral radiography, including radiographic interpretation, normal anatomy on periapical and extraoral films, recognition of abnormalities and the limitations of radiography.

DHY 229 2 C/50 CH
Clinical Dental Hygiene V – Lecture
Prerequisites: DHY 219, DHY 220
Corequisite: DHY 230
This course is a continuation of Clinical Dental Hygiene IV and offers other aspects of clinical practice. This course also examines the practice of dental hygiene from many aspects including business, career alternatives, job seeking skills, resume’ preparation and professional responsibilities.

DHY 230 5 C/144 CH
Clinical Dental Hygiene V – Lab
Prerequisites: DHY 219, DHY 220
Corequisite: DHY 229
The delivery of comprehensive care is accomplished through adherence to the process of care: assessment of patient needs, formulation of a dental hygiene diagnosis, planning for the prevention and treatment of oral disease, implementation of various dental hygiene interventions (services) and evaluation of both the patient and practitioner efforts and oral health outcomes. Clinical dental hygiene focuses on developing the cognitive, affective and psychomotor skills necessary for the delivery of preventive, educational and therapeutic services to the public. Clinical practice is provided in collaboration with the clinical dental hygiene faculty through an assessment of student progress in attaining program and clinical competency is ongoing.

Continued on next page.
DENTAL HYGIENE (DHY) Continued

DHY 200-C 2.5 C/40 CH
Clinical Dental Hygiene V – C
Prerequisites: DHY 229, DHY 230
The delivery of comprehensive care is accomplished through adherence to the process of care: assessment of patient needs, formulation of a dental hygiene diagnosis, planning for the prevention and treatment of oral disease, implementation of various dental hygiene interventions (services) and evaluation of both the patient and practitioner efforts and oral health outcomes. Clinical dental hygiene focuses on developing the cognitive, affective and psychomotor skills necessary for the delivery of preventive, educational and therapeutic services to the public. Clinical practice is provided in collaboration with the clinical dental hygiene faculty through an assessment of student needs, planning for treatment and disease control. Treatment includes implementation of various clinical dental hygiene services and an evaluation of treatment effectiveness based on the patient/clinic and of patient needs, planning for treatment and disease prevention. The health program gives them a sense of responsibility and commitment toward improving oral health in the community.

DHY 203 3 C/30 CH
Dental Hygiene Seminar
Prerequisites: DHY 229, DHY 220
This course is designed to apprise students of national and regional state board requirements, strengthen test-taking skills and provide an opportunity for review of topic areas evaluated on these board examinations. Guest speakers will provide a review of pertinent subject matter.

DENTAL LABORATORY TECHNOLOGY (DLT) 2011-12 only

DLT 101 3 C/45 CH
Introduction to Dental Laboratory Technology
An introduction to Dental Laboratory Technology. This course examines the principles of dental laboratory management, the daily operation of the dental laboratory, its equipment, safety procedures, and routine business operation. Included are legal and ethical issues related to the Dental Laboratory. Infection control protocol, infectious diseases and aseptic procedures will be described as it relates to the dental laboratory professional.

DLT 110 3 C/30 CH
Basic Anatomy and Tooth Morphology
Prerequisites: DLT 101, DEN 100
A study of the occlusal anatomy and morphology of human dentition. This course will focus primarily on the permanent human dentition will be continued throughout this course. This course will focus on the anatomy and anterior posterior tooth anatomy and will also discuss basic Head and Neck Anatomy. We will discuss the basics in Osteology, Muscles of Mastication, the TMJ, Muscles of Facial expression, Soft Palate anatomy, Circulatory system of the head and neck, Salivary glands, Nervous system, and Lymphatics and spread of infection. Laboratory sessions are designed to continue to develop waxing skills for application in the crown and bridge specialty area.

DLT 125 2 C/30 CH
Basic Dental Laboratory Techniques Practicum
Prerequisites: DLT 101, DEN 100
This course is an introduction to the design and fabrication of fixed appliances, such as full crowns, bridges, inlays and onlays. This course will provide hands-on appliance design requirements, construction and methods of wax pattern fabrication. This course affords the student the opportunity to complete laboratory projects.

DLT 130 3 C/60 CH
Advanced Anatomy and Morphology for Dental Technicians
Prerequisite: DLT 110
A study of the factors that determine the esthetic value of dental restorations. This course will focus on the properties, handling characteristics, and investing, casting, finishing, polishing, and corrective soldering techniques.

DLT 140 2 C/45 CH
Basic Crown and Bridge Techniques
Prerequisite: DLT 115
A study of the factors that determine the esthetic success of fixed restorations. Laboratory sessions are designed to support the required laboratory performance in Dental Ceramics with a focus on color, shade, size, shape, position, and harmony between natural and restored teeth.

DLT 155 4 C/195 CH
Esthetic Factors for Dental Restoration (Dental Ceramics)
Prerequisite: DLT 115
This course is designed to increase the proficiency and productivity of the dental laboratory technology student. The laboratory projects reinforce and build on the basic knowledge and techniques acquired in previous course studies. The student will become proficient in the design and construction of fixed prosthesis.

DLT 165 10 C/240 CH
Advanced Dental Laboratory Technology Practicum
Prerequisite: DLT 110
This course is designed to increase the proficiency and productivity of the dental laboratory technology student. The laboratory projects reinforce and build on the basic knowledge and techniques acquired in previous course studies. The student will become proficient in the design and construction of fixed prosthesis.
DIETETIC TECHNOLOGY (DT)

DT 111 2 C/45 CH Dietetics Orientation F, Sp, Sm

Dietetics Orientation is the first course in the program sequence. Students are introduced to the profession of dietetics, the American Dietetic Association, the Code of Ethics and professional conduct. Career opportunities are explored and students are encouraged to define career goals. Other topics include developing a portfolio, reviewing research in professional journals, self-assessment, time management, problem solving skills and study skills are also emphasized.

DT 130 3 C/45 CH Fundamentals of Nutrition F, Sp, Sm

Prerequisite: BIO 155

Fundamentals of Nutrition provides a sound and concise introduction to the science of human nutrition. Students explore the six essential nutrients and their functions in the body. These functions are developed around three fundamental problems of sustaining human life that nutrition solves: energy, tissue functions in the body. These functions are developed in the various phases of life, from birth through the elderly years. Students use the public health model and the interdisciplinary approach to assessing the nutrient requirements, developing care plans and delivering sound nutrition advice for clients. Students are required to develop education and training materials. Students use the action research model to initiate change.

DT 210 4 C/90 CH Nutrition Practicum I F

Corequisite: DT 210

This practicum course offers each student the opportunity to explore the nutritional needs of people in the various phases of life, from birth through the elderly years. Students use the public health model and the interdisciplinary approach to assessing the nutrient requirements, developing care plans and delivering sound nutrition advice for clients. Students are assigned to public health clinics, nursing homes, senior feeding programs, Head Start centers and Detroit Public Schools. Students observe and then practice the techniques of clinical nutrition care. An emphasis is placed on problem identification and problem solving from the perspective of the Dietetic Technician in clinical care. This practicum requires students to participate in 20 on-site sessions and scheduled seminars.

DT 252 3 C/45 CH Clinical Nutrition F

Corequisite: DT 130, BIO 250

Prerequisite: DT 253

The principles of assessment for diet modification are taught using a case study approach. Students will integrate food intake, diet analysis, drug interactions, food preferences and laboratory values as they explore various disease etiologies. Disease etiologies include diabetes, cardiovascular problems, gastrointestinal, renal, HIV, and cancer. Computer applications are used to gather and analyze data.

DT 253 4 C/90 CH Clinical Nutrition Practicum II F

Corequisite: DT 252

This course provides an opportunity to practice clinical nutrition skills in a health care facility under the guidance of a registered dietitian or a registered dietetic technician for twenty (eight-hour day) sessions. Students will observe the dietitian or dietetic technician in the nutritional care of patients and demonstrate competency in performing the observed task. Emphasis is placed on data collection, nutrition assessment, development of patient care plans, documentation, problem identification and problem solving, from the perspective of the technician in clinical care. The student will be expected to perform the observed functions in a professional manner. DT 252 should be taken concurrently. Seminar meets for one hour weekly.

DT 261 Dietetics Seminar Sp

Prerequisite: Students admitted to the DT program only

This seminar course explores how meaning, message and story are conveyed through images. Students will learn about storyboarding, story elements and organizations, archetypes, visual and perception theory, the organization of visual elements to create meaning, the history of the image, typography, visual imagery in cinema and the use of the image in digital media today.

DIGITAL MEDIA PRODUCTION (DMP)

DMP 101 3 C/45 CH Story Elements for a Digital Environment F, Sp

This seminar course explores how meaning, message and story are conveyed through images. Students will learn about storyboarding, story elements and organizations, archetypes, visual and perception theory, the organization of visual elements to create meaning, the history of the image, typography, visual imagery in cinema and the use of the image in digital media today.

DMP 102 3 C/45 CH Digital Video Production I F, Sp, Sm

Certification: This course will help the student to prepare for Apple Certified Pro in Final Cut Pro exam.

Digital Media Production teaches student basic video production values such as scriptwriting, story elements, lighting design, camera use, camera angles, project management and the fundamentals digital video capture and editing basics on Final Cut Pro.

DMP 103 3 C/45 CH Digital Video Production II F, Sp, Sm

Prerequisite: DMP 101

Certification: This course will help the student to prepare for Apple Certified Pro in Final Cut Pro exam.

Digital Media Production teaches student basic video production values such as scriptwriting, story elements, lighting design, camera use, camera angles, project management and the fundamentals digital video capture and editing basics on Final Cut Pro.

DMP 104 3 C/45 CH Digital Audio Production and Broadcasting

Prerequisite: DMP 102

This is a introduction course in digital signal processing, the fundamental elements of digital audio signal processing, such as sinusoids, spectra, the Discrete Fourier Transform (DFT), digital filters, transforms, transfer-function analysis, and basic Fourier analysis in the discrete-time case. The labs focus on practical applications of the theory, with emphasis on working with waveforms and spectra. This course will teach students will produce live web casts (capturing and transmission of live courses) in Windows Media, Real Media, QuickTime and MPEG formats as well as convert traditional video to almost any digital format including CD-ROM and DVD and publish sound files to the web. Continued on next page.
DIGITAL MEDIA PRODUCTION (DMP) continued

DMP 105 3 C/45 CH
Media Programming
E, Sp
This class develops media literacy skills, so that students can critique the basic dynamics that shape current media programming and give a clearer perspective of the boundaries between the real world and the simulated media world. This cutting-edge approach, which encourages the acquisition of strong knowledge structures and analytical skills, includes broadcast (television and radio), print, and digital media. The class examines the history of the modern communications industry, the regulatory process that governs what it can do, and the technical process that produces content and scheduling.

DMP 107 3 C/45 CH
Intro to Audio Production
Introduction to production skills and techniques.

DMP 111 3 C/45 CH
Television
This course covers techniques utilized by television stations in their programming. Emphasis is placed on commercial, cable and public television facilities and their relationship to the community.

DMP 112 3 C/45 CH
Broadcast Operations
This course is an introduction to the theory and techniques of radio programming and production, including the development and design of programming for audio broadcast production. Learners will explore the history of radio and program formats; make decisions about the use of effective words; music and sounds; and apply production techniques by creating and critiquing radio programs, public affairs and documentary programming, commercials, promotional and public service announcements, and music programs.

DMP 113 3 C/45 CH
Acting For The Camera
The basic physical and vocal skills required in performing before the camera are explored and developed through exercises improvisations and scene. The course covers acting theory, television and motion picture terminology, and script and role analysis.

DMP 114 3 C/45 CH
Writing for the Media
Prerequisite: ENG 119
This course covers basic writing for different audiences and different media outlets. Various writing styles and formats will be studied such as new stories, screenplays, press releases, radio and print advertising, writing for the internet, blogs and websites.

DMP 115 3 C/45 CH
Media Marketing
This course gives students a basic understanding of media market strategies and how public relations firm interface with the broadcast industry. Students learn the different strategies used by the different media.

DRAFTING (DRT)

DRT 101 3 C/45 CH
Blueprint Reading
Prerequisite: DRT 101
Fundamentals of blueprint reading as applied to specific problems. Designed for pre-engineers, draftsmen, machine operators, machine repairmen, electronic technicians, inspectors and supervisors.

DRT 102 4 C/90 CH
Fundamentals of Mechanical Drawing
Prerequisite: DRT 101
Fundamentals of Mechanical Drawing Basic course of students with minimal high school experience. Emphasizes use of instruments, introduction to drafting, introduction to drafting practices, geometric construction, lettering, line work, orthographic projection and three-dimensional visualization from two-view drawings, section cutting, auxiliary views and dimensioning systems.

DRT 112 3 C/45 CH
Technical Drawing Applications
Prerequisite: DRT 102
This course is focused on detailed drawings of a variety of parts, based on projection techniques, sectional views, threads and fasteners, dimensional fundamentals and other conventional drawing practices. Students will execute charts and graphs for data display and analysis and practice required instrument skills to produce ink drawings.

DRC 113 3 C/45 CH
Descriptive Geometry
Prerequisite: DRT 102
Occupational oriented solutions to descriptive geometry problems involving points, lines, planes and single and double curved surfaces and their intersections.

DRT 115 3 C/45 CH
Geometric Dimensioning and Tolerancing
Prerequisites: DRT 101, DRT 102
The theoretical and practical application of dimensioning and tolerance, as used in the world wide industry for the production of parts. GD&T is the standard that defines clear and consistent application for precise interpretation of tolerances on geometric and characteristics. The standard is intended for the more advanced engineer, drafter, product designer, machinists, or inspector. At present, this is a Prerequisite in the Automotive Industry for employment in design, engineering, or manufacturing. Emphasis is placed upon building a solid foundation in understanding dimensioning and tolerance terms, as well as definitions and concepts as stated in ANSI Y 14.5 M 1982 and ASME Y 14.5 M 1994 (two CH).

ECONOMICS (ECO)

ECO 101 3 C/45 CH
Principles of Economics I
Prerequisite: EE 102
This course is the study of macroeconomics. The following topics are discussed: operation of the national economy, unemployment, inflation, money and banking and international economic relations.

ECO 102 3 C/45 CH
Principles of Economics II
Prerequisite: ECO 101
This course is a continuation of Economics 101, Microeconomics. Supply and demand, theory of the firm, price determination and resource allocation is discussed.

ECON 232 3 C/45 CH
Consumer Economics
This course is an analysis of consumer oriented issues; the economics of the cost and availability of consumer credit, insurance options, personal investments, housing and personal income taxation.

EE 101 4 C/90 CH
Direct Current Fundamentals
Prerequisite: EE 101
The fundamentals of direct current (DC) as applied to all aspects of the electrical/electronic field. Direct current electron flow theory, Ohm’s Law, series and parallel and compound resistive circuits, network theorems, capacitors, magnetic circuits and inductors will be covered. Students experimentally verify the fundamentals discussed in the course by constructing and testing circuits. Instruments such as multimeters DC power supplied are used.

EE 102 4 C/90 CH
Alternate Current Fundamentals
Prerequisite: EE 101
This course deals with fundamental concepts of AC waveforms, effective and average values of both current and voltage, series parallel and compound

Continued on next page.
COURSE DESCRIPTIONS

Students are required to build circuits assigned by the instructor.

EE 103 3 C/45 CH
Electrical F
This course covers electrical symbols, schematic diagram, terms, series and parallel circuits, Ohm’s Law, repair and operation of single phase motor and three phase motor controls. Also, lightening both Incandescent and fluorescent, lighting and ballast specifications, safety precaution and troubleshooting techniques, identification of load and control circuits, oad common and ground connection. Use of electrical lighting instruments, multimeters, other circuit testing instruments. Ground fault circuit interrupters (GFCI), receptacles and circuit breakers.

EE 105 2 C/45 CH
Electronic Fabrication & Design E, S
Prerequisite: EE 102
An introduction to electronic fabrication and design techniques. It includes circuit drafting, PCB design and etching, assembly, soldering and use of hand tools. Students are required to build circuits assigned by the instructor.

EE 107 4 C/60 CH
Math for E/E I E, S, S
Prerequisite: MAT 105
Provides detailed coverage of areas of introductory algebra used in electrical engineering.

EE 111 3 C/60 CH
Solid State Fundamentals E, S, S
Prerequisite: EE 101
This course will cover diodes, transistors, power supplies, limiters, clippers, clamps, voltage multipliers, biasing, amplifiers and frequency effects. Students will assemble and test electronic circuits discussed in the course. Instruments such as DC power supplies, multimeters, oscilloscope, signal generators, transistors and diode testers will be used.

EE 115 4 C/60 CH
Math for E/E II S
Prerequisite: EE 107
Simultaneous equations, complex algebra, quadratic equations, trigonometry, vectors, series, derivatives and integrals are used to analyze, AC circuits, filter networks and electronic semiconductor circuits.

EE 205 2 C/45 CH
Linear Integrated Circuits E, S
Prerequisite: EE 111
This course will cover the fundamental of linear integrated circuits and their application. It will be concentrated on the design analysis of basic op-amps and their applications to comparators, integrators, differentiators, oscillators, amplifiers, timers, function generators, filters and phase circuits. Students will test the above circuits and devices in the lab using DC power supplies, signal generators, multimeters and oscilloscope.

EMT 101 2 C/30 CH
First Aid E, S, S
Prerequisite: Program Admission
This course is designed to provide the citizen responder with the knowledge and skills necessary in an emergency to help sustain life, reduce pain, and minimize the consequences of injury or sudden illness until professional help arrives.

EMT 105 3 C/67.5 CH
Medical First Responder E, S, S
Prerequisite: EE 111
This course is an overview of emergency medical services, including Basic Life Support (BLS), patient assessment, triage, patient handling and management, bleeding and shock control, management of fractures, childbirth and other medical emergencies. This is a State of Michigan approved course. If all comprehensive written and practical examinations are passed successfully the students are eligible to apply for licensure exams. This program is recommended for police officers, security officers, corrections officer, health professionals, fire fighters, or anyone who may have a duty to act during emergency situations.

EMT 114 4 C/90 CH
Basic EMT I E, S, S
Prerequisite: Program Admission
Lectures and lab sessions of this course include current principles and techniques in EMS operations, medical/legal issues, anatomy and physiology, patient assessment, respiratory emergencies, oxygen therapy, airway management, cardiovascular disease, CPR, triage, patient handling. This is a State of Michigan approved course. If all comprehensive written and practical examinations and corequisites are completed successfully the students are eligible to apply for licensure exams.

EMT 124 4 C/90 CH
Basic EMT II E, S, S
Prerequisite: Program Admission
The lectures and lab sessions of this course include principles and techniques in communicable diseases, stress management in EMS, traumatic injuries, abdominal illness, shock, IV maintenance, diabetes, the Central nervous system, rescue, extrication, geriatric, obstetrical, gynecological, pediatrics, environmental emergencies and hazardous materials behavioral emergencies, poisons, and substance abuse. This is a State of Michigan approved course. If all comprehensive written and practical examinations and corequisites are passed successfully the students are eligible to apply for licensure exams.

EMT 126 1 C/30 CH
Basic EMT Clinical Experience E, S, S
Prerequisite: Program Admission
This course is designed to provide Hospital and EMS experience to EMT Basic students to learn the psychomotor, affective and apply cognitive skills needed for entry level work as an Emergency Medical Technician Basic. These include but are not limited to Patient Assessment, Spinal Immobilization, Bleeding Control, and Dunning and donning of PPE’s. This is a State of Michigan approved course. If all comprehensive written and practical examinations and corequisites are completed successfully the students are eligible to apply for licensure exams. Students are required to complete an orientation session prior to attending the clinical experience.

EMT 211 4 C/90 CH
EMT Specialist E, S, S
Prerequisite: Program Admission
This course is designed to prepare Basic EMTs who are seeking employment with ALS agencies or hospital emergency departments. The course will emphasize enhancing basic skills, patient assessment, advanced airway management, IV fluid therapy and fluids and electrolytes.

EMT 217 3 C/45 CH
EMT Specialist Clinical Experience E, S, S
Prerequisite: Program Admission
This course is designed to provide Hospital and EMS experience for EMT Specialist students in order to learn the psychomotor, affective and apply cognitive skills needed for entry level work as an Emergency Medical Technician Specialist. Students are required to complete an orientation session prior to attending the clinical experience.

</table>

*Continued on next page.*
ENGLISH (ENG) continued

ENG 292  3 C/45 CH
Latino Literature: The Past Decade
Prerequisite: ENG 119
Survey of nationally renowned and emerging Latino writers, musicians, and screen writers, covering cultural, racial, and gender identity, political activism, sexual orientation and spirituality.

ENTREPRENEURSHIP (ENT)

ENT 100  3 C/45 CH
Introduction to Entrepreneurship
This course is designed to introduce students to the entrepreneurial process from conception to birth of a new venture. The students will examine elements in the entrepreneurial process: personal, sociological, and environmental- that give birth to a new enterprise.

ENVIRONMENTAL, HEALTH, AND SAFETY TECHNOLOGY (EHS)

EHS 100  3 C/45 CH
Environmental Laws and Regulations
F
The primary emphasis of this course is on the OSHA regulations pertaining to worker protection from exposure to occupational hazards. Discussion topics will include: EPA regulations relating to air, water and soil contamination. DOT regulations relating to safe packaging, storage and transportation procedures. Students will concentrate on researching, interpreting and applying regulations for workers who handle and transport hazardous materials. Students will identify and interpret, from case studies, applicable regulations and recommends compliance strategies.

EHS 270  3 C/45 CH
Sampling Procedures
F
In this course emphasis is placed on the methodology of sampling, analyzing and interpreting the results of the analysis of hazardous materials. The course will include industrial hygiene monitoring, pH testing and moisture content, selecting analytical service laboratories, and an introduction to chemical methods of analysis including spectroscopy and chromatography.

EHS 280  3 C/45 CH
Hazardous Materials Health Effects/Applied Toxicology
Prerequisite: BIO 155
This course is a review of the research done in determining the systematic health effect of exposures to chemicals. Determination of risk factors, routes of entry, control measures, and acute and chronic effects are discussed.

EHS 292  3 C/45 CH
Spill response (Practicum)
This course includes a 24-Hour hands-on experience regarding the characterization and cleanup of industrial spills. Meets OSHA HAZWOPER requirements.

EHS 294  3 C/45 CH
Hazardous Waste Site Worker
Sm
This course includes a 40-Hour hands-on experience regarding the characterization of working in an hazardous material workplace.

EXTENDED LEARNING OPPORTUNITIES IN NURSING (XNR)

XNR 310  3 C/90 CH
Administration of Medications
F, Sp, Sm
This course is designed to strengthen skills in medication administration, knowledge of drug calculation. It is open to all enrolled nursing students. It is required of all students who do not pass the math pretest in Nursing. (meets six hours per week.)

Continued on next page.
**COURSE DESCRIPTIONS**

**FACILITY MAINTENANCE PROGRAM (FM) continued**

**FM 103**  
**Carpentry**  
*E, Sp*  
This course covers carpentry terms, usage of carpentry equipment, basic construction materials, fractional arithmetic, wood jointing and fastening methods, types and sizes of fasteners, types of hinges, backing and latching devices, door size review, maintenance and installation. Also door code identification, counter tips and their standard heights, repair and maintenance will be covered.

**FM 104**  
**General Maintenance**  
*F*  
This course covers preventive maintenance of mechanical equipment such as air compressors, pumps, hydraulic systems, troubleshooting of a wide variety of hospital/nursing home/ hotel/office building equipment, gas and arc welding methods and procedures, alignment of flexible couplers for electric motors, packing glands, cut and installing glass panes. Use of various types of paint products and painting of walls, ceilings, floor coverings, use of hand and power tools in accordance with OSHA requirements, replacement of V-belts and alignment of pulleys and sheaves, selection and application of lubrication to machines and the adjustment of speed (RPM) of pulleys operated equipment and machines will be covered.

**FM 105**  
**Grounds Maintenance**  
*Sp*  
This course covers the maintenance of lawns and gardens, the mowing of lawns and grassy areas, the selection and use of proper fertilizers, irrigation of grounds, maintaining lawn and garden equipment, installing irrigation systems, building and install fencing. Also the removal of snow and ice, plowing below snow, scraping ice, spreading chemical/ice melters, clearing storm drains. The cleaning of outside areas: removing litter, sweeping/vacuuming entrances, cleaning outside of the building, the repair & installation of outside signs and the setup of seasonal displays/decorations will be covered.

**FM 106**  
**Safety and Support Services**  
*Sp*  
This course covers gas and welding safety, safe operation of hand and power tools, lock-out tag-out procedures, use and handle sharp containers, ladder safety, lifting techniques, inspection controls and blood borne pathogen safety. Also, national, OSHA, MIOSHA requirements pertaining to facility maintenance will be covered.

**FM 299**  
**Facility Maintenance Co-op**  
This course provides fieldwork experience.

**FIRE PROTECTION TECHNOLOGY (FPT)**

**FPT 100**  
**Incipient Fire Brigade**  
*Prerequisite: None*  
2 C / 30 CH  
This course is designed to provide student with the basic knowledge necessary to become a member of an Incipient Fire Brigade. Members of a Fire Brigade fight small (incipient) size fights in normal work clothes. Topics include organization and responsibilities, fire behavior, fire hoses, nozzles and appliances, portable fire extinguishers, fire detection and signaling systems, fixed fire extinguishing systems, hazard recognition, incident management, and loss control.

**FPT 110**  
**Fire Fighter I**  
*Prerequisite: Program Admission*  
8 C / 120 CH  
This course is designed to provide a student with the additional knowledge necessary for entry level positions on fire departments. Topics include fire fighter safety, personal protection equipment, hose operations, ladders, fire prevention, and others. Students who complete all course requirements will be eligible to take the State of Michigan Fire Fighter Training Council (MFFTC) written and practical examinations leading to certification as a Fire Fighter I. This course must be taken in conjunction with FPT 115.

**FPT 115**  
**Fire Fighter I Lab**  
*Prerequisite: Program Admission*  
5 C / 75 CH  
This course is designed to provide student with the psycho motor skill necessary for entry level positions in the fire department. Skills include hose operations, ladders, personal protective equipment, and others. Students who complete all course requirements will be eligible to take the State of Michigan Fire Fighter Training Council (MFFTC) written and practical examinations leading to certification as a Fire Fighter I. This course must be taken in conjunction with FPT 110.

**FPT 120**  
**Fire Fighter II**  
*Prerequisite: MFFTC Fire Fighter I Certification*  
Conquisites: FPT 120, FPT 125  
5 C / 75 CH  
This course is designed to provide student with the additional knowledge necessary for entry level positions on fire departments. This course builds on the knowledge acquired in FPT 110. Topics include vehicle extrication and hazardous materials operations. Students who complete all the requirements will be eligible to take the State of Michigan Fire Fighter Training Council (MFFTC) Fire Fighter II written and practical examinations leading to certification as a Fire Fighter II. This course must be taken in conjunction with FPT 125.

**FPT 125**  
**Fire Fighter II Lab**  
*Program Admission*  
3 C / 45 CH  
This course is designed to provide student with the additional knowledge necessary for entry level positions in the fire department. This course builds on the knowledge acquired in FPT 115. Skills include vehicle extrication and hazardous materials operations. Students who complete all the requirements will be eligible to take for the State of Michigan Fire Fighter Training Council (MFFTC) written and practical examinations leading to certification as a Fire Fighter II. This course must be taken in conjunction with FPT 120.

**FPT 150**  
**Principle of Emergency Services**  
*Prerequisite: None*  
3 C / 45 CH  
This course provides an overview to fire protection: career opportunities in fire protection and related fields; philosophy and history of fire protection/service; fire loss analysis; organization and function of public and private fire detection services; fire departments as part of local government; laws and regulations affecting the fire service; fire service nomenclature: specific fire protection functions; basic fire chemistry and physics; introduction to fire protection systems; introduction to fire strategy and tactics.

**FPT 155**  
**Fire Prevention**  
*Prerequisite: None*  
3 C / 45 CH  
This course provides fundamental information regarding the history and philosophy of fire prevention, organization and operation of a fire prevention bureau, use of fire codes, identification and correction of fire hazards, and the relationships of fire prevention with built-in fire protection systems, fire investigation, and fire and life-safety education.

**FPT 160**  
**Fire Behavior and Combustion**  
*Prerequisite: None*  
3 C / 45 CH  
This course explores the theories and fundamentals of how and why fires start, spread, and how they are controlled.

**FPT 165**  
**Fire Protection Systems**  
*Prerequisite: FPT 155, FPT 160, MAT 113*  
3 C / 45 CH  
This course provides information relating to the features of design and operation of fire alarm systems, water-based fire suppression systems, special hazard fire suppression systems, water supply for fire protection, and portable fire extinguishers.  
*Continued on next page.*
FIRE PROTECTION TECHNOLOGY (FPT) continued

FPT 170 3 C / 45 CH
Strategy and Tactics
Prerequisite: FPT 150
This course provides in-depth analysis of the principles of fire control through utilization of personnel, equipment, and extinguishing agents on the fire ground.

FPT 175 4 C / 60 CH
Hazardous Materials Chemistry
Prerequisite: None
This course provides basic fire chemistry relating to the categories of hazardous materials including problems of recognition, reactivity, and health encountered by firefighters.

FPT 180 3 C / 45 CH
Occupational Safety and Health for the Fire Service
Prerequisite: None
This course introduces the basic concepts of occupational health and safety as it relates to emergency services organizations. Topics include risk evaluations and control procedures for fire stations, training sites, emergency vehicles, and emergency situations involving fire, EMS, hazardous materials, and technical rescue. Upon completion of this course, students should be able to establish and manage a safety program in an emergency service organization.

FPT 185 3 C / 45 CH
Fire Protection Hydraulics and Water Supply
Prerequisite: Mat 113
This course provides a foundation of theoretical knowledge in order to understand the principles of the use of water in fire protection and to apply hydraulic principles to analyze and to solve water supply problems.

FPT 205 4 C / 60 CH
Introduction to Fire and Emergency Services Administration
Prerequisite: FPT 150
This course introduces the student to the organization and management of a fire department and the relationship of government agencies to the fire service. Emphasis is placed on fire service leadership from the prospective of the company officer.

FPT 210 6 C/90 CH
Fire Service Management I
Prerequisites: MFTTC Fire Fighter II Certification and three years experience on an organized fire department.
This program is designed to prepare fire fighters for advancement in the fire service. It is based on the Michigan Fire Fighters Training Council (MFTTC) Company Officer Prerequisite curriculum. Topics include educational methodology, incident safety, incident management and strategy and tactics. Students meeting all course requirements are eligible to continue on to the MFTTC Company Officer Course.

FPT 215 3 C / 45 CH
Building Construction for the Fire Service
Prerequisite: FPT 150
This course provides the components of building construction that relate to fire and life safety. The focus of this course is on firefighter safety. The elements of construction and design of structures are shown to be key factors when inspecting buildings, preplanning fire operations, and operating at emergencies.

FPT 220 6 C/90 CH
Fire Service Management II
Prerequisite: FPT 210
This program is designed to prepare fire fighters for advancement in the fire service. It is based on the Michigan Fire Fighters Training Council (MFTTC) Company Officer curriculum. Topics build on those factors when inspecting buildings, preplanning fire operations, and operating at emergencies.

FPT 225 3 C / 45 CH
Principles of Fire and Emergency Services Safety and Survival
Prerequisite: None
This course introduces the basic principles and history related to the national firefighter life safety initiatives, focusing on the need for cultural and behavior change throughout the emergency services.

FPT 230 4 C/60 CH
Fire Service Management III
Prerequisite: FPT 220
This program is designed to prepare fire fighters for advancement in the fire service. It is based on the Michigan Fire Fighters Training Council (MFTTC) Leadership and Health and Safety curriculum. Topics include problem solving, ways to identify and assess the needs of the Company Officer’s subordinates, methods for running meetings effectively, decision-making skills for the Company Officer, ethics, use and abuse of power at the Company Officer level, delegation to subordinates, assess personal leadership styles through situational leadership, discipline subordinates, and applies coaching/motivational techniques for the Company Officer.

FPT 235 3 C / 45 CH
Legal Aspects of the Fire Service
Prerequisite: None
This course introduces the Federal, State, and Local laws that regulate emergency services, national standards influencing emergency services, standard of care, tort, liability, and a review of relevant court cases.

FPT 240 3 C/45 CH
Fire Service Management IV
Prerequisite: FPT 230
This course builds on the previous Fire Service Management courses, offering an in-depth look at various topics. Topics considered budget management, marketing for the fire service, public relations, labor relations, and risk management. This course is designed for upwardly mobile individuals who seek to move into the upper ranks within the fire service.

FPT 245 3 C / 45 CH
Fire Investigation I
Prerequisites: FPT 150, FPT 165, FPT 160
This course is intended to provide the student with the fundamentals and technical knowledge needed for proper fire scene interpretations, including recognizing and conducting origin and cause, preservation of evidence and documentation, scene security, motives of the fire setter, and types of fire causes.

FPT 246 4 C / 60 CH
Prerequisite: FPT 245
This course is intended to provide the student with advance technical knowledge on rule of law, fire scene analysis, fire behavior, evidence collection and preservation, scene documentation, case preparation, and testifying.

FPT 250 3 C/45 CH
Fire Service Management V
Prerequisite: FPT 240
This course continues the process of developing upwardly mobile individuals within the fire service. Topics in this course offer in-depth work in the following areas labor issues, labor law, diversity, dealing with NFPA standards, complying with OSHA regulations, and dealing with regulatory agencies. The course is designed to prepare those individuals to be fire chief.

FPT 255 3 C / 45 CH
Fire Inspection Principles and Practice
The course provides fundamental information regarding the history and philosophy of fire prevention, organization and operation of a fire prevention bureau, use of fire codes, identification and correction of fire hazards, and the relationships of fire prevention with built in fire protection systems, fire investigation, and fire and life safety education. It is designed to enhance the student’s knowledge of fire prevention and its purpose within fire service organizations.

Continued on next page.
FIRE PROTECTION TECHNOLOGY (FPT) continued

FPT 260 3 C/45 CH
Industrial and Commercial Fire Protection
Prerequisite: FPT 255
This course considers the intricacies and differences between residential and commercial/industrial fire fighting. Students will discuss the strategies and tactics for a successful operation at larger structures, and the unique challenges for these types of operations. Topics include offensive and defensive operations, accountability, emergency escape techniques, and initial operations.

FPT 265 4 C/60 CH
Search and Rescue Operations I
Prerequisite: FPT 120
This course will prepare the student to plan and respond to various technical rescue incidents. This includes development of an action plan, Scene safety considerations, trench collapse and rescue, confined space rescue, and building collapse. The student will take into account patient considerations including extrication of victims and patient packaging. Shoring of collapsed structures is discussed in length.

FPT 270 3 C/45 CH
Search and Rescue Operations II
Prerequisite: FPT 265
Course is meant to build on FPT 265 Search and Rescue Operations I. Topics include: types of Rescue Companies, qualifications for rescuers, specialized equipment, low angle rescue, high angle rescue, water rescue, and elevator rescue. This is not a hands on class, but is meant to give the student an in-depth perspective of theory and knowledge in the subject area.

FPT 275 3 C/45 CH
Hazardous Materials in Fire Service Operations
Prerequisite: FPT 120
This theory based class enhances knowledge in hazardous materials for the hazardous materials responder. The student will look in-depth at topics such as the physical and chemical properties of hazardous materials, USDOT regulation for hazardous materials, emergency response to hazmat incidents, potential hazards at these incidents, and hazmat prevention techniques.

FPT 280 3 C/45 CH
Current Concepts in Fire Service
Prerequisite: FPT 120
The student will review current issues affecting the fire and emergency service as well as their own organizations. Each week the student will research and report on current and pertinent topics within the fire service and their affect on their organization. The student will use many resources in doing research including fire department policy and procedure, Federal and State legislation and regulation, books, magazines, and the Internet.

FPT 285 3 C/45 CH
Fire Officer Internship
Prerequisite: FPT 120
This course has two tracks that can be followed. The first allows the student to work within their own department. Students will submit and carry out a project for use within the department. The project must be of value to the department. A written report on the final outcome of the project must be submitted, or, an internship with a fire department of the student’s choice or a department of choice by the college. This track will be to enhance the student’s abilities and skills as an officer. The student will work with various individuals in the host department, and keep a log of their activities.

FOODSERVICE SYSTEMS MANAGEMENT (FSM)

FSM 101 1 C/15 CH
Foodservice Systems
Prerequisite: FSM 140
This introductory course teaches the skills and concepts necessary to plan menus for various customers in for-profit and not-for-profit markets. Techniques presented encourage students to take a systems approach to menu planning. Balancing nutrition with taste and presentation is emphasized. Students review current USDA guidelines.

FSM 115 2 C/30 CH
Food Safety and Sanitation
Prerequisite: FSM 140
Food preparation topics include: scientific principles of food preparation, with emphasis on the physical and chemical changes involved, cultural and economic aspects of food consumption, evaluation of product quality, basic concepts and techniques of volume food preparation, basic principles of food production, distribution, and service.

FSM 120 2 C/30 CH
Principles of Food Preparation
Prerequisite: FSM 140
This introductory course teaches the skills and concepts necessary to plan menus for various customers in for-profit and not-for-profit markets. Techniques presented encourage students to take a systems approach to menu planning. Balancing nutrition with taste and presentation is emphasized. Students review current USDA guidelines.

FSM 130 2 C/30 CH
Menu Planning and Nutrition
Prerequisite: FSM 140
This introductory course teaches the skills and concepts necessary to plan menus for various customers in for-profit and not-for-profit markets. Techniques presented encourage students to take a systems approach to menu planning. Balancing nutrition with taste and presentation is emphasized. Students review current USDA guidelines.

FSM 220 3 C/45 CH
Principles of Foodservice Systems
Prerequisite: FSM 140
This course begins with the history of foodservice. An overview of the different segments of the market is presented including current trends in to the foodservice industry. The central theme is a systems approach to understanding foodservice with emphasis on the components of foodservice systems, styles of foodservice, human and physical resources, and the menu as a management tool. Equipment layout and design and computerized menu development are also introduced.

Field trips and seminars emphasize observation of the various types of foodservice systems, equipment, layout and design. Students must attend five seminars in one of the option areas. This is a Manage First certificate course that meets the criteria of the Educational Foundation of the National Restaurant Association.

Option 1 Schools – seminar topics to include school foodservice history, current legislation, styles of foodservice systems, funding, support organizations, career opportunities, requirements for credentialing by The American School Foodservice Association.

Option 2 Institutional – seminar topics to include history of the various types of institutions, laws and regulations, styles of foodservice systems, support organizations and career opportunities.

Option 3 Hospitality - seminar topics include identification of different segments of the market, current trends, styles of foodservice, support organizations and career opportunities.

Laboratory required.
COURSE DESCRIPTIONS

FOODSERVICE SYSTEMS MANAGEMENT (FSM) continued

FSM 140L 1 C/60 CH
Principles of Food Preparation Laboratory
Corequisite: FSM 140
Lab fee: $25.00
Principles of Food Preparation Laboratory offers each student the opportunity to explore the chemical and biological properties of foods as a result of changes in temperature, cooking preparation, medium and time, as well as other factors. The observations and participation in experiments are coordinated with principles taught in FSM 140. An emphasis is placed on problem identification and problem solving from the perspective of the foodservice manager. Lab meets three hours weekly.

FSM 145 3 C/45 CH
Quantity Food Production E, Sp
This course requires observation and demonstration of identified skills. The emphasis is on the menu as a control measure and recipes as tools for food preparation and distribution. Students will learn the application of the principles of food preparation, identification of the criteria used for quality assurance, expected yield, and proper technique.

Quantity Food Production includes volume food preparation techniques for egg cookery, vegetables, salads, starches, sauces, meats and basic baking. Students are required to utilize computer programs designed for food production activities. This Manage First course meets the criteria of the Educational Foundation of the National Restaurant Association.

FSM 146 4 C/90 CH
Quantity Food Production: Practicum I E, Sp
This course requires observation and demonstration of identified skills. The emphasis is on the menu as a control measure and recipes as tools for food preparation and distribution. Students will practice the application of the principles of food preparation, identification of the criteria used for quality assurance, expected yield, and proper technique. Volume food preparation includes egg cookery, vegetables, salads, starches, sauces, meats and basic baking. Students are required to utilize computer programs designed for food production activities. Four 1-hour seminars per semester scheduled at the Northwest Campus.

Option 1 Schools - Targeted position functions include cooks, bakers, dishwashers, transportation, and service. Task and behaviors appropriate to each position will be observed, demonstrated and practiced. Practicum will be located in an area school district.
Option 2 Institutional - Students are introduced to the functions required of each food production unit in the foodservices department. This practicum may be located at hospitals, nursing homes, corrections facility or extended care facility.
Option 3 Hospitality — Students are introduced to the functions required of each position in the "back of the house" production and "front of the house" customer service area. Task and behaviors appropriate to each position will be observed, demonstrated and practiced. This practicum will be arranged at a hotel, restaurant, or other for profit establishment.

FSM 220 3 C/45 CH
Food & Beverage Cost Control Sp
Prerequisite: Math 112 or equivalent
This course reviews the development of cost control measures for each subsystem of the foodservice operation. Students examine foodservice situations requiring math skills. There is a focus on food and labor cost to include: sales, budget, costing recipes, pricing, equipment, utilities, overhead and profit. Students will use required industry foodservice forms for data collection. This Manage First course meets the criteria of the Educational Foundation of the National Restaurant Association.

FSM 230 3 C/45 CH
Purchasing for Foodservice Systems F
Prerequisite: FSM 145
Topics of discussion include: fundamentals of food and equipment purchasing, food storage, inventory, cost controls, development of specifications, budget analysis, data processing, receiving, storage, issuing and inventory control. The purchasing subsystem is viewed as one component of the foodservice system with the menu as the central focus. A strong emphasis is placed on quality, quantity and cost control. Field trips to vendors, food brokers, and facilities that engage in institutional feeding are mandatory. Students are required to utilize the computer programs designed for purchasing activities. This is a Manage First Certificate course that meets the criteria for NRA Education Foundation certification.

FSM 235 4 C/90 CH
Foodservice Practicum II F
Prerequisites: FSM 220, FSM 230
Students are assigned to the same practicum site as in FSM 146 for (15) Practicum days. Course requires observation, practice and demonstration of identified skills. The emphasis is on development of supervisory skills in food procurement and cost control. Students will apply the principles taught in FSM 230, Purchasing for Foodservice Systems and FSM 220, Food and Beverage Cost Control. Students will spend time becoming competent in the skills needed in each of the procurement subsystems. Students are required to utilize computer programs designed for food procurement activities. Four 1-hour seminars per semester scheduled at the Northwest Campus.

Option 1 Schools - Emphasis on formal bids, contracts, prime vendors, commodities, tracking and reimbursement forms required, inventory.
Option 2 Institutional — Emphasis on cost controls, purchasing groups, specifications for special dietary items, budgetary restrictions, and costing out in a non-profit setting.
Option 3 Hospitality — Emphasis on specifications, identification of resources, forecasting in a for profit setting.

FSM 240 3 C/75 CH
Computer Applications in Foodservice Lab
In this course students will become familiar with the use of computers in the foodservice industry. This hands-on lab course develops skills in the use of computer software programs for menu planning, equipment layout and facility design, cashing, ordering, inventory, personnel and payroll record keeping, policy and procedure manuals, HAACP, budgets, costing and other functions. Five hours lab time required weekly.

FSM 250 3 C/45 CH
Management of Foodservice Systems Sp
Prerequisite: FSM 230
Corequisite: FSM 255
Students learn management theories and styles and the application of these concepts to foodservice systems. Human resources as a component subsystem is stressed, as well as, assessment, planning, implementing and evaluating foodservice systems. Other topics covered include problem identification, problem solving, continuous quality improvement, and employee management concepts. Course includes a study of federal and state regulations that apply to foodservice. This Manage First course meets the criteria of the Educational Foundation of the National Restaurant Association.

FSM 255 4 C/90 CH
Management of Foodservice Systems: Practicum Sp
Prerequisites: FSM 145, FSM 235
Corequisite: FSM 250
Students are assigned to the same practicum site as in FSM 146 and FSM 235. The Practicum focus is on development of management skills, techniques and competency. Students are assigned to a facility in the Metro Detroit area. This practicum requires thirty (30) on site days. During this time students will observe and practice management techniques in scheduling, quality assurance, employee training, purchasing, menu planning, cost control, and other areas. Students will be expected to perform the observed functions in an acceptable professional manner.

Option 1 School — Application of management skills in a school foodservice facility.
Option 2 Institutional — Application of management skills in a non-profit institutional setting.
Option 3 Hospitality — Application of management skills in a for-profit hospitality establishment.
COURSE DESCRIPTIONS

FORENSIC PHOTOGRAPHY (VDP)

VDP 110 3 C/45 CH
Introduction to Digital Photography F
This is a first term course that focuses on teaching students how to operate 35mm digital cameras. Students will learn how to properly use camera controls, capture and expose of digital images. Students should own or have the use of a 35mm digital camera (with manual & automatic controls).

VDP 115 3 C/45 CH
Digital Photo Imaging I F
This course introduces photography student majors to computer based digital image processing. Through the use of digital production equipment (cameras, scanners, printer, and photo imaging software) students learn how to process images in a digital (computer base) processing environment.

VDP 120 3 C/45 CH
Forensic Photography Sp
Prerequisite: VDP 110
This course expands on lessons in beginning Digital Photography, with special emphasis on the application of photography to criminal and civil investigations, including the preparation of courtroom presentation. Emphasis is placed on aspects of design, composition, perception and content students will gain a scientific understanding of how to make informed choices in black-and-white and color digital photography.

VDP 210 3 C/45 CH
Studio Photography Sm
Prerequisites: VDP 110 & VDP 115
This course introduces the use of artificial lighting to create photographic illustrations in a controlled environment. Lighting techniques are demonstrated and applied in a series of photographic exercises with tabletop still life and portraiture. Both "hot lights" and electronic flash are used to achieve total control of composition, color, contrast and reflection. Emphasis is placed on the technical mastery of complex equipment, coupled with an aesthetic understanding of the physical principles of light.

VDP 235 3 C/45 CH
Photography Journalism Sm
Prerequisites: VDP 110 & VDP 115
This basic course in photography journalism and introduction to documentary photography will focus on creating photographs for newspapers. We will cover the history and ethics of contemporary photography and documentary photography. Students will work on weekly assignments, small picture packages and one long-term project.

VDP 255 3 C/45 CH
Forensic Photography Capstone Portfolio Project Sm
Prerequisites: All VDP Courses
This is a special course designed by the student and guided by the instructor to start the development of a capstone portfolio project. Students will develop a project that reflects what they have learned in the program. Group approach and class critiques will be important elements of the production of the capstone portfolio.

FRENCH (FRE)

FRE 101 4 C/60 CH
Elementary French I F, Sp, Sm
This course is designed for beginning students and aims at developing the four skills of understanding, speaking, reading and writing French. Emphasis is on grammatical constructions, vocabulary, basic idioms and phonetics. Special emphasis will be on the development of conversational French.

FRE 102 4 C/60 CH
Elementary French II F, Sp, Sm
Prerequisite: FRE 101
Continued emphasis will be on the four basic skills, fundamental grammatical construction and vocabulary. Expanded training in reading, writing and composition. Emphasis is on French conversation and idiomatic constructions.

FRE 201 4 C/60 CH
Intermediate French I
Prerequisite: FRE 102
This course is an expansion of essential principle of grammatical idiomatic usage through oral and written exercises, emphasis is on French conversation, and continued development on reading French.

FRE 202 4 C/60 CH
Intermediate French II
Prerequisite: FRE 201
The focus of this course is on reading French on an advanced level and a continued emphasis on idiomatic usage in both speaking and writing French.

GEOGRAPHY (GEO)

GEO 201 4 C/60 CH
World Regional Geography
This course is a study of the spatial relationships between human societies, cultures and natural resources in the various regions of the world. Through lectures, geographic films and field experiences, the course examines the cultural and physical landscape to illustrate how they relate to and interact with each other as part of a total region.

GEL 202 4 C/60 CH
Earth Science for Elementary School Teachers
This is an introduction to the major issues in the field of geology with emphasis on the normal process of movement, including the preparation of classroom materials, and the development of lesson plans in earth science. Emphasis is on the development of lesson plans in earth science for elementary (K-8) schools.

GEL 210 4 C/90 CH
Physical Geology Lecture F, Sp, Sm
Geology is the scientific study of the Earth. Physical geology is concerned with earth materials, changes in the interior and surface of the earth, and the dynamic forces that cause these changes. The course is organized beginning with a focus on earth materials, minerals, igneous rocks and volcanic processes of weathering, sediments and sedimentary rocks, soils, and metamorphic rocks.

Internal earth processes are emphasized, covering the processes of mountain building, structural geology and maps, plate tectonics, earthquakes, and the earth’s interior and the sea floor. The final focus is on surface processes including streams and groundwater, glaciers, deserts, wind and shoreline processes. (meets six hours per week, four hours lecture, two hours laboratory).

GERMANY LANGUAGE (GRM)

GRM 101 4 C/60 CH
Introduction to German
This course is designed to provide the learner with a solid background in the four language skills: speaking, understanding, reading and writing. Learners will be introduced to grammar structures and vocabulary. They will develop reading and listening skills and be introduced to diverse aspects of German life and culture.

GERONTOLOGY (GER)

GER 110 3 C/45 CH
Introduction to the Study of Aging
This is an introduction to the major issues in the field of gerontology with emphasis on the normal process of aging. Topics include physiology, psychology, economics, political issues, demography, sociology, education and community programs.

Continued on next page.
GERONTOLOGY (GER) continued

GER 115 3 C/45 CH
Programs/Services to the Aged
Prerequisites: GER 110, ENG 119
This course provides a comprehensive view of the national, state, and local structures, both public and private which provide services for the aging population. Included is an examination of the major legislative programs, agencies and regulations affecting the elderly.

GER 120 3 C/45 CH
Processes of Aging
Prerequisites: GER 110, GER 115, ENG 119, PSY 101,
Physiological changes which are normal to the aging process and to the health and well-being of the elderly are studied by examining issues unique to aging, including sensory abilities, exercise, nutrition and drug use and misuse. Present patterns of health, illness and disease behavior, as well as rates of utilization of health and medical facilities and services will be investigated. Longevity and the quality of life are considered with an emphasis on preventive care, health maintenance and alternatives to institutionalization.

GER 125 3 C/45 CH
Mental Health and the Aging
Prerequisites: GER 110, GER 115, ENG 119, PSY 101,
This course focuses on the mentally healthy older adult from a social-psychological perspective. It investigates the changing nature of social roles, emotional and social consequences of multiple losses, redefinition of needs in relationship to family and friends as well as the topic of retirement and the use of time.

COURSE DESCRIPTIONS

GER 130 3 C/45 CH
Counseling and Communication
Skills with Older Adults
Prerequisites: GER 110, GER 115, ENG 119, PSY 101,
program admittance or dept. approval
This course is an introduction to basic counseling skills for service providers who work with older adults. Basic communication and counseling skills are presented and practiced, including special considerations in dealing with older adults. Topics include empathy, death and dying, loss, grief and depression.

GER 140 3 C/45 CH
Legal Issues of Aging
Prerequisites: GER 110, GER 115, ENG 119, PSY 101,
program admittance or dept. approval
Major legally defined rights of older adults are considered. Information to provide service professionals and older persons more efficient access to legal services. The court system and probate, estate planning, taxes, guardianship and age discrimination are among the topics discussed.

GER 155 2 C/30 CH
Seminar for Gerontology
Field Placement I
Prerequisite: Satisfactory completion of required GER courses
Corequisite: GER 156
This course integrates classroom material with on-the-job learning experience in community settings coupled with concurrent classes and individual assignments. Emphasis is on upon skills development.

GER 156 4 C/60 CH
Gerontology Field Placement I
Prerequisite: Satisfactory completion of required GER courses
Corequisite: GER 155
This course focuses on observation and participation in structured learning roles and activities in community agencies in the field of aging. Students are supervised by an approved field work instructor with regular consultation and review with the college instructor.

GEOTHERMAL SYSTEMS TECHNOLOGY (GTT)

GTT 100 4 C/60 CH
Principles of Thermogeology
This course will cover the basic principles of the Earth’s heat sources and their use as alternative, renewable, and base-load energy. Attention will be given to the Earth’s formation, its core as a heat source, and its crust for solar energy storage. Ground source heat and its use as a renewable energy heating and cooling source will be emphasized. Field experience to geothermal sites will be conducted.

GTT 105 4 C/60 CH
Applications of Geothermal Systems
This course will explore the variety of geothermal systems installed around the world. The student will focus on emerging energy issues and challenges the nation and the geothermal REHC industry face in regard to economics, energy conservation, and energy use challenges to local economies. The course will emphasize how geothermal systems integrated with other renewable energy sources can play a significant role in successfully addressing these challenges. Students will learn how to systemically reduce the use of fossil fuels in local economies and municipalities while concurrently establishing sustainable local communities and buildings. Students will experience building sites or drilling sites geothermal/ground source heat.

GTT 201 3 C/45 CH
Geothermal REHC Technology
This course will cover the basics of geothermal energy production and technology. Essentials on how to utilize and integrate geothermal technology as an energy source will be analyzed and demonstrated. Examples of residential and commercial applications will be shown and reviewed.

GTT 220 4 C/60 CH
GHX Accreditation Exam Preparation
This course provides the student with practical field experience and hands-on techniques for the fusion of the two primary ground heat exchangers used in the day-to-day installation of a ground-source heat exchanger (GHX) using today’s industry standards. This course culminates the completion of the Geothermal REHC Technology Certification Program by taking the student through the process of preparing for the International Ground Source Heat Pump Association’s Accredited Installer examination.

HEALTH (HEA)

HEA 220 1 C/18.75 CH
Computer Applications in Health
Prerequisites: BIO 250, BIO 295, ENG 120, NUR 101
The focus of this course is to introduce health occupation students to basic computer applications. Content includes basic utilization of computers and its relation to health care and various hospital departments.

HEALTH SCIENCE (HSC)

HSC 100 1 C/30 CH
Medical Measurements and Mathematics
This course provides students with the necessary medical mathematics for calculating various drug administration.

HEATING, VENTILATION AND AIR CONDITIONING (HVA)

HVA 101 4 C/75 CH
Basic Refrigeration I
Corequisite: HVA 102
This course covers theories, application and principles of refrigeration and air cooling, basic cycles, systems, components, refrigeration accessories. The course also includes refrigeration code regulations, safe designs, construction, installation, alteration, inspection, testing and licensing of refrigeration systems.

Continued on next page.
HEATING, VENTILATION AND AIR CONDITIONING continued

HVA 102 2 C/45 CH
Hermetic Systems
Lab fee
Corequisite: HVA 101
This course covers fundamentals of heating including comfort standards, heat loss calculation, electric control wiring, servicing components and study of various types of systems. The course also includes local and national codes governing safe design, construction, installation, alteration, and service and testing. Corequisite: HVA 107

HVA 103 2 C/45 CH
Commercial Refrigeration
Lab fee
Prerequisites: HVA 101, HVA 102
Corequisite: HVA 108
This course covers application, installation and servicing of commercial-industrial refrigeration, including operating and testing of low, medium and high temperature systems. Lab fee

HVA 104 4 C/75 CH
Air Conditioning I
Lab fee
Prerequisites: HVA 101, HVA 102
Corequisite: HVA 105
This course covers load calculation, basic psychometrics, system design, air handling, selection of equipment and controls, installation and servicing of residential and commercial systems. Lab fee

HVA 105 4 C/75 CH
Air Conditioning II
Lab fee
Prerequisites: HVA 101, HVA 102
Corequisite: HVA 104
This course covers advanced design, application installation and servicing of commercial and field-assembled packaged air conditioning units, including testing, starting balancing and troubleshooting. Lab fee

HVA 106 4 C/60 CH
Basic Heating
Lab fee
Corequisite: HVA 107
This course covers fundamentals of heating including comfort standards, heat loss calculation, electric control wiring, servicing components and study of various types of systems. The course also includes local and national codes governing safe design, construction, installation, alteration, and service and testing. Corequisite: HVA 107

HVA 107 2 C/45 CH
Heating Controls
Lab fee
Corequisite: HVA 106
This course will cover heating controls, how they operate, how they are wired. Included in this course are schematic diagrams, pictorial diagrams and control operation. Lab fee

HVA 108 4 C/75 CH
Refrigeration Controls
Lab fee
Prerequisites: HVA 101, HVA 102, HVA 103
This course will cover refrigeration controls, how they operate, how they are wired and their uses. Included in this course are schematics diagrams, pictorial diagrams and control operation. Lab fee

HVA 109 4 C/75 CH
Ventilation & Duct Fabrication
Lab fee
Prerequisites: HVA 106, HVA 107
This course covers advanced system design and layout, including sizing and installation of air handling systems on selected blue prints. Lab fee

HVA 110 4 C/75 CH
Force Air & Hydronic Heating
Lab fee
Prerequisites: HVA 106, HVA 107
This course covers application, installation and service of steam and hydronic heating systems, including equipment selection, layout, construction, testing, adjusting and troubleshooting. Piping systems are also studied. Lab fee

HVA 111 3 C/60 CH
Applied Electricity in Air Conditioning and Heating
Lab fee
Prerequisites: HVA 101, HVA 102, or HVA 106 and/or HVA 107
In this course the student will learn the fundamentals of electricity as applied to air conditioning, heating and refrigeration covering such topics as: basic electricity, electrical symbols, circuits, electric meters, alternating current, single phase motors, testing, motor protection and troubleshooting. Lab fee

HVA 112 2 C/30 CH
Refrigerant Recovery, Recycling and Reclamation I
Lab fee
Prerequisites: HVA 101, HVA 102 or HVA 103
In this course emphasis is placed on dehydration, refrigerant, charging, recovery, recycling and reclamation procedures, as well as techniques using a state-of-the-art multiuse recovery/recycling machine. This course provides training required for refrigeration technicians for the EPA approved certification. Lab fee

HVA 113 2 C/30 CH
Refrigeration Code and Regulations
Lab fee
Prerequisites: HVA 101, HVA 102, HVA 103
This course covers fundamentals of heat, steam and other vapors, gases and vapor cycles of fuels and combustion, steam power plants, heat engines, building heating, systems and instruments. This course provides training required for refrigeration technicians for the EPA approved certification. Lab fee

HVA 114 2 C/30 CH
Heating Code and Regulations
Lab fee
Prerequisites: HVA 106
This course provides the student with the heating safety code of the American Society of Heating, Refrigeration and Air conditioning Engineers. The topics considered are scope and purpose, derivation, refrigerant, classification, system required for various establishments, installation requirements, piping valves, fitting and related parts and safety devices. Lab fee

HVA 115 3 C/60 CH
Applied Electricity in Refrigeration Code and Regulations
Lab fee
Prerequisites: HVA 101, HVA 102, HVA 103
In this course the student will learn the fundamentals of electricity as applied to air conditioning, heating and refrigeration covering such topics as: basic electricity, electrical symbols, circuits, electric meters, alternating current, single phase motors, testing, motor protection and troubleshooting. Lab fee

The course provides training required for refrigeration technicians for the EPA approved certification. Lab fee

HVA 116 3 C/60 CH
Applied Electricity in Refrigeration Code and Regulations
Lab fee
Prerequisites: HVA 101, HVA 102, HVA 103
In this course the student will learn the fundamentals of electricity as applied to air conditioning, heating and refrigeration covering such topics as: basic electricity, electrical symbols, circuits, electric meters, alternating current, single phase motors, testing, motor protection and troubleshooting. Lab fee

USA. These codes offer general criteria for the installation and operation of gas piping and gas equipment on consumers' premises. It is included to promote public safety by providing guidelines for the safer and more satisfactory utilization of gas. Lab fee

HVA 201 3 C/45 CH
Introduction to Boiler Plant Maintenance
Lab fee
This course covers water and steam, steam cycles, blow down, characteristics of steam and type of steam piping and systems. Also low pressure boilers and boiler room accessories, safety devices, their function and testing, fire tubes, boiler plant auxiliaries, pumps, injectors, regulators, feed-water, heaters, valves, traps, separators, water treatment principles, scale prevention, reaction under temperature and pressure, boiler circulation, feeds and construction, impaired testing, operation of boiler and boiler efficiency improvement techniques will be covered. Lab fee

HVA 202 3 C/45 CH
Steam I
Lab fee
Prerequisite: HVA 201
This course covers fundamentals of heat, steam and other vapors, gases and vapor cycles of fuels and combustion, steam power plants, heat engines, building heating, systems and instruments. This course covers other 200 level HVA courses prepare students for boiler operation and licensing. Lab fee

HVA 203 3 C/45 CH
Steam II
Lab fee
Prerequisite: HVA 202
This course covers definitions, safety regulations, and codes, fire tube boilers, water tube boilers, heating, surface and boiler horse power, boiler materials and construction, safety alarms and valves, fusible plugs, feed and blow off accessories, fuel gas analysis, water treatment, repairs and inspection. Continued on next page.
HEATING, VENTILATION AND AIR CONDITIONING continued

HVA 204 3 C/45 CH
Boiler Room Accessories Lab fee
Prerequisite: HVA 201
This course covers boilers, foundations and supports, safety devices, water walls, water columns, headers, drum materials, laying up of boilers, heat absorption rates of various water surfaces, pumps, injectors, regulators, turbines, air pre-heaters, collectors and traps, separators, drafts, automatic control equipment and operation.

HVA 206 3 C/45 CH
Refrigeration Operators Lab fee
This course covers fundamentals of refrigeration, compressors and their types, capacity controls, starting, stopping and operation, valves shapes, booster pumps, pump out and dual suction compressors, lubrication systems and lubricants, shaft seals and cylinder cooling, type of evaporators, cooling towers and spray ponds, accumulators and separators, samples of multiple choice questions, systems diagrams. Sequence of operations and calculation problems will be covered.

HEAVY EQUIPMENT MAINTENANCE (HEM) 2011-12 only

HEM 101 5 C/75 CH
Diesel Engine I Lab fee
This course covers various aspects of general engine diagnosis, cylinder head and valve train diagnosis and repair, engine block diagnosis and repair, and engine brakes. Performance task within this course will be according the most current ASE standards.

HEM 110 5 C/75 CH
Diesel Engine II Lab fee
Prerequisite: HEM 101
This course covers various aspects of lubrication systems, cooling system, air induction and exhaust system, fuel supply system, mechanical fuel injection and engine brakes.

HEM 111 6 C/90 CH
Suspension and Steering Lab fee
This course covers various aspects of steering systems, steering column, steering units, steering linkage, suspension systems, wheel alignment, tires and frames.

HEM 112 7 C/105 CH
Brakes Lab fee
The primary concentration of this course is on basics and hands-on of components that make up the chassis of over-the-road trucks and trailers. It will also cover the operation, troubleshooting and repair of a variety of construction equipment. Components used in the lab are representative of the major manufacturers’ current technologies.

HEM 116 3 C/45 CH
Vehicle (Mobile) Hydraulics Lab fee
Prerequisite: HEM 100
This course covers the basic fundamentals and principles of Hydraulics from construction, operation and application, to how they apply to Heavy Maintenance and troubleshooting of the various systems is also covered.

HEM 121 5 C/75 CH
Electrical/Electronic System I Lab fee
This course covers various aspects of general electrical systems and battery diagnosis and repair.

HEM 122 5 C/75 CH
Electrical/Electronic System II Lab fee
Prerequisite: HEM 121
This course covers various aspects of starting, charging and lighting systems diagnosis and repair.

HEM 123 7 C/105 CH
Preventive Maintenance Lab fee
Prerequisite: HEM 123
This course is designed to cover various aspects of preventive maintenance on medium and heavy duty diesel trucks.

HEM 124 7 C/105 CH
Drive Train Lab fee
Prerequisite: Program Admission
This course covers various aspects of clutch, transmission, drive shaft, universal joint, drive axle diagnosis and repair.

HEM 125 6 C/90 CH
Heating, Ventilation & Air Conditioning Lab fee
Prerequisite: Program Approval
This course covers various aspects of HVAC systems, A/C system and components, heating and engine cooling systems, operating systems, related controls and air/vacuum mechanical system diagnosis, service and repair.

HEM 200 5 C/75 CH
Diesel Engine III Lab fee
Prerequisite: Program Approval
This course covers various aspects of fuel system diagnosis and repair, electronic fuel management system diagnosis and repair.

HEM 202 5 C/75 CH
Electrical/Electronic System III Lab fee
Prerequisite: HEM 122
This course covers various aspects of gauges, warning device, and related electrical systems diagnosis and repair.

HEM 210 2 C/60 CH
Diesel Engine Fieldwork Experience Lab fee
Prerequisite: HEM 200
This course provides diesel engine fieldwork experience for students.

HEM 211 2 C/60 CH
Suspension and Steering Fieldwork Experience Lab fee
Prerequisite: HEM 111
This course provides suspension and steering fieldwork experience for students.

HEM 212 2 C/60 CH
Brakes Fieldwork Experience Lab fee
This course provides brake fieldwork experience for students.

HEM 222 2 C/60 CH
Electrical/Electronic System Fieldwork Experience Lab fee
Prerequisite: HEM 122
This course provides electrical/electronic fieldwork experience for students.

HEM 223 2 C/60 CH
Preventive Maintenance: Fieldwork Lab fee
Prerequisite: HEM 123
This course provides preventive maintenance fieldwork experience for students.

HEM 224 2 C/30 CH
Drive Train Fieldwork Experience Lab fee
Prerequisite: HEM 124
This course provides drive train fieldwork experience for students.

HEM 225 2 C/60 CH
Fieldwork Experience Lab fee
Prerequisite: HEM 125
This course provides heating, ventilation and air conditioning fieldwork experience for students.
HEMODIALYSIS (HMD)

HMD 110  3 C/45 CH  Hemodialysis Terms & Principle
This course provides students the introduction to the terminology of the Hemodialysis patient care. Usage, definition, pronunciation and spelling of terms common to the renal anatomy and physiology, chronic kidney disease, Hemodialysis devices, vascular access and Hemodialysis procedure and complications will be discussed. Computerized study guide audocassette tapes are used to enhance students learning. This course also defines the basic principles of diffusion, filtration, ultrafiltration, convection, and osmosis. Explains how diffusion, filtration, ultrafiltration, convection and osmosis relate to solute transport and fluid movement during dialysis. Describes the principles of fluid dynamics and how they relate to dialysis.

HMD 120  3 C/45 CH  Anatomy & Physiology of Kidney and Urinary System
This course is identifies the structures and functions of the normal kidney; describes acute vs. chronic kidney disease; list symptoms of urination and conditions that often occur due to the kidney failure.

HMD 130  3 C/45 CH  Surgical Principles of Peritoneal and Vascular Access
This course describes the three main types of vascular access. It presents to students basic anatomy of human systemic, pulmonary, and portal circulation systems; identify the predialysis assessments for all types of vascular access, describe the methods of needle insertion for AVFs and grafts; accessing procedure; exit site care, and monitoring of vascular catheters. Also presents to students basic principles of surgical sterile technique, surgical instruments, medical devices, and step-by-step surgical techniques for AVFs and AV graft placement.

HMD 140  3 C/45 CH  Hemodialysis Patient Care Management
This course describes at least four conditions that often occur due to kidney failure. Students will discuss the treatment options for kidney failure. They will identify members of the care team and discuss the communication skills dialysis team members use while working with the patients. Also describe the goal of rehabilitation and the Hemodialysis Patient care Specialist’s role in it. Hemodialysis patients' nutrition, patients' cope and education including patient self-management and the importance of hope will be discussed.

HMD 150  3 C/45 CH  Hemodialysis Machine Set-up
This course will identify the purpose and characteristics of dialyzers; describe the purpose and chemical composition of dialysate; describe dialysate preparation and the three monitoring functions of the dialysate delivery subsystem and the extracorporal blood circuit functions and monitoring systems. Students will discuss the purpose of water treatment for dialysis, the advantages and disadvantages of water softeners, carbon tanks, reverse osmosis, deionization, and ultraviolet irradiation in the treatment of water for dialysis. The method for microbiological testing of the water treatment system will be examined in the HMD Lab. The course also will identify the dialyzer reprocessing: history, reasons, and step-by-step procedures.

HMD 160  3 C/45 CH  Hemodialysis Clinical Pharmacy
This course is an introduction to medications used in the Hemodialysis procedure. It emphasizes classification, administration, forms, methods, interaction, and desired effects of pre-, intra- and post-hemodialysis medications. The Hemodialysis Patient Care Specialists, legal responsibilities are included.

HMD 170  3 C/60 CH  Hemodialysis Clinical Practicum
This is supervised clinical course (under direct supervision of clinical preceptor in dialysis setting), and a continuation of HMD 150 - Hemodialysis Machine Setup & Maintenance - Laboratory course. Students perform in the role of the Hemodialysis Patient Care Specialists on various stages of Hemodialysis procedure. This clinical setting involves two days per week, 8.5 hrs per day. Training series and students evaluation are based on the eight core modules. Each module is a self-sufficient topic, containing objectives, suggested practice areas with relevant informational background, and evaluation material. In addition, there is a separate reference module, which includes a glossary of terms. Students are responsible for their own transportation.

HOMELAND SECURITY (HLS)

HLS 100  3 C/45 CH  Intro to Homeland Security
This course is designed to introduce the audience to fundamental components and concepts of homeland security. Topics that will be discussed are: History and origins of terrorism, critical infrastructure-identity and protect, national security strategies and organizations and an introduction to weapons of mass destruction.

HLS 101  3 C/45 CH  Introduction to Terrorism
Prerequisite: HLS 100
This course is designed to provide a history of terrorism both foreign and domestic. It will explore topics such as new adversaries, motivation, and tactics for global terrorism to include the exploration of domestic acts occurring in the U.S.

HLS 102  3 C/45 CH  Business & Industry Crisis Management
This course is designed for business and industry. Topics include: contingency planning, business area impact analysis, risk communication and management, crisis management, disaster recovery and organizational continuity.

HLS 103  3 C/45 CH  Emergency Management Principles
This course is designed for tourism, hospitality and travel management industries. Topics include: overview of disaster threats to tourists, industry managerial experiences, assessing tourist business vulnerabilities, industry disaster planning and customer and employee expectations.

HLS 104  3 C/45 CH  Terrorism & Emergency Management
This course is designed for emergency response personnel. Topics include: history of terrorism in the United States, domestic and international terrorism, law enforcement/national security aspects, applying emergency management framework, the structure of antiterrorism programs, preparing and responding to major events.

HLS 105  3 C/45 CH  Hazards Risk Management
This course is designed for emergency response personnel. Topics include: contribute to the reduction of growing toll of disasters in the United States by providing an understanding of a process that provides a framework that may be applied at all levels of communities and governments, to identify, analyze, consider, implement and monitor a wide range of measures that contribute to their well being.

HLS 201  3 C/45 CH  Introduction to Intelligence
Prerequisite: HLS 100
This course is designed to introduce the student to the intelligence community of the U.S. government. The student will learn the importance of information sharing between the intelligence community and local law enforcement agencies. Topics will include: the history of intelligence, sources of intelligence, the various steps in gathering intelligence, and how intelligence applies to Homeland Security.

HLS 202  3 C/45 CH  Homeland Security Emergency Management
Prerequisite: HLS 100
This course is designed for emergency response personnel and will survey emergency and disaster management. Topics include: the history of domestic and international terrorism; natural and technological hazards and risk assessment; and the emergency management disciplines of mitigation, response, recovery, preparedness and planning.

Continued on next page.
COURSE DESCRIPTIONS

HOMELAND SECURITY (HLS)

HLS 203 3 C/45 CH
Counterterrorism for First Responders
Prerequisite: HLS 100
This course is designed for the first responders that are first on the scene of terrorism incidents whether they are foreign or domestic. The must provide security to the site, give aide to the wounded and literally put out the fire. The first responders will be prepared to handle all types of hazardous materials and effectively deal with chemical and biological events. The course provides step-by-step procedures for recognition and identification procedures for handle terrorist events.

HISTORY (HIS)

HIS 151 3 C/45 CH
World Civilization I
Pre-History – 1500 CE
This course is a Global History studying the development of civilizations from the end of the Pleistocene Epoch through the European Renaissance. The course focuses upon the political, economic, and cultural development and achievements of the various civilizations and societies of the world.

HIS 220 3 C/45 CH
History of Michigan
This course covers the historical development of Michigan from the period of the French exploration to the present. The major political, social and economic development of the state. Emphasis on southeastern Michigan, especially the metropolitan Detroit area.

HIS 230 3 C/45 CH
Patterns of American Life: A Cultural History of 17th to 19th Century America
This course traces the growth of American society from colonial days through the nineteenth century. Visits to local museums such as Henry Ford Museum, Greenfield Village, Heritage House, Detroit Historical Museum and the Dossin Great Lakes Museum will be focal points in an audio, visual and tactile experience. Students will learn blacksmithing, candle making and other crafts.

HIS 249 3 C/45 CH
U.S. History I 1607 - 1865
This course covers the political, social and economic development of the United States from colonization through the Civil War. Emphasis is placed on colonial America, the Revolutionary War, the Constitution, the slavery question and the Civil War.

HIS 250 3 C/45 CH
History of the United States II 1865 to Present
This course covers the rise of the United States as an industrial leader and world power. Emphasis is placed on the transition from slavery to freedom, the growth of big business, the Great Depression, postwar America and America’s wars.

HIS 255 3 C/45 CH
History of American Labor
This course covers the growth of organized labor from early craft unions, through the struggles of the industrial revolution, to the present multi-organizational federations. Analysis of current problems, organizational forms and activities of organized labor.

HIS 261 3 C/45 CH
African-American History I
This course is an American history course that focuses on the role the African-American has played in American history up to 1865. A survey of the African background, the Colonial period and the African-American experience from the American Revolution to the Civil War. This course provides students with a general background on the development of the African nation and the significant role played by African-Americans prior to the Civil War.

HIS 262 3 C/45 CH
African-American History II
This course is an American history course from 1865 to the present. The course focuses upon the African-American during the Reconstruction period and the thoughts and actions of African-Americans during the Twentieth Century as expressed through various leaders and organizations. This course provides students with a general background on the development of the African nation and the significant role played by African Americans from the period of the Civil War to the present.

HOTEL MANAGEMENT (HTM)

HTM 105 3 C/45 CH
Introduction to Hotel & Restaurant Management
The focus of this course is on analysis and understanding of the interdependent nature of major departments within a hotel operation. Emphasis will be placed on food and beverage, front office and rooms division, sales, human resources and facility management.

HTM 106 3 C/45 CH
Hotel & Restaurant Management
This course is designed to provide students with an in-depth study of Hotel and Restaurant Management. Special attention will be paid to supervision, procurement, computer systems, and the international hotel and restaurant management market.

HTM 200 3 C/45 CH
Hotel and Restaurant Operations
The focus of this course is on analysis and understanding of food, beverage service and controls for hotel dining rooms, restaurants, banquet facilities, and cafeterias. Emphasis will be placed on food and beverage management, menu planning, personnel, merchandising, operational reports, and equipment. The course will also cover operational regulations pertaining to safety, health, taxes, and licenses. The course will teach students how to successfully manage food and beverage operations found in lodging properties including coffee shops, gourmet dining rooms, room service, banquettes, lounges, and entertainment/show rooms.

HTM 225 3 C/45 CH
Special Events and Catering Management
This focus of this course will be on management and operations of conventions, meetings, banquets, trade shows, and exhibition for both profit and nonprofit organizations. Emphasizes on programs, planning, budgeting, contracts, marketing, facility selection, and exhibit and convention planning. Special emphases will be put on catering sales and management.

HTM 299 3 C/45 CH
Hotel Management Practicum
This course provides a forum where students can acquire entry level knowledge and skills in the hospitality industry while in a performance setting. Students apply the knowledge and skills acquired at WCCCD in an appropriate hospitality establishment approved by the instructor.

<td>C/45 CH</td>
<td>Professionalism in Human Services F, Sp, Sm Prerequisite: HUS 105 This course covers professional ethics, values, behaviors and communication skills are addressed. This course prepares the student for a field-site situation through community placement, and fulfillment of the student’s field-site role in a professional and responsible manner. Instructor and students locate and finalize individual student community placement arrangements.</td>
</tr>
</tbody>
</table>

By the end of the semester, students know the field site where they will work. CCT students will be assisted in identifying their CCT 103, CCT 104, CCT 105 and CCT 106 practicum sites. CCT students’ placement will not be finalized.
INDUSTRIAL COMPUTER GRAPHICS TECHNOLOGY (CAD)

CAD 101 4 C/60 CH
Fundamentals of Computer Aid Drafting
This is an introductory computer aided drawing and design course. As an elementary course, it will provide the student with an overview of drawings produced with the use of the computer. Students will explore software capability by generating various configurations and develop operational skills to include among others: input of graphic commands, editing, filing, imaging, rotating and copying, plotting and printing for drawings. Auto CAD software will be used in this class.

CAD 102 4 C/60 CH
Advanced Computer Aided Drafting
Lab fee
Prerequisite: CAD 101
An advanced computer aided drafting course that focuses on developing those competencies necessary to produce exacting and precise detail 3-D engineering drawings. The course included three-dimensional data base manipulation and is enhanced with menu creation and advanced editing. Auto CAD software will be used in this class.

CAD 110 4 C/60 CH
Intro to Unigraphics CAD/CAM
Lab fee
Prerequisite: DRT 102 or MAT 121
An introduction to two-dimensional drawing using the Unigraphics modeler. Other topics include UNIX operating system and Visual User Environment (VUE); File Management; Two-dimensional drawing, construction, and editing; view manipulation; layout; and a brief introduction to three-dimensional principles and concepts.

CAD 121 4 C/90 CH
Tool and Fixture Detailing
Lab fee
Prerequisite: CAD 102 or CAD 222
Study of the systems used in preparing detail drawings of assemblies. Includes detailing of blocks, pins, turned details, elements and castings.

CAD 200 4 C/60 CH
UG Free Form Modeling
Lab fee
Prerequisite: CAD 102, CAD 222
Definition of complex surfaces and their intersections. Includes cylinder, convolutes and double curved surfaces of all types.

CAD 203 4 C/60 CH
CAD Applications
Lab fee
Prerequisite: CAD 222
This NX class introduces the student to the use of reference features and expressions to create and constrain sketch geometry in NX.

CAD 211 4 C/90 CH
Die Design and Panel Tipping
Lab fee
Prerequisite: CAD 102 or CAD 222
Die design methods used for cutting dies. Use of standard components for dies employing standard die sets, punches, retainers, springs, and stripper bolts.

CAD 222 4 C/60 CH
Unigraphics Solids Modeling
Lab fee
Prerequisite: CAD 110
An introduction to the fundamental three dimensional models in Unigraphics. Other Topics include Boolean Operations; solid and surface base modeling; create and edit features; analyze, move and hybrid models.

CAD 224 4 C/60 CH
UG/Assembly/Components/Drafting
Lab fee
Prerequisite: CAD 222
Provides students with fundamentals of three dimensional drafting, geometric dimension and tolerances; and an introduction to organization of several different part files which share common data and components, subassemblies and assemblies.

CAD 226 4 C/60 CH
Advanced Unigraphics Solid Modeling
Lab fee
Prerequisite: CAD 222
An advanced Unigraphics solid modeling course that provides students with the ability to model complex free-form surface parts applied to the automotive industry for component engine and sheet metal design.

JAPANESE (JPN)

JPN 101 4 C/60 CH
Elementary Japanese I
F, Sp, Sm
This course is an introduction to Japanese language and development of Japanese culture and its characteristics. This course is recommended for educators and others who require or desire an intensive overview of the language.

JPN 102 4 C/60 CH
Elementary Japanese II
F, Sp, Sm
This course is a continuation of JPN 101 and is designed to provide basic knowledge of Japanese language for practical communication. It is designed to develop skills in reading, writing, speaking and listening. It also provides information about everyday life and culture in Japan. Students learn more advanced sentence structures and expressions.

COURSE DESCRIPTIONS
LEA 225 2 C/30 CH
Law Enforce Admin: Seminar I  F, Sp
Prerequisite: LEA 210
This course is an overview of law enforcement administration and its relationship to theory and practical application. Classroom materials and personal life experiences concerning all areas of administration in law enforcement are discussed.

LEA 226 4 C/60 CH
Law Enforcement Administration: Practicum  F, Sp
Prerequisite: LEA 210
This course is a supervised work experience in a law enforcement setting with emphasis on the development of positive interpersonal skills. Students must maintain a log and written reports of their field activities.

LEA 230 3 C/45 CH
Fundamentals of Criminal Investigation  F, Sp
Prerequisite: CIS 100, LEA 201
This course is an introduction to basic procedures in criminal investigation, including techniques of surveillance, crime scene search, collection, the preservation of evidence, sources of information including interviews and interrogation.

LEA 231 3 C/45 CH
Criminal Law and Justice I  F, Sp
Prerequisite: LEA 230
This course covers historical development and philosophical concepts of criminal law, including legal principles, identification and organization of the courts, identification of crime, intent and the provided penalties.

LEA 232 3 C/45 CH
Criminal Law and Justice II  F, Sp
Prerequisite: LEA 231
This course is a continuation of LEA 231 which includes the laws of arrest, search and seizure, the rights of the accused, duties of police officers, laws of evidence and criminal trials, survey and examinations of the roles of the police officer, the judge, jury, defense counsel and prosecution in the judicial process.

LEA 235 3 C/45 CH
Race Relations For Law Enforcement  F, Sp
Prerequisites: CIS 100, LEA 201
This course covers racial and cultural tensions as they relate to law enforcement. Techniques which consist of case histories, psychological confrontations, attitude changes, economic oppression, education deprivation and social injustices.

LEA 250 3 C/45 CH
Social Problems in Law Enforcement  F, Sp
Prerequisites: CIS 100, LEA 201
This course covers the role of today’s police officer in a multicultural society. It includes examination of the problems and causes of tension in social interactions and techniques in alleviating them.

LEA 253 3 C/45 CH
Law Enforcement Administration: Sem. II  F, Sp
Prerequisites: LEA 225, LEA 226
This is a topical seminar on current law enforcement issues for second year students.

LIBRARY TECHNOLOGY (LBT)

LBT 100 3 C/45 CH
Introduction to Libraries and Service  F, Sp, Sm
This course is designed to give the students a broad overview of the various types of libraries and library services offered to its users. A historical survey of libraries, from its beginnings in pre-history to the dynamic institutions they are today. Students are introduced to the functional and organizational structure; philosophy, and terminology are emphasized. Students will understand the roles that library technicians play as members of library staff. Issues in the library field which includes ethics, censorship, etc. will be explored.

LBT 105 3 C/45 CH
Library Technical Services and Acquisitions  F, Sp
This course introduces basic tenets of descriptive and subject cataloging, practice of acquisition, and the use of classification systems. Provides practical skills necessary to catalog and classify a variety of materials in MARC format, using cataloging tools online. Discuss the various aspects of technical service operations in the context of overall library services.

LBT 200 3 C/45 CH
Evaluating Information Sources  F
This course is designed to introduce students to the world of reference and information service. Core abilities will include the evaluation of print and electronic information sources, basic research methodology, search strategies, and standard bibliographic formats for determining the authority, currency and overall quality of resources.

LBT 210 3 C/45 CH
Library Technology  F, Sp
This course is designed to give the students practical skills in basic library technologies. An overview of integrated library management systems and its impact on circulation, patron registration, and cataloging operations. Covers statistics, inventory and shelving procedures. Covers statistics, inventory and shelving procedures. Covers statistics, inventory and shelving procedures. Covers statistics, inventory and shelving procedures.

LOGISTICS MANAGEMENT (LOG)

LOG 101 3 C/45 CH
Introduction to Logistics  F, Sp, Sm
Prerequisite: Program Admission
This course provides general knowledge of current management practices in logistics management. A study of the basic concepts in product distribution including distribution planning and terminology, transportation methods, traffic management, location strategies, inventory control and warehousing.

LOG 102 3 C/45 CH
Purchasing  F, Sp
Prerequisite: LOG 101
This course provides general knowledge of current purchasing practices for today’s supply chains. The student will be introduced to cross-functional teaming, purchasing and supply performance, supplier integration into new product development, supplier development, strategic cost management and total ownership cost (TOC) and many other topics.
LOGISTICS MANAGEMENT (LOG) continued

LOG 103 3 C/45 CH
Introduction to Supply Chain Management
Prerequisite: LOG 101
This course is designed to provide a general knowledge of Supply Chain Management (SCM) and the associated functions necessary for delivery of goods and services to customers. This course will focus on what employees and managers must do to ensure an effective Supply Chain exists in their organizations. Topics include: introduction to SCM, E-Commerce, materials management, information technology, measuring SCT performance, purchasing and distribution and research and case studies.

LOG 104 3 C/45 CH
Materials Management
Prerequisite: LOG 101
This course will introduce students to materials management by learning the planning production process, master scheduling, material requirement and forecasting material demands and inventory levels. This course is designed to build on the student's knowledge of supply chains and how effective material management improves supply chain performance.

LOG 105 3 C/45 CH
Inventory and Warehouse Management
Prerequisite: LOG 101
This course emphasizes the relationships of inventory and warehouse management to customer service and profitability of the wholesale distributor. The course will focus on the role of computerized systems and resulting information for effective management of inventory and the warehouse under various conditions.

LOG 110 3 C/45 CH
Transportation and Distribution
Prerequisite: LOG 101
Transportation and Distribution course examines the structure and importance of the commercial transportation industry in the logistics sector of business. The course includes discussions of regulations, economics, characteristics, and development in major transportation modes.

LOG 200 3 C/45 CH
International Logistics
Prerequisites: LOG 101, LOG 103
The International Logistics course is a study of global logistics with an emphasis on looking at the whole world as one potential market. The course will include an analysis of the global supply chain and current issues such as import/export regulations.

MANUFACTURING TECHNOLOGY (MAN)

MAN 100 3 C/45 CH
Shop Equipment and Tools
Lab fee
Prerequisite: MAN 110
An introduction to precision measuring tools used in tooling and manufacturing processes. In the shop, emphasis is placed on exercises and projects that embody the process and operation of using hand tools, layout tools, and machine tools, such as hack saw, belt and disc sanders, drill press, engine lathe, vertical mill machines and surface grinders. Classroom emphasis is placed on related information that is essential to the set up and operation of machine tools, and to perform basic processes and operations in the shop.

MAN 110 3 C/45 CH
Manufacturing Processes I
Lab fee
Prerequisite: MAN 100
A theoretical and practical introduction to conventional precision machine tools, including drill presses, engine and turret lathes, shape milling and grinding machines. Emphasis will be given on turning, threading, drilling, honing, shaping, and broaching.

MAN 120 3 C/45 CH
Survey of Material Science
Lab fee
Prerequisite: MAN 100
This is a study of the atomic structure, bonding, crystallization, and physical and mechanical properties of metals. The classification and selection of materials as well as heat-treating and hardness testing will be examined.

MAN 200 3 C/45 CH
Quality and Inspection
Lab fee
Prerequisite: MAN 110
This course is designed to give students a background in precision techniques of part measurement, testing procedures, and SPC principles. Emphasis is placed on CNN machine measurement and related software.

MAN 210 3 C/45 CH
Nontraditional Manufacturing
Lab fee
Prerequisite: MAN 110
This is a study of unconventional metal removal methods by using the high energy sources such as water, electricity, chemicals, heat, or light. An overview of the traditional processes that helped to create nontraditional machining will be studied.

MARKETING (MKT)

MKT 200 3 C/45 CH
Principles of Marketing
Prerequisite: BUS 150
A basic course with direct application to marketing functions and policies. Course includes consumer and industrial marketing concepts, service marketing, standardization and grading, pricing and government regulations.

MATHMATICS (MAT)

MAT 100 3 C/45 CH
Basic Mathematics
Prerequisite: BUS 150
This course covers solving problems with arithmetic. Building skills in using whole numbers, fractions, decimals. No calculators will be used for this class.

MAT 105 3 C/45 CH
Pre Algebra
This course is an introduction to variables in building mathematical and problem solving skills. Strong emphasis will be placed on operations with signed numbers.

MAT 110 3 C/45 CH
Business Mathematics
Prerequisite: MAT 100 or MAT 105
This course covers solving problems relating to bank and sales records, percentages in business, financial charges and statements, payrolls and taxes, insurance, bonds, stocks and annuities. Continued on next page.
### COURSE DESCRIPTIONS

#### MATHEMATICS (MAT) continued

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Credits</th>
<th>Contact Hours</th>
<th>Description</th>
</tr>
</thead>
</table>
| MAT 112     | 3       | C/45          | Elementary Algebra | Prerequisite: MAT 100 or MAT 105  
This course covers topics which include solving first and second degree equations, operations on polynomials, operations on rational expressions, word problems, graphing and solving linear equations and systems of linear equations and inequalities. |
| MAT 113     | 3       | C/45          | Intermediate Algebra | Prerequisite: MAT 112  
The emphasis of this course is on extending introductory concepts. New concepts presented are systems of linear equations and inequalities, polynomials, operations on rational expressions, word problems, graphing and solving linear equations and systems of linear equations and inequalities. |
| MAT 114     | 3       | C/45          | Technical Mathematics I | Prerequisite: MAT 100 or MAT 105  
This course covers application of arithmetic and basic algebra in technical problems, applying rules in arithmetic (whole numbers, fractions, decimals, percentage) to solve technical problems. |
| MAT 115     | 4       | C/60          | Technical Mathematics II | Prerequisite: MAT 114 or placement test  
This course is a continuation of MAT 114, using algebra to solve technical problems through the applications of equations, exponents and graphing methods in industrial work. |
| MAT 116     | 3       | C/45          | Math for Elementary Teacher I | Prerequisite: MAT 112  
The course provides the future elementary school teacher with a perspective for understanding mathematics taught in the elementary school. Topics include the study of problem solving techniques, fundamental concepts and structure of number systems, sets, numeration systems, integers, number theory and rational numbers. |
| MAT 117     | 4       | C/60          | Analytic Geometry & Calculus I | Prerequisite: MAT 116 or by placement  
In this course the functions and their graphs are reviewed. The concepts presented include limits, derivatives, differentiation of algebraic and trigonometric functions, applications of derivative, definite and indefinite integrals. |
| MAT 118     | 4       | C/60          | Analytic Geometry & Calculus II | Prerequisite: MAT 117  
This course covers the study of integration techniques, applications and integrals, limits and indeterminate forms, infinite sequence and series, improper integrals and an introduction to parametric and polar coordinates. The use of graphing technology or a computer algebra system is required. |
| MAT 119     | 4       | C/60          | Analytic Geometry & Calculus III | Prerequisite: MAT 118  
In this course the concepts presented include plane curves, polar coordinates, vectors, surfaces, vector-valued functions, partial differentiation and multiple integration with applications. The study of vector calculus includes line and surface integrals with applications. |
| MAT 120     | 4       | C/60          | College Algebra | Prerequisite: MAT 113 or by placement test  
This course is a basic course for students in business administration, education, psychology, and/or economics. It is a preparation for inferential statistics, providing a definition of statistics, measurements, working out distributions, frequency polygons, measuring central tendency and variability and finding correlation and regression. |
| MAT 121     | 4       | C/60          | Descriptive Statistics | Prerequisite: MAT 113 or placement test  
This course is a basic course for students in business administration, education, psychology, and/or economics. It is a preparation for inferential statistics, providing a definition of statistics, measurements, working out distributions, frequency polygons, measuring central tendency and variability and finding correlation and regression. |
| MAT 122     | 4       | C/60          | Linear Algebra | Prerequisite: MAT 121 or placement test  
This course is a continuation of MAT 121, using algebra to solve technical problems through the applications of equations, exponents and graphing methods in industrial work. |
| MAT 123     | 4       | C/60          | Trigonometry | Prerequisite: MAT 115 or by placement  
In this course the functions and their graphs are reviewed. The concepts presented include limits, derivatives, differentiation of algebraic and trigonometric functions, applications of derivative, definite and indefinite integrals. |
| MAT 124     | 4       | C/60          | Differential Equations | Prerequisite: MAT 123  
This course covers the following topics: the study of first order equations, higher order equations, linear systems of differential equations, power series solutions, and the Laplace transform. The use of a computer algebra system is required. |

#### MECHATRONICS (MCT)

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Credits</th>
<th>Contact Hours</th>
<th>Description</th>
</tr>
</thead>
</table>
| MCT 202     | 3       | C/60          | Introduction to Robotics | Sp  
This course is an introduction to the field of robotics technology. It will provide the student with a historical overview of the use and development of robotics. It will also include a discussion of the different types of robots (e.g., point-to-point, continuous path, electric, hydraulic, pneumatic, etc.) and introduction to robotics programming. |
| MCT 203     | 3       | C/60          | Mechatronics I | F  
Principles involved in the function of DC and AC motors and generators and their connection, operation and load characteristics. Study of different types of speed controls and starters, starters, characteristics of single phase motors and polyphase machines including synchronous and induction motors, transformer characteristics such as losses, efficiencies, paralleling transformers and transformer testing are included. Laboratory experiments to examine the characteristics of the various DC and AC motors and generators, using various speed controllers and starters. |
| MCT 204     | 2       | C/45          | Hydraulics and Pneumatics | Sp  
Survey of basic industrial hydraulics and pneumatics, including hydraulic laws and principles, necessary calculations, ANSI symbols, drawing of complete schematic diagrams of circuits studied, controls and motors used in hydraulic and pneumatic systems measuring devices and complete hydraulic and pneumatic systems. Lab coat is required. |
| MCT 205     | 3       | C/60          | Programmable Logics Controller | F  
Programmable controller hardware, relay ladder diagram and logic programming, timers and counters, arithmetic function, process control and data acquisition, data communication, computer numerical control computer controlled machines and programmable controller’s installation and troubleshooting systems will be covered. Allen-Bradley PLC-5 family programmable controllers will be used in the lab. Continued on next page.
MECHATRONICS (MCT) continued

MCT 212 3 C/60 CH
Mechatronics V: Advanced Robotics
This is an advanced course in robotic programming for automated material handling. Also include flexible manufacturing, sensors, concept of machine vision, troubleshooting of hardware and software. Emphasis will be on ABB robotics hardware, software and programming.

MCT 215 3 C/60 CH
Mechatronics VI: Advanced Programmable Logic Controllers
This is an advanced course in Programmable Logic Controllers in programming and hardware using Allen-Bradley programmable logic controllers family. Students will use programmable logic controllers in industrial automation environments. PLC installation and maintenance will be covered in this course.

MENTAL HEALTH (MEH)

MEH 110 3 C/45 CH
Individual & Group Tech I
Prerequisites: HUS 105, HUS 110, PSY 101
This course explores the role and function of the mental health worker in therapeutic interaction with individuals. An emphasis is placed on knowledge, skills, insights and attitudes essential in promoting emotional health among adults.

MEH 144 3 C/45 CH
Mental Health Legal Information
Prerequisites: HUS 105, HUS 110
This course focuses on legal information useful in intervention strategies for consumers of human services.

MEH 146 4 C/60 CH
Field Work II: Agency Placement
Prerequisites: MEH 140, SAC 203, HUS 135, HUS 105, HUS 110
This course provides observations and participation in structured learning roles and activities in a community agency, supervised by an agency fieldwork instructor with regular consultation and review with a college instructor.

MEH 210 3 C/45 CH
Individual & Group Tech II
Prerequisite: MEH 110
This course is a continuation of MEH 110 and it focuses on the mental health worker’s purposeful use of self in interaction with clients and client groups. Introduction to non-clinical strategies and roles such as advocacy, use of community resources and social action will be explored.

MEH 226 4 C/180 CH
Psychopathology & Behavior I
Prerequisite: MEH 110
This course is a study and review of psychopathology with emphasis upon the etiology, symptomatology, treatment and prognosis of mental disorders.

MUSIC (MUS)

MUS 100 3 C/45 CH
Introduction to the Fundamentals of Music
This course is an introduction to the vocabulary of music, basic terms, notation and appreciation. No credit for music majors.

MUS 101 3 C/45 CH
Fundamentals of Music I
Prerequisite: MUS 100
This course is a basic class in the discipline of music, musical elements, theory, notation, scale formation, terminology and ear training.

MUS 102 3 C/45 CH
Fundamental of Music II
Prerequisite: MUS 101
This course is a continuation of MUS 101 with increased emphasis on ear training.

MUS 110 3 C/45 CH
Class Piano I
This course is a study of the fundamentals of piano, including keyboard techniques.

MUS 111 3 C/45 CH
Class Piano II
Prerequisite: MUS 110
This course is a continuation study of the fundamentals of piano, including keyboard techniques.

MUS 121 3 C/45 CH
History of Jazz I
Prerequisite: MUS 146
This course provides an introduction to the history of jazz theory, technique, innovators and contributors.

MUS 132 1 C/45 CH
College Choir A, B, C, D
Prerequisite: MUS 111
In this course students will perform a variety of literature for chorus and vocal ensemble, including music for concert, church (gospel and hymns), glee club, madrigal and other materials for smaller vocal groups. (One credit per semester, up to a maximum of four credits.

MUSLIM WORLD STUDIES (MWS)

MWS 101 3 C/45 CH
Muslim World
Prerequisite: MUS 110
This course covers the history of the Muslim world from the rise of Islam to the present. Emphasis is placed on events which have a bearing on the contemporary Muslim world.

MWS 106 3 C/45 CH
Muslim World International Relations
This course covers the dynamics of Muslim world international relations, emphasizing their effects on the interests and security of the super powers.

MWS 107 3 C/45 CH
Muslim World Contemporary Issues
This course covers the problems and issues facing the contemporary Muslim world, stressing their relevance to United States welfare.

MWS 112 3 C/45 CH
Muhammad, Life of the Prophet
This course is designed to provide an understanding of the Prophet Muhammad’s life and career; to see that the history and development of Islam is a complex and multi-faceted process and the subsequent development and spread of Arab-Muslim civilization as it relates to the Prophet Muhammad’s life. The course also emphasizes analysis about the life and times of the Prophet Muhammad and revelations contained in the Koran.

MWS 114 3 C/45 CH
Islam in America
This course surveys the history of Islam in America from the earliest years of the African slave population, the antebellum period through the successive waves of immigration from the Muslim world, post 1965 and the aftermath of September 11, 2001. It will include the study of historical and ideological developments of various Islam movements and Muslim groups. Finally, it will study relations between Muslims and non-Muslims and the prospects for the future of Islam in America.

#### Prerequisites

- ENG 119
- BIO 240
- BIO 250
- BIO 295
- PSY 101
- Admission to the Nursing Program

This course focuses on the nursing care of the client with alterations in respiratory, cardiac or cardiovascular status. This course is organized according to the metaparadigm concepts: person, health, environment and nursing. In Level I, first year of the Nursing program, emphasis is on the nursing student as a caregiver. New nursing skills that the student will master in the nursing lab are tracheostomy care and endotracheal suctioning, central line dressing changes, and setting up chest tubes.

This course focuses on the nursing care of the client specific to the care of the obstetric client and newborn. This course uses 3D graphics programming to produce a variety of mold parts. Surfaces are extruded, revolved, lofted and swept into a variety of shapes. Programs are modified for tool path, tooling, speed and feeds. The student gains further experience by manufacturing programming parts. The course will allow students to create programs for CNC programs through the use of codes and dialog programs. A diverse variety of programming techniques such as canned cycles are edited, simulated and verified prior to the machine operations. The course focuses on the nursing care of the perioperative client, and the client with sensory alterations of vision and hearing. This course is organized according to the metaparadigm concepts: person, health, environment and nursing. In Level I, first year of the Nursing program, emphasis is on the nursing student as a caregiver. New nursing skills that the student will master in the nursing lab in this course are IV’s and IV piggybacks, blood transfusion, and oral suctioning.

This course focuses on the nursing care of the obstetric client, newborn and family unit. This course is organized according to the metaparadigm concepts: person, health, environment and nursing. In Level I, first year of the Nursing program, emphasis is on the nursing student as a caregiver. New nursing skills that the student will master in the nursing lab in this course are specific to the care of the obstetric client and newborn.

This course establishes the metaparadigm concepts: person, health, environment and nursing. In Level I, first year of the Nursing program, emphasis is on the nursing student as a caregiver. New nursing skills that the student will master in the nursing lab in this course are specific to the care of the obstetric client and newborn.

NURSING (NUR) continued

NUR 210 3.0 C/6/7.5 CH
Psychiatric Nursing – Lecture & Clinical
Prerequisites: ENG 119, BIO 240, BIO 256, BIO 295, PSY 101, HSC 100, DT 130, NUR 111, NUR 112, NUR 114, NUR 116, NUR 118, NUR 119, BIO 252
This course focuses on nursing care of clients with psychiatric disorders. This course is organized according to metaparadigm concepts: person, health, environment, nursing. In Level II, second year of the Nursing program, emphasis is on the nursing student evolving into the role of the professional nurse. New nursing skills that the student will master in the nursing lab in this course are specific to the care of the psychiatric client.

NUR 212 4 C/30 CH O/90 CH
Medical Surgical Nursing III – Lecture & Clinical
Prerequisites: ENG 119, BIO 240, BIO 256, BIO 295, PSY 101, HSC 100, DT 130, NUR 110, NUR 111, NUR 112, NUR 114, NUR 116, NUR 118, NUR 119, PSY 206
This course focuses on the nursing care of clients with endocrine, renal, immune and gastrointestinal disorders. This course is organized according to metaparadigm concepts: person, health, environment, nursing. In Level II, second year of the Nursing program, emphasis is on the nursing student evolving into the role of the professional nurse. New nursing skills that the student will master in the nursing lab are ostomy care and peritoneal dialysis.

NUR 214 3 C/6/7.5 CH
Pediatric Nursing – Lecture & Clinical
Prerequisites: ENG 119, BIO 240, BIO 256, BIO 295, PSY 101, HSC 100, DT 130, SOC 100, NUR 110, NUR 111, NUR 112, NUR 114, NUR 116, NUR 118, NUR 119, NUR 210, NUR 212, NUR 218
This course focuses on nursing care of the pediatric client. This course is organized according to metaparadigm concepts: person, health, environment and nursing. In Level II, second year of the Nursing program, emphasis is on the nursing student evolving into the role of the professional nurse.

NUR 216 4 C/30 CH O/90 CH
Medical Surgical Nursing IV – Lecture & Clinical
Prerequisites: ENG 119, BIO 240, BIO 250, BIO 252, BIO 295, PSY 101, HSC 100, DT 130, SOC 100, NUR 110, NUR 111, NUR 112, NUR 114, NUR 116, NUR 118, NUR 119, NUR 210, NUR 212, NUR 218, PSY 200
This course focuses on nursing care of clients with neurologic, musculoskeletal, hematologic, and oncologic disorders. This course is organized according to metaparadigm concepts: person, health, environment and nursing. In Level II, second year of the Nursing program, emphasis is on the nursing student evolving into the role of the professional nurse. New nursing skills that the student will master in the nursing lab are traction and adaptive equipment.

NUR 218 1 C/15 CH
Nursing Issues
Prerequisites: ENG 119, BIO 240, BIO 250, BIO 252, BIO 295, PSY 101, HSC 100, DT 130, SOC 100, NUR 110, NUR 111, NUR 112, NUR 114, NUR 116, NUR 118, NUR 119, NUR 210, NUR 212, NUR 218
This course focuses on issues within the environment of care, as well as professional nursing issues. This course is organized according to metaparadigm concepts: person, health, environment, nursing. In Level II, second year of the Nursing program, emphasis is on the nursing student evolving into the role of the professional nurse.

NUR 219 1 C/15 CH
Nursing Transitions
Prerequisites: ENG 119, BIO 240, BIO 250, BIO 252, BIO 295, PSY 101, HSC 100, SOC 100, DT 130, NUR 110, NUR 111, NUR 112, NUR 114, NUR 116, NUR 118, NUR 119, NUR 210, NUR 212, PSY 200
This course focuses on issues within the environment of care, as well as professional nursing issues. This course is organized according to metaparadigm concepts: person, health, environment, nursing. In Level II, second year of the Nursing program, emphasis is on the nursing student evolving into the role of the professional nurse.

NURSING ASSISTANT (NHS)

NHS 100 10 C/150 CH
Nursing Assistant
E Sp Sm
This program is a State of Michigan approved nursing assistant program.

OCcupATIONAL THERAPY ASSISTANT (OTA)

OTA 100 3 C/45 CH
Fundamentals of Occupational Therapy
This course is a study of the history, philosophy and functions of occupational therapy. Instructional themes include the meaning of occupation, the history of occupational therapy as a health profession, current professional structure, and the settings and methods that occupational therapy uses that contribute to the health care team.

OTA 110 3 C/45 CH
Terminology and Professional Communication
This course is an introduction to terminology as used in the occupational therapy field. The course uses a systems approach to provide a basis for understanding common psychiatric and medical terminology. Word roots, prefixes and suffixes are used as a basis for building medical terms, and applications of medical and psychiatric terms are used in medical records notes and case studies to increase understanding. The course also includes grammar and writing skills applied to writing in healthcare environments.

OTA 112 3 C/45 CH
Kinesiology for OTA
Prerequisite: BIO 240
This course is a basic course in kinesiology applied to the practice of occupational therapy. The course covers the relatedness of the skeletal and muscular systems to movement of the human body in daily functions. With knowledge of movement, levers, and other related mechanical principles, daily functions are analyzed and described. OTA 112 is an integrated lecture/lab course.

OTA 114 3 C/45 CH
Human Development
This course reviews human development throughout a human’s life span - infants, children, adolescents, adults, and older adults - with emphases on the cognitive, psychosocial, sensory-motor, and multicultural components. Other themes include age appropriate roles and life-tasks.

OTA 120 4 C/60 CH
Activity Skills
This course focuses on activity analysis from a multicultural, psychomotor, and theoretical perspectives. The course covers occupations and activities that children and adults engage in, with emphasis on analysis, teaching, and developing techniques and skills.

OTA 140 3 C/45 CH
Mental and Medical Conditions
This course discusses conditions/diseases commonly referred to occupational therapy in physical and psychosocial dysfunction settings, including etiology, incidence, pathology and residual effects. The course also includes the roles of team members, problem identification, and goal setting for occupational therapy intervention.

OTA 145 3 C/45 CH
Clinical Reasoning
This course assists the student in developing mental frames of reference to support clinical reasoning and decision-making in occupational therapy.

Continued on next page.
COURSE DESCRIPTIONS

OT 160 3 C/45 CH
Assistive Technology
This course studies the therapeutic adaptation of the environment and/or client functioning through the application of simple to complex technologies. Resources used include textbooks, computers, the Internet, and field trips to gain knowledge of what is state of the art.

OT 220 3 C/45 CH
Therapeutic Media I
Prerequisite: OTA 140
This course prepares a student in selected media such as ADL tasks, cognitive tasks, group techniques, therapeutic use of self, and sensory-motor activities used in occupational therapy to alleviate dysfunction in psychosocial performance components.

OT 222 3 C/45 CH
Level I A Fieldwork
Prerequisite: OTA 140
Classroom preparation and 56 hours of Level I fieldwork, which includes but is not limited to clinical observation and participation in an assigned treatment setting. Students will apply and develop these components in mental health which may include developmental disabilities. Fieldwork is individually assigned.

OT 240 4 C/60 CH
Therapeutic Media II
Prerequisite: OTA 112, OTA 140
This course prepares a student in selected media such as orthotics, adaptive equipment, ADL techniques and neuromuscular techniques used in occupational therapy to alleviate dysfunction in physical performance components. Consideration is given to the holistic view of the client.

OT 245 3 C/45 CH
Level I B Fieldwork
Prerequisite: OTA 140
Classroom preparation and 64 hours of Level I fieldwork, which includes but is not limited to clinical observation and participation in an assigned treatment setting. Students will apply related course content in physical dysfunction which may include pediatric settings. Fieldwork is individually assigned.

OT 260 3 C/45 CH
Therapeutic Media III
Prerequisites: OTA 220, OTA 240
This course identifies environmental, cultural, social and financial and client factors that influence the delivery of occupational therapy services in home and community settings, to individuals and populations. It also discusses public policy, cultural diversity, death and dying, adaptation, and common and disabling conditions that occur in later adulthood through the senescent years.

OT 265 3 C/45 CH
Pediatric OT
Prerequisite: OTA 240
This course will focus on the role of the COTA in pediatric settings as well as Occupational Therapy’s function in the field of pediatrics. Disabling conditions from this age group which are commonly referred to O.T. will be described. Students will develop their knowledge base in childhood conditions and their skills relative to selection of appropriate equipment and activities for this population.

OT 280 3 C/45 CH
OT Seminar
Prerequisite: OTA 220, OTA 240
This course reviews management of occupational therapy services: OTR/COTA collaboration: interviewing; time management, communication; credentialing; research; professional standards and ethics; student supervision; marketing of OT services.

OT 285 6 C/320 CH
Fieldwork Level II A
Prerequisite: Successful completion of all program courses below OTA 285
This is an eight week full-time fieldwork experience. Students will apply the knowledge and skills acquired in the classroom to therapy settings in the community. Students are individually assigned to fieldwork sites, and are required to attend scheduled Saturday seminars.

OTA 295 6 C/320 CH
Fieldwork Level II B
Prerequisite: Successful completion of all program courses below OTA 295
This is an eight week full-time fieldwork experience. Students will apply the knowledge and skills acquired in the classroom to therapy settings in the community. Students are individually assigned to fieldwork sites, and are required to attend scheduled Saturday seminars.

OFFICE INFORMATION SYSTEMS (OIS) (Formerly: Business Information Technology)

OIS 100 3 C/45 CH
Keyboarding
Prerequisite: OIS 102
This course is designed for those students interested in using a full-featured word processing computer program to create a professional looking documents and modifying them easily. Also this course is recommended for OIS 102.

OIS 101 3 C/45 CH
Keyboarding Fundamentals
Recommended: OIS 100
The student will master the microcomputer keyboard using the touch method. The student will type horizontal/vertical documents, memos, tables, postal cards, personal letters, business letters and manuscripts. The student will type from printed script and rough draft copies. When this course is completed, the student will type a minimum of 30 words per minute on straight-copy material with no more than five errors on a five-minute timing. A minimum of three hours of lab per week and a lab fee is required.

OIS 228 3 C/45 CH
Desktop Publishing I
Recommended: OIS 102
This course provides a BASICS step-by-step introduction to Adobe PageMaker 7 software. Everything from creating a publication and working with styles and graphics to working with tables and templates is covered. (Course is 85-90% hands-on).

OIS 231 3 C/45 CH
Desktop Publishing II
Prerequisite: OIS 228
This course will focus on the role of the COTA in pediatric settings as well as Occupational Therapy’s function in the field of pediatrics. Disabling conditions from this age group which are commonly referred to O.T. will be described. Students will develop their knowledge base in childhood conditions and their skills relative to selection of appropriate equipment and activities for this population.

OIS 251 3 C/45 CH
Microsoft Word Specialist
Prerequisite: BUS 225
Recommended: OIS 102
This course is designed for those students interested in using a full-featured word processing computer program to create a professional looking documents and modifying them easily. Also this course is recommended for OIS 102.

C = Credits CH = Contact Hours HL = Hours Lecture HLB = Hours Lab F = Fall Sp = Spring Sm = Summer
OFFICE INFORMATION SYSTEMS (OIS) (Formerly: Business Information Technology) continued

OIS 252 3 C/45 CH  
Microsoft Excel Specialist  
Prerequisite: BUS 225  
Recommended: OIS 102  
This course is designed for those students interested in using a full-featured excel spreadsheet to organize data, complete calculations, make decisions, graph data, develop professional looking reports, publish organized data on the Web and access real-time data from Web sites. Also this course is designed to assist the students preparing to take the Microsoft Office Specialist (MOS) Excel certification for expert level.

OIS 253 3 C/45 CH  
Microsoft PowerPoint Specialist  
Prerequisite: BUS 225  
Recommended: OIS 102  
This course is designed for those students interested in improving their skills to create, present, and collaborate on computer presentations. This class is using Microsoft PowerPoint software, as a visual communication tool, to create remarkable presentations with enhanced multimedia capabilities. Also this course is designed to assist the students preparing to take the Microsoft Office Specialist (MOS) PowerPoint certification for expert level. MOS PowerPoint certification recognizes individuals who have achieved a certain level of mastery with Microsoft PowerPoint product.

OIS 254 3 C/45 CH  
Microsoft Access Specialist  
Prerequisite: BUS 225  
Recommended: OIS 102  
This course is designed for those students who want to improve their skills to create or make use of a robust database solution. This class uses Microsoft Access software, as a powerful database management system, that allows you to organize, access, and share information in databases in a very easy way. Also this course is designed to assist the students preparing to take the Microsoft Office Specialist (MOS) Access certification for standard level. MOS Access certification recognizes individuals who have achieve a certain level of mastery with Microsoft Access product.

PARALEGAL TECHNOLOGY (PLT)

PLT 105 3 C/45 CH  
Legal Interviews & Investigations  
Prerequisite: Program Admission  
This course reviews interviewing techniques and investigation methods from the perspective of the legal assistant. It covers fact gathering from both public and private sources and reporting of data in a form suitable for legal office use.

PLT 120 3 C/45 CH  
Legal Research Writing I  
Prerequisite: Program Admission  
Co-Prerequisites: PLT 105, PLT 135  
This course is an introduction to the American legal system, legal research and writing skills. Students are introduced to printed and online resources available through the law library and the Internet.

PLT 130 3 C/45 CH  
Law Office Procedures and Management  
Prerequisite: Program Admission  
This course will provide students with an understanding of the role of the paralegal in the law office. Students will examine the structure of a law office, time and records management, billing methods, technology and computers, administrative procedures, client relations, office operating procedures, and professionalism in the workplace.

PLT 135 3 C/45 CH  
Professional Responsibility/Legal Ethics  
Prerequisite: Program Admission  
This course examines the various issues of professional responsibility and legal ethics that a paralegal encounters. The course will assist the student in developing an awareness and understanding of the professional codes of ethics that govern the legal profession and the impact those codes have on the daily responsibilities of the paralegal. Topics covered include client interviews and form preparation, as well as substantive and procedural aspects of the process from the paralegal’s perspective.

PLT 140 3 C/45 CH  
Business Organization and Corporation Law I  
Prerequisite: Program Admission  
This course is a survey of the various types of business organizations operating in the United States. The course will assist the student in developing an awareness and understanding of the fundamental legal issues arising from the selection, formation, and implementation of a business entity. Topics covered include an overview of sole proprietorships, partnerships, and other unincorporated entities as well as various types of corporations.

PLT 150 3 C/45 CH  
Legal Composition and Research II  
Prerequisite: Program Admission  
This course is a continuation of Legal Research and Writing I. Students will participate in supervised library based research projects, including a mock legal problem, preparation of a legal memorandum, reports, and draft pleadings.

PLT 160 3 C/45 CH  
General Practice Survey  
Prerequisite: Program Admission  
This course is an introduction to common areas of legal practice undertaken by sole practitioners and small firms. Students will examine civil and criminal litigation, as well as transactional matters.
This course focuses on contemporary styles in stage design and lighting. The course covers the principles of designing the scene, studying equipment for scenes and lighting design, as well as the process of complementing the scene with the play.

**THEA 151** 3 C/45 CH
Introduction to Acting
F, Sp
Prerequisite: HUM 141

This course introduces students to the basic principles and techniques of acting. Emphasis will be placed on body movement, projection into the mind of the character, voice and diction, and breathing. Students will also study script interpretation.

**THEA 152** 3 C/45 CH
Stagecraft and Lighting
Sm
Prerequisite: HUM 141

This course is a study of the theoretical and practical aspects of stage design and lighting. The course covers the principles of designing the scene, studying equipment for scenes and lighting design, as well as the process of complementing the scene with the play.

**PHARMACY TECHNOLOGY**

**PHT 100** 3 C/45 CH
Introduction to Pharmacy Technology
Lab fee
Prerequisite: PHT 100
Corequisite: PHT 105

This course provides an overview of the organization, functions, and services provided by both institutional and community pharmacies. The role of the pharmacist and the pharmacy technician in each of these settings will be studied. Discussion topics include ethical, legal, and professional issues. Emphasis is placed on pharmacy standards and on hospital and organizational (as in the case of health maintenance organizations and community pharmacies) policy and procedures. Introduction to pharmaceutical calculations. Laboratory included.

**PHT 120** 5 C/80 CH
Drug Distribution Systems
Lab fee
Prerequisites: PHT 105, PHT 130
Corequisite: PHT 130

This course provides detailed instruction in the systems, for the distribution of medications including the unit dose, traditional, and ward stock systems used in inpatient facilities, as well as intravenous admixture. It includes discussion of drug storage requirements and an introduction to inventory control, and methods of dispensing prescriptions to ambulatory patients will be addressed. Emphasis will be placed on technician responsibilities in each of these systems. This is a continuation of pharmaceutical calculations. Laboratory included.

**PHT 130** 5 C/80 CH
Pharmaceutical Calc & Drug Prep
Lab fee
Prerequisites: PHT 105, PHT 110
Corequisite: PHT 120

This course applies basic mathematics in the calculations required for determination of proper dosages, conversion operations, as well as in preparation of parenteral solutions for injection (IVs, chemotherapy, etc.). Detailed instruction in the techniques used in dosage preparation (aseptic technique, safe handling of chemotherapy, etc.) will be provided.

**PHT 155** 7 C/240 CH
Pharmacy Technology Practicum
Prerequisites: PHT 120, PHT 130
Corequisite: PHT 210
Supervised practice in an ambulatory and institutional pharmacy.

**PHT 210** 5 C/80 CH
Pharmacy Computer System
Lab fee
Prerequisites: PHT 120, PHT 130
Corequisites: PHT 155

This course is an exploration of computer systems used in the modern pharmacy. Laboratory practice and the uses of the computer for pharmaceutical calculations are included.

**PHILOSOPHY (PHL)**

**PHL 101** 3 C/45 CH
Comparative Religions I
F, Sp, Sm

This course covers the development of traditional religions and it explores world concepts with an emphasis on Judaism, Christianity and Islam.

**PHL 102** 3 C/45 CH
Comparative Religions II
F, Sp
Corequisite: PHL 101

This course focuses on contemporary styles in religions, with an examination of movements, forces and problems shaping the new religious consciousness. An analysis of the structure and relationships of the various movements and their impact on the American scene is provided.

**PHL 201** 3 C/45 CH
Introduction to Philosophy
F, Sp, Sm

This course cover basic problems in philosophy. Readings encompass ethics, politics, science and metaphysics to give students experience in critical thinking to promote objectivity.

Continued on next page.
PHILOSOPHY (PHL) continued

PHL 211 3 C/45 CH
Introduction to Logic  F, Sp, Sm
This is a course designed to impact principles of clear and consistent thinking through the techniques of logic to avoid fallacies and eliminate ambiguous ideas.

PHL 221 3 C/45 CH
Ethics  F, Sp, Sm
This course is a survey of ethical theories which have characterized human beings, with practical applications to current problems in human values.

PHLEBOTOMY (PLB)

PLB 100 3 C/36 CH
Introduction to Phlebotomy  
Study basic phlebotomy concepts such as skin punctures, venipunctures, arterial punctures, and bleeding times. Master specimen collection, preservation of specimens from various sources, and specimen processing. Incorporate a personal concept of professionalism (thirty six CH required for the imbedded lab).

PLB 105 3 C/128 CH
Phlebotomy Practicum  
Build on previously learned skills while continuing to master specimen collection and the preservation of specimens from various sources. Solidify skills in specimen processing while incorporating a personal concept of professionalism (sixteen CH for eight weeks)

PLB 110 3 C/36 CH
Pediatric Phlebotomy  
Become familiar with various pediatric blood collection procedures and equipment. Use hands-on, simulated classroom exercises and observe practices in a clinical setting (thirty six CH required for the imbedded lab).

PHYSICS (PHY)

PHY 101 4 C/90 CH
Physics for Elementary School Teachers  
Lab fee  
Lecture and laboratory course dealing with physics concepts and strategies for teaching these concepts in elementary [K-8] schools. Current State of Michigan physics teaching objectives and associated learning activities will be emphasized. Using such community resources as the Detroit Science Center, playgrounds, and amusement parks to teach physics will be emphasized. In addition, opportunities are provided for WCCCD students to teach physics to a small group of children (under teacher supervision) in local elementary schools.

PHY 115 4 C/90 CH
Fundamentals of Physics  
Lab fee  
This course covers fundamental principles, theories and problems of physics, and should be taken by students who have not had a course in high school physics, those with an inadequate background for PHY 235 and by those students whose curriculum requires four credit hours of physics. (Meets for six hours - four hour lecture, two hours lab)

PHY 235 4 C/60 CH
General Physics I  
Lab fee  
Prerequisite: PHY 115  
This non-calculus based physics course and it is designed partially to fulfill the physics requirement in PHY 235 and PHY 245. This course is a continuation of PHY 235. Topics include electricity, magnetism, light and atomic physics. (Meets for six hours - four hour lecture, two hours lab)

PHY 265 4 C/90 CH
Physics for Scientists & Engineers I  
Lab for  
Prerequisite: MAT 171  
This course is a general calculus based course designed to meet the requirements of engineering students and scientists. Topics include, mechanics, wave motion and thermodynamics. (Meets for six hours - four hours lecture, two hours lab)

PHY 275 4 C/90 CH
Physics for Scientists and Engineers II  
Lab for  
Prerequisites: PHY 265, MAT 172 or concurrent enrollment in MAT 172  
This course is a continuation of PHY 265. Topics include electricity, magnetism, physical and geometrical optics and elementary quantum mechanics. (Meets for six hours - four hours lecture, two hours lab)

PHYSICAL SCIENCE (PSC)

PSC 110 4 C/60 CH
Physical Science-Physics, Chemistry and Geology  
A course for non-science majors covering topics in chemistry, physics and environmental science to develop an understanding of how science, technology and society influence each other, and how to use this knowledge in every day decision-making.

POLITICAL SCIENCE (PS)

PS 101 3 C/45 CH
American Government  
E, Sp, Sm  
This course is an examination of America’s democracy, its principles, processes and political institutions. Emphasis is placed on the functioning of the national government and the making of public policy.

PS 104 3 C/45 CH
Introduction to Political Science  
F, Sp, Sm  
This is an introduction to Political Science and it describes the nature of political science, explains the ways in which political scientists study politics and offers introductory treatment of all major topics normally thought of as constituting political science. This course emphasizes a comparative approach to political systems and institutions. The U.S. role as an actor in a global setting will be emphasized.

PS 160 3 C/45 CH
International Politics  
Prerequisite: PS 101  
This course covers the dynamics of the basic factors motivating the behavior of nations and an analysis of the major areas of global political concern.

PS 235 3 C/45 CH
State and Local Government  
Sp  
Prerequisite: PS 101  
This course is a survey of state and local government, including structure, institutions and processes. The course stresses intergovernmental relations.

PS 275 3 C/45 CH
Public Administration Internship  
Sm  
Prerequisite: PS 101  
A course designed to give students the opportunity to experience the activities of an agency or institution related to government and public administration. Internships are available in a U.S. representative’s office, political party offices assisting a candidate for public office, a nonpartisan community office, or an interest group office.

PRINT TECHNOLOGY (PRN)

PRN 101 3 C/45 CH
Introduction to Print Technology  
This course offers students an opportunity to refine their skills with the process of offset lithography. Projects provide opportunities to apply their skill and to understand image concept and design, image assembly, film conversion, plate making, duplicator, presswork and bindery operations.
PROJECT MANAGEMENT (PRM)

PRM 101 3 C/45 CH
Introduction to
Prerequisite: PRM101
An overview of project management covering the history, practices and tools common to project management will be covered. Students will learn the basics of project management using Project Management Institute’s approach. This course satisfies the education requirement for project management professional certification. It is not a PMP test preparation course.

PRM 105 3 C/45 CH
Project Management Tools
Prerequisites: PRM 101
An overview of project management tools will be provided. Students will learn Microsoft Project to develop project schedules, assign resources, and learn the features and functions of the software including enterprise (web) functionality.

PRM 210 3 C/45 CH
Intermediate Project Management
This course will provide in depth coverage of the knowledge areas of project management and integration with other project management models and business practice. The role of the project manager will be explored in relation to day to day management of a project.

PRM 220 3 C/45 CH
Advanced Project Management
Prerequisite: PRM 105 or PRM 215
Students will be able to develop a clear project management schedule including communication plan, issue and risk management plan, resource management using project management principles and methods.

PRM 215 3 C/45 CH
IT Project Management
IT projects have unique requirements. This course will cover the different methods of IT project management including waterfall, phase gate, spiral planning and management. Students will understand the key issues and risks in IT projects including requirements gathering, test methods and the need to balance product requirements with project timing.

PSYCHOLOGY (PSY)

PSY 101 3 C/45 CH
Introductory Psychology
Prerequisite: PSY 101
This is an introduction to the study of human behavior and mental processes, concepts, theories and principles of scientific psychology.

PSY 202 3 C/45 CH
Human Sexuality
Prerequisite: PSY 101
This course focuses on the physiological, psychological, personal and interpersonal aspects of human sexual behavior. It examines changing sex roles and patterns, personal beliefs and value systems.

PSY 200 3 C/45 CH
Lifespan Development
This course reviews human development throughout the life span (infants, children, adolescents, adults, and older adults) with emphasis on the cognitive, psychosocial, sensorimotor, and multicultural components. It includes age appropriate roles and life tasks.

PSY 220 3 C/45 CH
Child Growth and Development
Prerequisite: PSY 101
This course covers the developmental sequence from conception to adolescence, with specific emphasis on the normal child. Examines psychological, social and biological factors that influence the developing child. Students will not receive credit for both PSY 220 and 225.

PSY 225 5 C/75 CH
Child Growth and Development Practicum
Prerequisite: PSY 101
This practicum will include supervised experiences working with children (this course also includes lecture material from PSY 220). Child care centers, day care nurseries, psychology clinics for children and Children’s Hospital are the various settings where students will have opportunities to utilize practical methodology as well as develop new techniques in child growth and development training. Students will not receive credit for both PSY 220 and 225.

PSY 230 3 C/45 CH
Psychology of Adjustment
Prerequisite: PSY 101
This course covers the evaluation of human effectiveness, psychopathology, the healthy personality and systematic research on problems of adjustment. Students will not receive credit for both PSY 230 and 235.

PSY 270 3 C/45 CH
Intimate Relationships
Prerequisite: PSY 101
This course covers the impact of intimate relationships on our emotional and social well being. It examines ways intimate relationships are formed, maintained and ended. Gender is a central organizing construct.

RECREATIONAL LEADERSHIP (RL)

RL 110 3 C/45 CH
Recreational Leadership Techniques
Prerequisite: PSY 101
This course covers the theories, principles and practice of planning, organizing, and conducting effective recreational programs for various groups, with emphasis on group involvement.
RENEWABLE ENERGY TECHNOLOGY (RET)

RET 100 4 C/60 CH
Renewable Energy/Alternative Energy Principles
This course will cover basic principles and history of alternative energy sources, industry and government status of geothermal, wind, solar, biomass, fuel cells and other energy sources will be highlighted. Alternative and traditional energies will be defined and compared in terms of today’s use. The evolving energy career areas will be discussed.

RET 120 3 C/45 CH
Conventional Energy Sources & Application
The focus of this course will be on the history of traditional energy sources and reason why government, business, and industry are turning to alternative and renewable energy sources. Topic include how to reduce fossil fuel usage and how to convert from traditional energy sources to alternative and renewable energy sources.

RET 140 3 C/45 CH
Energy and Electricity
In this course, students will learn the fundamentals of energy and electricity and how they are utilized in renewable energy sources. Students will examine the power generation process, transmission techniques, and networks. Topics to be explored during this course include: prime energy sources, metering electricity, and disbursement of energy and electricity.

RET 142 3 C/45 CH
Wind Power
In this course, students will analyze the historical concepts, modern applications, and future utilization of wind power. The usages of small, medium, and large wind turbines in urban, rural and industrial settings will be examined. Students will gain general knowledge on the economic and environmental issues associated with wind energy sources and they will also become familiar with site assessments for project planning.

SUSTAINABLE ENVIRONMENTAL DESIGN (SED)

SED 100 3 C/45 CH
Principles of Sustainable Environmental Design
This course will provide a broad-based introduction to sustainability that is applicable to all majors. This course examines the historical context and advancement of sustainability as a concept in society. The ethical and scientific basis for sustainable design in the built environment will be examined. Topics to be explored include: Renewable Energy, Sustainable Building and Site Design and the development of Sustainable Communities. Students will analyze how these technologies are utilized in rural, urban and industrial settings. They will also gain general knowledge on how to shape the consumer culture in applying more sustainable practices in design.

SED 120 3 C/45 CH
Residential & Commercial Design
This course will explore the holistic theory of sustainable design practices in residential and commercial dwellings. Students will assess the ecological advantages of producing sustainably designed and high efficiency buildings. During this course students will be introduced to green practices as well as LEED rating systems.

SED 140 3 C/45 CH
Sustainable Materials
This course will discuss the historical concepts of traditional building and how is has been affected by the environment. Students will become familiar with renewable materials and they will also learn how to maximize the efficient use of natural resources. This course will also assess the sustainable design principles as it relates to the salvaging of existing structural materials. Students will analyze the environmental impacts associated with utilizing renewable and recycled materials.

SED 142 3 C/45 CH
Sustainable Sites
In this course, students will gain knowledge on how to properly evaluate project sites that will minimize the harmful effects on the environment. Students will learn the skills necessary to redevelop damaged and Brownfield sites. During this course, students will survey storm water retention, water irrigation and the use of passive solar. They will also analyze the methods utilized to reduce pollution and reduce the disturbance and heat island effects on ecosystems.

SED 144 3 C/45 CH
Ecologically Aware Interiors
This course will explore the basic principles of energy consumption, indoor air quality and contentment in the home. Students will assess the need for comfort and accommodations as well as the physics of heat transfer and loss calculations. Students will also assess bioclimatic design, passive solar design, natural cooling and day lighting as it relates to an ecologically aware interior.

SED 146 3 C/45 CH
Sustainable Project Management
In this course, students will assess the basic principles of management, administration and planning of sustainable design projects. Students will analyze the basic concepts of sustainable development and ethical issues related to construction and management of projects. During this course, students will also examine sustainability characteristics and environmental safety throughout the duration of a project. The concept of strategic planning in the construction sector for sustainable development and the fundamentals of quality control and environmental management systems will also be explored throughout the course.

SED 148 3 C/45 CH
Sustainable Systems
This course will assess concepts that are utilized in sustainable design to design, construct and retrofit commercial and residential buildings. During this course, the following topics will be explored: electricity, water systems, HVAC systems and connective systems for monitoring commercial and residential energy use.

SED 160 3 C/45 CH
Sustainable Community Principles
The course will cover the principles of sustainable community design as well as the historical and political aspects of land use, urban design, regulation and investments. Topics that will be explored during this course include: economical housing, economic development, urban renewal, land usage, water technology and transportation sustainability.

SED 200 3 C/45 CH
LEED Certification Exam Preparation
This course will prepare students for the LEED-NC Professional Certification Exam. Students will reexamine sustainable design principles and concepts as well as the green building industry. During this course, students will analyze all of the components of the LEED–NC rating system and they will be required to review case studies and complete a practice exam.

Continued on next page.
## SUSTAINABLE ENVIRONMENTAL DESIGN (SED) continued

SED 220 6 C/120 CH Sustainable Environmental Design Capstone Sp
Prerequisites: All courses in certificate
This is a special course designed by the student and guided by the instructor to start the development of a sustainable capstone project. Students will work together in interdisciplinary teams to develop and build a project based upon the knowledge that they have obtained throughout the program.

## SOCIAL WORK (SW)

### SW 101 5 C/105 CH
Introduction to FLD Practice of SW/PRACTicum
Prerequisites: HIS 105, SOC 100, MAT 113
Students will explore the history of social work, employment, qualifications and opportunities, employment tasks and methods of working with a diverse population. Three shadowing practica are included in this course to expand the students' knowledge of various employment opportunities.

### SW 201 3 C/45 CH
Substance Abuse Service and Policy
Prerequisites: SW 101, SW 102
This course examines drug and alcohol abuse, its effects on social functioning with a special emphasis on vulnerable population groups, and the nature and effectiveness of substance abuse services. Students will also investigate case studies and recent literature, compare and contrast service using social work principles and examine the roles of agency personnel (paraprofessional/professional). The legislative response to substance use and abuse will also be addressed.

### SW 200 3 C/45 CH
Substance Abuse and Recovery
Prerequisite: SW 101
In this course students will examine the development of drug abuse from a variety of perspectives (i.e., behavioral, pharmacological, historical, social, legal and clinical) with a focus on women and addiction.

### SW Field Work I: Community Placement and Seminar
This course follows an established model of critical inquiry based on an inter-disciplinary study of American culture and national identity. Through a wide range of approaches, students will explore how the American experience and identity are produced by language, representations and the construction of cultural discourse. This course provides a critical understanding of how social identities of race, class, gender and nationalism function to define the evolving state of the American condition.

## SOCIOLOGY (SOC)

### SOC 100 3 C/45 CH
Introduction to Sociology
Prerequisite: SOC 100
In this course students will examine basic sociological concepts such as theories of social organization research, methods of research, culture, society and social groups, the socialization process, social class and social mobility, race and ethnic relations. Social institutions such as education, family, religion and government will also be discussed.

### SOC 102 3 C/45 CH
Exploring Human Behavior in the Environment
Prerequisite: SW 101
This course introduces students to the notion that individuals are a function of their interaction with the bio-psycho-social contexts. Students will explore theory and knowledge of human psychosocial development, behavior, and functioning, from infancy through death within a framework of culture, ethnicity, social class, race, gender, and sexual orientation. The interplay between and among micro, mezzo, and macro systems of individuals, groups, families, and communities as they influence human growth and development will be explored. Special emphasis on understanding the impact of poverty, oppression, discrimination, exploitation, and violence.

### SOC 104 3 C/45 CH
American Studies
Prerequisite: SOC 100
This course introduces students to the notion that individuals are a function of their interaction with the bio-psycho-social contexts. Students will explore theory and knowledge of human psychosocial development, behavior, and functioning, from infancy through death within a framework of culture, ethnicity, social class, race, gender, and sexual orientation. The interplay between and among micro, mezzo, and macro systems of individuals, groups, families, and communities as they influence human growth and development will be explored. Special emphasis on understanding the impact of poverty, oppression, discrimination, exploitation, and violence.

Courses of instruction that students receive in this area are essential to the acquisition of the knowledge and skills needed for the competent practice in human service settings. 185 Contact Hours in field placement

### SW 130 3 C/45 CH
Customer Service, Documentation and Interviewing for the Social Work Technician
Prerequisites: SW 101, SW 102
This course must be completed before field placement. Students will demonstrate effective use of telephone communication by preparing for telephone calls, developing listening skills, practicing protocols and background environment. Students will learn basic casework skills and strategies for interviewing clients in various situations.

### SW 200 3 C/45 CH
Death and Dying
Prerequisite: SOC 100
This course is a survey and analysis of concepts, theories and contemporary issues related to death and dying. Among the areas to be studied are bereavement, grief, suicide and funeral service practices.

### SW 225 3 C/45 CH
Sociology of Work
Prerequisite: SW 101
This course is a study of current social issues including crime, poverty, domestic abuse, drug addiction, environment, urbanization, racism, sexism, family issues and unemployment. This course provides an overview of the origins, existing policies and proposed solutions to social problems. Course content includes both theory and practice.

### SW 226 4 C/60 CH
Field Work II: Community Placement and Seminar
This course is a study of current social issues including crime, poverty, domestic abuse, drug addiction, environment, urbanization, racism, sexism, family issues and unemployment. This course provides an overview of the origins, existing policies and proposed solutions to social problems. Course content includes both theory and practice.
SOCIOLOGY (SOC) continued

SOC 230 3 C/45 CH
Ethnic Minorities Sp, Sm
Prerequisite: One course in ANT or SOC, Early Childhood students do not need a Prerequisite.
This course covers the contributions of ethnic minorities which give our society a unique cultural diversity. Local ethnic differences and problems and multiethnic cooperation is viewed through sociological, anthropological, historical perspectives.

SOC 245 3 C/45 CH
Marriage and Family F, Sp, Sm
Prerequisite: SOC 100
In this course the family is studied cross culturally with emphasis on the contemporary American Family. Topics include gender role socialization, mate selection, alternatives to marriage, the multi-ethnic family and intergenerational issues.

SOC 250 3 C/45 CH
Juvenile Delinquency F
Prerequisite: SOC 100
In this course students will examine the problem of juvenile delinquency as it exists in the United States. An analysis of the various forms of delinquency will be highlighted. There will be an overview of the societal implications of juvenile delinquency ranging from the individual, the family and the community. Juvenile delinquency will be evaluated from a macro perspective by examining the role of schools, court systems, and legal implications with an overview of prevention initiatives and rehabilitation programs.

SPANISH (SPA)

SPA 101 4 C/60 CH
Elementary Spanish I F, Sp, Sm
This course covers grammatical constructions, vocabulary, basic idioms, basic phonetics and oral drill.

SPA 102 4 C/60 CH
Elementary Spanish II F, Sp, Sm
Prerequisite: SPA 101
This course covers completion of fundamental constructions, vocabulary, emphasis on spoken language. Further training in reading, writing, Spanish conversation and the use of idiomatic constructions.

SPA 201 4 C/60 CH
Intermediate Spanish I F, Sp
Prerequisite: SPA 102
This course covers a review of essential grammatical principles and further development of reading skills and idiomatic usage.

SPA 202 4 C/60 CH
Intermediate Spanish II Sp, Sm
Prerequisite: SPA 201
Reading on more advanced levels. Continued emphasis on writing and spoken Spanish.

SPEECH (SPH)

SPH 100 3 C/45 CH
Interpersonal Communication F
In this course there will be the study of the application of the basic skills necessary for interpersonal communication with emphasis on group discussion.

SPH 101 3 C/45 CH
Fundamentals of Speech F, Sp, Sm
In this course there will be the study and application of basic principles underlying effective oral communication with emphasis on public speaking.

SPH 105 3 C/45 CH
Improving the Speaking Voice F, Sp
Prerequisite: SPH 101
This course covers the study of the underlying principles and practices pertinent to the development of appropriate vocal and articulatory skills: breath control, voice production, vocal resonance and inflection.

SPH 131 3 C/45 CH
Introduction to Radio, TV & Mass Communication Sp
Prerequisite: SPA 101
This course is the study of growth and development of radio, television and other forms of mass communication.

SPH 201 3 C/45 CH
Advanced Public Speaking F
Prerequisite: SPH 101
This course covers an advanced study, preparation and delivery of informative and persuasive speeches.

SURGICAL FIRST ASSISTANT (SFA)

SFA 200 3 C/45 CH
Fundamentals of Surgical First Assisting-Lecture
Prerequisite: Admission to Surgical First Assistant Program
This course is designed for Certified Surgical Technologists who intend to develop their competencies in the fundamentals of the theory and practice of a First Surgical Assistant. The course teaches the responsibilities of a First Surgical Assistant on how to use peri-operative monitoring equipment, conduct diagnostic tests, and execute surgical procedures.

SFA 210 3 C/45 CH
Advance Surgical Pharmacology - Lecture
Prerequisite: Admission to the Surgical First Assistant Program
This course is a continuation of Surgical Pharmacology (SUR 140) and teaches what medications the surgical first assistant will most frequently use in surgical and anesthetic procedures.

SFA 220 3 C/45 CH
Surgical Management of Patients – Lecture
Prerequisites: BIO 252, SFA 200, SFA 210
This is an introductory course on the theory and practice of caring for the surgical patient by the surgical first assistant during the pre-operative, intra-operative, and post-operative phases of a surgery. The student will also learn the role of the first assistant during the pathological and physiological processes and when the first assistant must apply intervention techniques.

SFA 230 3 C/45 CH
Surgical First Assistant Techniques – Lab
Prerequisites: BIO 252, SFA 200, SFA 210
SFA 230 is intended for certified surgical technologists, OR nurses, and certified surgical first assistants so that they can develop their competencies in the fundamentals of the surgical skills and surgical techniques of a first surgical assistant.

This course focuses on the surgical first assistant’s moral and legal responsibility for performing manipulative clinical procedures, whether for diagnosis, monitoring, or treatment, and includes the theoretical knowledge and practical techniques necessary to assist the surgeon before, during, and after surgery in the use of equipment, hemostasis, instruments, material and suturing.

SFA 235 8 C/360 CH
Clinical Preceptorship – Clinical
Prerequisites: BIO 252, SFA 200, SFA 210, SFA 220, SFA 230, SFA 253
This course is a clinical practice of basic surgical skills for surgical first assistant students. A student enrolled in the course is assignment to a qualified preceptor—a surgeon who provides direct supervision and guidance during each rotation. Each student in the course is required to complete a specified number of cases—115 to 135 cases (approximately 300 hours) with 100 percent skill competency. Continued on next page.
SURGICAL FIRST ASSISTANT (SFA) continued

SUR 100 3 C/45 CH
Orientation to Surgical Technology - Lecture
This is an introductory course to the career world of surgical technology and peri-operative environment. The role and responsibilities of the circulating and scrub technologists, as well as other surgical team members, are explored. Also studied are work strategies for success as a surgical technologist including managing pressure, time management, and achieving personal excellence.

SUR 101 3 C/45 CH
Central Service Technician - Lecture
Prerequisites: Admission to Central Service Tech Program
This course provides the fundamentals of central processing, sorting, and distribution (CSD). Instruction and practice is given in aseptic technique, patient centered practices and theories, customer service, and overall policies and practices of central service supply departments. Students who complete this program are eligible to take the American Society for Healthcare Central Service Personnel (ASHCSP) National Certifying Examination.

SUR 110 3 C/45 CH
Surgical Technology Principles – Lecture
Prerequisites: Admission to the Surgical Technology Program, ENG 119, ENG 120, BIO 240, BIO 250, BIO 295, PSI 101, ALH 110
This course provides the fundamentals of surgical concepts and techniques. The course covers methods of sterilization, disinfection, surgical instrumentation, equipment, supplies, wound closure and management, and preparation of the patient for surgical intervention. The perioperative care of the patient is emphasized.

SUR 120 4 C/60 CH
Surgical Specialties & Techniques I – Lecture
Prerequisites: Admission to the Surgical Technology Program, ENG 119, ENG 120, BIO 240, BIO 250, BIO 295, PSI 101, ALH 110
This course is designed to focus on the perioperative care of the surgical patients during endoscopic, general, obstetric and gynecologic, genitourinary, ophthalmic, orthopedic, ENT, and peripheral vascular procedures. Students will become familiar with the diagnostic, procedural considerations, operative procedures and instrumentation for the specialties. Concentration will also be given to OR principles related to physics, surgical robotics, and sterility.

SUR 125 4 C/40 CH
Surgical Technology Clinical I – Lab
Prerequisites: Admission to the Surgical Technology Program, ENG 119, ENG 120, BIO 240, BIO 250, BIO 295, PSI 101, ALH 110
This course gives an introduction to the activities and procedures performed by the scrub and circulating surgical technologists. Students are guided in activities that will assist them in performing as a member of the surgical team. Patient care, selection of the proper items, practice, and maintaining aseptic technique are emphasized. Students will practice techniques in lab sessions. The last five weeks, tour of various facilities is required. Students are responsible for their own transportation.

SUR 130 4 C/60 CH
Surgical Specialties & Techniques II – Lecture
Prerequisites: Program, ENG 119, ENG 120, BIO 240, BIO 250, BIO 295, PSI 101, ALH 110, SUR 110, SUR 120, SUR 125
A continuation of surgical specialties and techniques, this course is designed to focus on the perioperative care of surgical patients during cardiac, endoscopic, geriatric, oral, pediatric, plastic and reconstruction, thoracic and neurosurgery specialties. Students will become familiar with the diagnostic, procedural considerations, operative procedures, and instrumentation for the specialties.

SUR 140 3 C/45 CH
Surgical Pharmacology Lecture
Prerequisites: Program, ENG 119, ENG 120, BIO 240, BIO 250, BIO 295, PSI 101, ALH 110, SUR 110, SUR 120, SUR 125
This course gives an introduction to medications used in the operating room. It emphasizes classification, administration, forms, methods, interactions, and desired effects of peri-operative medications. Surgical technologists’ legal responsibilities are also covered.

SUR 145 4 C/240 CH
Surgical Technology Clinical II – Clinical
Prerequisites: Program, ENG 119, ENG 120, BIO 240, BIO 250, BIO 295, PSI 101, ALH 110, SUR 110, SUR 120, SUR 125
This supervised clinical course is a continuation of SUR 125. Students perform in the role of scrub person, second assistant, and assistant to the circulating person on various surgical procedures. This clinical meets two days per week, and students are responsible for their own transportation to their assigned clinic.

SUR 155 6 C/360 CH
Surgical Technology Clinical III – Clinical
Prerequisites: Program, ENG 119, ENG 120, BIO 240, BIO 250, BIO 295, PSI 101, ALH 110, SUR 110, SUR 120, SUR 125, SUR 130, SUR 140, SUR 145
Further develops clinical skills of students to anticipate the surgeon’s needs during the schemes of various surgical procedures. Students practice their role responsibilities as a scrub person, second assistant, and assistant to the circulating person on various surgical procedures. The clinical assignment meets three days a week. Students are responsible for their own transportation to their clinical assignments.

SUR 160 4 C/60 CH
Surgical Seminar and Certification Preparatory – Lecture
Prerequisites: ENG 119, ENG 120, BIO 240, BIO 250, BIO 295, PSI 101, ALH 110, SUR 110, SUR 120, SUR 125, SUR 130, SUR 140, SUR 145
This course includes student presentations and discussions as well as an overview of Surgical Technology in preparation for the National Certifying Examination. It also uses techniques and exercises in successful writing standardize test. Students will take the practice LCC-ST CST Self-Assessment Exam during the fourth week of class.
TEACHER EDUCATION (ED)

ED 110 3 C/45 CH
Introduction to Education I
Prerequisite: Admission to Teacher Education Program
This course provides a foundation for teaching in public and private elementary schools (K-8). Topics and issues are addressed which provide understandings of school organization and role of schools in society; duties, responsibilities, and expectations of teachers; working with parents and community members; fiscal considerations; and of diversity/equity issues.

ED 111 3 C/45 CH
Introduction to Education II
Prerequisite: ED 110
This course is a continuation of ED 110. The major focus is on school curricula and instruction (teaching methods). Student participation in four school-based assignments (field experiences) forms an integral part of the course. Opportunities are also provided for students to gain understandings of Michigan performance objectives/benchmarks and local students to gain understandings of Michigan of the course. Opportunities are also provided for student participation in four school-based assignments (field experiences) forms an integral part of the course. Responsibilities, and expectations of teachers; working with parents and community members; fiscal considerations; and of diversity/equity issues.

ED 202 4 C/60 CH
Earth Science for the Elementary Teacher and Practicum
Prerequisite: ED 110
This is a lecture and practicum course dealing with earth science concepts and teaching methodology. Nationally used elementary science curricula will acquaint the student with techniques of teaching basic earth science concepts. Emphasis is on the pedagogical approaches widely used in elementary classrooms.

TELECOMMUNICATIONS (TCM)

TCM 200 3 C/45 CH
Intro to Telecommunications F, Sp
Prerequisite: EE 101 or CIS 112
History of voice data communications, basic services/systems, regulatory agencies and laws, opportunities and overview of technical tasks. Also, introduction to networking concepts, installation of networking software and their maintenance will be covered. Various types of networks will be implemented in the lab. Emphasis on mastering technical terminology.

TCM 202 3 C/60 CH
Fiber Optics Communications Sp
Lab fee
Prerequisite: EE 111 or TCM 200
This course covers the properties and practical applications of fiber optics in telecommunication circuits. Fiber cables, fabrication techniques, modulation schemes, system design, installation and testing and introduction to laser will be covered.

TCM 203 3 C/60 CH
Communications I F
Lab fee
Prerequisite: EE 111
A study of the fundamental concepts of communications systems and techniques. Topics covered include amplitude, frequency, phase and pulse modulation concepts, two way systems, basic TV systems and noise and information theory. Introduction to the circuitry of the A-M and F-M superheterodyne receiver, with emphasis on amplifier coupling, AM and FM detectors and similarities and differences between the AM and FM systems.

TCM 206 4 C/75 CH
Basic Switching and Signaling Techniques
Lab fee
Prerequisite: TCM 200, EE 111
This course includes types and function of modern telephone switching techniques, computer and peripherals systems, network design and trucking signaling, protocols and formats, loop and ground signaling.

TCM 211 3 C/60 CH
Communications II Sp
Prerequisite: TCM 203
Study of digital communication principles including digital transmission and digital radio. Wave guides and satellites communications, PCM, DPCM, ASK, PSK will be covered.

VETERINARY TECHNOLOGY (VTP)

VTP 103 2 C/30 CH
Laboratory Animal Medicine – Lecture
This course is an initial learning experience which stresses medical terminology, basic humane animal handling, animal husbandry and supportive care with emphasis on common laboratory animal species.

VTP 104 2 C/60 CH
Laboratory Animal Medicine – Lab
For VTP 103.

VTP 105 2 C/30 CH
Small Animal Technology I: Lecture
Prerequisites: VTP 103, VTP 104
This course is an overview of large animal anatomy and physiology, handling, nursing care, husbandry, pharmacology, clinical pathology, surgery, and diagnostic imaging.

VTP 106 2 C/60 CH
Small Animal Technology I: Lab
Prerequisites: VTP 103, VTP 104
Corequisite: VTP 105
This course is an overview of large animal anatomy and physiology, handling, nursing care, husbandry, pharmacology, clinical pathology, surgery, and diagnostic imaging.
VETERINARY TECHNOLOGY (VTP) continued

VTP 210  2 C/150 CH
Large Animal Medicine Lab
Prerequisites: VTP 201, VTP 202
Corequisite: VTP 209
Laboratory sessions include handling restraint and techniques associated with horses, cattle, sheep, goats and swine. Sessions are held at various large animal facilities.

VTP 211  3 C/45 CH
Regulatory Veterinary Medicine
Prerequisites: VTP 201, VTP 202
Corequisite: VTP 212
This is an interactive course which discusses conditions that determine the fitness of animal products for human consumption and zoonotic implications.

VTP 212  3 C/45 CH
Issues in Veterinary Technology
Prerequisites: VTP 201, VTP 202
Corequisite: VTP 211
This seminar course is presented by various specialists in the veterinary field.

VTP 233  4 C/120 CH
Veterinary Tech Practicum II
Prerequisite: VTP 123
Corequisite: VTP 202
This practicum is for students enrolled in the VTP involving mastery of clinical pathology techniques used in veterinary medicine.

VTP 243  2 C/30 CH
Veterinary Tech Practicum III
Prerequisite: VTP 233
This practicum in a veterinary hospital and/or biomedical setting is for the mastery of advanced technical skills. Must have the director’s approval of site required.

VIDEKO GAME DESIGN & ANIMATION (VGD)

VGD 268  3 C/45 CH
Computer Games Foundations
This course is designed as a first course for computer Game Design and Development Concentrations which will introduce the vocabulary and concepts of game development. This course is a very comprehensive overview electronic game development process and underlines the historical context, content creation strategies, and future trends in the industry. The student will learn how games are produced, tested and released. The game industry is the fastest growing segment of the entertainment market and an excellent field for career advancement.

VGD 269  4 C/60 CH
Introduction to 3D
Prerequisites: CIS110, CIS 266
Students will learn fundamental and beginner knowledge that is essential for further exploration of 3D graphics. Also they will learn methods and techniques involved with the designing and construction of 3D related objects that are suited for games, movies, and or TV broadcast. After completing this course, students will have a basic knowledge of a high-end, industrial strength 3D graphics package.

Prerequisites: CIS110, CIS 266
Students should be able to begin developing their own 3D content using the tools and techniques and their own creativity. This course will cover topics such as 3D concepts and terminology, 3D modeling techniques, UV mapping, texturing, lighting, rendering, animation and rigging.

WELDING (WLT)

WLT 101  4 C/75 CH
Welding and Fabrication I
F, Sp, Sm
Lab fee
This course covers the use of oxyacetylene and shielded metal arc welding equipment to perform various welding operations. It includes the use of filler rods for oxyacetylene. Brazing and silver soldering are included.

WLT 102  4 C/75 CH
Welding and Fabrication II
F, Sp
Lab fee
Prerequisite: WLT 101
This course provides advanced instruction in shielded metal arc welding, including related theories, codes and standards. The emphasis is on out of position welded joints and procedures for cutting and beveling.

WLT 103  4 C/75 CH
Welding and Fabrication III
Sp
Lab fee
Prerequisite: WLT 102
This course covers instruction in tungsten-inert-gas, shielded metal arc welding with manually operated torch on various metals, including technical theory directly related to TIG welding.

WLT 208  4 C/60 CH
Pipe Welding
Sp
Lab fee
Prerequisite: WLT 103
This course covers the advanced processes utilized in the modern industry. Pipe joint welding in accordance with American Welding Society codes and specifications, including processed metallic inert gas, tungsten inert gas, shielded metal arc and soldering.

Continued on next page.
WELDING (WLT) continued

WLT 210 4 C/75 CH Certificate Welding Practices 5p
Lab fee
Prerequisite: WLT 208
This course covers advanced theory and hands-on application of skills necessary to pass American Welding Society procedures. Practice and theory in shielded metal arc, tungsten inert, metallic inert gas welding in piping, tubing and plate in common alloy metals.

WATER AND ENVIRONMENTAL TECHNOLOGY (WET)

WET 101 3 C/45 CH Water Treatment Technologies
This course will cover the conventional water treatment processes. Topics to be explored will include: preliminary treatment, coagulation and flocculation, sedimentation and clarification, filtration, and disinfection.

WET 102 3 C/45 CH Waste Water Treatment Technologies
This course will provide an introduction to the cause of water pollution, the reason for treating polluted waters and the fundamentals of Wastewater treatment. Students will study the basic principles of treatment plant operation and the processes commonly used in pollution control facilities.

WET 210 3 C/45 CH Advanced Waste Water Treatment Technologies
Discusses wastewater treatment technologies beyond conventional processes. Includes the processes and techniques commonly used for advanced wastewater treatment, disinfection, solids stabilization and disposal, nutrient reduction and toxics removal. Includes field tours and discussion of safety and health, sampling procedures, record keeping, data preparation and report writing, and analytical procedures used to determine optimal plant operation and compliance with regulatory requirement.

WET 212 3 C/45 CH Advance Water Treatment
Considers drinking water treatment technologies beyond conventional processes. Includes softening, ion exchange, activated carbon absorption, aeration, air stripping, and membrane processes. Includes participation in field tours and discussions on safety and health, sampling procedures, record keeping, data preparation, report writing and the analytical procedures used to determine and measure drinking water quality.

WET 215 3 C/45 CH Water Quality Analysis and WET Instrumentation
Investigates conventional water and wastewater laboratory test procedures, with particular emphasis on those analytical techniques that require an understanding and practical use of laboratory instrumentation. Water Quality Lab tests include BOD, TSS, temperature, DO, pH, conductivity, TDS, total and volatile solids, alkalinity, TRC, and others common to the daily operation of both drinking water and wastewater plants; includes discussions of basic stream ecology and applied environmental science principles. Instrumentation Lab includes the use of pH, millivolt and specific ion meters and probes and an introduction to Spectrophotometry, atomic absorption (AA), and gas chromatography/mass spectrometry (GC/MS). Includes field tours of municipal water, wastewater treatment facility labs and related field study discussions.

WET 220 3 C/45 CH Water Quality Analysis & Microbiology
Investigates more advanced water quality analytical techniques and the microbiology of water, including microscopic examination and identification of microorganisms commonly found in water supplies, water and wastewater treatment processes and polluted bodies of water. Water Quality Analysis lab work involves more advanced analytical procedures to determine nutrients, heavy metals and toxic materials. Focuses on lab health and safety, proper lab technique, representative sampling procedures, record keeping, data preparation and handling and report writing. Continues field studies and analysis using Atomic Absorption and/or Gas Chromatography/Mass Spectrometer instruments. Includes lab work involving organisms commonly found in water and wastewater samples with specific bacteriological analytical techniques.

WET 224 2 C/30 CH Water/Wastewater Utility Equipment Maintenance
Provides the student with basic knowledge of mechanical equipment and repair techniques used in both water and wastewater facilities. Uses shop drawings and blueprints during disassembly and reassembly of a variety of mechanical devices. Studies pumps, valves, piping systems, and chlorination equipment.

WET 265 3 C/45 CH Practicum in Water/Wastewater Treatment
Must be taken during final semester with permission of program director. Provides opportunities to perform technical procedures through structured field experience in water and wastewater treatment plants. Emphasizes gaining experience under plant managers and operating personnel with goal of developing organizational skills and responsibility necessary for entry-level employment. Uses rotation through assigned areas of experience in water treatment.

TITLE VI OF THE CIVIL RIGHTS ACT OF 1964

Section 100.3 of the Department of Education’s Regulation (34 CFR) effectuating Title VI of the Civil Rights Act of 1964 requires that no person in the United States shall, on the ground of race, color, or national origin be excluded from participation in, be denied the benefits of, or be otherwise subjected to discrimination under any program receiving Federal financial assistance.

TITLE IX OF THE EDUCATION AMENDMENTS OF 1972

Section 901 of Title IX provides that no person shall, on the basis of sex, be excluded from participation in, be denied the benefits of, or be subjected to discrimination under any education program or activity receiving Federal financial assistance.

§ 106.42 Displacement of other Federal obligations.

The policy of the U.S. Department of Education in fulfilling its obligations under Title IX, as amended, is designed to eliminate such displacement to the largest extent possible. The Department shall be guided in this policy decision by the principles and regulations of other Federal laws or regulations involving the same subject matter. The Department’s policy shall be that no person shall be subjected to the unequal application of any condition, standard, or rule of conduct with respect to the participation in, or denial of the benefits of, a Federal program or activity on the basis of sex.

§ 106.42(a)(1) The definition of disability.

For purposes of paragraph (a)(1), the term “disability” means physical or mental impairment which substantially limits, or which is deemed by the Department to be so likely to result in, a substantially limiting impairment, any of the activities of daily living, i.e., eating, bathing, dressing, toileting, self-care in the broadest sense, or mobility. It also includes any record of such impairment or any history of such impairment.

§ 106.42(b) The definition of otherwise qualified individual with a disability.

For purposes of paragraph (a)(1), the term “otherwise qualified individual with a disability” means a student or applicant who, with or without reasonable accommodation, as defined in paragraph (b)(1)(v), can meet the requisite academic standards for participation in educational programs or activities of the college, provided that the requisite standards are not fundamentally arbitrary or discriminatory.

§ 106.44 Financial assistance and contracts and cooperative agreements.

Title IX of the Education Amendments of 1972, as amended, is designed to eliminate (with certain exceptions) discrimination on the basis of sex in any education program or activity receiving Federal financial assistance.

§ 106.44(a)(1) Title IX federal obligations.

The Department shall carry out its responsibilities under Title IX in a manner which is consistent with the principles and regulations of other Federal laws or regulations involving the same subject matter. The Department’s policy shall be that no person shall be subjected to any condition, standard, or rule of conduct with respect to the participation in, or denial of the benefits of, a Federal program or activity on the basis of sex.

§ 106.44(a)(2) Federal obligations under Section 504.

Title IX of the Education Amendments of 1972, Section 504 of the Rehabilitation Act of 1973, the Age Discrimination Act of 1975, and the Americans with Disabilities Act (ADA), which provide comprehensive civil rights protection for individuals with disabilities, or the College’s Statement of Compliance with Federal and State laws, should be directed to Mark Sanford, Wayne Community College, 801 W. Fort, Detroit, MI 48226 or by calling 313-496-2765.

§ 106.44(a)(3) Discrimination on the basis of sex.

Title IX of the Education Amendments of 1972, as amended, is designed to eliminate the displacement of Federal obligations to the largest extent possible. The Department shall be guided in this policy decision by the principles and regulations of other Federal laws or regulations involving the same subject matter. The Department’s policy shall be that no person shall be subjected to the unequal application of any condition, standard, or rule of conduct with respect to the participation in, or denial of the benefits of, a Federal program or activity on the basis of sex.

§ 106.44(a)(4) Other Federal obligations.

Title IX of the Education Amendments of 1972, Section 504 of the Rehabilitation Act of 1973, the Age Discrimination Act of 1975, and the Americans with Disabilities Act (ADA), provide comprehensive civil rights protection for individuals with disabilities, or the College’s Statement of Compliance with Federal and State laws, should be directed to Mark Sanford, Wayne Community College, 801 W. Fort, Detroit, MI 48226 or by calling 313-496-2765.

§ 106.46 Financial assistance and contracts and cooperative agreements.

Title IX of the Education Amendments of 1972, as amended, is designed to eliminate such displacement to the largest extent possible. The Department shall be guided in this policy decision by the principles and regulations of other Federal laws or regulations involving the same subject matter. The Department’s policy shall be that no person shall be subjected to the unequal application of any condition, standard, or rule of conduct with respect to the participation in, or denial of the benefits of, a Federal program or activity on the basis of sex.

§ 106.46(a)(1) Title IX federal obligations.

The Department shall carry out its responsibilities under Title IX in a manner which is consistent with the principles and regulations of other Federal laws or regulations involving the same subject matter. The Department’s policy shall be that no person shall be subjected to any condition, standard, or rule of conduct with respect to the participation in, or denial of the benefits of, a Federal program or activity on the basis of sex.

§ 106.46(a)(2) Federal obligations under Section 504.

Title IX of the Education Amendments of 1972, Section 504 of the Rehabilitation Act of 1973, the Age Discrimination Act of 1975, and the Americans with Disabilities Act (ADA), which provide comprehensive civil rights protection for individuals with disabilities, or the College’s Statement of Compliance with Federal and State laws, should be directed to Mark Sanford, Wayne Community College, 801 W. Fort, Detroit, MI 48226 or by calling 313-496-2765.

§ 106.46(a)(3) Discrimination on the basis of sex.

Title IX of the Education Amendments of 1972, as amended, is designed to eliminate the displacement of Federal obligations to the largest extent possible. The Department shall be guided in this policy decision by the principles and regulations of other Federal laws or regulations involving the same subject matter. The Department’s policy shall be that no person shall be subjected to the unequal application of any condition, standard, or rule of conduct with respect to the participation in, or denial of the benefits of, a Federal program or activity on the basis of sex.

§ 106.46(a)(4) Other Federal obligations.

Title IX of the Education Amendments of 1972, Section 504 of the Rehabilitation Act of 1973, the Age Discrimination Act of 1975, and the Americans with Disabilities Act (ADA), provide comprehensive civil rights protection for individuals with disabilities, or the College’s Statement of Compliance with Federal and State laws, should be directed to Mark Sanford, Wayne Community College, 801 W. Fort, Detroit, MI 48226 or by calling 313-496-2765.

§ 106.48 Federal obligations and compliance.

The Department shall carry out its responsibilities under Title IX in a manner which is consistent with the principles and regulations of other Federal laws or regulations involving the same subject matter. The Department’s policy shall be that no person shall be subjected to any condition, standard, or rule of conduct with respect to the participation in, or denial of the benefits of, a Federal program or activity on the basis of sex.

§ 106.48(a)(1) Title IX federal obligations.

The Department shall carry out its responsibilities under Title IX in a manner which is consistent with the principles and regulations of other Federal laws or regulations involving the same subject matter. The Department’s policy shall be that no person shall be subjected to any condition, standard, or rule of conduct with respect to the participation in, or denial of the benefits of, a Federal program or activity on the basis of sex.

§ 106.48(a)(2) Federal obligations under Section 504.

Title IX of the Education Amendments of 1972, Section 504 of the Rehabilitation Act of 1973, the Age Discrimination Act of 1975, and the Americans with Disabilities Act (ADA), which provide comprehensive civil rights protection for individuals with disabilities, or the College’s Statement of Compliance with Federal and State laws, should be directed to Mark Sanford, Wayne Community College, 801 W. Fort, Detroit, MI 48226 or by calling 313-496-2765.

§ 106.48(a)(3) Discrimination on the basis of sex.

Title IX of the Education Amendments of 1972, as amended, is designed to eliminate the displacement of Federal obligations to the largest extent possible. The Department shall be guided in this policy decision by the principles and regulations of other Federal laws or regulations involving the same subject matter. The Department’s policy shall be that no person shall be subjected to the unequal application of any condition, standard, or rule of conduct with respect to the participation in, or denial of the benefits of, a Federal program or activity on the basis of sex.

§ 106.48(a)(4) Other Federal obligations.

Title IX of the Education Amendments of 1972, Section 504 of the Rehabilitation Act of 1973, the Age Discrimination Act of 1975, and the Americans with Disabilities Act (ADA), provide comprehensive civil rights protection for individuals with disabilities, or the College’s Statement of Compliance with Federal and State laws, should be directed to Mark Sanford, Wayne Community College, 801 W. Fort, Detroit, MI 48226 or by calling 313-496-2765.

§ 106.48 Federal obligations and compliance.

The Department shall carry out its responsibilities under Title IX in a manner which is consistent with the principles and regulations of other Federal laws or regulations involving the same subject matter. The Department’s policy shall be that no person shall be subjected to any condition, standard, or rule of conduct with respect to the participation in, or denial of the benefits of, a Federal program or activity on the basis of sex.

§ 106.48(a)(1) Title IX federal obligations.

The Department shall carry out its responsibilities under Title IX in a manner which is consistent with the principles and regulations of other Federal laws or regulations involving the same subject matter. The Department’s policy shall be that no person shall be subjected to any condition, standard, or rule of conduct with respect to the participation in, or denial of the benefits of, a Federal program or activity on the basis of sex.

§ 106.48(a)(2) Federal obligations under Section 504.

Title IX of the Education Amendments of 1972, Section 504 of the Rehabilitation Act of 1973, the Age Discrimination Act of 1975, and the Americans with Disabilities Act (ADA), which provide comprehensive civil rights protection for individuals with disabilities, or the College’s Statement of Compliance with Federal and State laws, should be directed to Mark Sanford, Wayne Community College, 801 W. Fort, Detroit, MI 48226 or by calling 313-496-2765.
COMPLIANCE STATEMENTS

of receipt of the answers to the informal grievance. The coordinator shall further investigate the matters of grievance and reply in writing to the student within five (5) business days. Any complaint submitted under this procedure shall be filed at Step 1 within twenty (20) business days after the student became aware, or reasonably should have become aware of the complaint. If the complaint is not served within that time, the complaint will not be considered. Failure by the student to appeal the complaint from Step 1 to Step 2 within the time limit procedure shall also nullify the complaint.

Step 2
If the student wishes to appeal the decision of the Equal Opportunity Compliance Coordinator, the student may submit an appeal to the President of the College within five (5) business days after receipt of the Coordinator’s response. The president (or his designee) shall meet with all parties involved within (10) ten business days to formulate a conclusion, and response in writing to the student within ten (10) business days.

Step 3
If at this point the grievance has not been satisfactorily settled further appeal may be made to the Office of Civil Rights, Department of Education, Washington, D.C. 20201.

Any complaint submitted under this procedure shall be filed at Step 1 within twenty (20) business days after the student became aware, or reasonably should have become aware of the complaint. If the complaint is not served within that time, the complaint will not be considered. Failure by the student to appeal the complaint from Step 1 to Step 2 within the time limit procedure shall also nullify the complaint.

SEXUAL HARASSMENT POLICY
Sexual harassment is an infringement on an employee’s right to work and a student’s right to learn in an environment free from unlawful sexual pressure. It is the policy of Wayne County Community College District to prohibit unlawful sexual harassment of employees and students.

Sexual harassment consists of overt activity of a sexual nature, which has a substantial adverse effect on a person in both the workplace and in the academic setting. It may include, but is not limited to, the following:

1. Demands for sexual favors accompanied by threats concerning an individual’s employment or academic status;
2. Demands for sexual favors accompanied by promises of preferential treatment concerning an individual’s employment or academic status;
3. Verbal, written or graphic communication of a sexual nature;
4. Patting, pinching, or other unnecessary body contact with another employee or student.

Any employee or student should report, in writing or orally, any and all incidents of such activity. Complaints may be directed to the employee’s supervisor or the Director of Human Resources. Student complainants should report, in writing or orally, any and all incidents to the appropriate Campus Provost.

There will be no retaliation against an employee or student for making a complaint or taking part in the investigation of a complaint under this policy. To the extent it can, the College will keep matters confidential. The Director of Human Resources shall promptly investigate all incidents of sexual harassment and direct a report with recommendations to the Board of Trustees following the report of an employee. The Campus Provost will promptly investigate all incidents of sexual harassment and direct a report with recommendations to the Vice President for Educational Affairs following the report of a student. Violation of this policy shall subject the offending party to appropriate disciplinary action up to and including discharge from employment (Policy adopted by the Wayne County Community College District Board of Trustees 03/25/87, revised 03/22/91, 03/25/92).

CLERY ACT
In compliance with the Student Right-to-Know and Campus Security Act enacted Nov. 8, 1990, later formally renamed the Jeanne Clery Disclosure of Campus Security Policy and Campus Crime Statistics Act, and commonly referred to as simply the Clery Act, the Wayne County Community College District (Policy adopted by Wayne County Community College District Board of Trustees 03/25/87, revised 03/22/91, 03/25/92).
