PREFACE

The Wayne County Community College District (WCCCD) is a multi-campus community college that provides educational resources to the residents of Wayne County and to those of many other communities. The District has five campuses and the Mary Ellen Stempfle University Center. Each campus is located near a major freeway. WCCCD serves 32 cities and townships. The District offers over 130 degrees and certificates through distance learning and full-service campus options.

From its beginning in 1967, WCCCD has viewed education as one of the most important factors for achieving success in today's dynamic and technologically-driven work environment.

The District provides a step-by-step approach to a career path by providing students with the ability to reach their career potential through an "open door" policy and affordable tuition. Because WCCCD is committed to "Make Education First," every student has the chance to fulfill his or her educational goals.

This catalog is for informational use only and does not constitute a contract. Wayne County Community College District reserves the right to add or delete, without notice, any course offering or information contained in this catalog.

Note: The District reserves the right to assign instructional staff other than those listed in the "Academic Schedule of Classes" and to eliminate, cancel, phase out or reduce courses and programs for financial, curricular or programmatic reasons.

ACCREDITATION

The Wayne County Community College District (WCCCD) is accredited by the Higher Learning Commission (HLC), 230 South LaSalle Street, Suite 7-500, Chicago, Illinois 60604; 312-263-0456, 1-800-621-7440, (fax at) 312-263-7462. The Higher Learning Commission is one of six regional institutional accreditors in the United States. General questions and information may be located on the website www.hlcommission.org or by email to info@hlcommission.org. Information regarding WCCCD's status of accreditation is made available on the WCCCD HLC website. Complaints can be directed by email to complaints@hlcommission.org. In addition, specific program accreditation or approval has been granted by the following agencies:

MISSION STATEMENT

WCCCD's mission is to empower individuals, businesses, and communities to achieve their higher education and career advancement goals through excellent, accessible, culturally diverse, and globally competitive programs and services.

VALUES STATEMENT

- Supporting Excellence In Teaching and Learning
- Honoring Diversity
- Serving The Common Good
- Being Accountable
- Operating With Integrity

VISION STATEMENT

WCCCD will be known as a premier community college and innovator in the areas of high quality academic and career education, talent development in support of regional economic growth, diversity and inclusion, and technological advancement.

FUNCTIONS STATEMENT

- Career Education
- University Transfer and General Education
- Workforce Development and Continuing Education
- Developmental Education
- Student Support Services
- Community Engagement

GENERAL EDUCATION

WCCCD students take general education courses in disciplines such as English, humanities, social sciences, natural sciences, and mathematics as a part of their requirements for an associate degree. Because students in career education, university transfer, and other credit-bearing programs share this common experience, these general education courses become the “bond” that gives the student body cohesion and the curriculum wholeness. For career education students, general education courses provide an opportunity to transcend the chosen

career field and develop knowledge and skills needed such as critical thinking, problem-solving, communications, and teamwork.

The “philosophy of general education” statements presented below were adapted in principle by the faculty in 1997 and reaffirmed by the WCCCD Board of Trustees in 2009: At WCCCD, we believe that learning leads to a better life. Our general education courses equip students with the tools needed to build such a life, and to serve family, community, and society. Upon successful completion of an associate degree, students will be able to:

- Read, write, and speak effectively.
- Understand and appreciate the role of culture and the arts in both society and personal life.
- Know the principles and be able to apply the methods of science.
- Have mathematical and technological skills (especially computer skills) sufficient for personal and career use.
- Know the principles and methods of the social sciences, and understand the basic social, political, and economic issues of the contemporary world.
- Understand and appreciate both our common humanity and the diversity of cultures—historically, around the globe, and within contemporary America.
- Be able to identify, define, and think critically about the issues that arise in daily life, both personally and professionally.
- Have the skills needed to work ethically and effectively with others.
- Become a lifelong learner.

WAYNE COUNTY COMMUNITY COLLEGE DISTRICT’S 2022-2026 STRATEGIC GOALS

The District has established the strategic goals listed below for District-Wide development and improvement as outlined in the strategic plan. The theme of this strategic plan focuses on bold future pathways that lead to operational excellence and promote student success and completion.

GOAL #1: EXPANSION OF STUDENT SUCCESS, INITIATIVES AND OPPORTUNITIES

WCCCD will increase student success through expansion of student - centered support services, initiatives, and partnerships.

GOAL #2: STRENGTHEN CURRICULUM DEVELOPMENT AND EFFECTIVENESS

WCCCD will develop curricular and co-curricular services that respond to dynamic student educational needs and regional economic development needs.

GOAL #3: PROMOTION OF OPERATIONAL SYSTEMS

WCCCD will promote operational excellence within its systems, services, and programs by expanding continuous quality improvement processes.

GOAL #4: DEVELOPMENT AND MANAGEMENT OF INSTITUTIONAL RESOURCES

WCCCD will increase its capacity to meet changing student, business, and regional educational needs through the advancement of sustainable human, financial, physical, and technological resources.

GOAL #5: ADVANCEMENT OF WORKFORCE DEVELOPMENT, COMMUNITY PARTNERSHIPS, AND ENGAGEMENT

WCCCD will advance institutional community engagement and workforce development initiatives that position the District as a premier resource for community and workforce development.

A BRIEF HISTORY OF WAYNE COUNTY COMMUNITY COLLEGE DISTRICT

WCCCD recently celebrated the 50th anniversary of its founding. WCCCD was established in 1967 through an act of the Michigan Legislature and a vote of the citizens of the college's legal district. It is sometimes said that WCCCD arose from the ashes of the 1967 racial uprising in Detroit and, in fact, Governor George Romney did sign the legislation creating WCCCD shortly after the uprising. The first classes were offered in the fall of 1969. In the early years, WCCCD operated with limited resources and functioned as a "college without walls" in that it offered courses in a variety of high schools and other community locations. Over time, WCCCD's five campuses and a number of specialty centers were developed and today provide beautiful and state-of-the-art settings for the students, businesses, and communities being served. In 1998, the term "District" was added to the college's name to reflect the growing multicampus structure and the county-wide nature of services to 32 townships and communities and nearly two million Wayne County citizens. In 2001, the voters of the District approved a major property tax increase and WCCCD immediately began a period of transformation now referred to as the "Pathways to the Future" initiative. With the leadership of Chancellor Curtis L. Ivery, WCCCD has proceeded over the past 20 years through four phases of the transformation of its programs, services, facilities, technological resources, and systems. The Pathways to the Future initiative

has provided the framework for the transformation of WCCCD's facilities, career education and university transfer programs, continuing education and workforce development programs, student support services, and learning and information technologies. Today, WCCCD is known as one of the nation's leading urban/metropolitan community college districts.

THE STUDENT BODY

The Wayne County Community College District practices an "open door" admission policy, and provides an educational experience to students who desire the opportunity. The District has a rich and diverse student population; approximately 70% are women and more than 50% are members of minority groups. While approximately 90% are Michigan residents, citizens from more than 30 countries are also enrolled in programs of study at the District. More than 80% of all WCCCD students attend part-time.

The student body is reflective of the diverse constituency served by the District. Nearly 70% of the student body receives financial aid or participates in work-study programs with approximately 42% being first in their family to attend college. Each semester, more than 300 veteran students also take advantage of the GI Bill®. Each year, the District graduates approximately 2,000 students. While a majority of students are enrolled in two-year transfer programs, the District has expanded career/technical course offerings to meet the demands of new and emerging technologies. Currently one-third of the College's enrollment is in career education. Many will continue their education at four-year institutions, while others focus on degrees and professional certificates allowing entry into rewarding careers.

GI Bill® is a registered trademark of the U.S. Department of Veterans Affairs (VA). More information about education benefits offered by VA is available at the official U.S. government Web site at <https://www.benefits.va.gov/gibill>.

ALUMNI

Since its founding, graduates of the District have had a profound impact on the professional, political and economic development in Wayne County, the State of Michigan, the nation and world.

Our alumni hold positions as teachers, dentists, doctors, lawyers, entrepreneurs, journalists, nurses, corporate business professionals, law enforcement officers, administrators, elected officials and a variety of other positions in professional and technical areas. The District has graduated more than 35,000 students who have, furthered their careers or enriched their lives through continuing education programs offerings.

ENROLLMENT MANAGEMENT, STUDENT SERVICES AND ACADEMIC POLICIES

ADMISSIONS

Admission Procedures for New Students

Admission to Wayne County Community College District is “open door” and automatic for those who are 18 or older. Admission to specific programs is not automatic. New students are required to complete an Application for Admission and complete an online orientation. Students are encouraged to apply for admission online at www.wcccd.edu.

After completing an application and the ACCUPLACER® assessment, students will meet with an academic advisor to discuss their educational goals and select appropriate courses. Once a student is admitted to the college, they will receive an email from the admission office containing their student email address and a temporary password, which allows them to activate their student account. Students can access their email by logging into their My Wildcat Portal. All official college communication to students will come through WCCCD student e-mail accounts. WCCCD students will be responsible for communications sent to this address. It is the student’s responsibility to frequently check both their email and My Wildcat Portal for important announcements and updates.

For those under 18 years of age, the possession of a high school diploma/GED or approval of a parent or guardian is required to accompany the Application for Admission. Persons under age 16 must re-apply and be approved for each semester for which they intend to enroll regardless of previous enrollments. Applications for persons under the age of 16 are submitted to the District Office of Student Services, 801 W. Fort St., Detroit, MI 48226. These classes may be available at no cost to the high school student who qualifies under the State School Aid Act, PA.148, Section 216. Students should contact their high school principal or academic advisor.

Transfer Students

Students transferring to Wayne County Community College District from other colleges or universities who wish to have credit transferred to their WCCCD record, should request the previous institution to forward official copies of their transcripts to the District Records Office. Generally, credit earned from regionally accredited institutions and from all publicly supported junior and community colleges is acceptable if earned with a grade of “C” or better and is appropriate to the student’s program of study. Transfer students are also encouraged to apply online at www.wcccd.edu. Students who have a bachelor’s or graduate degree are not required to take a placement test to enroll.

Former Students (Returning)

A returning student is an individual who has not attended the District for the last two years. All students in this category must complete an application for re-admission request online at www.wcccd.edu. All students re-admitted to the District after missing four or more regular semesters or two years will be responsible for the curricula and regulations published in the current catalog and other official publications which are in effect at the time of their re-admission. In certain cases, dates of program admission may take precedence over dates of college admission for the purpose of meeting program requirements for graduation.

Program Admission

Certain programs at the District have prerequisite courses and other criteria required for admission. In addition to meeting the official admissions/registration requirements, students are required to apply for official program admission to their program of study. Students must complete an official Program Admission Form that may be online at www.wcccd.edu. Program admission is required for technical degrees and certificate programs.

International Students

Wayne County Community College District encourages applicants for admission from qualified persons around the world and values the diversity that international students bring to campus. A vibrant international student population translates to a stronger multicultural experience for all students.

The District is authorized under Federal law to enroll non-immigrant alien students on the “F-1” student visa. Wayne County Community College District follows requirements set forth by the United States Department of Homeland Security. Each requirement must be satisfied before admission as an International Student is considered. International applicants should visit the website for application deadlines and a list of credentials needed for a complete application to be considered at: <https://www.wcccd.edu/international-students>

Senior Citizens

Citizens who are residents of the district and 60 years of age or older may enroll in academic classes at Wayne County Community College District tuition-free. Senior Citizen Tuition Waivers will be granted on a seat-availability basis in regularly scheduled academic classes. Continuing Education classes or classes leading to Continuing Education Certificates are not included in this tuition waiver. Although student activity fees shall be waived for senior citizens, they are responsible for all other fees such as the cost of books and class supplies. Senior citizen students are expected to adhere to the same academic standards, rules and regulations that are in place for other students. Proof of age and residency is required at the time of registration.

Guest Students

Students currently enrolled at another post-secondary institution who wish to register for classes at WCCCD must submit a completed Michigan Association of Collegiate Registrars and Admissions Officers (MACRAO) Michigan Undergraduate Guest Application which can be found at <https://www.macrao.org/>.

Native American Students

Free tuition is available to eligible Native American students. Students, however, are responsible for all fees, books and class supplies. Students claiming this exemption must present appropriate documentation at the time of enrollment. For more information visit the Office of Admissions and Records at your campus.

Michigan Colleges Online

Michigan Colleges Online (MCO) is an initiative of the Michigan Community College Association and the twenty-eight (28) Michigan community colleges. Students can enroll for courses at other colleges through the Michigan Colleges Online site, complete the course from another “Provider” college while maintaining their status at their home college and continue to receive Home college support services. For further information, please visit <https://www.micollegesonline.org/>.

Student Assessment

All first-time students with intent to pursue a degree or certificate must be assessed for skills in reading, writing, and mathematics prior to registering for classes. Students may be exempt from placement testing and orientation for up to 9 credit hours for personal interest. The assessment used is ACCUPLACER® and the process takes approximately two hours to complete. If a student has attended another college or university they may be exempt from assessment testing. Official transcripts must be submitted proving that certain courses in English, writing and mathematics have been completed. All Dual/Concurrent Enrollment students registering for Math or English courses must take the ACCUPLACER® Assessment test.

The results of your assessment testing do not affect your admission to WCCCD. Students who meet the “open door” admission requirements are automatically admitted to the college. However, the results of your assessment testing will be used by the District to ensure that you are placed in courses

appropriate for your skill level, particularly in English and mathematics.

To arrange for the ACCUPLACER® assessment, contact the Student Services Office at the campus of your choice. Please plan to stay at least two hours for your testing session. It is suggested that you prepare for assessment prior to your test day. Please visit www.wcccd.edu to sample test questions and practice tests to help you prepare. Please bring a photo ID when testing. Students are encouraged to call the campus to confirm the testing schedule.

Assessment Requirements and Institutional Priorities

WCCCD is committed to creating a holistic learner-centered environment in which students, faculty, and administrators collaborate to improve student learning. To that end, WCCCD focuses on (1) assessing the degree to which students achieve their stated goals and learning outcomes for courses, programs, and disciplines and (2) sharing assessment results among students, faculty members, and administrators to inform decisions regarding the improvement of student learning, teaching, curricula, and institutional practices.

English as a Second Language Testing (ESL)

Once admitted to Wayne County Community College District, students will be assessed using the ACCUPLACER® assessment. This service is limited only to students who have applied and been accepted by the College. Results from the ACCUPLACER® assessment will be used by District staff to assist students with placement in courses that are appropriate to the student's skill level.

Program Testing

The Office of Career Planning and Placement administers a number of assessment services for students, faculty, advisors and staff.

Academic Advisement and Guidance Services

Students may interact with academic advisement online and at the campus. Each campus is staffed with advisors and support staff who provide advising services as an integral part of the instructional process. In assisting students to achieve their academic greatest potential, our advisors and staff are committed to an effective entry-exit college experience. Services provided include:

- Educational guidance
- Academic advising
- College transfer information
- Scholarship information
- Personal/social/career advising

Jointly, advisement staff and the student may develop a plan which gives a student the opportunity to gain competencies in:

- Program selection
- Goal setting
- Career focus
- Stress management
- Time management

Financial Aid

Students must complete the **Free Application for Federal Student Aid (FAFSA)**, online at <https://studentaid.gov/h/apply-for-aid/fafsa>, each academic year to be considered for Federal Student Aid.

Financial aid is available to those who qualify. Students are encouraged to apply for financial aid each year as early as October 1st for the upcoming school year.

To receive Federal Student Aid funds, a student must be qualified to study at the postsecondary level. A student meets this requirement if they have a high school diploma; completed secondary level homeschooling in accordance with State laws;

or a General Education Development (GED) certificate. Please visit the financial aid web site at <https://www.wcccd.edu/financial-aid> for additional information on eligibility.

All official College communications will be delivered to WCCCD student email accounts. Notices and updates will also be sent via Web-Gate and WCCCD Student Forms. Students are required to review email WCCCD Student Forms and My Wildcat Portal messages on a regular basis. Review My Wildcat Portal messages at My Wildcat Portal àSelect “Financial Aid” in the Categories Menu Notifications tab for viewing Messages.

Student financial aid funds are made available only for the purposes directly related to Wayne County Community College District educational expenses. The use of these funds for any other purposes may jeopardize your eligibility to continue to receive these benefits.

The District Financial Aid Office has the right to review, adjust or cancel the financial aid award at any time due to notification from the U.S. Department of Education, a change in the student’s FAFSA, financial, marital or academic status, or because of adjustments (changes) in federal or state regulations, funding or computational errors. Financial aid cannot pay for certain repeat courses and courses that are not included in the declared major. Students may accept any number of awards or other financial assistance from public or private sources or both. However, the total assistance may not exceed the cost of attendance.

Information is also available on the following websites:

- Wayne County Community College District: www.wcccd.edu
- The State of Michigan: Student Financial Aid: www.michigan.gov/mistudentaid
- The U.S. Department of Education: studentaid.gov

The types of federal financial assistance include the following:

- Federal Pell Grant
- Federal Supplemental Educational Opportunity Grant (SEOG)
- Federal Work-Study
- Federal Direct Student Loan
- Iraq and Afghanistan Service Grant

The terms and conditions for each type of financial assistance are available online by clicking on the Financial Aid tab on the District’s website at www.wcccd.edu. **A student may decline all or any portion of a financial aid award by notifying the District Financial Aid Office in writing.**

Financial Aid Satisfactory Academic Progress Policy

In order to receive Federal Student Aid, regulations require that all students make continued progress in their educational program. This requirement is called Satisfactory Academic Progress and will be monitored by the District Financial Aid Office. In accordance with Federal Regulations the District Financial Aid Office’s policy will be to evaluate Satisfactory Academic Progress each academic year for students enrolled in programs longer than one year in length and at the end of each semester for all students in programs one year or less in length. Please see the financial aid website at <https://www.wcccd.edu/financial-aid/satisfactory-academic-progress> for a more comprehensive review of this policy. At each evaluation, a student’s progress will be measured on the following elements:

Qualitative Requirement

Cumulative GPA Requirement:

In order to continue to receive financial aid, a student must maintain a cumulative GPA of at least 2.0.

Quantitative Requirements

Maximum Timeframe:

Students must complete an undergraduate degree or eligible certificate program of study within 150% of the published credit hours required to complete the program. If the program requires 60 credit hours for completion, the maximum timeframe is 90. If the program requires 44 credit hours, the maximum time frame is 66 credit hours.

Pace of Progression:

Students should successfully complete at least 67% of the credit hours attempted. If a student earns 67% of all credit hours attempted, the student should complete the program within the maximum time frame. The pace that a student completes their program is calculated by dividing the cumulative hours the student successfully completed by the cumulative hours they attempted.

Additionally, transfer credit hours from another school, as well as repeated and developmental classes, are counted as credit hours attempted and completed. Withdrawal grades and incomplete grades are counted as credit hours attempted. Students seeking a second Associates Degree or certificate who are not meeting the quantitative standard, and want to be considered for financial aid eligibility, will need to submit a Satisfactory Academic Progress (SAP) appeal.

Appeal Process

Students who have been disqualified for financial aid are ineligible to receive financial aid and will not receive aid for the following, or future semesters. Students that were impacted by significant circumstances that caused them to be unable to meet satisfactory academic progress standards which resulted in their ineligibility have the option of submitting a SAP Appeal for consideration of approval and reinstatement of aid eligibility. The District Financial Aid Office considers the student's written appeal, supporting documentation, and federal regulations when making a determination.

Please see the financial aid web site at <https://www.wcccd.edu/financial-aid/satisfactory-academic-progress> for additional information on filing an appeal as well as accessing the online form.

If the appeal is approved, the student may be granted probation for one semester. Students will be required to follow an academic plan to ensure program progression. That plan will be reviewed after each semester. Financial aid eligibility is terminated for students who did not satisfy their probationary term or adhere to their academic plan.

All SAP appeal decisions are sent to students' WCCCD email accounts and posted to My Wildcat Portal.

Regaining Eligibility

Students who lose their financial aid eligibility because they fail to meet satisfactory academic progress will regain eligibility when it is determined that they are again meeting both the qualitative and quantitative standards. They are responsible for the payment of tuition and fees until financial aid eligibility is regained. When satisfactory academic progress standards are met, eligibility is regained for subsequent terms of enrollment.

Developmental Courses

Repeated and developmental courses are added into credits attempted and are used in the calculation of attempted credits verses completed credits. Up to 30 credits of combined developmental and ESL courses can be funded with federal student aid.

Pell Grant Lifetime Eligibility

The Higher Education Opportunity Act limits the period of time a student may receive a Pell Grant to 12 FULL-TIME semesters or the equivalent. This provision applies to all Federal Pell Grant eligible students. The calculation of the duration of a student's eligibility will include all years of the student's receipt of Federal Pell Grant funding. Students can monitor their Pell Lifetime Eligibility Used at <https://studentaid.gov>

Financial Aid for Repeated Courses

The District Financial Aid Office is required by the U.S. Department of Education to monitor and adjust a student's enrollment level for federal student aid if, or when, they repeat course work for credit that they have already earned. Students can retake and receive federal aid if they previously failed a course, but can only receive financial aid twice for a course that has been passed. A passing grade is defined for this purpose as D or better. Please note that the repeat course policy for financial aid is separate from institutional academic policies regarding repeat courses. The financial aid policy allows a student to receive financial aid under the following situations:

- To repeat any failed course until a passing grade is received
- To repeat one time any course in which a passing grade was previously received

Please Note: Regardless of the outcome, courses are not eligible to be covered by financial aid after a 2nd attempt has been made in a course that has, at any time, previously earned a passing grade.

Veteran Affairs

The Veteran Affairs office is located in the District Admissions and Records Office, 801 W. Fort, Detroit, MI 48226 or www.wcccd.edu.

The main purpose of Veteran Affairs is to certify enrollment of those veterans and dependents that are using their educational benefits. The staff is a liaison between the Department of Veterans Affairs and Wayne County Community College District. The staff assists the veteran in filling out forms, explaining the various degree programs the District has to offer and directing the student to the various academic departments for advising and ongoing support services.

The Department of Veteran Affairs requires that all recipients of veteran educational benefits make progress toward their stated academic degree. Therefore, all veterans receiving benefits must maintain an accumulated grade point average

(GPA) of 2.0 to remain eligible for Veterans Administration benefits. A veteran who allows his or her accumulated GPA to fall below 2.0 will be placed on probation. A veteran will be allowed two semesters to bring his or her accumulated GPA to 2.0 or higher. If the veteran fails to do so, the Department of Veterans Affairs will be notified of his or her unsatisfactory progress.

A signed statement acknowledging these requirements will be required from each veteran student at the beginning of each enrollment period.

Registration

There are specific registration procedures for new students, former students and for students who are currently enrolled. A detailed description of the enrollment and registration procedures is published in the Schedule of Classes which is available at www.wcccd.edu and at all WCCCD locations prior to each registration period.

Residency

Students residing within the District service area at the time of registration will be charged resident tuition rates. The District is defined as all of Wayne County with the exception of the following cities and townships: Dearborn, part of Dearborn Heights, Garden City, Highland Park, Livonia, Northville, Plymouth and part of Canton Township. Residency can be verified by voter registration card, driver's license, tax or rent receipts, or state identification card.

Residency is established at time of registration. Wayne County Community College District reserves the right to make final decisions on residency eligibility.

Special Residency

Children of deceased, 100% disabled, or missing Michigan veterans, between the ages of 16 and 22 and who are state resident for 12 months, per the State of Michigan statutes, may receive free tuition and fees for 36 months at State-supported colleges.

Change of Name or Address

A student who changes his or her name or address at any time after registration must immediately report such a change to the Office of Admissions and complete a change of data form. A veteran who changes address after certification must also report such a change to the District Student Services Division.

Deferred Tuition Plan

A minimum payment of 65% of all tuition and fees must be paid at the time of registration.

Outstanding Balances

Outstanding balances that are not paid in full on or before the published due date will be placed on Financial Hold and charged a default fee*. All student accounts remaining delinquent at the end of the semester (please refer to the District calendar for specific date) will be charged an additional semester delinquency fee*. All refunds will be applied to the student's account. Students who cancel or withdraw from classes after all refund periods have ended will be charged prior to receiving a refund.

**Refer to the current Academic Schedule for fees.*

Payment of Tuition and Fees

All tuition, fees and deposits are due at the time of registration. Students that choose the deferred tuition payment plan must pay a minimum of 65% of total tuition and fee(s) for the current term. Payments may be made by money order, check, debit card, Visa, MasterCard, Discover Card, American Express or ATM debit card.

**Refer to the current Academic Schedule for fees. Wayne County Community District reserves the right to cancel the registration of any student who does not make required tuition and fees payment within the specified timeframe.*

Cashless Registration Process

The District accepts online payments through all major credit cards and through checking and savings accounts. It is recommended that students

review the cost of tuition and fees in the class schedule before registering. When calculating the cost of tuition, please remember to consider all fees including, registration, student activity, technology, facility and applicable lab fees.

NOTE: All returning students who have an outstanding balance must pay 100% of their outstanding balance.

Returned Check Policy

Students are liable for all amounts pertaining to any bank rejected checks, which includes but is not necessarily limited to the following:

- The amount of the rejected check
- A District service fee* for NSF (bad check) processing
- A deferred fee*
- Charges assessed by the external check guarantee company utilized by the district.

**Refer to the current Academic Schedule for dates.*

ALL CHECKS WRITTEN TO THE DISTRICT ARE VERIFIED BY AN EXTERNAL CHECK GUARANTEE AGENCY. ALL RETURNED CHECKS ARE SUBJECT TO THE AGENCY'S COLLECTION FEES.

STOP PAYMENT OF CHECK DOES NOT INITIATE CANCELLATION OF CLASSES. YOU MUST OFFICIALLY WITHDRAW FROM YOUR CLASSES BY COMPLETING AN ADD/DROP FORM.

Important Registration Information

You are officially registered when the registration staff enters your classes into the registration system or once you click the "register" button for those registering in My Wildcat Portal. ***You are responsible for all tuition and fees incurred including the non-refundable registration fee.*** You must pay at least 65% of your tuition and fees at the time of registration. You must officially withdraw from your class (es) within the refund period to be eligible for any refund. The unpaid

balance of tuition and fees is still due when you drop a course after the refund period ends. Therefore, *any course dropped after the 50% refund period must be paid for in FULL.*

Disclaimer

The schedule of classes is for information only and does not constitute a contract. The District reserves the right to change, modify or alter without notice all fees, charges, tuition, expenses and costs of any kind and further reserves the right to add or delete, without notice, any course offering or information contained in the schedule.

WCCCD reserves the right to assign instructional staff and to eliminate, cancel, phase out or reduce course sizes and/or programs for financial, curricular or programmatic reasons.

Auditing Classes

Students desiring to audit courses for no credit must indicate “audit” on the Registration Form for the appropriate classes prior to registering. Students auditing courses pay regular tuition and fees. Credit is not given for an audited course, nor may a change to credit status be made after the student has registered to audit a course. Students who desire to change from credit status to audit status in a course must do so before the class begins. The course is included on the official transcript as an audit and denoted by the letter V. Auditing a course can only be done during walk-in registration. Students must complete a registration form in order to audit a course.

Repeating Courses

Students may not repeat for credit any course for which they have earned a “C” or better. Exceptions may be made in special circumstances at the discretion of the Vice-Chancellor or his/her designee. Students have an opportunity to repeat completed courses (for no additional credit) in which they would like to improve their grade point average three times after the initial enrollment. If a class is repeated, each grade received will remain on

the transcript, but the highest grade awarded will be used in calculating the grade point average.

Adding or Dropping Classes

Students may add or drop classes through the registration period. Please consult the current Schedule of Classes for applicable add/drop dates. Students desiring to add/drop classes may do so online through My Wildcat Portal. Classes dropped after the refund period will be reflected as a “W” grade on the student transcript.

Withdrawing from Classes

Officially withdrawing from classes may entitle students to full or partial refunds. For more information, refer to the current Academic Schedule book.

Refunds

Classes cancelled by the District will result in a 100% refund. The District reserves the right to cancel classes. The District will attempt to notify students whose classes are cancelled. Students substituting another course must process a drop/add form as soon as possible without additional charge for the added class. If students do not wish to substitute another course, a refund is automatic and there is no need to process a drop/add form. The refund will be returned to the student approximately 3-5 weeks after the first day of the semester. **There is no refund for health reasons.** Classes dropped by the student after the refund deadlines will result in **“no refund.”**

Tuition, student activity fees, technology fee, facility fee, and all course-designated fees are refundable within the deadline requirements. However, registration, drop/add and deferred fees are not refundable unless the District cancels one or all of a student’s classes.

Military Refund Policy

A student belonging to the Armed Forces or the Michigan National Guard who is called to active

duty will be allowed to withdraw from classes without penalty and receive a 100% refund of the student's tuition and fees provided the student has not completed the course(s) for which the student is seeking a refund.

Career Planning and Placement

The Career Planning and Placement Office offers students and graduates an opportunity to explore employment opportunities in conjunction with their educational and personal goals. Professional staff is available online at www.wcccd.edu at each campus to provide a variety of employment related services. Additional information can be found at <https://www.wcccd.edu/career-planning-and-placement>

Students and graduates receive assistance in preparing resumes, cover-letters, and improving their interviewing skills through the use of employability development software programs. Referrals are made to testing and counseling services where students can receive assistance in identifying interests, aptitudes, and abilities; relating to career choices. WCCCD subscribes to a leading recruitment website, College Central Network. Through this site, students can view jobs posted locally and nationally, and also post, update and forward their resume.

Student Activities

The Office of Student Activities coordinates a variety of programs and services intended to enhance the educational purpose and philosophy of the District. Formal education is only one facet of a student's total educational experience while attending Wayne County Community College District. With this in mind, participation in student activities encourages and challenges students to get involved in other facets of the District community by planning or participating in student organizations and activities. The educational opportunities, development of leadership, social and interpersonal skills, personal satisfaction and enjoyment gained from participating in student

activities will make the personal investment well worth the effort.

Each campus has recreational, social, and family student activities. This may include guest speakers and special events. The District's Chapter of Phi Theta Kappa International Honor Society recognizes students who have achieved academic excellence. Student activities at WCCCD are student driven. For information about specific student organizations and activities, contact the administrative office at the WCCCD location of your choice.

It is the students' responsibility to provide individual liability, health and accident insurance coverage. The District accepts no responsibility for insurance coverage for participation in any student activity.

Student Executive Council

The Student Executive Council is a governing body of students who represent the interests of the student body. As the official "student voice" the Wayne County Community College District Student Executive Council is the liaison between the student population, faculty, and administration to promote the rights, education, and general welfare of all students at the college. The Student Executive Council consists of five students each appointed by a Campus President to serve a term of one academic year.

Academic Honesty

The expectation at Wayne County Community College District is that the principles of truth and honesty will be practiced in all academic matters. Therefore, acts of academic dishonesty, including such activities as plagiarism or cheating, are regarded by the District as very serious offenses. In the event that cheating, plagiarism or other forms of academic dishonesty on the part of students are discovered, each incident will be handled on an individual basis as deemed appropriate by the instructor.

Care should be taken that students' rights are not violated and that punitive measures are instituted only in cases where documentation of offenses exists. A description of all such incidents should be reported to the Campus Academic Officer where a file of such occurrences is maintained. The Campus Academic Officer may institute action against a student according to procedures of due process outlined in Student Rights and Responsibilities in the *Student Handbook*.

Class Attendance

Students are expected to attend all class sessions. When absence from class is unavoidable, it is the student's responsibility to make arrangements for make-up work, and to determine if announcements relevant to the course were missed during the absence. Make-up work is permitted at the instructor's discretion. Excessive absence may result in failure.

Students may not bring children to class or leave them unattended at the campus. Only registered students and College-approved staff are allowed to attend lectures, labs, or discussions.

PLEASE NOTE: Class attendance can only be monitored and verified by the instructor.

Final Examinations

Final examinations are held regularly at the end of each semester or session. Students are required to take the final examination at the time and place scheduled in order to receive credit for the course, unless otherwise indicated by the instructor.

Grading System

The following is the grading system used at Wayne County Community College District. All courses in which the student enrolls and earns grades are recorded on the official transcript. Grade points are used to measure a student's academic achievement for the total number of credit hours attempted. Final course grades are accessible 48 hours after classes end.

Grade	Points	Description
A	4.0	Excellent
B	3.0	Above Average
C	2.0	Average
D	1.0	Below Average
E	0.0	Failure to complete course requirements satisfactorily

Transcript Codes	Description
CR	Credit by Examination
CFE	Credit for Experience
AP	Advanced Placement (Articulation)
I*	Incomplete: The awarding of an incomplete grade is at the discretion of the instructor provided the student has been attending the class, is passing and has an unforeseen emergency, which occurs after the last day to drop classes.
NG	No grade issued by instructor.
V	Audit: Students visiting or auditing a course must declare this option when registering. Veteran and financial aid students are not eligible to audit.
W**	Withdrawal: Withdrawal by the student during the first half of the semester.
XW	Walk-away status: Attended at least 1 class during the first third of the semester and failed to withdraw during the remaining two-thirds of the semester.

Note *District policy requires all students who earn an incomplete "I" grade to complete that course by the end of two consecutive terms after the term in which the "I" grade was given. The student is charged with the responsibility of completing the course requirements through the instructor who issued the "I" grade. In the event the student is unable to contact the instructor, the student must immediately contact the appropriate Campus Academic Officer. Failure to complete the course requirements within the two-consecutive-term time limit shall result in a grade of "E" replacing the "I" grade. Students should not register a second time for a course in which they have an outstanding "I" grade. An "Incomplete" grade is given only when an unforeseen emergency prevents the student from completing the work in a course and is given at the discretion of the instructor.

Note **While NEITHER GRADES XW, W ARE CALCULATED AS PART OF THE OFFICIAL GRADE POINT AVERAGE, they are counted in determining satisfactory progress for students receiving financial aid and continuing eligibility.

Grade Point Average (GPA)

The grade point is calculated by multiplying the grade points by credit hours attempted. The cumulative grade point average is the total number of grade points earned divided by the total number of credit hours attempted. Attempted credit hours include "E" grades, even though grade points are not earned. THE HIGHEST GRADE IS USED TO CALCULATE GRADE POINTS FOR ANY REPEATED CLASS.

Example:

English	C = 2 x 3 credits = 6 grade points
Biology	B = 3 x 4 credits = 12 grade points
Psychology	E = 0 x 3 credits = 0 grade points
Political	
Science	A = 4 x 3 credits = 12 grade points 13 credits (divided into)

Equation = (total number of grade points earned)
divided by (total number of credit hours
attempted).

30 grade points/13 credit hours attempted
Equals 2.31 GPA

Standards of Academic Progress

The Board of Trustees of Wayne County Community College District hereby authorizes the Chancellor to develop and promulgate standards for admission to and satisfactory progress in academic programs which vary from the general admissions and progress standards now in force. The Chancellor shall ensure that any such standards are appropriately published and communicated to students affected. In addition, the administration shall clarify to students that the General Standards for Admission and Satisfactory Progress already in force shall be applicable to all students unless separate standards have been promulgated for specific academic programs.

It is hereby policy that requirements for graduation include a cumulative GPA of 2.0 or higher. No certificate or degree will be granted to any student who has less than a 2.0 cumulative GPA.

The District maintains that all students should make continued progress toward an educational goal. In an effort to assist students, the following standards of academic progress have been established:

- Good Standing: A student maintaining a 2.0 or above cumulative GPA
- Total credits utilized in computing the cumulative GPA will not include:
 - Credit for classes which have been repeated. The lower grade will not be used in determining the GPA
 - Classes with a grade of CR, CRE, V and withdrawals (W, XW)
- Probationary Status: A student who has a cumulative GPA below 2.0 is placed on probationary status. A student is notified of probationary status on the semester grade report. When a student is placed on probation, the following steps must be followed:
 - The student will be assigned an academic advisor for prescriptive assessments and the determination of the appropriate courses to pursue in the future. Note: It will be the student's responsibility to contact the advisor to schedule an appointment
 - A probationary student may not elect more than nine (9) credit hours for the fall/spring semesters; six (6) credit hours in the summer unless that student has the written authorization of the advisor.
 - The student must schedule regular meetings with an academic advisor during the academic probationary period.
 - Continued Probationary Status: A student is placed on continued probationary status when the student's GPA for a semester is 2.0 but the cumulative GPA remains below 2.0.

- **Exclusion:** If a student maintains a cumulative GPA of less than 2.0 for three consecutive semesters, the student may be excluded from future enrollment at the District for one semester. Re-entry is not automatic. A student may apply for re-entry through a campus Office of Admissions.

Appeal of Grades

A student who believes that a grade has been awarded unfairly or incorrectly should first contact the instructor who awarded the grade to discuss the issue and attempt to resolve the dispute. If the matter is not resolved to the student's satisfaction, the student may submit a grade appeal request form to the campus Chief Academic Officer at the location where the course was taken. Please refer to the Student Handbook for additional information regarding the process and how to request for grade appeal.

The student will be advised of the appeal process, which includes a written statement from the student and the instructor's written response. Grade appeals must be filed within 90 days of the conclusion of the semester or session during which the student was enrolled in the course where the challenged practice occurred.

Student Complaints

Students who have a complaint concerning a course, an instructor or other staff should discuss the problem with the instructor or staff person first. If the student is still dissatisfied after this discussion, the student should complete a formal written inquiry/complaint form available in the Student Services office at the campus of choice. The inquiry/complaint form is also available online at www.wcccd.edu. Refer to the Student Code of Conduct in the WCCCD Student Handbook for additional information regarding complaint resolution. Students, who, after following established complaint protocol, remain dissatisfied, may file a complaint with the Michigan Department of Regulatory Affairs at Post-Secondary Complaints Information which is available at www.wcccd.edu.

Credit for Pre-College Learning

Wayne County Community College District recognizes that many of our students come to us with a wealth of learning which was achieved through experiences outside a college classroom. The District sponsors several programs which are directed toward helping students convert those learning experiences into college credit that may be applied toward a certificate or degree. These include the Articulation Program, Credit by Examination, the College Level Examination Program (CLEP), Credit for Experiential Learning and Credit for Specialized Experience. Contact the Campus Admissions Office.

Articulation Programs

High Schools

High School articulation agreements are cooperatively planned and operated by the District and several secondary schools. Students who graduate from a participating school's career and technical preparation program may be eligible to receive college credit for competencies successfully completed in high school.

Colleges/Universities

The purpose of college/university articulation agreements is to allow students to complete an associate degree program, or in some cases, a certificate program, and transfer to a related bachelor's degree program with minimum loss of credit and duplication of coursework. An articulation agreement will describe the courses to be taken at Wayne County Community College District in order to complete the associate degree at Wayne County Community College District and successful matriculation into a four-year college or university program of study.

Credit by Examination

Upon the recommendation of the Chief Academic Officer, credit may be earned for some courses in the current catalog through special examination. Credit earned in this manner will satisfy degree and certificate requirements. An academic officer can

provide students with the direction and the forms necessary to apply for credit by examination.

College Level Examination Program (CLEP)

The CLEP test is based on the premise that individuals acquire knowledge informally throughout their lives. The test allows them to convert this knowledge into college credit. This opportunity may be particularly useful to the occupational career student, adult student, and the student who did not graduate from high school but who has acquired some special expertise.

There are two types of CLEP tests available: the **General Examinations**, which measure knowledge in basic liberal arts areas (English composition, humanities, mathematics, and social science/history), and the **Subject Examinations**, which measure achievement in 37 specific college courses. When prior college credit has been earned on a formal basis in the subject area, no CLEP credit will be allowed. Credit is granted for tests with scores which rank at the 50th percentile or higher based on sophomore norms presented in tables of percentile ranks provided by the College Entrance Examination Board, which developed and standardized the CLEP test.

A maximum of one year of credit (30) credit hours may be allowed for pre-college learning. This credit will apply toward WCCCD degrees and certificates. Most examinations are given once each month and may be taken by WCCCD students at the Counseling and Testing Bureau of Wayne State University. Descriptive brochures and applications are available at Wayne State University, 5050 Cass Avenue, Detroit, Michigan 48202.

Credit for Experiential Learning

If you wish to receive credit for learning you have achieved through experience but do not wish to use the College Level Examination Program (CLEP) or Credit by Examination, you may take advantage of our experiential learning program. To do this, prepare a portfolio which includes the following

information:

1. Courses for which you want to receive credit
2. Learning goals that you have achieved
3. Documentation of the achievement of the learning goals

This portfolio is then reviewed by faculty to determine if credit may be awarded. Several things about experiential learning are important to understand as students consider using this opportunity to earn credit. First, credit is granted for learning achieved from experience, not for the experience itself. In developing the portfolio, students will need to demonstrate that their experiences have helped them gain both theoretical and practical knowledge at the same level as they would have achieved by taking the course. Second, the process of developing a successful portfolio is as time consuming as taking a course. Therefore, we recommend that students consider this option only if they wish to receive credit for a group of courses. Credit for a single course is earned more efficiently through credit by examination or the CLEP program.

The fee for this service is an amount equal to half the normal tuition for the courses in addition to a fee* for processing. The Campus Chief Academic Officer can provide students with the directions and the forms necessary to receive credit for experiential learning.

Credit for Specialized Experience

Wayne County Community College District will grant four credit hours of credit, without fee payment, for the Fire Academy, Police Academy, Emergency Medical Training, military service, conscientious objector, Peace Corps, or Volunteers in Service to America (VISTA) service and experience, subject to the following stipulations:

1. Credit will be granted only for one of these training or service experiences.
2. Credit for military service will be granted only for active duty service of one year or more.

3. Credit for Fire and Police Academy experience will be granted only after completion of academy training, and one year of active duty with a public fire protection or law enforcement agency.
4. Credit for Peace Corps and VISTA experience will be granted only after completion of the appropriate tour of duty.
5. Credit for conscientious objector service will be granted only for those objectors who rendered service to the community as a result of their legally determined conscientious objector status.
6. This credit will not satisfy any part of the 15 credits at WCCCD required for graduation.
7. This credit is general elective credit and does not apply toward the fulfillment of any general education requirement for a degree.
8. This credit will be recorded on the student's academic record, without grade, as follows:

COE 999	4 credits
<i>Conscientious Objector Service</i>	
EMS 999	4 credits
<i>Emergency Medical Training</i>	
FAE 999	4 credits
<i>Fire Academy Experience</i>	
MSE 999	4 credits
<i>Military Service Experience</i>	
PAE 999	4 credits
<i>Police Academy Experience</i>	
PCE 999	4 credits
<i>Peace Corps Experience</i>	
VSE 999	4 credits
<i>VISTA Experience</i>	
9. To obtain this credit, students must meet the following criteria:
 - a. Be currently registered or have earned credit for at least one WCCCD credited course
 - b. Present official certificates to the Registrar attesting to the Fire Academy training (diploma or other official verification); military service (DD 214 preferred); or Peace Corps, VISTA, Police Academy, or Emergency Medical Training experience. Contact 313-496-2862 for further information.

Transfer College Information

Planning for Transfer

Many students attending WCCCD are beginning a journey toward a bachelor's degree program, taking their freshman and sophomore requirements here while planning to transfer to a four-year college or university. Many students will choose to obtain an associate degree prior to transfer to their chosen senior institution.

Getting an associate degree is encouraged because it equips students with a marketable degree should interruptions occur in completing a bachelor's degree.

Some tips that will ensure that you make an easy transition from the community college to the university setting include:

- Begin planning early – meet with a WCCCD advisor to explore the official website and transfer guides of senior colleges and universities.
- Once you have selected a transfer institution, make contact with an advisor at that school as well.
- Make certain you understand the freshman and sophomore level requirements of your chosen university.
- Students should research course equivalencies at <https://www.mittransfer.org/plan>
- If you are uncertain about where to attend upon completing your program at WCCCD, explore college web sites, write for information about programs you are interested in, and/or plan a trip to one or more colleges to become familiar with their environment, faculty and programs.
- WCCCD hosts "College Night" programs where representatives from senior colleges and universities will be on-site to speak with students. Plan to attend one of these events.

Transfer Support

The Office of Student Services on each campus can provide information about which WCCCD courses will transfer to universities in the area. It is the student's responsibility to consult an academic advisor to plan a program of study based on the

specific university and appropriate academic major. Academic advisors can help students select the right courses for transferring to a four-year institution or college.

Petition for Change of Program Requirements

When a student is preparing to register for the final semester of his or her program or degree and unable to complete the requirements because a course (1) has not been offered recently at any campus or online, and (2) is not offered for the upcoming semester or has been cancelled due to lack of enrollment, the student may petition the District to have the required course changed and a related course substituted. No course will be changed without the substitution of another course.

Petitions for a change of program requirements must be submitted within the first two weeks of the enrollment period for the semester in which the change is to apply, except in the case of cancelled classes. Students should visit www.wcccd.edu or go to the Campus Chief Academic Officer to initiate a petition to change program requirements. Some program requirements are absolute. Nothing in this policy shall be construed to create an obligation on the part of the District to change any program requirements.

Campus Dean's Honor List

Students completing 12 or more credits during the fall or spring semesters with a minimum grade point average of 3.5 are eligible to be recognized on the Dean's Honor List.

Graduation with Honors

Students who complete degree requirements with exceptionally high scholastic averages are eligible to receive degrees with honors. Those who have earned the following grade point averages are eligible to be graduated:

- 3.75 – 4.00 summa cum laude
- 3.50 – 3.74 magna cum laude
- 3.25 – 3.49 cum laude

In computing the grade point average, all courses taken (with the exception of developmental educational courses) at Wayne County Community College District are considered.

Graduation

Students must adhere to the following graduation requirements:

1. Be officially admitted to the program or declare their major within the first 12 credit hours of coursework at the District.

Prior to the semester in which the students intend to graduate, they must:

2. Obtain and complete an application for graduation.
3. Submit the completed form to the appropriate advisor or program director for review.
4. Complete exit counseling at <https://studentaid.gov/h/manage-loans> (only for student loan recipients)

Students are expected to follow the program outlined in the catalog in effect at the time of admission to the college. After an enrollment break of two or more years, students must follow the program requirements of the catalog at the time of re-enrollment. For Graduation Application deadlines, please refer to the ecollege calendar.

Michigan Transfer Agreement (MTA)

The Michigan Transfer Agreement (MTA) is designed to facilitate transfer from one institution to another. One guiding principle of the agreement is to promote transparency among institutions to ensure accurate transfer information for students. The Michigan Transfer Agreement replaces the MACRAO Transfer Agreement. Students first enrolled Fall 2014 (or later) will not be eligible and should pursue the Michigan Transfer Agreement (MTA) instead. Wayne County Community College District is a member of the Michigan Association of College Registrars and Admission Officers (MACRAO).

To fulfill the MTA, students must successfully complete at least 30 credits, with at least a 2.0 in each course and at least one credit completed at the institution awarding the MTA. These credits should be met according to the following distribution:

- One course in English Composition
- A second course in English Composition or 1 course in Communications
- One course in Mathematics from one of three pathways: College Algebra, Statistics or Quantitative Reasoning.
- Two courses in Social Sciences (from two disciplines)
- Two courses in Humanities and Fine Arts (from two disciplines, excluding studio and performance classes)
- Two courses in Natural Sciences including one with laboratory experience (from two disciplines)

The inclusion of specific courses within a given category is determined by WCCCD. In general, technical, vocational, development and enrichment courses will not be included in the MTA Common Core. Special circumstances may allow for select vocational course acceptance if agreed to by a participating four-year college.

It is important for students wishing to take advantage of this agreement to work closely with an advisor at any WCCCD campus to ensure that the courses they select fulfill the WCCCD general education requirements and are eligible for the MTA agreement.

- WCCCD, upon student request, will evaluate a student's transcript for completion of the MTA Transfer Agreement. A "MTA Transfer Agreement Satisfied" endorsement will be placed on the student's transcript if the MTA Common Core has been fulfilled.
- The four-year college will determine the transferability, equivalency, and applicability of the MTA Common Core courses in meeting additional baccalaureate requirements. No additional General Education Common Core courses will be required by the four-year college of any student who completes the Associate of Arts (A.A.) or Associate of Science (A.S.) degree. *According to the requirements of the MTA agreement.
- Participating four-year colleges may require, of all students, additional graduation requirements beyond the 30 credit hours (45 quarter hours) satisfied by the MTA Common Core (i.e., competency, foreign languages, physical education, religion). Transfer students who complete the MTA Common Core will be expected to fulfill all graduation requirements.
- In order to benefit from the MTA Transfer Agreement, a student must be eligible for admission to a four-year college. The attainment of an A.A. or A.S. degree is desirable for most prospective transfer students. Individual objectives and circumstances are best considered by allowing each student flexibility to determine the time of transfer.

PLANNING GUIDE • MICHIGAN TRANSFER AGREEMENT (MTA)

A minimum of 30 credits is required to complete the MTA. At least one (1) course must be taken at Wayne County Community College District. Coursework transferred from other institutions that does not have a direct WCCCD equivalent may be eligible to satisfy MTA, dependent on evaluation.

Designated MTA courses: EACH course must be completed with a minimum grade of “C”.

☐ MTA Humanities

☐ MTA Humanities

ADDITIONAL COURSEWORK

If necessary, additional designated MTA courses (from above lists) to total or exceed 30 credit hours.

☐ MTA Additional Course (if needed)

☐ MTA Additional Course (if needed)

Many Michigan four-year colleges and universities are part of the Michigan Transfer Agreement. The Agreement requires completion of 30 credit hours of coursework in general education areas. If a student has successfully completed the appropriate coursework, that student's transcript will be marked "MTA Satisfied". Participating four year colleges and universities will accept that as a completion of 30 credits toward their general education requirements. Students who plan to transfer should contact their intended transfer institution. The MTA requires that colleges list coursework which is applicable.

ACADEMIC SUPPORT AND DEGREE REQUIREMENTS

PLANNING YOUR PROGRAM OF STUDY

The most important thing to do to ensure your success at WCCCD is to carefully plan your progress through your program of study, whether that is several specific courses or an entire certificate or degree. This plan should include consideration of family or job commitments, as well as the College's requirements and course offerings.

Student services staff are available on all campuses Monday through Friday, both day and evening, to help you in planning your program of study. In addition, faculty members, campus academic staff and student services staff are available to assist you in making sound academic decisions in your program of study.

These individuals are valuable resources and you should consult them any time you have a question. Students are encouraged to meet with an advisor each semester prior to registering.

CLASS SCHEDULING

The District strives to meet the scheduling needs of all students, whether they choose to study full-time, part-time, or less than part-time. Since earning a degree requires at least 60 academic credits, the length of time it takes to complete a degree depends on the number of credits a student successfully completes each semester.

Most WCCCD courses are three academic credits and require three hours of class time per week. Some courses require more academic credits and longer hours for laboratory and/or practicum assignments. Generally, classes are in session 15 weeks for the fall and spring terms, and 12 or 7.5 weeks for summer terms. Fast-Track and other academic sessions may vary in duration. Courses are also offered through Distance Learning. Refer to the current Schedule of Classes for specific and up-to-date information on the time, day and campus location of offered courses or at www.wcccd.edu. This catalog suggests a sequence of courses you

should follow to earn your degree if you are a full-time student. However, since many students are employed or have family responsibilities and other commitments, part-time study is available for the majority of programs. Contact the advising office at the campus of your choice for advice on selecting courses for part-time study.

Semester Enrollment Status

Academic Credit Hours
Full-time (12 or more credit hours)
Three-quarter time (9-11 credit hours)
Half-time (6-8 credit hours)
Less than half-time (1-5 credit hours)

ACADEMIC SUPPORT SERVICES

Students are encouraged to meet regularly with their student services staff or advisors when entering WCCCD and throughout their stay at the District for assistance in educational planning and self-development. Advisors and other staff are available to assist students with educational, vocational and personal concerns. Individual and group experiences are available through a variety of District resources for students who wish to increase their effectiveness as learners and to improve their social skills.

LEARNING CENTERS

The District provides supportive services through its Learning Centers located at each campus. The centers provide academic skill building for individuals and groups. Each Learning Center houses a wide range of equipment and materials to address various levels of learning difficulties. Students can access learning assistance technologies to support academic success.

SERVICES FOR STUDENTS WITH DISABILITIES

WCCCD Disability Support Services provides students access to all District occupational, technical, and vocational programs. Students with disabilities are provided academic assistance, supportive services, and personal and career advisement. Each student is given the opportunity to realize his/her maximum potential which is achieved by formal and informal assessments.

Additionally, other specialized services are available based on the academic need or a disability of the student.

- Students who self-disclose either a physical and/or cognitive disability must present written verification from a qualified physician, psychologist, psychiatrist or therapist. Documentation submitted for students with disabilities is confidential and used solely for the purpose of assisting students in identifying and securing appropriate accommodations and services to enhance student's success at WCCCD.

Each campus offers services to students with a disability. Contact the Learning Center at the campus of your choice for more information.

- Curtis L. Ivery Downtown Campus: 313-496-2758
- Downriver Campus: 734-946-3500
- Eastern Campus: 313-922-3311
- Northwest Campus: 313-943-4000
- Ted Scott Campus: 734-699-7008
- Mary Ellen Stempfle University Center: 313-962-7150

DEVELOPMENTAL EDUCATION

Developmental education coursework is designed to build upon existing skills in order to facilitate student success in the core curriculum at Wayne County Community College District. Developmental education courses are offered in writing, reading and mathematics for students needing review in these areas. The courses emphasize individual attention, personalized teaching, and learning in small support groups. Each course carries full college credit at WCCCD. Developmental education courses are not transferable to four-year institutions for academic credit. The Developmental Education courses that are offered are as follows:

- ENG 111 Introduction to Reading Skills
- ENG 112 Career and Technical Reading I
- ENG 113 Career and Technical Reading II
- ENG 114 Career and Technical Writing I
- ENG 115 Career and Technical Writing II
- MAT 105 Pre-Algebra
- MAT 112 Elementary Algebra

LEARNING RESOURCE CENTERS

Wayne County Community College District's Learning Resource Centers (LRC) provide information literacy education, multimedia resources, and services to support the curricula offered by the District. The library provides research needs to students, faculty, staff, and administration. The library extends these services to the community and serves as a catalyst for lifelong learning.

Our Learning Resource Centers are located on all five campuses with services including access to computers and printing/copying services; print collections for campus-based programs; bibliographic instruction; monthly workshops to promote student success with the development of soft skills and how to successfully complete course assignments.

WCCCD is a member of the Detroit Area Library Network (DALNET), a multitype library and information network servicing Southeastern Michigan/Detroit metropolitan area. DALNET provides the framework and support for our shared integrated catalog and library system with over 1,000,000 items. This platform is used to automate and manage their operations, including acquisitions and access for traditional print materials as well as electronic resources.

Below, is the list of library resources available to all WCCCD students to include DALNET.

DALNET

- Adam Cardinal Maida Alumni Library
- Arab American National Museum
- Concordia University Ann Arbor
- Detroit Institute of Arts
- The Henry Ford Benson Ford Research Center
- Macomb Community College
- McLaren-Macomb
- Mid-Michigan Health
- Oakland Community College
- Rochester College
- Siena Heights University
- University of Detroit Mercy
- Walsh College
- Wayne County Community College District
- Wayne State University

WCCCD library collections include both print resources and electronic resources to support our programs. Specialized collections can be accessed at the campus offering the programs. Electronic resources include e-book collections for both general and reference resources; electronic journal access, and access to streaming videos and video clips through Films on Demand. All electronic resources can be accessed from anywhere with an internet connection.

WCCCD participates in interlibrary loan services with DALNET (Detroit Area Library Network) through the Get It Local, which can be accessed through the shared library catalog for all members.

WCCCD also participates in interlibrary loan services with Michigan Electronic Library (MeL Cat), which is a statewide resource sharing system with over 200 participating library.

Contact Information for the LRCs are as follows:

CONTINUING EDUCATION

The School of Continuing Education provides the District with quality services that foster personal enrichment and professional development for individuals and the community to upgrade skills thereby increasing competitiveness. Courses and workshops are offered to assist professionals in maintaining the mandatory continuing education requirements for certification and licensure. Programs are offered to enrich the intellectual, physical, and emotional aspects of an individual regardless of age. The District is committed to the design and delivery of innovative programs and courses that address the diverse needs of business and the community and contribute to the economic development of Wayne County. District goals are achieved through the successful delivery of non-credit programs for special target populations.

The School of Continuing Education and Workforce Development offers diversified, short-term skills training programs designed to provide individuals with the skills necessary for employment, skills upgrade, career advancement, certification/re-certification, and licensure. Some of the occupational-based programs include:

- Advanced computer technology
- Customer service training
- Advanced manufacturing
- Innovative training solutions
- Leadership development
- Measurable training results
- Performance improvement
- Safety and health training

Persons enrolling in Personal Enrichment and Leisure programs offered through the School of Continuing Education are able to enjoy a variety of programs intended for their personal growth and development, and/or the attainment of personal goals, i.e.: fitness and yoga courses, computer training, photography, gardening, cooking, music and dance.

The School of Continuing Education also provides children and youth with the opportunity to enroll in programs designed to assist them with the extra motivation necessary to do well in school, while creating a foundation for continuous life-skills building. Parents may enroll children in courses to strengthen academic and test-taking skills, nurture interests in dance, music, science, mathematics and art, discover new recreational skills or enhance existing ones.

Community members and organizations enrolled in Continuing Education courses that offer special guest lectures, seminars and workshops to address a specific need or topics of interest. Certain programs provide the flexibility of distance learning; allowing program participation online.

DISTANCE LEARNING

The District's distance learning offerings are designed to provide students with greater access to the District's programs and are available to all students. Distance learning opportunities are available through online, hybrid, and Virtual Classroom (also known as Live-Interactive Online (LIO) courses.

Wayne County Community College District's online degree programs provide a convenient, affordable, and flexible way to reach your academic and career goals. Whether it's one class or a degree program, online courses allow you to choose when, where and how you receive your education.

WCCCD offers degree and certificates programs allowing you to conveniently explore your academic interests and discover a fulfilling career path. All of WCCCD's online learning opportunities are fully accredited and offer an engaging educational experience that will help you obtain the knowledge and skills you need to achieve your goals. Currently, students can take a fully online Associate of Arts degree or Accounting Certificate. Talk with your academic advisor for details.

Online Courses: These courses enable students to earn course credit through Internet connections. Students must have access to a computer with an Internet connection and relevant computer peripherals. A majority of online course work occurs in a virtual environment that is accessible 24 hours a day, seven days a week. Most online courses are 100% online. However, some courses require periodic face-to-face sessions.

Hybrid: These courses combine in-person and online delivery. Hybrid courses (also known as blended courses) replace a portion of traditional face-to-face instruction with web-based online learning (e.g., video lectures, online discussions, or activities). The purpose of a hybrid course is to take advantage of the best features of both face-to-face and online learning. Student participation in all modalities of instruction contact is required.

Virtual Classroom: Virtual Classroom (VC) courses, also known as Live-Online courses, meet online at scheduled times. Virtual Classroom courses are for students who prefer to interact with faculty and other students, offering set class time and structure, without the need to come to campus.

For more information concerning any of the District's distance learning opportunities, please contact distancelearning@wcccd.edu.

CATALOG-IN-FORCE

Each student's catalog-in-force for degree or certificate requirements is the College Catalog which is in effect when a student first enrolls in credit courses at Wayne County Community College District.

A student, who has been away from the College for four (4) or more regular semesters, or the last two (2) years, must complete an application for re-admission. Students will follow the Catalog-in-force requirements (degree or certificate program requirements) effective the term the student re-enrolls in credit courses.

For programs that have selective admission, a student's catalog-in-force requirements (degree or certificate program requirements) are those that are in effect the term a student is accepted into the program and enrolls in program courses.

In addition, the District reserves the right to change course offerings and academic requirements as deemed necessary.

DEGREE REQUIREMENTS

Requirements for All Degrees

Candidates applying for an associate degree at Wayne County Community College District must meet the following basic requirements:

- Complete at least 60 credit hours
- A minimum of 15 credits of program requirements at WCCCD
- PS 101 American Government (3 credits)
- Have a minimum grade point average of 2.0 upon completion.

REQUIREMENTS FOR SPECIFIC DEGREES

Associate of Arts (A.A.) Degree

The Associate of Arts (A.A.) degree is designed for students who plan to transfer to a four-year college or university and for those who plan to earn a professional degree. Programs leading to the A.A. degree are designed for students who plan to major in such areas as English, Humanities, or Social Sciences and for students who are preparing for professional programs in areas such as law, journalism, business administration, teaching and computer information systems.

In order to receive the A.A. degree, students must:

1. Complete the "Requirements for All Degrees" as listed in each program
2. Complete the following academic group requirements:

General Education Courses:

English 119 and ENG 120 6 credits
 PS 101 - American Government. 3 credits
 Humanities 9 credits
 Natural Science*. 8 credits
**Natural Science course must include a laboratory*
Social Science. 9 credits

Note: Students must complete a minimum of three (3) courses from the following areas of concentration:

- Anthropology - Philosophy
- Economics - Political Science
- English - Psychology
- History - Sociology
- Mathematics - Speech

Total General Education Credits: . . . 35 credits
 +
 Electives 25 credits

Associate of Arts Degree

Program Total: 60 credits

Associate of Science (A.S.) Degree:

This degree is designed for students who plan to transfer to a four-year college or university with a major in the natural or physical sciences including chemistry, mathematics, biology and physics. Courses leading to an A.S. degree are designed for students enrolled in pre-professional studies for such areas as medicine, dentistry, engineering, dietetics, and environmental and natural resources.

In order to receive the A.S. degree, students must:

1. Complete the "Requirements for All Degrees" as listed in each program
2. Complete the following academic group requirements:

English 119 and ENG 120 6 credits
 PS 101 - American Government. 3 credits
 Humanities 9 credits
 Natural Sciences 20 credits
Social Science. 9 credits

Total General Education Credits: . . . 47 credits
 +
 Electives 13 credits

Associate of Science Degree

Program Total: 60 credits

Note: Humanities, Natural Sciences and Social Science courses must be taken in more than one discipline.

Associate of Applied Science (A.A.S.) Degree:

This degree is designed to prepare students for immediate employment in specialized areas such as mechanical and engineering technologies, health, business and office technologies and human services.

The A.A.S. degree is usually considered for vocational technological and occupational fields leading directly to employment in such areas as nursing, criminal justice, aviation mechanics, child care, gerontology, mental health, addiction studies, drafting or computer technology. However, many WCCCD students with the A.A.S. degree transfer to four-year colleges to continue their education while working.

In order to receive the A.A.S. degree, students must:

1. Complete the "Requirements for All Degrees" as listed in each program
2. Refer to the specific A.A.S. degree program for the required program credits
3. Adhere to the program course requirements for the specific A.A.S. degree desired

Associate of General Studies (A.G.S.) Degree:

This degree program helps students who plan to study a variety of areas without committing themselves to a specific field as they prepare for employment or additional academic work. In order to receive the A.G.S. degree, students must:

1. Complete the "Requirements for All Degrees" as listed in each program
2. Complete the following academic group requirements:

ENG 119 3 credits

Elective: *any English course*

above ENG 119 3 credits

Humanities 3 credits

Mathematics 3 credits

*Natural Science. 3 credits

**ANT 153, DT 130 OR any course from AST, BIO, GEL, CHM, PHY*

PS 101 - American Government. . . 3 credits

Total General Education Credits: . . . 18 credits

+

Electives 42 credits

Associate of General Studies

Degree Program Total. 60 credits

Additional Associate Degrees:

A student who has received an associate degree from WCCCD may obtain an additional associate degree in another area. However, students should seek academic advising before pursuing an additional associate's degree. This provision is subject to the following stipulations:

- For each additional associate degree, a minimum of 15 semester credit hours must be completed at WCCCD. These credit hours may not repeat previously earned credit.
- All academic group requirements for the associate of arts or associate of science degree may be met by credit previously earned, or by credit additionally earned, or both.
- All courses required by any specific program must be completed.
- An additional degree must be within a specific program if the first degree was not.
- Students must complete their last semester at WCCCD.
- Students may not receive a certificate and an associate degree in the same career program within the same semester.

Certificate Requirements (CERT)

Certificate programs are designed for students who are seeking entry-level skills and for those who wish to improve their performance in their present job or who wish to qualify for advancement. These programs are designed to stack your credentials—by upskilling, getting you into the workforce quickly, or working toward an advanced degree. Each program builds toward a higher credential. This means you can stop at the level that's right for you or continue upward.

Students must have a minimum grade point average of 2.0 in the program upon completion to receive a certificate. The specific course requirements are listed in the academic program section of this Catalog. Refer to the table of contents for page listings of certificate programs. In addition, contact the Workforce Development Department at the District for information on specialized certificate training programs offered throughout the academic year.

Short-Term Certificates:

- Certificate of Achievement (ACERT):
less than 16 credits
- Short-Term Certificate (SCERT):
16-29 credits

One-Year Certificates:

- One-Year Certificate (CERT): 30-35 credits

Courses that Satisfy the Academic Group Requirements

The courses listed below may be used to satisfy the English, Humanities, Social Sciences, and Natural Sciences academic group requirements for the following degree programs:

- Associate of Arts
- Associate of Applied Science
- Associate of Science
- Associate of General Studies

Refer to the “Specific Degree Requirements” and the special requirements of your chosen program listed in this catalog to be sure that you select the correct courses.

NOTE: Elective courses may be selected from the list of courses below in addition to the courses listed in the Course Description section of this catalog.

I. Courses that satisfy English requirements:

Options:

ENG 119	English I (required for all degrees plus one other English (ENG) course.) or
ENG 1190	English I
ENG 120	English II (required for the A.A., A.S. and other degree's.)
ENG 134	Technical Communications
ENG 260	Introduction to African-American Literature
ENG 261	African-American Literature in the Twentieth Century
ENG 270	Professional and Technical Report Writing
ENG 280	Creative Writing

II. Courses that satisfy the humanities requirements:

Options:

AAS 253	African-Caribbean Literature
ARA 101	Introduction to Arabic I
ARA 102	Introduction to Arabic II
ART 101	Drawing I
ART 102	Drawing II
ART 103	Drawing III
ART 111	Design I
ART 112	Design II
ART 115	Basic Drawing for Animation
ART 121	Painting I
ART 122	Painting II
ART 123	Painting III
ART 131	Ceramics I
ART 132	Ceramics II
ART 151	Sculpture I
ART 152	Sculpture II
ART 171	Printmaking I
ART 172	Printmaking II
ART 173	Printmaking III
ART 174	Printmaking IV
CHN 101	Introduction to Chinese
ENG 212	Women in Literature
ENG 228	Introduction to Folklore and Mythology

ENG 231	Introduction to Poetry
ENG 232	Introduction to the Novel
ENG 233	Introduction to Drama
ENG 234	The English Bible as Literature
ENG 240	Introduction to Shakespeare
ENG 250	American Literature, 1800-Present
ENG 252	English Literature Across the Centuries
ENG 260	Introduction to African-American Literature
ENG 261	African-American Literature in the Twentieth Century
ENG 266	African-Caribbean Literature
ENG 280	Creative Writing
ENG 285	Children's Literature
ENG 290	Spanish American Literature
ENG 292	Latina Literature-The Past Decade
FRE 101	Elementary French I
FRE 102	Elementary French II
FRE 201	Intermediate French I
FRE 202	Intermediate French II
GRM 101	Elementary German I
GRM 102	Elementary German II
GRM 201	Intermediate German I
GRM 202	Intermediate German II
HUM 101	Introduction to the Visual Arts
HUM 102	Introduction to the Performing Arts
HUM 103	The Art of Humanities
HUM 126	Foundations of African-American Art
HUM 141	Introduction to the Theatre
HUM 211	Music Appreciation
HUM 221	Art Appreciation
HUM 222	Art History
HUM 231	Introduction to Film
HUM 232	Film History
JPN 101	Elementary Japanese I
JPN 102	Elementary Japanese II
MUS 100	Introduction to the Fundamentals of Music
MUS 101	Fundamentals of Music I
MUS 102	Fundamentals of Music II
MUS 121	History of Jazz I
MWS 102	Islamic Civilization
PHL 101	Comparative Religions I
PHL 102	Comparative Religions II

PHL 201	Introduction to Philosophy
PHL 211	Introduction to Logic
PHL 221	Ethics
SPA 101	Elementary Spanish I
SPA 102	Elementary Spanish II
SPA 201	Intermediate Spanish I
SPA 202	Intermediate Spanish II
SPH 101	Fundamentals of Speech
SPH 105	Improving the Speaking Voice
SPH 131	Introduction to Radio, Television and Mass Communications
SPH 201	Advanced Public Speaking

III. Courses that satisfy the natural sciences requirements:

For the A.A. degree and the A.S. degree:

- At least one (1) of the natural sciences must be a laboratory course.
- Mathematics courses numbered 135 or above may be used to meet the non-laboratory natural science requirement.

Options:

Note: + designates a science course with a laboratory

Natural Sciences:

ANT 153	Introduction to Physical Anthropology
AST 101	Astronomy I: New Solar System
BIO 125+	Biology for Non-Science Majors
BIO 151	Human Ecology
BIO 155+	Introductory Biology
BIO 165+	Botany
BIO 175+	Zoology
BIO 240+	Human Anatomy and Physiology I
BIO 250+	Human Anatomy and Physiology II
BIO 252	Pathophysiology
BIO 295+	Microbiology
CHM 105+	Introduction to Chemistry
CHM 136+	General Chemistry I
CHM 145+	General Chemistry II
CHM 155+	Survey of Organic and Biochemistry
CHM 250	Organic Chemistry I
CHM 252	Organic Chemistry II
CHM 255+	Organic Chemistry Lab

DT 130	Fundamentals of Nutrition
GEL 210+	Physical Geology Lecture
PHY 115+	Fundamentals of Physics
PHY 235+	General Physics I
PHY 245+	General Physics II
PHY 265+	Physics for Scientists and Engineers I
PHY 275+	Physics for Scientists and Engineers II

Mathematics:

MAT 135	Quantitative Reasoning
MAT 155	College Algebra
MAT 156	Trigonometry
MAT 171	Analytic Geometry and Calculus I
MAT 172	Analytic Geometry and Calculus II
MAT 271	Analytic Geometry and Calculus III
MAT 272	Linear Algebra
MAT 273	Differential Equations

IV. Courses that satisfy the social sciences requirements:

- At least two courses must be selected from the following academic areas:
 - Anthropology (ANT)
 - Economics (ECO)
 - Geography (GEG 202)
 - History (HIS)
 - Political Science (PS)
 - Psychology (PSY)
 - Sociology (SOC)
- Courses that satisfy the social sciences requirements below must be taken from more than one academic area.

Options:

AAS 131	American Government and the African-American Struggle
AAS 140	The Psychology of the African-American Experience
ANT 152	Introduction to General Anthropology
ANT 154	Introduction to Cultural Anthropology
ANT 201	Urban Life and Culture

ANT 210	Anthropology of Sex and Culture
ECO 101	Principles of Economics I
ECO 102	Principles of Economics II
ECO 232	Consumer Economics
ECO 272	Money and Banking
HIS 151	World Civilization I: Prehistory to 1650
HIS 152	World Civilization II: 1650 to Present
HIS 220	History of Michigan
HIS 230	Patterns of American Life: A Cultural History of 17th to 19th Century America
HIS 249	History of the United States I: 1607-1865
HIS 250	History of the United States II: 1865-Present
MWS 101	Muslim Worldview and Foundations
MWS 103	Global History of Islam
MWS 106	Islam and International Relations
MWS 107	Contemporary Issues in the Muslim World
PS 101	American Government
PS 104	Introduction to Political Science
PS 160	International Politics
PS 235	State and Local Government
PS 275	Public Administration Internship
PSY 101	Introductory Psychology
PSY 202	Human Sexuality
PSY 220	Child Growth and Development
PSY 225	Child Growth and Development with a Practicum
PSY 230	Psychology of Adjustment
PSY 235	Psychology of Adjustment with a Practicum
PSY 250	Psychology of Personality

DEGREE PROGRAMS

ACCOUNTING

Associate of Applied Science Degree: (ACC-AAS)

- College Certificate: (ACC-CERT)

About the Program

The Accounting Associate of Applied Science degree and College Certificate programs prepare students presently employed in the accounting field and for those seeking advancement or those seeking a position in the field immediately upon graduation. Areas where a student may find employment include but are not limited to, auditing, payroll, cost, budget and tax. In addition to the course work in Accounting, the student will complete courses in various other business disciplines and the liberal arts.

This Program Offers:

- Associate of Applied Science: **67** credit hours
- College Certificate: **34** credit hours

Program Goals

- To provide students with a background in the accounting field, an advanced foundation of accounting principles and concepts for entry-level positions with accounting tax services firms, CPA firms and other small businesses
- To prepare students to successfully pass the National Certified Bookkeeping Exam and Individual Income Taxation Enrolled Agent Exam

Program Outcomes

- Demonstrate use of technology, software and integrated computerized accounting software to perform basic accounting and bookkeeping tasks
- Demonstrate proficiency in preparing and processing payroll records and reports in compliance with state and federal requirements

- Competently prepare and analyze financial statements in accordance with generally accepted accounting principles
- Recognize and interpret the fundamentals of Individual Income Taxation (according to Enrolled Agent Exam objectives)
- Apply the Internal Revenue Code as it relates to individual, partnership, and corporation income taxes
- Identify and explain concepts of financial accounting in accordance with the National Certified Bookkeeping Exam objectives
- Balance and reconcile financial information and fundamentals of Individual Income Taxation according to the Enrolled Agent Exam objectives
- Accurately prepare professional financial statements and other reporting documents with a 70% or higher proficiency rate
- Articulate, apply and practice ethical parameters of the profession to include federal and state regulatory guidelines for generally accepted accounting principles

College Certificate Goals

- To provide students, with a foundation in principles and concepts related to the accounting field
- Designed for rapid entry into the workforce while maximizing transfer credit into the Associate of Applied Science Degree in Accounting

College Certificate Outcomes

- Demonstrate use of technology, software and integrated computerized accounting software to perform basic accounting and bookkeeping tasks
- Demonstrate competency in the preparation of financial statements, payroll reports, tax returns and other related financial documents

Admission Requirements

Students are required to do the following:

- Fulfill all WCCCD admission requirements
- Fulfill course placement requirements based on the ACCUPLACER® assessment
- Declare intent to enter the program on WCCCD Admission Application or in the Student Services Office
- Complete an Educational Development Plan (Plan of Work), outlining the student's plan for program completion

ADDICTION STUDIES

- College Certificate: (ADD-CERT)

About the Program

The Addiction Studies College Certificate program prepares graduates to work as entry level professionals in centers and facilities serving persons who are dependent upon addictive substances. Helping individuals, families and communities with challenges of addiction in interpersonal, familial and community problems is the focus of the addiction studies program. This certificate seeks to prepare students to tackle the problems of addiction by teaching them the knowledge and necessary skills to understand and address these issues.

College Certificate Goals

- To prepare students for State of Michigan Certification as a Certified Addictions paraprofessional
- To prepare students to work for organizations and agencies as paraprofessionals to deliver quality helping services to those in need of assistance and support while improving the social functioning and wellbeing of clients
- To enhance career opportunities and advancement in the Behavioral Sciences industry

College Certificate Outcomes

- Meet the educational requirements to become certified by taking the Michigan Certification Board for Addiction Professionals (MCBAP) examination and passing with at least 85% and/or the State of Michigan Social Services Technician examination
- Implement themes of the Social Work Mission while assisting clients
- Navigate through the National Association of Social Workers (NASW) Code of Ethics, while employing the most appropriate ethics
- Learn about various substance abuse, social programs, services, activities, agencies, organizations and institutions that will be useful in advocating and providing services to clients

Admission Requirements

Students are required to do the following:

- Fulfill all WCCCD admission requirements
- Fulfill course placement requirements based on the ACCUPLACER® assessment
- Declare intent to enter the program on WCCCD Admission Application or in the Student Services Office
- Complete an Educational Development Plan (Plan of Work), outlining the student's plan for program completion

AMERICAN SIGN LANGUAGE INTERPRETATION

Associate of Applied Science Degree: (AAS-ASL)

- Short-Term Certificate: (SCERT-ASL)

About the Program

The American Sign Language Interpretation Associate of Applied Science Degree and Short-Term College Certificate program provides language training and cultural enrichment for people who wish to learn American Sign Language and the uniqueness of deaf culture. This program is a complement to other degrees and is particularly useful for parents of deaf children and students pursuing careers such as allied health, nursing, early childhood education and teaching, where clients may be deaf.

This Program Offers:

- Associate of Applied Science: **60** credit hours
- Short-Term Certificate: **28** credit hours

Program Goals

- To teach students the style and semantic concepts of ASL allowing for effective communication with deaf persons in informal settings, human services, health care and other corporate or non-profit sectors
- Enhance the credentials of current ASL professionals for advanced employment opportunities that assign value to skills in ASL and knowledge of the deaf culture
- To prepare students to enter an interpreter training program and successfully pass the ASL certification exam, sponsored by the national licensing association, with a proficiency score of 70% or higher

Program Outcomes

- Describe the structures of ASL to include phonology, morphology syntax and semantics at a 75% proficiency level or higher

- Apply basic language skills to produce American Sign Language in a variety of ways to communicate effectively with deaf adults and children who depend on visual presentations of English for communication
- Demonstrate the appropriate use of classifiers through directionality, word signs, noun placement and non-manual signs with a 75% proficiency level or higher
- Exhibit an awareness, support and respect for ASL as the visual language of the deaf community

Certificate Goals

- To teach students the style and semantic concepts of ASL to allow for effective communication with deaf persons in informal settings, human services, health care and other corporate or non-profit sectors
- Enhance the credentials of current ASL professionals for advanced employment opportunities that assign value to skills in ASL and knowledge of the deaf culture
- To prepare students to enter an interpreter training program and successfully pass the ASL certification exam, sponsored by the national licensing association, with a proficiency score of 70% or higher

Certificate Outcomes

- Describe the structures of ASL to include phonology, morphology syntax and semantics at a 75% proficiency level or higher
- Apply basic language skills to produce American Sign Language in a variety of ways in order to communicate effectively with deaf adults and children who depend on visual presentations of English for communication
- Demonstrate the appropriate use of classifiers through directionality, word signs, noun placement and non-manual signs with a 75% proficiency level or higher

Continued on next page.

ANESTHESIA TECHNOLOGY

Associate of Applied Science Degree: (AT-AAS)

About the Program

The Anesthesia Technology Associate of Applied Science degree program is a six semester program that will prepare students to enter the allied health profession specifically focused on fundamental and advanced clinical procedures. The Anesthesia Technologists is proficient in the acquisition, preparation, and application of various types of equipment required for the delivery of anesthesia care.

This Program Offers:

- Associate of Applied Science: **68** credit hours

Program Goals

- To prepare the student with the knowledge and technical skills to effectively perform as a team member of the anesthesia care unit under the direct supervision of a doctor or registered nurse
- To prepare the anesthesia technology student to proficiently maintain and service equipment by cleaning, sterilizing, assembling, calibrating, testing, troubleshooting, requisitioning and recording of inspections and maintenance. The student will use critical thinking skills to become an intricate member of the anesthesia care team
- To prepare the student to successfully pass the National Certifying Examination for Anesthesia Technologist

Program Outcomes

- Students will be able to demonstrate and apply technical competency as it applies to the Anesthesia Technology profession
- Exhibit proficiency in successfully completing the National Certification Examination for Anesthesia Technologists

- Demonstrate expertise in the application of sterile and aseptic technique
- Model a self-sufficient Anesthesia Technologist who displays positive values, integrity and professionalism
- Recognize and verbalize indications for anesthesia intervention and the associated risks and benefits
- Anticipate the needs of the anesthesia provider to assist with the delivery of patient care
- Demonstrate the ability to maintain and update all relevant anesthesia equipment and troubleshoot as necessary
- Maximize patient safety by facilitating a safe environment

Admission Requirements

Students are required to do the following:

- Fulfill all WCCCD admission requirements
- Be 18 years of age or older and have a high school diploma or GED
- Fulfill course placement requirements based on the ACCUPLACER® assessment
- Declare intent to enroll in the Anesthesia Technology program by submitting an Allied Health Department application and submit to Health Sciences Department
- Must complete criminal background check, physical exam, Hepatitis B, MMR, Varicella, Tetanus, and Tuberculosis shot
- Submit official transcripts from previous institutions
- Valid State Picture I.D.
- Meet with the Program Designee to review and complete paperwork
- Students are allowed two attempts for successful program completion

Continued on next page.

Anesthesia Technology continued

Additional entry requirements for Anesthesia Technology

Grade “C” or better in science courses (NO science course older than 5-years can be transferred into the program)

- Chemistry
- Anatomy and Physiology I and II
- Introduction to Biology

Two reference letters

- If currently working - 1 professional letter (signed and dated) 1 personal letter (signed and dated -not from a relative)
- If not currently employed-2 personal letters (signed and dated -not from relatives) A letter from a current or previous WCCCD faculty member is acceptable
- Attend Pre-Admission Orientation

Prior to starting Clinical Education

Requirements:

- Negative drug screen
- Update tuberculous skin test
- Influenza vaccine (if applicable)

Degree Requirements

Students must complete all core course work with a grade of “C” or better to meet graduation requirements for Anesthesia Technology.

- Core course work grading scale

A = 100 – 95%

B = 94 – 85%

C = 84 – 70%

D = 69 – 60%

E = 59% & Below

- Students should aim to achieve a minimum score of 85% on the mock certification exam.

- Exam will take place in ANE 220
- Exam will be proctored, timed, and challenged through a Blackboard learning shell
- Students must obtain AHA Healthcare Provider Basic Life Support (BLS)/CPR card and Advanced Cardiac Life Support (ACLS) / CPR card – both are provided to the student through programmatic scheduling of courses

*The score of 85% is reflective of the passing score needed to become a national certified anesthesia technologist through the American Society of Anesthesia Technologists and Technicians (ASATT).

Based upon Michigan Law

Students applying for admission to the Anesthesia Technology Program will be subject to a criminal background check, the results of which could preclude an applicant from admission to Wayne County Community College District’s Anesthesia Technology Program on the basis of any of the following: A felony conviction, or conviction for an attempt or conspiracy to commit a felony within the past 15 years. Any misdemeanor conviction involving abuse, neglect, assault, battery or criminal sexual conduct within the past 10 years. Any misdemeanor conviction involving fraud or theft.

A.A.S. PROGRAM TOTAL 68*Note: Program total hours may not include prerequisites.***ANESTHESIA TECHNOLOGY:
ACCELERATED ALTERNATE
DELIVERY**

Associate of Applied Science Degree: (ATAD-AAS)

About the Program

The purpose of the Anesthesia Technology Accelerated Alternate Delivery Associates of Applied Science is to prepare working professionals in the Anesthesia Technology field to sit for the National Certification Examination sponsored by the American Society of Anesthesia Technologists and Technicians, ASATT.

The instructional format for this program is hybrid delivery. The Anesthesia Technologist assists with care of the surgical anesthesia patient before, during and after surgery as a member of the anesthesia care team (Anesthesiologist, Certified Registered Nurse Anesthetist, Anesthesia Technician, Anesthesia Technologist, Anesthesia Assistant, Surgeon, Surgical First Assist, Surgical Technologist, Registered Nurse, and other surgical personnel). The Anesthesia Technologist is proficient in the acquisition, preparation, and application of various types of equipment required for the delivery of anesthesia care.

This Program Offers

- Associate of Applied Science: 60 credit hours

Program Goals

- To prepare the student with the knowledge and technical skills to effectively perform as a team member of the anesthesia care unit under the direct supervision of an anesthesiologist or certified registered nurse anesthetist.
- To prepare the anesthesia technology student to proficiently maintain and service equipment by cleaning, sterilizing, assembling, calibrating, testing, troubleshooting, requisitioning, and recording of inspections and maintenance. The student will use critical thinking skills to become an intricate member of the anesthesia care team.

Continued on next page.

*Anesthesia Technology:
Accelerated Alternate Delivery continued*

- To prepare the student to successfully pass the National Certifying Examination for Anesthesia Technologist sponsored by the American Society of Anesthesia Technologists and Technicians, ASATT.

Program Outcomes

- Students will be able to demonstrate and apply technical competency as it applies to the anesthesia technologist profession.
- Exhibit proficiency in successfully completing the National Certifying Examination for Anesthesia Technologists with an 80% or better proficiency rate.
- Demonstrate expertise in the application of sterile and aseptic technique.
- Apply principles of pharmacology as related to the Anesthesia Technologist and the surgical patient.
- Demonstrate critical thinking skills during peri-operative procedural management according to the facility policies, procedures, and anesthesia preferences.
- Perform competently in the Anesthesia Technologist role in accordance with American Society of Anesthesia Technologist and Technicians standards.
- Maximize patient safety by facilitating a safe surgical / anesthesia environment
- Demonstrate self-direction and responsibility for maintaining anesthesia competency and patient safety.
- Effectively use written, oral, and interpersonal communication skills operating as a member of a diverse team of medical professionals.
- Incorporate safety principles, practices and standards as governed by the profession baccalaureate institution
- Model a self-sufficient Anesthesia Technologist who displays positive values, integrity, and professionalism.

- Recognize and verbalize indications for anesthesia intervention and the associated risks and benefits.
- Anticipate the needs of the anesthesia provider to assist with the delivery of safe patient care.
- Demonstrate the ability to maintain and update all relevant anesthesia equipment and troubleshoot, as necessary.

Admission Requirements

An applicant for Anesthesia Technology Accelerated Alternate Delivery (AAD) Program is required to:

- Apply to WCCCD for college admission.
- Complete a WCCCD Health Science Program Application and submit to the Campus Academic Officer.
- Be 18 years of age or older and have a high school diploma or GED.
- Fulfill course placement requirement based on ACCUPLACER assessment.
- Submit official transcripts from previous institutions of higher education.
- Valid state picture I.D.
- Meet with Program Dean to review and complete appropriate paperwork.
- Students will only be provided two attempts for successful program completion.

Programmatic Admission / Portfolio Requirements

- Valid and current AHA-BLS (Provider) card.
- Current ASATT Membership.
- All science courses (biology, chemistry, anatomy and physiology I and II) must be taken within the previous five-years when transferring the credit(s) into the anesthesia technology program.
- Complete criminal background check (paid for by student).
- Physical exam / assessment by primary care physician (PCP).

- Provide documentation of the following vaccines:
 - Hepatitis B • MMR
 - Varicella • Tetanus
 - Seasonal Flu
- Negative Tuberculosis examination – tested within previous 12-months
 - Negative chest x-ray (CXR) may also be provided.
- Two reference letters (should speak of your character and why you should be considered for entry)
 - 1 professional letter (examples include)
 - Chief or Co-Chief Anesthesiologist
 - Chief or Co-Chief CRNA
 - Staff Anesthesiologist
 - Staff CRNA
 - Chief Anesthesia Technologist / Technician
 - Operating Room Director
 - Education Director that has worked closely with you over the years.
 - 1 personal letter (examples include)
This letter should come from someone that you've worked with over the years.
 - Surgical Technologist
 - Registered Nurse
 - Central Processing Technician
 - Pharmacist(s)
 - Volunteer Organization Leader / Member
 - Church Congregation Member
 - Educational Leader
- Negative Urine Drug Screening
 - This will be completed and submitted before attending clinical education for graduate checkoffs.
- Submit documentation verifying clinical experiences for at least 300 anesthesia surgical procedures in the anesthesia technician role. Upon submission of the documentation, a student will prepare the appropriate paperwork so that experiential credit can be granted as part of the AAD curriculum. Credit will be recorded on the student's academic record, without grade as follows:
 - Anesthesia Technologist (ANE) 200 – Anesthesia Technology Clinical I – 4 credit hours, and 240 contact hours. Experiential learning credit is given to a student that has worked in the role as an Anesthesia Technician with worked hours between 6240 (ambulatory surgery), 4160 hours within level 2 trauma, or 2080 hours in level 1 trauma.
 - Anesthesia Technologist (ANE) 210 – Anesthesia Technology Clinical II – 4 credit hours, and 240 contact hours. Experiential learning credit is given to a student that has worked in the role as an Anesthesia Technician with worked hours between 6240 (ambulatory surgery), 4160 hours within level 2 trauma, or 2080 hours in level 1 trauma.
 - Anesthesia Technologist (ANE) 230 – Anesthesia Technology Clinical Education – 180 contact hours. Experiential learning credit is given to a student that has worked in the role as an Anesthesia Technician with worked hours between 6240 (ambulatory surgery), 4160 hours within level 2 trauma, or 2080 hours in level 1 trauma.
 - Students must complete 180 hours of clinical experience time, outside of their “home” or “employer” facility.
 - This unbiased approach will provide exceptional opportunities for the student so he/she can showcase their skills and education gained throughout the program.

Continued on next page.

*Anesthesia Technology:
Accelerated Alternate Delivery continued*

- Students must complete all core course work with a grade of “C” or better to meet graduation requirements Anesthesia Technology AAD program.
 - Anesthesia Technology Course Grading Scale
 - A = 100 – 95%
 - B = 94 – 85%
 - C = 84 – 70%
 - D = 69 – 60%
 - E = 59% and Below
 - Students should aim to achieve a minimum score of 85% on the mock certification exam.
 - Exam will take place in ANE 220.
 - Exam will be proctored, timed, and challenged through a Blackboard learning shell.
 - Student must obtain American Heart Association Advanced Cardiac Life Support (ACLS). This training will be provided by the college at no additional cost to the student. This course has been incorporated into the ANE 230 Clinical course.
- *The score of 85% is reflective of the passing score needed to become national certified anesthesia technologist through the American Society of Anesthesia Technologists and Technicians (ASATT).

Based upon Michigan Law

Students applying for admission to the Anesthesia Technology Program will be subject to a criminal background check, the results of which could preclude an applicant from admission to Wayne County Community College District’s Anesthesia Technology Program based on any of the following: A felony conviction, or conviction for an attempt or conspiracy to commit a felony within the past 15 years. Any misdemeanor conviction involving abuse, neglect, assault, battery, or criminal sexual conduct within the past 10 years. Any misdemeanor conviction involving fraud or theft.

ASSOCIATE OF ARTS - A.A.

Associate of Arts Degree: (AA)

About the Program

The District offers a two-year course of study leading to the Associate of Arts degree. This degree is designed for students who plan to complete their first two years of college at Wayne County Community College District and transfer to a baccalaureate degree granting institution. Programs leading to the A.A. degree are designed for students who plan to major in such areas as performing arts, English, humanities or the social sciences. It is also for students who are preparing for professional programs in areas such as law, journalism, business administration, teaching and computer information systems.

Program Goals

- To provide a general foundation for associate of arts studies as the precursor to a declared four-year degree

Program Outcomes

- To successfully complete the Associate of Arts program with a "C" average or higher as a foundation to transfer to a four-year baccalaureate institution

Degree Requirements

- The Associate of Arts degree consists of a minimum of sixty (60) semester hours of credit, of which fifteen (15) must be earned at WCCCD
- Thirty-five (35) credit hours are used to satisfy the general education and academic group requirements
- Twenty-five (25) credit hours are needed to satisfy the elective requirements
- Consult a transfer coordinator at the campus for course requirement advising

Students are required to complete:

A total of twenty-five (25) elective credit hours, including a minimum of three (3) courses in one of the following areas of concentration:

- Humanities
- English
- Speech
- Social Science
- African-American Studies
- Anthropology
- Economics
- Sociology
- Life and Physical Science
- Mathematics
- Human and Community Development
- Philosophy
- Psychology

Associate of General Studies Degree: (AGS)

About the Program

The Associate of General Studies degree program helps students who plan to study a variety of areas without committing themselves to a specific field as they prepare for employment or additional academic work.

Program Goals

- To provide a general foundation of liberal arts studies as the precursor for a declared four year baccalaureate degree

Program Outcomes

- To successfully complete the Associate of General Studies degree program of study with a "C" average or higher as a foundation to transfer to a four-year baccalaureate institution

Degree Requirements

- The Associate of General Studies degree consists of a minimum of sixty (60) credit hours, of which fifteen (15) must be earned at WCCCD
- Complete the "Requirements for All Degrees"
- Complete all academic group requirements
- Must complete at least twenty-six (26) credit hours with an overall GPA of 2.0

AUTO BODY TECHNOLOGY

Associates of Applied Science Degree: (ABT-AAS)

• College Certificate: (ABT-CERT)

About the Program

The Auto Body Technology Associate of Applied Science degree is designed to provide students with in-depth instruction in the field of Automotive Body Paint and Repair. The Auto Body Technology Program is designed to develop qualified technicians who can diagnose, repair and service the body and finish work of automobiles. The program provides opportunities for students to develop their skills and competencies for positions such as Automotive Painter, Auto Body Paint and Repair Technician, Collision Repair Technician, Glazier (glass repair specialist), as well as self-employment in the Auto Body and Auto Collision repair field. The program prepares students for Automotive Service Excellence (ASE) and State of Michigan certifications in Damage Repair and Refinishing, and Damage Analysis and Estimating.

This Program Offers:

- Associates of Applied Science: **62** credit hours
- College Certificate: **36** credit hours

College Certificate Goals

- To prepare students for employment in the auto body paint and repair technology industry through applied knowledge of automotive paint, refinishing and repair equipment
- To teach students the basic principles of auto body technology safety as it applies to tools and equipment operations
- To prepare students for individual credentialing by recognized skill standards established by the Automotive Service Excellence (ASE)

College Certificate Outcomes

- Students will be able to develop a competency in the use of appropriate tools and equipment to provide painting and basic repair services according to industry standards in a safe manner

- Students will be able to demonstrate basic math and English competency as required in the auto body field especially as it relates to Damage Analysis/Estimating/Customer Service
- Students will be able to work independently and professionally as a member of an automotive body technology team
- Students will be able to obtain individual credentialing through the National Institute for Automotive Service Excellence (ASE)

Program Goals

- To prepare students for employment in the auto body paint and repair technology industry through applied knowledge of automotive paint, refinishing and repair equipment
- To teach students the basic principles of auto body technology safety as it applies to tools and equipment operations
- To provide basic welding skills used in the auto body repair industry
- To prepare students for individual credentialing by recognized skill standards established by the National Institute for Automotive Service Excellence (ASE)

Program Outcomes

- Students will be able to develop a competency in the use of appropriate tools and equipment to provide painting and basic repair services according to industry standards in a safe manner
- Students will be able to demonstrate basic Math, Science and English competency as required in the auto body field especially as it relates to Damage Analysis/Estimating/Customer Service
- Students will be able to demonstrate commonly utilized welding practices in the Auto Body Repair field
- Students will be able to work independently and professionally as a member of an automotive body technology team

Continued on next page.

Auto Body Technology continued

- Students will be able to obtain individual credentialing through the National Institute for Automotive Service Excellence (ASE)

Admission Requirements

Students are required to do the following:

- Fulfill all WCCCD admission requirements
- Fulfill course placement requirements based on the ACCUPLACER® assessment
- Declare intent to enter the program on WCCCD Admission Application or in the Student Services Office
- Complete an Educational Development Plan (Plan of Work), outlining the student's plan for program completion

AUTOMOTIVE SERVICE TECHNOLOGY (ASE-EF MASTER)

Associate of Applied Science Degree: (AST-AAS)

- College Certificate: (AST-CERT)
- Short-Term Certificates:
 - Automatic Transmission and Transaxle (SCERT-AUTO)
 - Brakes (SCERT-BRKS)
 - Engine Performance (SCERT-EP)
 - Engine Repair (SCERT-E/REP)
 - Heating and Air Conditioning (SCERT-HAC)
 - Manual Drive Train and Axle (SCERT-MDTRN)
 - Suspension and Steering (SCERT-SUSP)
- Certificate of Achievement:
 - Electrical/Electronic Systems (ACERT-EES)

About the Program

The Automotive Service Technology Associate of Applied Science degree and College Certificate programs are designed to develop qualified technicians to diagnose, repair and service modern automobiles. The programs provide opportunities for the student to develop their skills and competencies for entry-level positions such as automotive technician, service manager, parts manager, product test technician and self-employment. The programs prepare students for Automotive Service Excellence (ASE) and State of Michigan certifications for any of the eight (8) automotive areas or “Master” certification.

The instruction, curriculum, facilities and equipment for this program have been evaluated by the ASE Education Foundation (ASE-EF) and the District received accreditation from the National Institute for Automotive Service Excellence (ASE) in the following areas:

- Automatic Transmission and Transaxle (SCERT-AUTO)
- Brakes (SCERT-BRKS)
- Electrical/Electronic Systems (ACERT-EES)
- Engine Performance (SCERT-EP)

- Engine Repair (SCERT-E/REP)
- Heating and Air Conditioning (SCERT-HAC)
- Manual Drive Train and Axle (SCERT-MDTRN)
- Suspension and Steering (SCERT-SUSP)

This Program Offers:

- Associate of Applied Science: **64** credit hours
- College Certificate: **30** credit hours

Short-Term Certificates:

- Automatic Transmission and Transaxle: **19** credit hours
- Brakes: **18** credit hours
- Engine Performance: **24** credit hours
- Engine Repair: **19** credit hours
- Heating and Air Conditioning: **18** credit hours
- Manual Drive Train and Axle: **17** credit hours
- Suspension and Steering: **17** credit hours

Certificate of Achievement:

- Electrical/Electronic Systems: **12** credit hours

**See schedule for short-term sequencing offerings*

Program Goals

- To prepare students for employment in the auto service industry through applied knowledge of automotive technology machinery, software and its applications.
- To teach students the basic principles of automotive technology safety as it applies to tool and equipment operations
- To prepare students for individual credentialing by recognized skill standards established by the ASE Education Foundation (ASE-EF)
- To prepare students for individual credentialing by recognized skill standards established by the State of Michigan certifications of any of the eight (8) automotive areas and/or “Master” certification

Continued on next page.

*Automotive Service Technology continued***Program Outcomes**

- Students will be able to demonstrate basic math and use of appropriate tools and equipment to perform maintenance and basic repair services according to industry standards in a safe manner
- Diagnose and perform basic mechanical and electrical repairs using appropriate tools and equipment according to industry standards in a safe manner
- Work independently and professionally as a member of an automotive service technology team
- Students will be able to obtain individual credentialing through the National Institute for Automotive Service Excellence (ASE) with a cut score or better proficiency rate established by the industry association
- Students will be able to obtain individual credentialing in any of the eight (8) automotive areas and/or “Master” certification by the State of Michigan with a 70% or better proficiency rate

Admission Requirements

Students are required to do the following:

- Fulfill all WCCCD admission requirements
- Declare intent to enter the Automotive Service Technology Program on the WCCCD Application for Admissions or change intent at the admissions office
- Fulfill course placement requirements based on the ACCUPLACER® assessment
- Complete a WCCCD Program Application during the semester they are enrolled in AUT 114 - Electrical/Electronics Systems I course, and then submit the application to the Campus Academic and Student Services Officers

AVIATION MECHANICS: AIRFRAME

Associate of Applied Science Degree: (AMAF-AAS)

- College Certificate: (AMAF-CERT)

About the Program

The Aviation Mechanics Associate of Applied Science and College Certificate degree program offer two options: Airframe and Powerplant. Courses are conducted in partnership with the Michigan Institute of Aviation Technology (MIAT). Successful completers will be granted credit toward the Associate of Applied Science degree.

The program is designed to prepare students for entry into a variety of occupations, which require competence in the two basic areas of airframe and powerplant technology. Students completing the college certificate or the Associate of Applied Science Degree program will be qualified to obtain a Federal Aviation Administration (FAA) Certificate to be licensed as an airframe or powerplant technician. Students seeking career advancement in the field or transfer to a four-year institution should elect the Association of Applied Science Degree. Students who wish to prepare only for the FAA license should select the Certificate.

This Program Offers:

- Associate of Applied Science: Mechanics
Airframe: 97 credit hours
- College Certificate: Airframe Aviation
Technician: 48 credit hours

Airframe Certificate Goals

- To teach and prepare students for individual certificate credentialing by the Federal Aviation Administration (FAA) to be licensed as an airframe technician
- To teach students the basic principles of aviation mechanical safety as it applies to airframe and/or powerplant repair

Airframe Certificate Outcomes

- Students will be able to demonstrate an applied understanding of the basic principles to analyze, troubleshoot and repair servicing systems of the airframe

Airframe Program Goals

- To teach and prepare students for individual certificate credentialing by the Federal Aviation Administration (FAA) to be licensed as an airframe technician
- To teach students the basic principles of aviation mechanical safety as it applies to airframe repair

Airframe Program Outcomes

- Students will demonstrate an understanding of and proficiency in the basic principles to analyze, troubleshoot and repair servicing all systems of the airframe to include; nonmetallic, sheet metal, wood, fabric and finishing coverings, aircraft welding, communication and navigation systems, electrical, hydraulics, pneumatic lines and fittings systems, landing gear systems, position and warning systems, instrument, cabin atmosphere control systems, fuel, ice, rain control and fire protection systems
- Demonstrate proficiency in performing aircraft weight and balance, major and minor repairs and alterations, cleaning and corrosion control and ground operations
- Demonstrate an applied understanding of basic math concepts and use of appropriate tools and equipment to perform maintenance and repair services in accordance with the federal aviation industry standards and guidelines
- Demonstrate proficiency in completing
- To prepare students for individual credentialing by the Federal Aviation Administration (FAA) general airframe written, oral and practical exams with a 70% or better proficiency rate and attain a mechanics certificate with airframe ratings

Admission Requirements

Students are required to do the following:

- Fulfill all WCCCD admission requirements
- Fulfill course placement requirements based on the ACCUPLACER® assessment
- Declare intent to enter the program on WCCCD Admission Application or in the Student Services Office
- Complete an Educational Development Plan (Plan of Work), outlining the student’s plan for program completion

AVIATION MECHANICS: POWERPLANT

Associate of Applied Science Degree: (AMP-AAS)

- College Certificate: (AMP-CERT)

About the Program

The Aviation Mechanics Associate of Applied Science and College Certificate degree program offers two options: Airframe and Powerplant. Courses are conducted in partnership with the Michigan Institute of Aviation Technology (MIAT). Successful completers will be granted credit toward the Associate of Applied Science degree.

The program is designed to prepare students for entry into a variety of occupations, which require competence in the two basic areas of airframe and powerplant technology. Students completing the college certificate or the Associate of Applied Science Degree program will be qualified to obtain a Federal Aviation Administration (FAA) Certificate to be licensed as an airframe or powerplant technician. Students seeking career advancement in the field or transfer to a four-year institution should elect the Association of Applied Science Degree. Students who wish to prepare only for the FAA license should select the Certificate.

This Program Offers:

- Associate of Applied Science: Mechanical Powerplant: 27 credit hours
- College Certificate: Powerplant Aviation Technician: 48 credit hours

Powerplant Program Goals

- To teach and prepare students for individual credentialing by the Federal Aviation Administration (FAA) to be licensed as a powerplant technician
- To teach students the basic principles of aviation mechanical safety as it applies to airframe and powerplant repair

Powerplant Program Outcomes

- Students will demonstrate proficiency in analyzing, troubleshooting and repair servicing all systems of the powerplant to include; reciprocating and turbine engines, auxiliary power units, instruments, fire protection systems, electrical systems, cleaning and lubrication systems, fuel metering and fuel systems, ignition, starting and systems, cooling induction systems, exhaust and reverser systems and propeller and unducted fans
- Demonstrate proficiency in performing aircraft weight and balance, major and minor repairs and alterations, cleaning and corrosion control and ground operations
- Demonstrate advanced math concepts and use of appropriate tools and equipment to perform powerplant maintenance and repair services in accordance with the federal aviation industry standards and guidelines
- Identify, describe and proficiently complete powerplant maintenance forms and records
- To prepare students for individual credentialing by the Federal Aviation Administration (FAA) General Powerplant written, oral and practical exams with a 70% or better proficiency rate and attain a mechanics certificate with powerplant ratings

Powerplant Certificate Goals

- To teach and prepare students for individual certificate credentialing by the Federal Aviation Administration (FAA) to be licensed as an airframe technician
- To teach students the basic principles of aviation mechanical safety as it applies to airframe and/or powerplant repair

Powerplant Certificate Outcomes

- Students will be able to demonstrate an applied understanding of the basic principles to analyze, troubleshoot and repair servicing systems of the powerplant

Admission Requirements

Students are required to do the following:

- Fulfill all WCCCD admission requirements
- Fulfill course placement requirements based on the ACCUPLACER® assessment
- Declare intent to enter the program on WCCCD Admission Application or in the Student Services Office
- Complete an Educational Development Plan (Plan of Work), outlining the student’s plan for program completion

BIO-MEDICAL EQUIPMENT REPAIR TECHNOLOGY

Associate of Applied Science Degree: (BET-AAS)

About the Program

The Bio-Medical Equipment Repair Technology Associate of Applied Science degree program is designed to provide students with in-depth knowledge of high technology equipment used in hospitals, clinics and in the offices of medical doctors. Health care facilities today depend heavily on technology to diagnose, monitor and treat diseases. The equipment and technology utilized are intended to improve the quality of healthcare. The medical community must rely on the skills of Bio-Medical Equipment Repair Technicians to maintain their equipment. The students in the program will benefit by gaining skills to make themselves competitive in the employment market as trends continue to require more technological training in the healthcare field. Their tasks include functional and safety inspections, preventive maintenance, calibration, troubleshooting, equipment repair, and the training of hospital personnel in the safe and proper use of the equipment.

This Program Offers:

- Associate of Applied Science: **61** credit hours

Program Goals

- The Bio-Medical Equipment Repair Technology program will provide the skills and training necessary for students to understand and preserve medical electronic equipment to prepare students to initiate functional and safety inspections, preventive maintenance, calibration, troubleshooting, equipment repair, and the training of hospital personnel in the safe and proper use of Bio-Medical equipment
- Prepare students to successfully pass the ICC Certification exam for the Bio-Medical Equipment Technician (BMET) with a proficiency of 70% or higher

- Provide transferability to four-year universities offering BS in electrical electronics, engineering technology and vocational teaching certificates, students may replace EE 107 and EE 115 with MAT 155 and MAT 156

Program Outcomes

- Demonstrate knowledge of techniques, skills, and modern tools used within Bio-Medical Equipment industry
- Apply creativity in the design of systems, components, and processes appropriate to program objectives
- Function effectively as part of a team and communicate effectively with clients
- Identify, analyze, troubleshoot and repair hardware and software problems of bio-medical equipment
- Recognize the need for lifelong learning and upgraded certifications in the field
- Understand professional, ethical, and social responsibilities of working in the health care field
- Repair, maintain, install, upgrade, layout and modify electrical/electronics of bio-medical equipment

Admission Requirements

Students are required to do the following:

- Fulfill all WCCCD admission requirements
- Declare intent to enter the program on WCCCD Admission Application or in the Student Services Office
- Complete an Educational Development Plan (Plan of Work), outlining the student's plan for program completion
- Students must declare intent to enter the Bio-Medical Equipment Repair Technology program and complete a WCCCD Program Application and submit to the Campus Chief Academic Officer
- Fulfill course placement requirements based on the ACCUPLACER® assessment

BOOKKEEPING

- Short-Term Certificate: (SCERT-BOK)

About the Program

The Bookkeeping Short-Term Certificate is designed to provide students with in-depth instruction in the field of Accounting with a concentration in Bookkeeping. The program covers the foundational knowledge and skills needed to help process a company's business transactions. The curriculum focuses on the role of accounting in business and management. Students will encounter real-world scenarios where they will use accounting information resources and systems, and present conclusions based on accounting and business data. Additionally, students will use ledgers, journals, and worksheets to complete formal, informal, and quantitative accounting tasks.

Students successfully completing this short-term certificate in Bookkeeping may sit for one of two national Bookkeeper certification exams. Certification is not required, however holding a national certification may increase employment opportunities.

1. The National Association of Certified Professional Bookkeepers: administers the Uniform Bookkeeper Certification Exam.
2. The American Institute of Professional Bookkeepers: administers the Certified Bookkeepers Exam. Candidates for this certification must document at least two years of full-time work experience as a condition for meeting certification requirements.

This Program Offers:

- Short-Term Certificate: **20** credit hours

Certificate Goals

- To learn the skills necessary for employment in the field of accounting in an entry-level position such as Bookkeeper, Accounting Associate or similar position and title
- To teach students to comprehend, apply and integrate the basic principles of accounting
- To prepare students to use accounting and business terminology as well as effective communication skills

Certificate Outcomes

- Perform all phases of the accounting cycle using manual and computerized systems
- Create and communicate written accounting reports for internal and/or external constituents
- Perform specialized accounting functions such as cost, tax and payroll accounting
- Demonstrate accounting skill and knowledge
- Operate software to record, store and analyze accounting data and generate reports
- Check figures, postings and documents for correct entry and mathematical accuracy

Admission Requirements

Students are required to do the following:

- Fulfill all WCCCD admission requirements
- Fulfill course placement requirements based on the ACCUPLACER® assessment
- Declare intent to enter the program on WCCCD Admission Application or in the Student Services Office
- Complete an Educational Development Plan (Plan of Work), outlining the student's plan for program completion

BUSINESS ADMINISTRATION

Associate of Arts Degree: (BAD-AA)

Associate of Applied Science Degree: (BAD-AAS)

• Certificate of Achievement: (BAD-ACERT)

About the Program

The Business Administration Associate of Arts and Associate of Applied Science degree programs are suitable for students presently employed in business and industry and seeking advancement, those seeking such a position immediately upon graduation and those anticipating transfer to a four-year institution. The student will complete a core liberal arts and business courses. Those anticipating transfer should coordinate their studies with the transfer policies of the institutions to which they intend to transfer. In some instances, these students may find it more advantageous to pursue a more general associate degree.

This Program Offers:

- Associate of Arts Degree: **62** credit hours
- Associate of Applied Science: **61** credit hours

Certificates Offered:

- Business Administration: Retail Management Short-Term Certificate (RTM-SCERT): **24** credit hours
- Business Administration: Business Supervisor Certificate of Achievement (BAD-ACERT): **12** credits

Program Goals

- To teach and provide a general foundation of the field of business administration as a precursor for a declared four-year degree

Program Outcomes

- Employ effective oral, written and presentational techniques consistent with the

Continued on next page.

Business Administration continued

- Demonstrate and apply ethical values, global awareness and technological skills to identified problems and issues making appropriate decisions related to business problems
- Assess, identify and apply critical thinking skills to formulate viable solutions to business problems by using basic accounting, business and financial concepts
- Proficiently articulate and communicate business information and data utilizing word processing, spreadsheet applications, slide presentations and database software

Admission Requirements

Students are required to do the following:

- Fulfill all WCCCD admission requirements
- Fulfill course placement requirements based on the ACCUPLACER® assessment
- Declare intent to enter the program on WCCCD Admission Application or in the Student Services Office
- Complete an Educational Development Plan (Plan of Work), outlining the student's plan for program completion

BUSINESS ADMINISTRATION: RETAIL MANAGEMENT

- Short-Term Certificate (RTM-SCERT)

About the Program

The Retail Management Short-Term Certificate is designed to prepare students for career opportunities and upward mobility in the retail industry.

This Program Offers:

- Short-Term Certificate: **24** credit hours

Certificate Goals

The goal of the Retail Management Certificate is to create a career pathway for students interested in management careers in the retail industry. Students will learn the most relevant, in-demand skills that will lead to career advancement and increased wages

Certificate Outcomes

- Demonstrate effective written and interpersonal communication skills
- Demonstrate a high level of inquiry, analytical, and problem-solving skills
- Demonstrate computer and information literacy
- Discuss topics such as budgets and financial statements
- Explain the management function and apply it to business organization

Admission Requirements

Students are required to do the following:

- Fulfill all WCCCD admission requirements
- Fulfill course placement requirements based on the ACCUPLACER® assessment
- Declare intent to enter the program on WCCCD Admission Application or in the Student Services Office
- Complete an Educational Development Plan (Plan of Work), outlining the student's plan for program completion

BUSINESS ANALYTICS

- College Certificate: (CERT-BAN)

About the Program

This Business Analytics College Certificate is designed to provide students with in-depth instruction and prepares students for entry-level. Business Analytics positions requiring knowledge, setup and usage of business intelligence and data analysis solutions. Business Analytics is expanding in businesses, government agencies and not-for-profit organizations, enabling professionals to make better decisions utilizing appropriate data and information. Students will have the ability to structure data and prepare reports in a way that is meaningful to business decision makers. Course work will include database concepts, data modeling, SQL, data analysis, data mining tools, mathematical and statistical techniques, project management and systems analysis. Emphasis is placed on strong communication skills necessary to interact with key users and understand their requirements.

This Program Offers:

- College Certificate: **33** credit hours

Certificate Goals

- The goal of the program is to prepare data specialists who understand the fundamentals of business analytics, are able to effectively analyze data in the digital realm, and apply digital analytics to pricing and marketing campaigns. Program participants will be prepared to successfully take the industry recognized Certified Data Science Associate Certification.

Certificate Outcomes

- Understand how and why digital analytics is an essential component of any successful business strategy
- Be able to develop a framework for quantifying the returns on social media and digital marketing
- Understand and be able to demonstrate the uses of cross-platform and cross-device effects in digital attribution analyses

- Integrate data from the mobile landscape and use key metrics in the development of a mobile marketing/social media strategy
- Demonstrate how to extract business intelligence from social listening tools

Admission Requirements

Students are required to do the following:

- Fulfill all WCCCD admission requirements
- Fulfill course placement requirements based on the ACCUPLACER® assessment
- Declare intent to enter the program on WCCCD Admission Application or in the Student Services Office
- Complete an Educational Development Plan (Plan of Work), outlining the student's plan for program completion

BUSINESS ANALYTICS: ARTIFICIAL INTELLIGENCE PROMPT ENGINEERING

- College Certificate (SCERT-BAI)

About the Program

The Foundations of AI in Business Analytics Program provides the broad-based knowledge of the underlying concepts of integrating AI within the context of business analytics, appealing to professionals and students interested in leveraging AI tools to enhance data-driven decision-making. As organizations increasingly rely on AI for business solutions to stay competitive, this certificate equips students with the expertise needed to meet evolving demand.

This Program Offers the fundamental skills required to design, implement, and manage AI solutions for business.

This Program Offers:

- College Certificate (SCERT): 19-20 credit hours

Certificate Goals

- To have a fundamental understanding of artificial intelligence, its history, and its significance in contemporary society.
- Understand the basics of machine learning, including supervised and unsupervised learning, and enable them to implement and evaluate machine-learning models.
- Students will understand the role of data, data warehousing, data analysis and the importance of Big Data use to the business owner.
- Students will know the various career paths in Business Analytics and know how to be a contributor on a data analysis team.
- Demonstrate comfort and familiarity with relevant software tools such as R, Hadoop and MapReduce.

- Practice Python and related data manipulation programs
- Articulate a basic understanding of machine learning concepts and its use in passive data generation

Certificate Outcomes

Upon successful completion of this course, the student shall be able to:

- Demonstrate fundamental understanding of the history of artificial intelligence (AI) and its foundations.
- Apply basic principles of AI in solutions that require problem solving, inference, perception, knowledge representation, and learning.
- Demonstrate awareness and a fundamental understanding of various applications of AI techniques in intelligent agents, expert systems, artificial neural networks and other machine learning models.
- Demonstrate proficiency developing applications in an AI language, expert system shell, or data mining tool.
- Demonstrate proficiency in applying scientific method to models of machine learning.
- Demonstrate an ability to share in discussions of AI, its current scope and limitations, and societal implications.

Admission Requirements

To be admitted into the Computer Information Systems Program students must:

- Fulfill all WCCCD admission requirements.
- Declare intent to enter the program on WCCCD Admission Application or in the Student Services Office.

CIVIL TESTING AND
INSPECTION TECHNICIAN

- Associate of Applied Science Degree (CIV-AAS)
- College Certificate: (CIV-CERT)
 - Short-Term Certificate (CIV-SCERT)

About the Program

The Civil Testing and Inspection Technician Program prepares students to carry out inspection and testing tasks in the construction of the infrastructure including highways, roads, bridges, airports, and railroads. This coursework prepares students to read and interpret civil engineering work site construction design drawings and specifications for municipal sector infrastructure improvement projects including roadway resurfacing and reconstruction, as well as storm sanitary, and water main improvement/replacement projects. Upon completion, students may have the opportunity to obtain a nationally recognized certificate.

- This Program Offers:**
- Associate of Applied Science: **63** credit hours
 - College Certificate: **35** credit hours
 - Certificate of Achievement: **10** credit hours

- Program Goals**
- The goal of the Civil Testing and Inspection Technician Program is to create a career pathway for students interested in the horizontal construction industry.

- Program Outcomes**
- Students will be able to demonstrate the civil testing and inspection process
 - Demonstrate effective use of interpersonal skills
 - Demonstrate analytical and problem-solving skills
 - Demonstrate computer skills in software designed for civil testing/inspection
 - Demonstrate project management skills

Continued on next page.

COMPUTER AIDED DESIGN

Associate of Applied Science Degree: (ICGT-AAS)

• College Certificate: (ICGT-CERT)

About the Program

The Computer Aided Design program provides students with career-based training in mechanical design using computer-aided drafting/design technology. To provide the necessary technical education base, the program also includes education and training in applied technical mathematics, engineering drawing, and geometric dimensioning and tolerance skills. Basic training in computer technology is included to prepare students for the two-dimensional, three-dimensional and solid modeling computer-aided design technology in the program.

All technical manufacturing and engineering design in today's high-technology business and industry uses computer-based, computer-aided design technologies that integrate the design, engineering and manufacturing design analysis, and manufacturing of complex products and product parts, subassemblies, and assemblies into a single, technically coherent process.

The Computer Aided Design Technology program provides the skills and knowledge required for entry-level employment in industrial drafting, computer-aided drafting, and mechanical design fields. Emphasis is placed on the applications, procedures and techniques of principles involved in industrial drafting and design techniques. Areas include layouts and detailing in product design, tool design, die design, machine design, and advanced computer-aided design. Laboratory work in an integral part of the program for all technical courses.

This Program Offers:

- Associate of Applied Science: **63** credit hours
- College Certificate: **30** credit hours

Continued on next page.

*Computer Aided Design continued***Program Goals**

- To provide students a foundation of the basic principles of mechanical design technology utilizing computer integration in the manufacturing industry
- To teach students knowledge in producing engineering drawings related to manufacturing

Program Outcomes

- Students will be able to utilize computer based simulation and programming tools for system design and analysis
- Demonstrate and apply knowledge of machines' principles and operation, tools and materials, requisite mathematics and physics, to select operations parameters in order to program, setup, and operate production manufacturing equipment
- Demonstrate and apply knowledge of machines' principles and operation, tools and materials, requisite mathematics and physics, to select operations parameters to troubleshoot and diagnose both numerically/computer numerically (NC/CNC) controlled machines and programmable logic controlled (PLC) equipment
- Demonstrate and apply knowledge of material science, machining tolerances, blueprint/schematics, and hands on skills in welding, burning, pipefitting, rigging, the use of basic hand tools and mobile equipment for the fabrication of designed parts incorporating accepted industry methods
- Demonstrate knowledge and application of the principles of drafting, the communication of ideas, designs and visualization skills as the language of the engineering field, including the creation and interpretation of drawings using proper dimensioning and tolerancing for size and geometry, use of computer-aided drawing programs to incorporate proper industry acceptable standards and conventions

College Certificate Goals

- To provide students a basic understanding of principles of mechanical design technology utilizing computer integration in the manufacturing industry

College Certificate Outcomes

- Demonstrate and apply knowledge of machines' principles and operation, tools and materials to program, setup, and operate production manufacturing equipment
- Demonstrate and apply knowledge of machines' principles and operation, tools and materials, requisite mathematics and physics, to select operations parameters to troubleshoot and diagnose both numerically/computer numerically (NC/CNC) controlled machines and programmable logic controlled (PLC) equipment
- Apply the basic principles of equipment maintenance, troubleshooting and problem solving techniques to maintain industrial machines that ensures the production of quality products
- Incorporate safety awareness, principles and practices of machine safety, environmental safety, chemical safety and personal/employee protection

Admission Requirements

Individuals interested in the Computer Aided Design program are required to fulfill the following requirements:

- Fulfill all WCCCD college admission requirements
- Declare intent to enter the program on WCCCD Admission Application or in the Student Services Office
- Complete an Educational Development Plan (Plan of Work), outlining the student's plan for program completion
- Fulfill course placement requirements based on the ACCUPLACER® assessment

COMPUTER INFORMATION SYSTEMS

Associate of Applied Science Degree: (AAS-CIS)

About the Program

The Computer Information Systems Associate of Applied Science degree program is designed to provide a solid foundation in the fundamental skills that are generally required to analyze system requirements and design solutions, or to support and manage the application of technology resources. The degree includes core courses of information systems fundamentals, and allows for the selection of courses in specialized areas of concentration to complete the degree option requirements.

Program concentrations are designed to meet the educational needs of most segments of the IT field in a client-server environment and microprocessor platform along with web and server applications. The training blends general education courses with the required IT skills for programmer/analyst in government, insurance, manufacturing, service, sales, utilities and banking. Additional education and job experience leads to work in systems analysis and project management.

This Program Offers:

- Associate of Applied Science Degree: **61** credit hours
- Associate of Applied Science Degree: Cybersecurity **64** credit hours

Certificates Offered:

1. Mobile Application Developer (CERT-APD): **34** credit hours
2. Computer Support Specialist (SCERT-CSS): **27** credit hours
3. Cybersecurity (CERT-CYB): **32** credit hours

4. Certified Ethical Hacker (ACERT-CEH): **13** credit hours
5. Network+ (ACERT-NTWK): **10** credit hours
6. Security+ (SCERT-SEC): **16** credit hours
7. Database Administrator (CERT-DBA): **30** credit hours
8. Network Administrator (CIS-NTWK-ADM-SCERT): **27** credit hours
9. Video Game Design and Animation (CERT-VGDA): **34** credit hours
10. Website Developer (CERT-CMW): **30** credit hours
11. Cloud Computing (SCERT-CLD)

Program Goals

- Teach students foundation skills and to apply that knowledge to meet the needs of the computer information systems field
- Provide general education coursework with technical competence required in IT skills for programmers and analysts and other aspects of the profession

Program Outcomes

- Apply knowledge of computing and mathematics appropriate to the discipline
- Analyze a problem, identify and define the computing requirements appropriate to its solution
- Demonstrate applied knowledge to design, implement, and evaluate a computer-based system, process, component or program to meet desired needs
- Exhibit an applied understanding of processes that support the delivery and management of information systems within a specific application environment

- Effectively use written, oral, verbal and interpersonal communication skills while operating as a member of a diverse team of individual support interacting with a broad range of audiences
- Demonstrate an understanding of professional, ethical, legal, security and social issues and responsibilities related to the profession

Admission Requirements

To be admitted into the CIS program students must:

- Fulfill all WCCCD admission requirements
- Declare intent to enter the program on WCCCD Admission Application or in the Student Services Office intent at the campus admission office
- Fulfill course placement requirements based on the ACCUPLACER® assessment
- Complete an Educational Development Plan (Plan of Work), outlining the student's plan for program completion

COMPUTER INFORMATION SYSTEMS: ARTIFICIAL INTELLIGENCE PROMPT ENGINEERING

- Certificate of Achievement (AIPE-ACERT)

About the Program

The Certificate of Achievement in Artificial Intelligence with Prompt Engineering is designed to equip students with foundational knowledge and hands-on skills in the rapidly growing field of artificial intelligence (AI). The program is designed to meet the growing demand for AI skills while equipping students with practical tools and foundational knowledge to excel in a rapidly evolving technological environment.

This Program Offers:

- College Certificate (ACERT): 6 credit hours

Certificate Goals

- Teach students' foundational skills in preparation for entry-level careers in Artificial Intelligence
- Provide students with the course content and practical experience consistent with the competencies required in using AI and Prompt Engineering and other aspects of the industry.

Certificate Outcomes

The Certificate of Achievement in Artificial Intelligence will offer the following:

- Hands-On Learning Experience: By offering practical skills in both AI and prompt engineering, students will be able to directly apply the concepts they learn to real-world challenges, enhancing their problem-solving abilities and increasing their marketability.
- Pathway to Further Education: For students interested in pursuing advanced degrees or certifications in AI, this certificate will serve as a strong foundation, providing a robust understanding of AI concepts and applications that can be built upon in future studies.

- Advancing Technological Literacy and Innovation Promoting AI Literacy: As AI technologies become central to everyday life, there is an increasing need for a population that understands and can interact with AI effectively. This program will foster greater AI literacy among students, preparing them not only for careers in technology but also for active engagement with emerging technologies in their personal and professional lives.
- By completing this certificate, students will be equipped with both foundational AI knowledge and specialized skills in prompt engineering, preparing them for entry-level roles in AI development, data analysis, and other AI-driven fields.

Admission Requirements

To be admitted into the Artificial Intelligence Prompt Engineering Certificate Program students must:

- Fulfill all WCCCD admission requirements
- Declare Computer Information Systems or Cybersecurity as program intent at the campus admission office
- Fulfill course placement requirements based on the ACCUPLACER assessment
- Existing WCCCD students must also have completed CIS 110 and CIS 112.
- Complete a WCCCD Program Application and submit to the Campus Academic Officer.

COMPUTER INFORMATION SYSTEMS: COMPUTER SUPPORT SPECIALIST

- Short-Term Certificate: (SCERT-CSS)

About the Program

The Computer Information Systems Computer Support Specialist Short-Term Certificate program is designed to provide a solid foundation in the fundamental skills that are generally required to analyze system requirements and design solutions, and or support and manage the application of technology resources. Degree concentrations include core courses of information systems fundamentals, database systems, networking, web systems and software development.

Description: Computer Support Specialists provide technical assistance, support, and advice to users. These troubleshooters diagnose problems and provide technical support for hardware, software, and IT systems.

A person in this occupation applies computer software and technology to business related matters. Typical support specialist tasks include analyzing and solving business problems by creating a computerized system using microcomputer application software (e.g. word processor, spreadsheets, databases, presentation, web development, etc.) to write a custom program or integrate multiple software applications. Students are also prepared to interface with users and functions as an integral part of an IT support team.

This Program Offers:

- Short-Term Certificate: 27 credit hours

Certificate Goals

- Provide basic foundation and practical experience in computer systems concepts with an emphasis in microcomputer applications

Certificate Outcomes

- Demonstrate ability to manage workgroup resources to include file shares, print shares and physical connections
- Proficiently install, configure and support industry required applications
- Proficiently use integrated software packages to analyze and support business problems related to the IT infrastructure

Admission Requirements

To be admitted into the CIS program students must:

- Fulfill all WCCCD admission requirements
- Declare intent to enter the program on WCCCD Admission Application or in the Student Services Office
- Fulfill course placement requirements based on the ACCUPLACER® assessment
- Complete an Educational Development Plan (Plan of Work), outlining the student's plan for program completion

COMPUTER INFORMATION SYSTEMS: CYBERSECURITY

Associate of Applied Science Degree (AAS-CYB)

About the Program

The Cybersecurity Associate of Applied Science degree program is designed to provide fundamental skills, knowledge, and abilities to design and maintain secure IT systems. This program is aligned with the National Initiative for Cybersecurity Education (NICE) and the Department of Defense Directive 8570.

Students will utilize virtual environments, including Cybersecurity simulations and game-based learning, to demonstrate mastery of competencies while preparing for industry recognized Cybersecurity certifications.

This Program Offers

- Associates of Applied Science Degree:
64 credit hours

Certificates Offered:

1. Cybersecurity (CERT): **32** credit hours
2. Certified Ethical Hacker (ACERT): **13** credit hours
3. Network+ (ACERT): **10** credit hours
4. Security+ (SCERT): **16** credit hours

Program Goals:

- Teach students foundational skills in preparation for entry-level careers in Cybersecurity
- Provide students with course content and practical experience consistent with the competencies required to pass Network+, Security+, Certified Ethical Hacker (CEH), Cisco Certified Network Association (CCNA), and Certified Authorization Professional (CAP) certification exams.

Program Outcomes

- Apply knowledge of computer networking concepts and protocols, and network security methodologies
- Analyze, identify, and define risk management requirements
- Demonstrate applied knowledge of Cybersecurity principles
- Explain processes that support the management of mitigating vulnerabilities, threats, and risk to IT systems
- Demonstrate appropriate written, oral, verbal, and interpersonal communication skills
- Describe professional, ethical, legal, social issues, and responsibilities germane to the Cybersecurity industry

Admission Requirements

To be admitted into the Cybersecurity Program students must:

- Fulfill all WCCCD admission requirements
- Declare intent to enter the program on WCCCD Admission Application or in the Student Services Office
- Complete an Educational Development Plan (Plan of Work), outlining the student's plan for program completion

COMPUTER INFORMATION SYSTEMS: CYBERSECURITY

- College Certificate (CERT-CYB)

About the Program

The Cybersecurity Certificate program provides the “how to” of installing, configuring, operating, and troubleshooting medium-size routed and switched networks; implementing infrastructure-level network security; connecting remote sites via a WAN; and mitigating network infrastructure level security threats in preparation for the following certification exams: Network+, Security+, and Certified Ethical Hacker (CEH).

This Program Offers

- College Certificate (CERT): **32** credit hours

College Certificate Goals:

- Teach students foundational skills in preparation for entry-level careers in Cybersecurity
- Provide students with course content and practical experience consistent with the competencies required to pass the following certification exams: (a) Network+, (b) Security+, and (c) Certified Ethical Hacker (CEH)

College Certificate Outcomes

- Select the components required to meet a given network specification
- Describe the purpose and basic operation of the protocols in the OSI and TCP/IP models
- Identify key issues plaguing the information security world, incident management process, and penetration testing
- Explain system hacking methodology, steganography, steganalysis attacks, and covering tracks
- Explain various types of penetration testing, security audits, vulnerability assessments, and penetration testing

COMPUTER INFORMATION SYSTEMS: CERTIFIED ETHICAL HACKER

- Certificate of Achievement (ACERT-CEH)

About the Program

The Certified Ethical Hacker Certificate Program is designed to provide the “how to” of Intrusion Detection, Policy Creation, Social Engineering, DDoS Attacks, Buffer Overflows and Virus Creation and perimeter defense development in preparation for the Certified Ethical Hacker (CEH) certification exam.

This Program Offers

- Certificate of Achievement (ACERT):
13 credit hours

College Certificate Goals

- Teach students foundational skills in preparation for entry-level careers in Cybersecurity
- Provide students with course content and practical experience consistent with the competencies required to pass the Certified Ethical Hacker (CEH) certification exam

College Certificate Outcomes

- Describe the key issues plaguing the information security world, incident management process, and penetration testing
- Explain various types of footprinting, footprinting tools, and countermeasures
- Classify malware, malware analysis procedures, and countermeasures
- Explain social engineering techniques, identify theft, and social engineering countermeasures
- Describe different types of webserver attacks, attack methodology, and countermeasures
- Demonstrate network scanning techniques and scanning countermeasures

Admission Requirements

To be admitted into the Cybersecurity Program students must:

- Fulfill all WCCCD admission requirements
- Declare intent to enter the program on WCCCD Admission Application or in the Student Services Office

COMPUTER INFORMATION
SYSTEMS: CLOUD
COMPUTING

- Short-Term Certificate (SCERT-CLD)

About the Program

The Short-Term Certificate in Cloud Computing is designed to examine the motivating factors, benefits and challenges of the cloud, as well as service models, service level agreements (SLAs), security, and example cloud service providers and use cases. We will discuss topics such as cloud infrastructures, virtualization, software defined networks and storage, cloud storage, and programming models. Students will work with Amazon Web services, Google Cloud and Microsoft Azure, use them to rent and provision compute resources and then program and deploy applications that run on these resources. Finally, students will understand the details of the MapReduce programming model and gain a broad overview of the Spark, Graph Lab programming models as well as message queues and stream processing.

This Program Offers

- College Certificate (SCERT): 22 credit hours

College Certificate Goals

- Teach students’ foundational skills in preparation for entry-level careers in Cloud Computing
- Provide students with the course content and practical experience consistent with the competencies required in using and managing Cloud Computing tools and other aspects of the industry.

College Certificate Outcomes

The Short-Term Certificate will offer the following:

- Cloud Computing will teach the understanding of principles in data center design; cloud management techniques and cloud software deployment considerations.

Continued on next page.

*Computer Information Systems:
Cloud Computing continued*

- Different CPU, memory and I/O virtualization techniques that serve in offering software, computation and storage services on the cloud; Software Defined Networks (SDN) and Software Defined Storage (SDS);
- Cloud storage technologies and relevant distributed file systems, NoSQL databases and object storage.
- The variety of programming models and developing a working experience in several of them.

Admission Requirements

To be admitted into the Cloud Computing Certificate Program students must:

- Fulfill all WCCCD admission requirements
- Declare Computer Information Systems or Cybersecurity as program intent at the campus admission office
- Fulfill course placement requirements based on the ACCUPLACER assessment
- Existing WCCCD students must also have completed CIS 110 and CIS 112.
- Complete a WCCCD Program Application and submit to the Campus Academic Officer.

COMPUTER INFORMATION SYSTEMS: MOBILE APPLICATION DEVELOPER

- College Certificate: (CERT-APD)

About the Program

The Computer Information Systems Mobile Application Developer College Certificate is designed to prepare students for mobile application developer career positions or as entrepreneurs in mobile application development. Students will gain technical foundation in how to design, develop, implement, and market simple business or personal solutions through mobile applications. The student completing this program can publish his or her application in the APP-Store.

This Program Offers:

- College Certificate: **34** credit hours

Certificate Goals

- To prepare students to enter the Information Technology Industry as application developers

Certificate Outcomes

- Learn mobile application platforms such as Google Android and Apple iOS
- Learn development tools including Android Studio, Xcode, and related utilities
- Learn and apply programming languages such as Java, Swift, and XML
- Learn about cloud computing platforms such as Amazon Web Services, Google App Engine, and Apple iCloud
- Learn mobile design approaches and industry practices
- Apply new knowledge to build new mobile applications
- Deploy applications to the Google Play store and/or Apple App Store

Admission Requirements

To be admitted into the CIS program students must:

- Fulfill all WCCCD admission requirements
- Declare intent to enter the program on WCCCD Admission Application or in the Student Services Office
- Complete an Educational Development Plan (Plan of Work), outlining the student's plan for program completion
- Fulfill course placement requirements based on the ACCUPLACER® assessment

COMPUTER INFORMATION
SYSTEMS: NETWORK+

- Certificate of Achievement (ACERT-NTWK)

About the Program

The Network+ Certificate Program provides the broad-based knowledge of the underlying concepts of data networking, such as the Open Systems Interconnection (OSI) reference model and the protocols that operate at the various model in preparation for the Network+ certification.

This Program Offers

- Certificate of Achievement (ACERT):
10 credit hours

College Certificate Goals

- Teach students foundational skills in preparation for entry-level careers in Cybersecurity
- Provide students with course content and practical experience consistent with the competencies required to pass the Network+ certification exam

College Certificate Outcomes

- Identify the layers of the OSI reference model and describe the functions of each layer
- Describe the different types of hubs, bridges, switches, and routers and explain their functions
- Describe the technologies used to connect remote computers to networks
- Evaluate the physical installation site for a network and explain how environmental conditions can affect the network planning process
- Explain the various mechanisms used to make network data continuously available
- Distinguish among network problems, computer problems, and user problems

Admission Requirements

To be admitted into the Cybersecurity Program students must:

- Fulfill all WCCCD admission requirements
- Declare intent to enter the program on WCCCD Admission Application or in the Student Services Office
- Complete an Educational Development Plan (Plan of Work), outlining the student’s plan for program completion

Network+: Certificate of Achievement (ACERT)

COMPUTER INFORMATION
SYSTEMS: SECURITY+

- Short-Term Certificate (SCERT-SEC)

About the Program

The Security+ Certificate Program provides the broad-based knowledge about IT industry-wide security topics, including communication security, infrastructure security, cryptography, access control, authentication, external attack, and operational and organization security in preparation for the Security+ certification exam.

This Program Offers

- Short-Term Certificate (SCERT): **16** credit hours

College Certificate Goals

- Teach students foundational skills in preparation for entry-level careers in Cybersecurity
- Provide students with course content and practical experience consistent with the competencies required to pass the Security+ certification exam

College Certificate Outcomes

- Identify network perimeter security and elements of an effective security policy
- Classify encryption, including the three main encryption methods used in internetworking
- Discuss universal guidelines and principles for effective network security, as well as guidelines to create effective specific solutions
- Describe security principles and security attack identification
- Explain mechanisms used to implement security systems, tools to evaluate key security parameters, techniques for security accounts, and threats to Windows and UNIX systems
- Security auditing and discovery processes, audit plans, and network-based and host-based discovery software

Admission Requirements

To be admitted into the Cybersecurity Program students must:

- Fulfill all WCCCD admission requirements
- Declare intent to enter the program on WCCCD Admission Application or in the Student Services Office
- Complete an Educational Development Plan (Plan of Work), outlining the student’s plan for program completion

COMPUTER INFORMATION SYSTEMS: SOFTWARE DEVELOPER

- Certificate: (SFD-CERT)

About the Program

The software development certificate teaches students how to create applications and systems that run on a variety of devices including personal computers, mobile phones, tablets, automobiles, and other devices. The program achieves this goal by exposing students to key programming languages.

This Program Offers:

- College Certificate: **37** credit hours

College Certificate Goals

- Teach students in-demand and emerging programming languages such as advanced Java programming, Python, JavaScript, Swift, and Kotlin.
- Students will learn about development tools and platforms such as IntelliJ IDEA, NetBeans IDE, Android Studio, Apple Xcode, Visual Studio Code, and cloud based services.
- Students will be exposed to database concepts, various operating systems such as Linux, macOS, and modern versions of Windows.

College Certificate Outcomes

- Students will be prepared to work as software development employees or contractors
- Students are able to transfer courses to a 4-year institution for completion of computer science or related degree

Admission Requirements

- Fulfill all WCCCD admission requirements
- Declare intent to enter the program on WCCCD Admission Application or in the Student Services Office

- Complete an Educational Development Plan (Plan of Work), outlining the student's plan for program completion
- Fulfill course placement requirements based on ACCUPLACER® assessment

Prerequisite Work

Prior to beginning the program, students must have computer competencies, which include the ability to key text at a minimum rate of 35 words per minute. These necessary skills can be obtained from your life experiences or by taking any of the following courses: Keyboarding, Keyboarding Fundamentals and Intermediate Keyboarding.

COMPUTER INFORMATION SYSTEMS: DATABASE ADMINISTRATOR

- Certificate: (CERT-DBA)

About the Program

The Computer Information Systems: Database Administrator Certificate program is designed to give students a thorough technical foundation to design and implement the infrastructure for business solutions using database tools. Database Administrators use software to store and organize business data of all kinds and works in nearly all industries. The student completing this program can sit for Oracle Certification exams. This program focuses on administrative tasks and building database applications using programming skills such as data collection, query techniques and database creation. Database administrators typically perform tasks such as identify user needs to create and administer databases, coordinate changes to computer databases, test and implement the database applying knowledge of database management systems, coordinate and implement security measures to safeguard computer databases, ensure that the database operates efficiently and without error, make and test modifications to the database structure, maintain the database and update user permissions, merge old databases into new ones, and backup and restore data to prevent data loss.

This Program Offers:

- Certificate: **30** credit hours

College Certificate Goals

- To prepare students to gain employment in the computer information systems field as a database administrator or technician
- To prepare students to sit for individual certification by recognized industry experts for Oracle Database Administrator

College Certificate Outcomes

- Be knowledgeable of database management system architecture and environment, with emphasis on database processing, physical representation, modeling, and database implementation
- Identify network components
- Understand Oracle Database Administrator functions as well as using RMAN, SQL, and Flashback technology
- Analyze database management problems using elements and components of database software
- Demonstrate a working knowledge of computer information systems, fundamental computer concepts, database structures, and programming techniques
- Develop database structures to store, retrieve and update data
- Develop programs using structured design and logic tools
- Design software that integrates web sites and databases including client and server-side scripting
- Plan, coordinate and implement security measures to safeguard information in computer files against accidental or unauthorized damage, modification or disclosure

Admission Requirements

Students are required to do the following:

- Fulfill all WCCCD admission requirements
- Declare intent to enter the program on WCCCD Admission Application or in the Student Services Office
- Complete an Educational Development Plan (Plan of Work), outlining the student's plan for program completion
- Fulfill course placement requirements based on the ACCUPLACER® assessment

COMPUTER INFORMATION SYSTEMS: NETWORK ADMINISTRATOR

- College Certificate: (CIS-NTWK-ADM-SCERT)

About the Program

"The Computer Information Systems Network Administrator Short-Term Certificate is designed to provide a solid foundation in the fundamental skills that are generally required to analyze system requirements and design solutions or, to support and manage the application of technology resources.

The Network Administrator concentration prepares students as network systems administrators who can design, install, and support an organization's LAN (local-area network), network segment, Internet, or intranet system. Network systems administrators provide day-to-day on-site administrative support for software users in a variety of work environments, including professional offices, small businesses, government, and large corporations. They maintain network hardware and software, analyze problems, and monitor the network to ensure its availability to system users. These professionals gather data to identify customer needs and then use that information to identify, interpret, and evaluate system and network requirements. Network systems administrators also plan, coordinate, and implement network security measures.

The goal of the Network Administrator is to provide day-to-day on-site administrative support for software users in a variety of work environments.

This Program Offers:

- Short-Term Certificate: **27** credit hours

College Certificate Goals

- Teach students foundation skills and to apply that knowledge to meet the needs of the computer information systems field
- Provide general education coursework with technical competence required in IT skills for programmers and analysts and other aspects of the profession

College Certificate Outcomes

Students will be able to demonstrate:

- Proficiency and applied knowledge required for use of Windows client operating systems in a network environment
- Proficiency and applied knowledge in various Windows server services implemented in a network environment
- Proficiency and applied knowledge in working with common network devices such as hubs, switches, routers, firewalls, and network cabling
- Proficiency in managing resources including folders, files and printers in a network environment
- Proficiency in creating and managing user accounts, groups and permissions in a domain environment
- Effective use of written, oral, verbal and interpersonal communication skills operating as a member of a diverse support team interacting with a broad range of audiences.
- Exhibit understanding of professional, ethical, legal, security and social issues and responsibilities related to the profession

Admission Requirements

- Fulfill all WCCCD admission requirements
- Declare intent to enter the program on WCCCD Admission Application or in the Student Services Office
- Complete an Educational Development Plan (Plan of Work), outlining the student's plan for program completion
- Fulfill course placement requirements based on the ACCUPLACER® assessment

COMPUTER INFORMATION SYSTEMS: VIDEO GAME DESIGN AND ANIMATION

- College Certificate: (CERT-VGDA)
- Certificate of Achievement: (VGDA-ACERT)
(VGVR-ACERT)

About the Program

The Computer Information Systems Video Game Design and Animation College Certificate is designed to provide a solid foundation in the fundamental skills that are generally required to meet the needs of the video game design, animation and programming field.

Description: Creation and design of video games and the animation included within.

This Program Offers:

- College Certificate: **34** credit hours

College Certificate Goals

- To provide students with a basic foundation for video game design, animation and programming field

College Certificate Outcomes

- Students will be able to produce quality work in a video game design and animation environment
- Effectively use written, oral, verbal and interpersonal communication skills when operating as a member of a diverse support team interacting with a broad range of audiences
- Demonstrate an applied understanding of processes that support the design, animation and production environment

Admission Requirements

- Fulfill all WCCCD admission requirements
- Declare intent to enter the program on WCCCD Admission Application or in the Student Services Office

- Complete an Educational Development Plan (Plan of Work), outlining the student's plan for program completion
- Fulfill course placement requirements based on the ACCUPLACER® assessment

Prerequisite Work

Prior to beginning the Video Game Design and Animation concentration of the Computer Information Systems program, students must have computer competencies which include the ability to key text at a minimum rate of 35 words per minute. These necessary skills can be obtained from your life experiences or by taking any of the following courses: Keyboarding, Keyboarding Fundamentals and Intermediate Keyboarding.

- College Certificate: (CERT-CMW)

About the Program

The Computer Information Systems Website Developer College Certificate program is designed to prepare students for employment in the area of web design. Students will learn web design, XHTML coding, image editing, validation, CSS, GUI editors, server-side and client-side languages.

Description: Web developers are responsible for day-to-day site creation, design and all technical aspects of a website.

This Program Offers:

- College Certificate: **30** credit hours

College Certificate Goals

- Students will be able to demonstrate competencies in the development and deployment of website design

College Certificate Outcomes

- Demonstrate ability to code the features necessary for website development and deployment
- Demonstrate ability to solve problems related to the program content
- Develop proficiencies in modifying a website

Admission Requirements

- Fulfill all WCCCD admission requirements
- Declare intent to enter the program on WCCCD Admission Application or in the Student Services Office

COMPUTER NUMERICAL CONTROL

Associate of Applied Science Degree: (CNC-AAS)

- CNC Programming and Operation Short-Term Certificate: (CNC-SCERT)
- CNC 5-Axis Programming and Operation Short-Term Certificate: (CPO-SCERT)
- CNC Operation Certificate of Achievement (CNC-OP-ACERT)
- CNC Programming Certificate of Achievement: (CNC-PR-ACERT)

About the Program

The Computer Numerical Control Associates of Applied Science degree program prepares students to be successful in a highly technical field with the foundation and skill-set to make them a valued asset in an ever-changing industry. Students will be exposed to topics that include, but are not limited to, basic and advanced programming, machine controls, machine set-up, and program structure to manufacture parts to blueprint standards for fit and tolerances as dictated by modern Geometric Dimensioning & Tolerancing (GD&T) standards. Students will be required to complete hands-on projects in a state-of-the-art lab environment.

This Program Offers:

- Associate of Applied Science Degree: **60** credit hours
- CNC Programming and Operation Short-Term Certificate: **24** credit hours
- CNC 5-Axis Programming and Operation Short-Term Certificate: **24** credit hours
- CNC Operation Certificate of Achievement: **12** credit hours
- CNC Programming Certificate of Achievement: **12** credit hours

Program Goals

- To prepare students for employment in highly-skilled manufacturing environments
- To instruct students on how to apply critical thinking and analytical problem solving as a CNC operator and/or programmer
- To prepare the student to successfully take the National Institute of Metalworking Skills (NIMS) certification exams (4 exams that can be taken at different intervals as the student moves through the program)
- To emphasize the importance accuracy and attention to detail
- To expose students to resources such as online forums and networking
- To teach students to adhere to safety standards and procedures to not endanger themselves or others

Program Outcomes

- Accurately interpret blueprint drawings and apply information to product development
- Demonstrate basic knowledge of manufacturing processes
- Utilize the CAD application within MasterCam for both 2D and 3D drawing development
- Write and apply 2D and 3D programs
- Demonstrate ability to start-up and set-up CNC machines
- Utilize machine controls on various CNC equipment
- Set-up machines to execute programs
- Demonstrate ability to load programs and/or use Intuitive Programming proficiently
- Demonstrate knowledge of safety standards as they apply to all manufacturing environments
- Demonstrate ability to measure and gage parts accurately
- Demonstrate knowledge of and ability to apply Reinshaw Probing

- Demonstrate and apply proficient use of point-to-point measuring equipment as well as surface scanning
- Demonstrate an understanding of hard part machining

Certificate Goals

- To instruct students on how to apply critical thinking and analytical problem solving as a CNC operator and/or programmer
- To prepare the student to successfully take the National Institute of Metalworking Skills (NIMS) certification exams
- To teach students to adhere to safety standards and procedures to not endanger themselves or others

Certificate Outcomes

- Accurately interpret blueprint drawings and apply information to product development
- Demonstrate basic knowledge of manufacturing processes
- Utilize the CAD application within MasterCam for both 2D and 3D drawing development
- Write and apply 2D and 3D programs
- Demonstrate ability to start-up and set-up CNC machines

Admission Requirements

Students are required to do the following:

- Fulfill all WCCCD admission requirements
- Declare intent to enter the program on WCCCD Admission Application or in the Student Services Office
- Complete an Educational Development Plan (Plan of Work), outlining the student's plan for program completion
- Fulfill course placement requirements based on ACCUPLACER® test
- Students must be 18 years of age and possess a high school diploma or GED

COSMETOLOGY MANAGEMENT: ASSOCIATE OF APPLIED SCIENCE (A.A.S.)

- Associate of Applied Science Degree (AAS-COS)
- College Certificate: (CERT-COS)

About the Program

The Cosmetology Management Associate of Applied Science Degree and Certificate program is designed to prepare students for leadership and entrepreneurial roles within the cosmetology industry.

This program blends technical knowledge with core business principles to develop the competencies required to manage a salon, lead a team, or operate an independent business. Students gain practical skills in human resources, finance, marketing, and operations, essential tools for navigating the competitive beauty industry. For licensed professionals currently working in the field, the program offers a pathway to elevate career opportunities and increase earning potential.

This Program Offers:

- Associate of Applied Science: **62** credit hours
- College Certificate: **24** credit hours

Program Goals

- Develop Business and Management Competencies by equipping students with foundational knowledge in salon operations, financial management, human resources, and marketing strategies to successfully lead or manage a cosmetology business.
- Enhance Leadership and Professionalism by preparing students to assume leadership roles within the cosmetology industry by fostering decision-making, team-building, ethical practices, and effective communication skills.

- Integrate Technical and Business Skills by bridging the gap between cosmetology practice and business theory by combining industry-standard cosmetology competencies with applied business education.
- Promote Lifelong Learning and Transferability by encouraging graduates to pursue further education by aligning the program with transfer opportunities to four-year institutions, particularly in business-related fields.
- Cultivate Client-Centered Practices by fostering skills that support a safe, inclusive, and customer-focused salon environment, including cultural competence, client relations, and service quality.

Program Outcomes

- Students will demonstrate the business and leadership acumen necessary to apply core principles of marketing, finance, operations, and entrepreneurship in managing or launching a successful salon.
- Students will apply human resource strategies to recruit, train, and manage salon staff using current human resource best practices, while ensuring compliance with state and federal employment laws.
- Students will utilize social psychology in professional settings to create inclusive, client-centered salon environments by applying social psychology concepts to foster collaboration, empathy, and professionalism.
- Students will be able to develop strategic business plans to construct comprehensive salon business plans that demonstrate critical thinking, market analysis, and fiscal responsibility.
- Students will be able to incorporate technology and innovation along with current digital tools, scheduling systems, and marketing platforms to enhance salon operations, branding, and customer engagement.

- Students will demonstrate effective written and verbal communication skills tailored to diverse audiences, including clients, colleagues, and industry professionals, ensuring clarity, professionalism, and customer satisfaction in salon and business settings.
- Students will uphold ethical standards, legal responsibilities, and professional codes of conduct, demonstrating integrity and accountability in all aspects of cosmetology practice and salon management.
- Students will exhibit analytical, creative, and intellectual competencies by integrating critical thinking with innovative problem-solving to address complex salon management challenges and develop forward-thinking beauty solutions.

College Certificate Goals

- Develop basic business and management skills by equipping students with essential knowledge in salon operations, finance, marketing, and human resources.
- Foster leadership and professionalism by preparing students for leadership roles through ethical decision-making, teamwork, and effective communication.
- Bridge technical and business competencies by combining cosmetology management with applied business principles to support career advancement.
- Promote client-centered excellence by cultivating inclusive, customer-focused salon practices that emphasize cultural awareness and service quality.

College Certificate Outcomes

- Students will be prepared to apply foundational business, leadership, and entrepreneurship principles to manage or operate a salon.

- Students will gain human resource strategies to effectively recruit, train, and supervise salon staff in compliance with employment laws.
- Students will possess the necessary skills to create comprehensive business plans demonstrating critical thinking, market awareness, and financial planning.
- Students will develop competence in utilizing digital tools, scheduling systems, and marketing platforms to streamline salon operations and enhance client engagement.
- Students will understand the importance of fostering inclusive, client-centered salon environments through the application of social psychology and professional conduct.
- Students will understand the ethical standards in all aspects of salon management.

Admission Requirements

Students are required to do the following:

- Be 18 years of age or older (unless part of dual enrollment) or must have completed high school or hold a General Education Development (GED) Certificate
- Fulfill all WCCCD admission requirements
- Declare intent to enter the program on WCCCD Admission Application or in the Student Services Office
- Complete an Educational Development Plan(Plan of Work), outlining the student's plan for program completion
- Fulfill course placement requirements based on the ACCUPLACER® assessment

- Craft Brewing Short-Term Certificate (BRW-SCERT)

About the Program

The Craft Brewing Short-Term Certificate Program prepares individuals for careers in the growing beer brewing industry. Classroom instruction and laboratory work serve to educate the student in aspects of the craft brewing industry are included in the certificate program. Coursework will cover brewing, fermentation, safety and sanitation, operations, agriculture, marketing, management, equipment for production and bottling, packaging as well as specifics of craft beer microbiology. Courses will be taught in a setting designed to mirror operations in both large and small brewing operations. Graduates of the program will be prepared to sit for certification exams offered by the Institute of Brewing and Distilling (IBD) and qualify for employment in local and national brewing establishments.

This Program Offers:

- Craft Brewing Short-Term Certificate: **21** credit hours

Certificate Goals

- To provide awareness and practical application of all aspects of the craft beer brewing industry
- To prepare students for Institute of Brewing and Distilling (IBD) Certification Exams

Certificate Outcomes

- Students will be prepared for advanced mid-level positions in the craft brewing industry and pass IBD certification exams
- Students will be able to identify, in detail, the brewing process and correctly articulate the safety and sanitation needs of brewing

- Students will be able to indicate the microbiological challenges of the brewing process
- Students will be able to indicate the heat transfer and fluid challenges of the brewing process
- Students will be able to demonstrate the bottling aspects of the brewing process
- Students will be able to indicate the agricultural opportunities and recipe creation strategies in the brewing process

Admission Requirements

Students are required to do the following:

- Fulfill all WCCCD admission requirements
- Declare intent to enter the program on WCCCD Admission Application or in the Student Services Office
- Complete an Educational Development Plan (Plan of Work), outlining the student's plan for program completion
- Fulfill course placement requirements based on ACCUPLACER® test

CRIMINAL JUSTICE: LAW ENFORCEMENT ADMINISTRATION AND CORRECTIONS

Associate of Applied Science Degree(s):

- Law Enforcement Administration (CJLE-AAS)
- Corrections (CJC-AAS)
- College Certificate (CJPPS-CERT)
- Certificate of Achievement (CJRC-ACERT)

About the Program

The Criminal Justice Law Enforcement Administration and Corrections Associate of Applied Science degree programs are designed to provide the academic and professional training necessary for careers in Law Enforcement. The Law Enforcement Administration option is designed to prepare students for entry or advancement in the criminal justice system. The Corrections option prepares students for employment in correctional institutions or fields related to probation and parole.

This Program Offers:

- Associate of Applied Science Degree(s):
 1. Law Enforcement Administration: **61** credit hours
 2. Corrections: **61** credit hours
- College Certificate: Criminal Justice: Public Private Security: **31** credit hours
- Certificate of Achievement:
 - Corrections: **15** credit hours

Program Goals

- To teach students the principles of community law enforcement and corrections vocation
- To instruct students on how to apply critical thinking and analytical problem solving in the law enforcement profession

Program Outcomes

- Students will be able to apply academic knowledge to a field of training program's designed to assimilate into a policing competency
- Demonstrate critical thinking, decision-making and problem solving as it applies to the vocation
- Utilize effective verbal and written communication with the public, staff and administration by documenting activities, maintaining databases and effective performance
- Exhibit knowledge of and apply ethical values, cultural awareness and technological skills when making decisions related to the vocation

College Certificate Goals

- To prepare students interested in entering the field of public/private security for high quality corporate security jobs in law enforcement, retail, education, management, design and business
- To prepare students for jobs in the Transportation Security Administration (TSA) of the Department of Homeland Security

College Certificate Outcomes

- Explain basic security functions, crime causation theories and the relationship between security and policing
- Distinguish between the different categories of crime
- Develop an investigative strategy and prepare and present findings
- Identify threats to information security, develop policies and procedures to help detour incidents
- Demonstrate an understanding of cybercrime
- Evaluate potential threats and conduct information security assessments

Admission Requirements

Students are required to do the following:

- Fulfill all WCCCD admission requirements
- Declare intent to enter the program on WCCCD Admission Application or in the Student Services Office
- Complete an Educational Development Plan (Plan of Work), outlining the student's plan for program completion
- Fulfill all course placement requirements based on ACCUPLACER® assessment
- Obtain an Educational Development Plan (Plan of Work), outlining the student's plan for program completion

DENTAL ASSISTING

- College Certificate: (DEA-CERT)

About the Program

The Dental Assisting College Certificate program provides students with the necessary training to perform the duties of a dental assistant, including assisting the dentist (chair side), providing patient education, performing laboratory procedures, exposing and diagnostic x-rays and performing office management tasks such as billing, maintain patient information, and scheduling appointments.

In addition, the dental assistant who becomes licensed can provide expanded functions as delegated by Michigan law. Instruction runs concurrently with the laboratory instruction throughout the program. Students gain clinical experience in clinical facilities and dental offices. Aptitudes that will be helpful to students are an ability to pay attention to detail, follow instructions, work quickly and independently, be responsible for personal and office organization, and interact well with people.

Upon completion of the program, students are eligible to take the Dental Assisting National Board Examination to become a Certified Dental Assistant (CDA). In addition, they are eligible to take the State of Michigan's Registered Dental Assistant Examination to become a licensed Registered Dental Assistant (RDA).

The program in Dental Assisting is accredited by the Commission on Dental Accreditation. The Commission is a specialized accrediting body recognized by the Commission on Recognition of Post-Secondary Accreditation and the United States Department of Education.

College Certificate Goals

- To teach and prepare students as dental assistants to competently perform a variety of dental assisting tasks in a variety of community and health care settings

College Certificate Outcomes

- Students will be able to detail, plan and demonstrate competency in performing comprehensive and routine dental laboratory procedures, assist in managing medical emergencies and perform expanded functions legal in the State of Michigan
- Perform clinical and support treatments to include collecting diagnostics and data
- Manage proper infection control and hazard management protocol
- Take proficient diagnostic radiographs related to exposure and evaluation
- Carry out routine dental office procedures to include computer data entry, scheduling, and records management
- Understand regulations governing the legal and ethical boundaries of the profession as they apply to American Dental Assistants Association (ADAA) code of ethics and Health Insurance Portability and Accountability Act (HIPAA) guidelines while modeling professional behaviors, ethics and appearance
- Provide patient oral health instructions
- Upon completion of the Dental Assisting Program, the HESI Dental Assisting Exit Exam will be administered

Admission Requirements

The program begins each Fall semester and part-time students are accepted on a space availability basis. Student must have the program's approval, a completed application, and other required information submitted by the due date. If there are openings after the application deadline, any remaining openings will be filled on a first come basis to qualified applicants.

Students must complete the following:

- Fulfill all WCCCD admission requirements
- Possess a high school diploma or GED
- Request official high school and/or college transcripts to be sent to the Dental Assisting Program office

Continued on next page.

Dental Assisting continued

- Must be 18 years of age or older
- Declare intent to enter the Dental Assisting Program on the WCCCD Application for Admission form or change intent at the Admission's Office
- Declare intent to enter the Dental Assistant Program by submitting an Allied Health Application
- Demonstrate reading comprehension via the ACCUPLACER® assessment with a score of 276 in the Next Generation Reading portion or Freshman English 119. Based on the results of the test Prerequisite courses may be required
- Documentation of current immunizations or immunity for tetanus, MMR and Varicella
- Receive the Hepatitis B vaccination or declare intent to receive or decline the vaccination
- Must test negative on a TB test
- Show proof of enrolling in an applicable CPR (for the healthcare provider) course
- Obtain a Criminal Background Check (through the program)
- Meet with the Dental Assisting Program Director
- The admitted student must purchase the required uniform. Students will be loaned a dental kit in the first week of classes
- Program approval is required for credits for "Prior Experience and Required Knowledge"
- Complete a WCCCD Program Application and submit to the Campus Academic Officer

An admitted student must purchase the required uniform. Students will be loaned a dental kit in the first of week of classes and will need to provide:

- Documentation of current medical examination
- Complete CPR training for the Health Care Provider (A CPR course is offered by the College)
- Documentation of dental examination and completed treatment

Before participating in any clinical course:

- The admitted student must purchase the required uniform. Students will be loaned a dental kit in the first week of classes.

DENTAL HYGIENE

Associate of Science Degree: (DEH-AS)

About the Program

The Dental Hygiene Associate of Science degree program at Wayne County Community College District is a prominent career for individuals interested in working as an important part of the dental healthcare team. The dental hygienist learns specialized clinical skills to provide direct patient care, and may be responsible for community distribution of information related to the prevention of oral diseases and the maintenance of oral health. The demand for dental services will continue to grow due to the success of preventive dentistry in reducing the incidence of oral diseases. Dentists will need to employ more dental hygienists to meet the increased demand for dental services.

Dental Hygienists are important members of the dental health care team. Their primary duties include the following: oral prophylaxis, such as scaling, root planning and polishing, recording medical/dental history, diagnostic data collection, dental charting, oral cancer screening, oral examinations, treatment planning; expose and interpret dental radiographs, apply fluoride, and dental sealants, teach patients proper oral hygiene techniques, counsel patients about plaque control, develop individualized at home oral hygiene programs, counsel patients on the importance of good nutrition for maintaining optimal oral health and performing other clinical dental hygiene services. The Dental Hygiene program is designed to prepare students to become competent oral health clinicians and educators. Admission to the program is limited and competitive. Upon completion of this program, students are eligible to take the National Board Dental Hygiene Examination and The Commission on Dental Competency Assessments, Western Regional Examining Board and Council of Interstate Testing Agencies, Inc. Examination. The Michigan Board of Dentistry may deny dental hygiene licensure to an applicant who has been convicted of a criminal offense.

This Program Offers:

- Associate of Science Degree: **83** credit hours

Program Goals

- Prepare a dental hygienist who will be competent with respect to “Competencies for the Dental Hygiene”
- Maintain a contemporary program curriculum that reflects evidence-based research of the practicing dental hygienist
- Prepare students to pass all licensing examinations successfully
- Maintain expert dental hygiene faculty and staff with relevant work experience, educational methodology and lifelong learning experiences
- Maintain admissions policies to ensure qualified students
- Maintain an active Advisory Committee
- Satisfy patients with the quality of student dental hygiene care
- Maintain a quality assurance program for patient care

Program Outcomes

- The dental hygiene graduate must be able to discern and manage ethical issues of dental hygiene practice in a rapidly changing environment
- The dental hygiene graduate must be able to acquire and synthesize information in a critical, scientific and effective manner in order to provide dental hygiene care to promote patient health and wellness
- The dental hygiene graduate must be concerned with improving the knowledge, skills and values of the profession
- The dental hygiene graduate must be able to provide planned educational services using appropriate interpersonal communication skills and educational strategies to promote optimum health

Continued on next page.

Dental Hygiene continued

- The dental hygiene graduate must be able to initiate and assume responsibility for health promotion and disease prevention activities for diverse populations
- The dental hygiene graduate must be able to provide accurate consistent and complete documentation systematically collect, analyze and accurately record baseline data on the general oral and psychological health status using methods consistent with medicolegal principles
- The dental hygiene graduate must be able to discuss the conditions of the oral cavity, actual and potential problems, etiological and contributing factors and recommended and alternative treatments available
- This involves collaborating with the patient and or other health professionals to formulate a comprehensive dental hygiene care plan that is patient centered and based on current scientific evidence
- The dental hygiene graduate must be able to provide patient centered care that is culturally appropriate and based on current standards of practice and specialized treatment that includes preventive and therapeutic procedures to promote and maintain oral health and assist the patient in achieving oral health goals
- The dental hygiene graduate must be able to evaluate the effectiveness of planned clinical and educational services and modify as necessary

Admission Requirements

Admission is competitive and based on previous academic performance, test scores, criminal background check, letters of recommendation, an interview and fulfillment of ALL admission requirements. Deadline for application to the program is May 15th and admission is granted prior

to the Fall semester. Additional admission information is provided during DEN 100, Professional Development, or upon request from the Dental Hygiene Program office. Once a student has been admitted there will be additional required information that the student must submit to the dental hygiene program office.

Students must complete the following:

- Fulfill all WCCCD admission requirements
- Possess a high school diploma or GED
- Must be 18 years of age or older
- Declare intent to enter the Dental Hygiene program by submitting an Allied Health Application
- Successful completion of the Admission Assessment Exam before acceptance
- Obtain a Criminal Background Check
- Provide transcripts of all other institutions to Dental Hygiene Program office
- Before clinical participation, students must show:
 - Attend mandatory New Student Orientation
 - Documentation of current immunizations or immunity for tetanus, MMR and Varicella
 - Receive the Hepatitis B vaccination or declare intent to receive or decline the vaccination
 - Must test negative on a TB test
 - Complete CPR training (A CPR course is offered by the College)
 - Documentation of a standardized dental and health examination
 - Obtain an Instrument Kit from approved vendor (discussed in detail during orientation)

Degree Requirements

- Students must complete all course work with a grade of “C” or better to meet graduation requirements

DIGITAL MARKETING

- College Certificate (SCERT-DM)

About the Program

The Digital Marketing Short-Term Certificate (SCERT-DM) is a dynamic 18-credit program designed to equip students with essential skills and knowledge for careers and business opportunities in the evolving digital marketing landscape. This program introduces students to the fundamentals and history of digital marketing, emphasizing the integration of emerging technologies such as Internet, Cloud, and AI marketing strategies. Through hands-on experience with tools like Google, Microsoft 365, and CRM platforms, students will develop a practical understanding of digital marketing systems and techniques. The curriculum also explores various digital marketing career paths, preparing students to contribute effectively within a digital marketing team or business environment.

This Program Offers:

- College Certificate (SCERT): **18** credit hours

College Certificate Goals

- To introduce marketing students to the world of digital marketing. The Fundamentals, History, and significance of Digital Marketing ecosystem.
- Digital transformation: evaluate the field in relation to emerging trends, their evolution, adoption, and future path, with a particular emphasis on integrating Internet, Cloud and AI marketing strategies
- Enhance students learning with Marketing online tools: Google, Microsoft and CRM tools resources.
- Articulate a basic understanding of the techniques that will drive your digital marketing businesses and customers efforts:
- Learn about the various career paths in Digital Marketing and know how to be a contributor on a digital marketing team.

Certificate Outcomes

Upon successful completion of this course, the student shall be able to:

- Demonstrate fundamental understanding of the history of Digital Marketing and its foundations.
- Demonstrate awareness and comprehension of various applications of Digital Marketing systems functionality.
- Proficient in Microsoft 365-AI ecosystem and complete discussions/ Digital Marketing: AI, Internet, Cloud and CRM platforms .
- Gain practical and projects experience in using digital tools as an asset to their current or prospective jobs/businesses in digital marketing

Admission Requirements

This Program Offers: - Associate of Arts Degree: 62 credit hours - Associate of Applied Science: 61 credit hours

Students are required to do the following:

- Fulfill all WCCCD admission requirements
- Fulfill course placement requirements based on the ACCUPLACER® assessment
- Declare intent to enter the program on WCCCD Admission Application or in the Student Services Office • Complete an Educational Development Plan (Plan of Work), outlining the student's plan for program completion

DIGITAL MEDIA PRODUCTION

Associate of Applied Science Degree: (AAS-FTC)

• College Certificate: (CERT-FTC)

About the Program

The Digital Media Production Associate of Applied Science degree and College Certificate program will provide students with a broad survey of the digital production tools. The students will gain a theoretical grasp of the implications of digital mass communications through various digital media production courses and hands-on experience in digital video and sound production, web design layout and design. The program may be pursued as a full-time or part-time study.

This Program Offers:

- Associate of Applied Science: **61** credit hours

- College Certificate: **33** credit hours

Program Goals

- To teach and provide students with a foundation in the field of Digital Media Productions as a precursor for a declared four-year degree
- To produce students that can work with and visualize the direction of digital media

Program Outcomes

- Students will be able to effectively use industry-standard motion media editing software applications in digital video production e.g. preproduction, production and post-production
- Analyze the relationship of aesthetics, content, user needs and/or interactivity of projects for implementing digital media
- Apply knowledge of story structure to synthesize a design, incorporate storyboards and flow chart techniques using good design principles and contemporary digital technology for motion media projects

Continued on next page.

Digital Media Production continued

- Create a production plan and schedule that meets client needs, appropriately utilizes resources and operates timely and efficiently within budget constraints
- Demonstrate an understanding of legal regulations, industry ethics, production schedules and budgets to effectively function as a contributing member of the production team
- Use listening and knowledge of technical terms/industry jargon to effectively communicate both verbally and in writing with clients, colleagues and other industry professionals

College Certificate Goals

- To provide student's a basic foundation in digital media production
- Provide a foundation for students to develop competency in developing media projects utilizing digital media technology

College Certificate Outcomes

- Students will be able to create art and design projects utilizing digital media technology software
- Demonstrate competency in developing media projects that incorporate web design and development, computer graphics and digital video
- Demonstrate proficiency in editing, streaming media, web animation, motion graphics, and dimensional animation

Admission Requirements

Students are required to do the following:

- Declare intent to enter the program on WCCCD Admission Application or in the Student Services Office

- Complete an Educational Development Plan (Plan of Work), outlining the student's plan for program completion
- Complete 23 required credits and 7 electives credits from the Digital Media program electives list at the Admissions Office
- Fulfill all WCCCD admission requirements
- Fulfill course placement requirements based on the ACCUPLACER® assessment

Prerequisite Work

- Prior to beginning the Major Requirements students are required to test at the level or complete English 119 and be computer literate or complete OIS 101

TECHNOLOGY**

- College Certificate: (CERT-DPT)

About the Program

The Digital Photography Technology College Certificate program is designed to provide students with in-depth instruction in the field of Digital Photography. Students will gain a theoretical grasp of the implications of digital photography through various digital photography courses, hands-on experience with cameras and lighting, and digital post production of images. This certificate in Digital Photography Technology will prepare students to enter a number of professional photography fields, such as portrait and commercial studios, and in computer-based processing labs. Emphasis is placed on digital photography and computer-based media imaging.

This Program Offers:

- Digital Photography Technology
College Certificate: **36** credit hours
- Digital Photography Technology: Forensic
Photography College Certificate: **30** credit hours
- Digital Photography Technology: Commercial
Photography: Certificate of Achievement:
12 credits
- Digital Photography Technology: Journalism
Photography Certificate of Achievement:

College Certificate Goals

- To prepare students to become photographic entrepreneurs and business owners in the vast and varied industry of photography

Continued on next page.

Digital Photography Technology continued

- To teach students the skills that will make them knowledgeable, competent, and competitive when seeking employment in the industry
- To teach the fundamentals of commercial photography (studio, architectural, etc.)

College Certificate Outcomes

- Students will be able to perform all of the fundamental and advanced camera techniques used in digital photography
- Students will be able to produce digital images at a quality level equal to professional photographers
- Students will have the skills to establish a business of their own in photography or be employed by a professional photo organization
- Students will understand the role of photography in advertising and commercial publicity
- Students will understand typical personnel structures and commissioning methods of advertising agencies, design groups and public relations organizations
- Students will understand the relationship of copy and image in advertising
- Students will understand the aspects of the equipment and props, including lighting, used in commercial photography

Admission Requirements

Students are required to do the following:

- Fulfill all WCCCD admission requirements
- Declare intent to enter the program on WCCCD Admission Application or in the Student Services Office
- Complete an Educational Development Plan (Plan of Work), outlining the student's plan for program completion
- Fulfill course placement requirements based on the ACCUPLACER® assessment

TECHNOLOGY:
FORENSIC PHOTOGRAPHY**

- College Certificate: (FOR-CERT)

About the Program

The Forensic Photography College Certificate program is designed to provide students with the technical skills necessary to photographically preserve crime scenes and items of evidence, from both technical and legal standpoints. The Forensic Photography program provides students with the necessary skills needed in the principles of composition, focus, exposure, color theory, and lighting. The program enables students to work in front of the camera, photography studios, and computer based processing labs. The program addresses the need for an alternative career track for students that work in crime scene investigation, criminal justice, homeland security, fire safety, as well as other evidence gathering related occupations. There is a demand for individuals that have the skills and talents as a photographer or a computer-based digital imaging specialist.

College Certificate Goals

- To provide students with the general principles involved in the scientific approaches involved in the recognition, documentation and evidence production of forensic photography
- To expose students to the legal constraints and ethical issues of the criminal justice system
- To provide students with basic training and hands-on experience related to the fundamental techniques of forensic photography as it relates to career tracks including criminal justice, homeland security and others

Continued on next page.

*Digital Photography Technology:
Forensic Photography continued*

College Certificate Outcomes

- Students will be able to analyze, interpret and demonstrate the anthropological ability to properly collect, preserve and document specimens via forensic photography
- Demonstrate an applied understanding of the role of the forensic entomologist in the moral and legal systems of our society
- Identify, detail and explain the process for preparing case reports with a 70% proficiency rate or higher

Admission Requirements

Students are required to do the following:

- Fulfill all WCCCD admission requirements
- Declare intent to enter the program on WCCCD Admission Application or in the Student Services Office
- Complete an Educational Development Plan (Plan of Work), outlining the student's plan for program completion
- Fulfill course placement requirements based on the ACCUPLACER® assessment

EARLY CHILDHOOD EDUCATION

Associate of Applied Science Degree: (ECE-AAS)

- Short-Term Certificate: (ECE-SCERT)

About the Program

The Early Childhood Education Program offers a Short-Term Certificate as a Child Development Associate (CDA) and an Associate of Applied Science degree in Early Childhood Education. The program at Wayne County Community College District prepares students to work as child care administrators and to be teachers and caregivers in an early childhood settings. The CDA Training program is designed for the childcare worker wishing to become a Child Development Associate (CDA). The CDA credential is independently awarded by the National Council for Professional Recognition to those demonstrating competence in their work with children in early education and childcare programs. Formal training is required for this credential.

Child Development Associate (CDA) - focuses on child development methods and strategies to motivate learning in the six competencies and function areas. Graduates become responsible for the care and education of children up to five years old by creating and maintaining a safe and healthy learning environment, guiding behavior, planning curricula, implementing learning activities, and working cooperatively with staff and parents.

** Selected WCCCD courses will transfer to some colleges and universities to meet requirements for an Elementary Education Certification — Early Childhood Endorsement. (See a counselor or academic advisor for more information)*

This Program Offers:

- Associate of Applied Science: **63** credit hours
- Short-Term Certificate: **19+** credit hours

Program Goals

- To prepare students with educational and academic skills to compete for professional employment
- To prepare students with practical experiences which are implemented in a child care setting

Program Outcomes

- Demonstrate knowledge of child development theory and its application to Early Care and Education by identifying key developmental theorists and recognizing children's developmental stages
- Demonstrate competence in facilitating the development of an individual child's stages of progression that promote physical, cognitive and/or socio-emotional development
- Understand, articulate and practice the regulations governing legal and ethical boundaries of the profession

College Certificate Goals

- To prepare students to meet the requirements to apply for a CDA certification
- To provide students with a foundation in child development theories to examine program philosophy goals, classroom design, teacher/child interaction, curriculum planning and implementation, assessment of the young child, involvement of the family/community and issues of diversity
- To teach students methods of formulation lesson plans that foster children's personal social, physical, cognitive and creative development
- To teach students elements of designing and assessing a learning environment using teaching strategies based upon child development and learning theories

Continued on next page.

*Early Childhood Development continued***College Certificate Outcomes**

- To prepare students to meet the goals, guidelines and objectives of the National Council for Professional Recognition (CDA) certification
- To prepare students to maintain their current employment as well as to increase employment opportunities

Admission Requirements

To be admitted into the program a student must:

- Fulfill all WCCCD admission requirements
- Declare intent to enter the program on WCCCD Admission Application or in the Student Services Office
- Complete an Educational Development Plan (Plan of Work), outlining the student's plan for program completion
- Fulfill course placement requirements based on the ACCUPLACER® assessment
- Submit a Program application to the Campus Academic Officer before the ninth week of the fall or spring semesters
- Students must complete and present the following when admitted into the program: CPR Training/Food handler's card (as needed), Current TB results/Current Immunization Records, Background check (clearance from federal, state and local agencies), and Drug test

ELECTRICAL ELECTRONICS ENGINEERING TECHNOLOGY

Associate of Applied Science Degree: (EEET-AAS)

• College Certificate: (CERT-EEET)

About the Program

The Electrical Electronics Engineering Technology Associate of Applied Science and College Certificate degree programs prepare students for a wide range of job opportunities in the installation and maintenance of electronic equipment in manufacturing, research, development, medicine and communications.

The Electrical Electronics Engineering Technology program prepares students for various International Society of Certified Technician (ISCET) certification exams.

This Program Offers:

- Associate of Applied Science: Electrical Electronics Technology: **68** credit hours
- College Certificate: Electrical Electronics Engineering Technology: **33** credit hours

Concentrations in Electrical Electronics Engineering Technology:

- Associate of Applied Science Degree:
- Computer Technology (AAS-EEET): **65** credit hours
- College Certificate: Programmable Logic Controllers (CERT-PLC) : **37** credit hours

Program Goals

- Provide students with educational experiences in the areas of electrical and electronics installation and maintenance
- Prepare students to successfully pass the International Society of Certified Technician (ISCET) certification exam

Continued on next page.

Electrical Electronics Engineering Technology continued

- Provide transferability to four-year universities offering BS in electrical electronics, engineering technology and vocational teaching certificates
- Provide transferability to four-year universities offering BS in electrical electronics, engineering technology and vocational teaching certificates, students may replace EE 107 and EE 115 with MAT 155 and MAT 156

Program Outcomes

- Successfully pass the International Society of Certified Technician (ISCET) certification exam with a passing score of 70% or better
- Read and interpret electrical drawings, electronic schematics, and building and machinery blueprints
- Repair, maintain, install, upgrade, lay out and modify industrial electrical/electronic equipment and manufacturing control systems
- Identify, troubleshoot and repair hardware and software problems
- Effectively communicate through verbal, written and drawing documentation in a team environment
- Students with prior electrical electronics license, training and experience may be qualified to waive certain classes
- Electrical Electronics Engineering Programs are approved by the FAA (Federal Aviation Administration)

College Certificate Goals

- Successfully pass the International Society of Certified Technician (ISCET) certification exam with a passing score of 70% or better
- To provide students a foundation in electrical and electronics installation and maintenance

College Certificate Outcomes

- Prepare students to successfully pass the International Society of Certified Technician (ISCET) certification exams with a passing score of 70% or better
- Proficiently perform installations, repairs and maintenance
- Communicate effectively through verbal, written and drawing documentation in a team environment

Admission Requirements

Individuals interested in the Electrical Electronics Engineering Technology program are required to fulfill the following requirements:

- Fulfill all WCCCD admission requirements
- Declare intent to enter the program on WCCCD Admission Application or in the Student Services Office
- Complete an Educational Development Plan (Plan of Work), outlining the student's plan for program completion
- Fulfill course placement requirements based on the ACCUPLACER® assessment
- Students must complete a WCCCD Program Application and submit to the Campus Academic Officer during the semester they are enrolled in EE 101 Survey of Electrical and Electronics Technology – 4 credit hours
- Students with prior electrical electronic licenses, training and experience may be qualified to waive certain classes

ELECTRICAL ELECTRONICS ENGINEERING TECHNOLOGY: COMPUTER TECHNOLOGY

Associate of Applied Science Degree: (AAS-EECT)

About the Program

The Electrical Electronics Engineering Technology, Computer Technology, Associate of Applied Science degree program prepares students for several IT industry careers by providing in-depth exposure to computer hardware and operating systems. Students learn the functionality of hardware and software components as well as suggested best practices in maintenance and safety issues. Through hands on activities and labs, students learn how to assemble and configure a computer, install operating systems and software, and troubleshoot hardware and software problems. This program helps students prepare for the CompTIA's A+ certification, Microsoft Certified System Engineer, and Microsoft Certified Systems Administrators exams.

This Program Offers:

- Associate of Applied Science: **64** credit hours

Program Goals

- To assure that students are provided educational experiences in the areas of electrical and electronic computer technology
- To teach students the functionality of computer hardware and software components maintenance and safety
- To produce students who can critically think and troubleshoot hardware and software problems
- To prepare students to successfully pass the CompTIA's A+ certification, Microsoft Certified System Engineer, and Microsoft Certified Systems Administrators exams

Program Outcomes

- Students will be able to successfully pass the CompTIA's A+ certification, Microsoft Certified System Engineer, and Microsoft Certified Systems Administrators exams
- Identify, describe and explain the steps and procedures for setting up and managing a Windows Server Active Directory Environment including identification of the policies and procedures associated with implementation
- Identify, troubleshoot and repair hardware and software problems

Admission Requirements

Individuals interested in the Computer Technology program are required to fulfill the following requirements:

- Fulfill all WCCCD admission requirements
- Declare intent to enter the program on WCCCD Admission Application or in the Student Services Office
- Complete an Educational Development Plan (Plan of Work), outlining the student's plan for program completion
- Fulfill course placement requirements based on the ACCUPLACER® assessment
- Students must complete a WCCCD Program Application and submit to the Campus Academic Officer during the semester they are enrolled in EE 101 Survey of Electrical and Electronics Technology – 4 credit hours

ELECTRICAL ELECTRONICS ENGINEERING TECHNOLOGY: PROGRAMMABLE LOGIC CONTROLLERS

- College Certificate: (CERT-PLC)

About the Program

The Electrical/Electronics Engineering Technology: Programmable Logic Controllers Technology certificate is designed to provide students with in-depth instruction in the field of Programmable Logic Controllers (PLC). This program will prepare students for employment in the ever-expanding Electrical/Electronics industry as entry-level programmable logic controller programmers and technicians, instrumentation technicians, field engineers, and sales and marketing engineers.

This Program Offers:

- College Certificate: **38** credit hours

College Certificate Goals

- Prepare students for employment in the manufacturing industry using applied knowledge of manufacturing with the ability to perform a task with minimal human intervention through automation
- Assure that students are provided educational experiences in the areas of automation that include entry level programming, installation and maintenance
- Provide transferability to four-year universities offering BS in electrical electronic engineering technology

College Certificate Outcomes

- Demonstrate proficiency in reading and interpreting electrical drawings, electronic schematics, and building and machinery blueprints

Continued on next page.

EMERGENCY MEDICAL TECHNOLOGY

Associate of Applied Science Degree: (EMT-AAS)

- College Certificate: (CERT-EMT)

About the Program

The Emergency Medical Technology (EMT) Associate of Applied Science degree and College Certificate curriculum stresses the integration of knowledge and skills required to competently perform pre-hospital basic, limited, and advanced life support. Wayne County Community College District's EMT Program is an approved State of Michigan Education Program Sponsor with the Michigan Department of Community Health EMS Section. The Emergency Medical Technician-Paramedic Program at Wayne County Community College District is accredited through The Commission on Accreditation of Allied Health Education Programs (CAAHEP) from the recommendation of the Committee on Accreditation of Educational Programs for Emergency Medical Services Professions (CoAEMSP).

Therefore, students that successfully meet the completion criteria and are eligible for Emergency Medical Technology (EMT) Program certification and the National Registry for EMT's certification examination necessary for and Michigan licensure as a EMS Professional.

This Program Offers:

- Certificate of Achievement*: Medical First Responder = **3** credit hours
- Certificate of Achievement*: Basic Emergency Medical Technician (Basic EMT) = **2** credit hours
- College Certificate: EMT = **30** credit hours:
- College Certificate: Paramedic = **53** credit hours
- Associate of Applied Science Degree: Emergency Medical Technology = **72** credit hours

**Refer to Academic Schedule*

Medical First Responder: This certificate of achievement will prepare individuals to take the Medical First Responder examination through the National Registry of EMTs.

Basic EMT: This certificate of achievement will prepare individuals to take the Emergency Medical Technician examination through the National Registry of EMTs.

Paramedic: This certificate program is designed for individuals who desire employment on Advanced Life Support (ALS) Ambulance Agencies, Fire Departments or Hospital Emergency Departments requiring Paramedic skills.

Program Goals (CoAEMSP):

Goal Emergency Medical Technician

- To prepare competent entry-level Emergency Medical Technicians in the cognitive (knowledge) psychomotor (skills) and affective (behavior) learning domains to the Paramedic or the Emergency Medical Technician-Intermediate or Emergency Medical Technician-Basic or First Responder Levels

Program Outcomes

- Demonstrate appropriate level of technical capability and proficiency with psychomotor skills and assessment
- Recognize the nature and seriousness of the patient's condition or extent of injuries to assess requirements for emergency medical care
- Administer appropriate emergency medical care based on assessment of the patient's condition
- Properly and safely lift, move, position and handle the patient to minimize discomfort and prevent further injury
- Provide a service in an environment requiring special skills and knowledge in such areas as communications, transportation and record keeping

Continued on next page.

Emergency Medical Technology continued

- Perform the expectations of the position description safely and effectively
- Commitment to life-long learning

Admission Requirements

Entry into the Paramedic Program occurs each Fall semester and the Basic EMT program every Fall and Spring semester. Students interested in either program must submit a completed application and required documentation by the application due date. Any remaining openings will be filled on a first come basis to qualified applicants. Students are required to do the following:

- Fulfill all WCCCD admission requirements
- Successfully complete a minimum of 12 college credits with a “C” or better and/or have ACCUPLACER® scores that fulfill program requirements
- Declare intent to enter the Emergency Medical Technology program on the WCCCD Application for Admission
- Must be 18 years of age or older
- Must complete physical exam and other health requirements
- Complete a WCCCD Program Application and submit to the Campus Academic Officer

Based upon Michigan Law, students applying for admission to the EMT program will be subject to a criminal background check, the results of which could preclude admission to Wayne County Community College District’s EMT program on the basis of any of the following:

- A felony conviction or conviction for an attempt or conspiracy to commit a felony within the past fifteen (15) years

- Any misdemeanor conviction involving abuse, neglect, assault, battery or criminal sexual conduct within the past fifteen (15) years
- Any misdemeanor conviction involving fraud or theft

The Wayne County Community College District (WCCCD) Paramedic Program does not accept partial Experiential Learning. Students who have attended other institutions’ Paramedic Program but did not complete the program, will not receive credit for that portion toward WCCCD’s Paramedic Program. These students are subject to all the admissions policies as a new student to enter the Paramedic Program at WCCCD.

EMERGENCY RESPONSE AND SAFETY

Associate of Applied Science Degree (ERS-AAS)

About the Program

This Associates of Applied Science degree will prepare students to fulfill an immediate need in the workforce and serve as a pathway to other careers within the first responders' business community. Students who enroll in the program will range from recent high school graduates to other adult individuals desiring career training. Students may come from a variety of cultural, educational, and socioeconomic backgrounds.

This course provides the theory and skills necessary to assist professional emergency response providers in providing direct emergency care. Candidates will receive training to provide emergency response assistance in the classroom, skills lab, and community settings.

This Program Offers:

- Associate of Applied Science: **61** credit hours

Program Goals

- The goal of the Emergency Response and Safety Program is to prepare students for advancement opportunities in the workplace by providing additional emergency response education.

Program Outcomes

- Demonstrate appropriate level of technical capability and proficiency with psychomotor skills and assessment in an emergency response setting.
- Apply leadership and professional communication skills when working with other emergency response members and teams.
- Prepare graduates for advancement and leadership opportunities within the workplace. Support the profession of emergency responders and safety providers.

Continued on next page.

*Emergency Response and Safety continued***Admission Requirements**

Students are required to do the following:

- Fulfill all WCCCD admissions requirements
- Fulfill course placement requirements based on the ACCUPLACER® Test
- Declare intent to enter this program on the WCCCD Application for Admission or change intent at the Admissions Office
- Complete a WCCCD Program Application and submit to the Campus Academic Officer

EMERGENCY ROOM MULTI-SKILL HEALTHCARE TECHNOLOGY

Associate of Applied Science Degree: (ERHT-AAS)

- College Certificate: (CERT-ERT)

About the Program

The Emergency Room Multi-Skill Health Care Technology (ERT) Associate of Applied Science Degree and College Certificate program is designed to prepare the student to work in the hospital and urgent health care environments. Students will find employment opportunities with various hospital emergency departments, special care units and urgent care centers. Emergency Room Technicians receive specialized training in hospital procedures and protocols. Practical skills include insertion of Foley catheters, EKG, phlebotomy, 12-lead cardiac monitoring, sterile procedures, insertion of nasal gastric tubes and many other skills.

This Program Offers:

- Associate of Applied Science: **61** credit hours
- College Certificate: **30** credit hours

Program Goals

- Prepare students for advanced responsibilities in the emergency room assisting nurses and health care professionals in providing basic patient care

Program Outcomes

- Demonstrate appropriate level of technical capability and proficiency with psychomotor skills and assessment as delineated in basic patient care practices in an emergency room setting
- Apply therapeutic and professional communication skills when working with patients, families, colleagues and other health care providers and members of the community

- Provide the Basic EMT with the principle skills and techniques necessary to provide additional patient care within a hospital, urgent care, or primary health care environment
- Prepare graduates to successfully obtain employment in a hospital, urgent care or primary health care environment
- Support the profession by preparing graduates who are competent Emergency Room Multi-Skilled Technicians and as members of the health care team

Admission Requirements

Students are admitted to the program each year for the Fall and Spring semesters. Student must have the Program's approval, a completed application, and other required information submitted by the required due date. After the application deadline any remaining openings will be filled on a first come basis to qualified applicants.

Based upon Michigan Law

Based on Michigan Law: Students applying for admission to the Emergency Room Multi-Skill Healthcare Technology (ERT) program will be subject to a criminal background check, the results of which could preclude an applicant from admission to Wayne County Community College District's ERT program on the basis of any of the following:

- A felony conviction or conviction for an attempt or conspiracy to commit a felony within the past fifteen (15) years
- Any misdemeanor conviction involving abuse, neglect, assault, battery or criminal sexual conduct within the past fifteen (15) years
- Any misdemeanor conviction involving fraud or theft

Continued on next page.

*Emergency Room Multi-Skill
Healthcare Technology continued*

- Students are required to do the following:
- Fulfill all WCCCD admission requirements
 - Successfully complete a minimum of 12 college credits with a “C” or better and/or ACCUPLACER® scores that fulfill program requirements
 - Declare intent to enter the Emergency Medical Technology on the WCCCD Application for Admission
 - Must be 18 years of age or older
 - Must complete physical exam and other health requirements
 - Complete and pass background check
 - Obtain a basic EMT Certificate or License

- College Certificate: (CERT-ENT)

About the Program

The Entrepreneurship College Certificate program is designed for those individuals who have, or desire to have, their own business. Emphasis is on successfully creating and sustaining a competitive advantage in starting, managing and growing a small business. This program focuses on the preparation needed for small business ownership.

College Certificate Goals

- Teach students basic principles, concepts and procedures necessary to start a business and/or grow an existing small business
- Provide students a foundation for strategic planning, decision making, critical thinking, communication skills and resources in starting and/or growing an existing business

College Certificate Outcomes

- Apply knowledge of what it takes to start a new business including the basics of finance, marketing and management
- Demonstrate and apply leadership and workplace relationship skills when communicating with customers, employees, suppliers, etc. specific to the field
- Understand and apply a working knowledge of legal issues of operating a small business
- Demonstrate knowledge in completing a comprehensive business plan that will enable the business to secure adequate funding
- Effectively use written, oral, listening and electronic communication skills when interacting in the office environment

Continued on next page.

*Entrepreneurship continued***Admission Requirements**

Students are required to do the following:

- Possess a high school diploma or GED
- Fulfill all WCCCD admission requirements
- Declare intent to enter the program on WCCCD Admission Application or in the Student Services Office
- Complete an Educational Development Plan (Plan of Work), outlining the student's plan for program completion
- Fulfill course placement requirements based on the ACCUPLACER® assessment

FACILITY MAINTENANCE

Associate of Applied Science Degree: (FAM-AAS)

- College Certificate: (FAM-CERT)

About the Program

The Facility Maintenance Associate of Applied Science degree and College Certificate program prepares the student for immediate employment as a facility maintenance technician, maintenance and stationary engineer, and facility maintenance manager at health care institutions, large office towers, apartment complexes, professional buildings, multiuse facilities, plants, government and educational building, etc.

Students will be able to perform work related to carpentry, plumbing, ground maintenance, electrical, general maintenance of heating, ventilation, air conditioning and refrigeration, (HVAC/R) and operation and complete maintenance of boiler plants. The program also prepares students to take local and State of Michigan examinations for obtaining license(s) for Mechanical Maintenance and Mechanics Education and Certification for Health Care (MECH) State of Michigan. The certificate will fulfill the competency requirements for the Joint Commission on Accreditation of Hospital Organization (JCAHO) for facility maintenance training. Students may be eligible to waive certain course.

This Program Offers:

- Associate of Applied Science: **62** credit hours
- College Certificate: **32** credit hours
- Building Engineer College Certificate: **33** credit hours

Program Goals

- To teach students to proficiency in performing electrical and HVAC/R (heating, ventilating, air conditioning and refrigeration) systems maintenance and repairs in multi-purpose buildings and facilities

Program Outcomes

- Demonstrate proficient use of hand tools, equipment and gauges commonly used in the repair and troubleshooting of commercial HVAC/R (heating, ventilating, air conditioning and refrigeration) systems
- Describe and apply the principles of operation of basic components and systems used in meeting specific needs in conditioning air, heating air, providing ventilating and refrigerating objects
- Interpret and apply EPA regulatory laws in properly handling refrigerants and other environmentally hazardous materials used with HVAC/R systems
- Demonstrate proper selection and application of HVAC/R components in maintenance of a commercial system
- Solve basic technical problems encountered in commercial refrigeration, cooling and heating equipment
- Effectively demonstrate competent verbal communication skills with individuals and teams

College Certificate Goals

- Provide students with a basic foundation in performing electrical and HVAC/R (heating, ventilating, air conditioning and refrigeration) systems maintenance and repairs

College Certificate Outcomes

- Demonstrate proficient use of tools, equipment and gauges commonly used in the repair and troubleshooting of commercial HVAC/R systems
- Demonstrate applied competency in proper selection and application of HVAC/R components in maintenance of a commercial system
- Solve basic technical problems encountered in commercial refrigeration, cooling and heating equipment

Admission Requirements

Students are required to do the following:

- Fulfill all WCCCD admission requirements
- Declare intent to enter the program on WCCCD Admission Application or in the Student Services Office
- Complete an Educational Development Plan (Plan of Work), outlining the student's plan for program completion
- Fulfill course placement requirements based on the ACCUPLACER® assessment

BUILDING ENGINEER**

- College Certificate: (BDE-CERT)

About the Program

The Facility Maintenance: Building Engineer Certificate is designed to prepare students for career opportunities in general building maintenance and repair, maintain machines, mechanical equipment for commercial and residential buildings. Students will be prepared to complete general repairs, work on plumbing, electrical, and air-conditioning and heating systems, among other tasks.

This Program Offers:

- College Certificate: **33** credit hours

College Certificate Goals

- Provide students with a basic foundation in performing maintenance and operations on building equipment including HVAC/R (Heating, Ventilation, Air Conditioning and Refrigeration), and Mechanical, Electrical and Plumbing Systems (MEP)

College Certificate Outcomes

Upon completion of the program, students will be able to:

- Demonstrate the ability to maintain and operate all building equipment (HVAC/R, MEP, etc.)
- Demonstrate the ability to perform miscellaneous maintenance throughout the building
- To learn the knowledge and skills to perform as supervisors and managers in the Building Engineering industry
- Demonstrate competency and compliance with all City, State and Federal safety and environmental laws, codes, standards and regulations
- Demonstrate the process in ordering, maintaining stock and inventory parts and supplies

- Demonstrate competency in inducing water treatment chemicals at proper amounts and times in heating and cooling systems
- Demonstrate competency in performing chemical analysis tests

Admission Requirements

To be admitted into the Facility Maintenance: Building Engineer program students must:

- Fulfill all WCCCD admission requirements
- Declare intent to enter the program on WCCCD Admission Application or in the Student Services Office
- Complete an Educational Development Plan (Plan of Work), outlining the student's plan for program completion
- Fulfill course placement requirements based on ACCUPLACER assessment

FASHION DESIGN

Associate of Applied Science Degree: (FAD-AAS)
• College Certificate: (FAD-CERT)

About the Program

The Fashion Design Associate of Applied Science Degree and College Certificate is designed for those persons who are innovative and driven to design and create apparel. Courses will offer students creative studies in design fundamentals, fashion analysis, fashion history, textiles, color theory, sketching, as well as technical training in draping, pattern making, pattern grading, and clothing construction. The Fashion Design degree will provide the training required for entry-level employment by the whole sale ready to wear industry or for custom design business operations.

This Program Offers:

- Associate of Applied Science: **61** credit hours
- College Certificate: **40** credit hours

Program Goals

- Utilize ability, critical thinking and problem solving skills in the development of design ideas, as per industry standards
- Develop individual student design abilities with a strong emphasis on professionalism
- Exhibit analytical, creative, and intellectual competencies through rigorous coursework and training in all area of the curriculum
- Identify, explain and apply skills and abilities to career opportunities in the evolving global marketplace
- Deepen and broaden a fashion design student's education through a strong core of foundation courses

Program Outcomes

- Identify, explain, and apply individual foundation skills developed through hands-on and digital methodology

Continued on next page.

Fashion Design continued

- Examine and implement practical and conceptual design solutions through two dimensional and three-dimensional techniques in projects and assignments
- Apply analytical, creative, and intellectual competencies when developing solutions for design projects and assignments
- Identify and apply the aesthetics, critical thinking and problem-solving skills required for entry level career positions
- Demonstrate requisite creative abilities and critical design skills that prepare students academically and professionally for entry into the upper division

College Certificate Goals

- To provide students with opportunity to apply basic design concepts with a strong emphasis on professionalism

College Certificate Outcomes

- Students will demonstrate requisite creative abilities and critical design skills that prepare students academically and professionally for entry into the upper division
- Possess basic competencies in sewing, draping, and pattern drafting and apply these in their understanding of fit on the human body

Admission Requirements

Students are required to do the following:

- Be 18 years of age or older (unless part of dual enrollment) or must have completed high school or hold a General Education Development (GED) Certificate
- Fulfill all WCCCD admission requirements
- Declare intent to enter the program on WCCCD Admission Application or in the Student Services Office

- Complete an Educational Development Plan (Plan of Work), outlining the student's plan for program completion
- Fulfill course placement requirements based on the ACCUPLACER assessment

FASHION INDUSTRIAL TAILOR

- Associate of Applied Science Degree: (FAD – AAS)
- College Certificate: (FAD-CERT)
 - Certificate of Achievement (FAD-ACERT)

About the Program

The Associate of Applied Science in Industrial Tailor prepares students for careers in garment construction, apparel production, and custom tailoring across diverse sectors of the fashion and textile industries. This hands-on, technique-driven program emphasizes industrial sewing machine operation, garment fitting, pattern modifications, alterations, and textile handling using industry-standard tools and methods. Students will gain practical experience in tailoring for ready-to-wear, uniforms, performance wear, costume design, and custom-fit garments. Coursework is supported by experiential learning in lab environments simulating professional production settings. The program also integrates foundational knowledge in fashion industry standards, materials sourcing, production workflow, and quality control. Graduates are equipped to work as industrial tailors, alterations specialists, production sewists, or costume technicians, or to start their own tailoring businesses. This degree also complements other pathways in fashion design and merchandising by offering a specialized technical route focused on craftsmanship and precision garment construction.

This Program Offers:

- Associate of Applied Science: **62** credit hours
- College Certificate: **40** credit hours
- Certificate of Achievement: **11** credit hours

Program Goals

- Develop Technical Proficiency: Equip students with advanced skills in garment construction, sewing techniques, pattern modification, and alterations using industrial machinery.

Continued on next page.

Fashion Design continued

- **Promote Industry Standards and Quality Control:** Train students in professional finishing techniques, garment evaluation, and inspection procedures aligned with industry expectations.
- **Enhance Workplace Readiness:** Prepare students for employment in manufacturing, custom tailoring, costume production, and entrepreneurial garment services through hands-on training and real-world projects.
- **Encourage Entrepreneurial Thinking:** Foster an understanding of small business operations, pricing, customer service, and branding for those pursuing self-employment or freelance tailoring.
- **Support Cross-Industry Collaboration:** Enable students to integrate their tailoring expertise with related fields such as fashion design, merchandising, theater, and product development.

Program Outcomes

- **Operate Industrial Sewing Equipment:** Safely and effectively use a variety of industrial sewing machines and tools, including sergers, blind hemmers, and cover stitch machines.
- **Construct Garments to Specification:** Assemble garments using industry-standard techniques and follow technical specs, patterns, and production guidelines.
- **Perform Advanced Alterations and Fittings:** Execute custom alterations, tailoring, and garment adjustments based on client or project needs.
- **Apply Textile Knowledge in Garment Production:** Identify fabric properties and appropriate handling methods to ensure quality and durability in finished products.

- **Collaborate in a Production Environment:** Work effectively within a team, meet deadlines, and manage workflows in a simulated or actual apparel production setting.
- **Demonstrate Quality Assurance and Professional Finishing:** Inspect garments for defects, ensure construction meets quality standards, and execute professional-level garment finishing.
- **Communicate Effectively with Clients and Teams:** Interpret client needs, provide garment consultations, and present work professionally both verbally and in writing.
- **Apply Business and Pricing Strategies:** Understand costing, pricing, and basic business models relevant to tailoring services and small garment businesses.

Admission Requirements

Students are required to do the following

- Be 18 years of age or older (unless part of dual enrollment) or must have completed high school or hold a General Education Development (GED) Certificate
- Fulfill all WCCCD admission requirements
- Declare intent to enter the program on WCCCD Admission Application or in the Student Services Office
- Complete an Educational Development Plan (Plan of Work), outlining the student's plan for program completion
- Fulfill course placement requirements based on the ACCUPLACER assessment

FASHION MERCHANDISING

Associate of Applied Science Degree: (FAD – AAS))

• College Certificate: (FAD-CERT)

About the Program

The Associate of Applied Science in Merchandising is designed to prepare students for dynamic careers in the fashion, retail, and product management industries. This program provides a practical foundation in visual merchandising, retail buying, inventory control, trend analysis, marketing, and customer experience. Students gain hands-on experience through classroom projects, industry software, and merchandising labs that simulate real-world environments. With a focus on both the creative and business sides of merchandising, students learn to analyze consumer behavior, develop product assortments, manage retail floor plans, and create compelling visual displays. Emphasis is placed on preparing students for careers in both physical and digital marketplaces, including e-commerce. Graduates are equipped to enter the workforce directly or continue toward a bachelor's degree in merchandising, fashion marketing, business, or related fields.

This Program Offers:

- Associate of Applied Science: **63** credit hours
- College Certificate: **41** credit hours

Program Goals

- **Develop Industry-Ready Skills:** Equip students with the practical skills and foundational knowledge required for immediate employment in fashion merchandising and retail environments.
- **Bridge Fashion and Business:** Provide an understanding of the fashion industry's business side, including marketing strategies, consumer behavior, product planning, and inventory control.

- **Foster Visual and Analytical Thinking:** Teach students how to analyze market trends, visually merchandise products, and make data-informed buying and merchandising decisions.
- **Support Career Mobility and Lifelong Learning:** Prepare students for a range of entry-level positions and promote further educational opportunities in fashion business, retail, or marketing.

Program Outcomes

- Identify and interpret current fashion trends and their influence on consumer behavior.
- Develop basic retail buying plans and calculate markup, markdown, and profitability.
- Design and implement visual merchandising displays that align with brand identity and sales objectives.
- Apply marketing and branding strategies to promote fashion products across various platforms.
- Understand the fundamentals of supply chain management in fashion retail and its role in merchandising.
- Communicate effectively with vendors, team members, and clients using industry-relevant terminology and presentation skills.
- Demonstrate professionalism, time management, and collaborative skills in fashion-related workplace settings.

Admission Requirements

Students are required to do the following

- Be 18 years of age or older (unless part of dual enrollment) or must have completed high school or hold a General Education Development (GED) Certificate
- Fulfil all WCCCD admission requirements
- Declare intent to enter the program on WCCCD Admission Application or in the Student Services Office

- Complete an Educational Development Plan (Plan of Work), outlining the student's plan for program completion
- Fulfill course placement requirements based on the ACCUPLACER assessment

FIRE PROTECTION TECHNOLOGY

Associate of Applied Science Degree: (AAS-FPT)

- College Certificate: (CERT-FPT)
- Short Term Certificate: (SCERT-FPT)

About the Program

The Fire Protection Technology Associate of Applied Science degree program addresses the constant change and growing complexities of modern living and the environment as it pertains to fire suppression. There is a demand for college-trained people in the various fields of Fire Protection. The degree addresses the needs of a person wanting to be an entry level firefighter, those desiring advancement within their fire career as well as those individuals seeking fire related jobs within companies. The program adheres to the National Fire Academy's Fire and Emergency Services Higher Education (FESHE) model curriculum. WCCCD is an approved Regional Training Center (RTC) with the Michigan Firefighter

This Program Offers:

- Associate of Applied Science: (AAS-FPT)
Fire Administration: **62** credit hours
- Associate of Applied Science: (AAS-FS)
Fire Suppression: **62** credit hours
- College Certificate: (CERT-FPT)
Fire Protection Technology: **30** credit hours
- Short Term Certificate: (SCERT-FPT)
Fire Protection Technology: **21** credit hours

Program Goals

- To instruct students on the competencies and skills implored in the principles of fire development, cause and prevention
- To teach students advanced principles of fire chemistry, arson and investigation and fire health and safety according to the National Fire Protection Association (NFPA) guidelines

- To prepare entry level students to successfully pass the State of Michigan Fire Fighter Certification exam with a proficiency score of 70% or higher competencies required to pass the Network+ certification exam
- Meet the educational requirement to become certified by taking the Project Management Professional (PMP) exam with a 70% or higher proficiency score

College Certificate Goals

- To provide basic instruction on the competencies and skills in the principles of fire protection technology.

Admission Requirements

To be admitted into the Cyber Security Program students must:

Admission Requirements Students are admitted to the program each year for the Fall, Spring and Summer semesters.

Students must have the Program's approval, a completed application, and other required information submitted by the due date. If there are openings after the application deadline, any remaining openings will be filled on a first come basis to qualified applicants

Students are required to do the following:

- Fulfill all WCCCD admission requirements.
- Complete any prerequisite course with a "C" or better
- Declare intent to enter the Fire Protection Technology program on the WCCCD application
- Must be 18 years old on the day of State Examination
- Successfully complete a minimum of 12 college credits with a "C" or better and/or have ACCUPLACER® scores that fulfill program requirements

- Must submit a completed “Public Safety Program Application” packet.
- Have access to a computer and the internet
- Complete a WCCCD Program Application and submit to the Campus Academic Officer

GERONTOLOGY

- College Certificate: (GER-CERT)

About the Program

The Gerontology College Certificate program is designed to prepare students for direct service occupations in the care of seniors. Students are trained for positions in case management and program administration. The job opportunities are available in diverse locations, such as housing complexes, nursing and congregate care facilities, adult day care centers and mental and health agencies. The program explores the normal processes of aging and related social, legal and economic issues.

College Certificate Goals

- To proficiently prepare students to competently and ethically serve the gerontology community as a highly skilled care provider

College Certificate Outcomes

- Students will have an understanding and knowledge regarding mental health as it relates to aging, later life transitions, mental illness and treatment
- Effectively use written, oral and listening skills when following care plans, providing appropriate documentation and working collaboratively with all stakeholders' e.g. multidisciplinary teams, medical and healthcare professionals, family and community members
- Understand, articulate and adhere to the professional and ethical care standards and regulations governing the profession

Admission Requirements

- Fulfill all WCCCD admission requirements
- Declare intent to enter the program on WCCCD Admission Application or in the Student Services Office
- Complete an Educational Development Plan (Plan of Work), outlining the student's plan for program completion
- Fulfill course placement requirements based on the ACCUPLACER® assessment

GLOBAL SUPPLY CHAIN MANAGEMENT

- College Certificate: (CERT-LOG)
- Certificate of Achievement (WTR-ACERT)

About the Program

The Global Supply Chain Management College Certificate program is a unique business management program that prepares graduates for employment in the areas of global supply chain (logistics) management, inventory control, materials management, and distribution. The field of global supply chain management includes occupations such as supervisors and/or managers of transportation, storage, and/or distribution; helpers, laborers, and/or hand material movers; and transportation/machine and vehicle material movers. The program combines core education courses with specific occupational courses in the area of customer service, supervision, and supply chain management.

College Certificate Goals

- To provide foundational understanding of the logistics support process as it pertains to product management and consumer distribution

College Certificate Outcomes

- Students will be able to utilize purchasing vocabulary and marketing concepts related to source selection, pricing, quality, and negotiating strategies to effectively procure goods and services
- Demonstrate, establish and maintain systems to track and control inventory
- Evaluate and effectively translate oral, written and electronic communication in a variety of business and manufacturing environments

Admission Requirements

- Fulfill all WCCCD admission requirements
- Declare intent to enter the program on WCCCD Admission Application or in the Student Services Office
- Complete an Educational Development Plan (Plan of Work), outlining the student's plan for program completion
- Must be 18 years old before the first day of class
- Fulfill course placement requirements based on the ACCUPLACER® assessment or completed 12 credits or more of college courses with a grade of a "C" or better

GRAPHIC DESIGN TECHNOLOGY

- College Certificate: (CERT-GDT)

About the Program

The Graphic Design Technology College Certificate program has been developed to prepare students for entry level positions in a variety of industries that require computer aided desktop publishing and graphic design applications. This program gives each student a solid foundation in basic concepts, and parallel today's latest graphic design technology. After receiving the foundations in art, computer literacy and basic math, the student will receive extensive training in all aspects of Adobe Creative Suite.

College Certificate Goals

- To develop student's oral, written and visual communication skills in graphic design technology
- To provide a basic foundation of the principles of computer aided desktop publishing design in print and visual media

College Certificate Outcomes

- Students will be able to demonstrate sound principles of basic visual perception evident in their graphic design work
- Define, identify and produce denotative and connotative messages in graphic designs, logos, illustrations and photographs
- Define, identify and implement design strategy and critical thinking techniques for visual problem solving in visual communication that addresses client needs
- Demonstrate proficiency in various graphic design, publishing and Web design technologies

Continued on next page.

*Graphic Design Technology continued***Admission Requirements**

- Fulfill all WCCCD admissions requirements
- Declare intent to enter the program on WCCCD Admission Application or in the Student Services Office
- Complete an Educational Development Plan (Plan of Work), outlining the student's plan for program completion
- Possess a high school diploma or GED
- Submit a transcript (copy) of grades earned for transfer in any course completed at WCCCD
- Fulfill course placement requirements based on the ACCUPLACER® Test

AND AIR CONDITIONING
(HVAC)**

Associate of Applied Science Degree: (HVAC-AAS)

About the Program

The Heating, Ventilation and Air Conditioning (HVAC) Associate of Applied Science degree and College Certificates are designed to provide students an opportunity to develop their skills and competencies for entry-level positions in the Heating, Ventilation, Air Conditioning and Refrigeration field. The curriculum focuses on the ability to maintain, install and repair climate control and refrigeration devices in residential, industrial and commercial buildings. The program provides students with training in the layout and design of cooling, heating and refrigeration systems, the use of the latest tools, gauges and testing equipment used in the field, as well as troubleshooting and inspection of equipment. The program certificates and degree prepare students for federal, state and local licensing exams.

This Program Offers:

- Associate of Applied Science Degree:
64 credit hours

- College Certificate(s):

1. 3rd Class Refrigeration (SCERT-HVAC-TCR):
28 credit hours

2. Geothermal Technology (CERT-HVAC-GTT):
33 credit hours

3. High Pressure Steam (CERT-HVAC-HPS):
30 credit hours

4. Sheet Metal Design and Fabrication
(CERT-HVAC-SMDF): **34** credit hours

5. HVAC: Sheet Metal and Design Fabrication:
10 credit hours

6. HVAC: Advanced: **13** credit hours

7. HVAC: Boiler Operations: **12** credits

8. HVAC: Residential Air Conditioning and
Commercial Refrigeration: **16** credits

9. HVAC: Residential Heating: **10** credits

Program Goals:

- To teach students the principles and technical application of installing, maintaining, and repairing heating, air conditioning and cooling systems according to industry standards
- Students will be prepared to pass federal, state and local licensing/certification exams

Program Outcomes:

- Exhibit knowledge of basic principles of electricity, electrical current, and circuitry for heating, refrigeration and air conditioning devices
- Describe and apply refrigeration theory and refrigeration cycle, troubleshoot, diagnose and repair sealed systems
- Demonstrate proper application and use of tools, test equipment, safety procedures, and safety techniques of basic shop tools used in the refrigeration and air conditioning industry
- Apply mathematical, reading, and communication skills essential to the HVAC service industry
- Apply and describe the sequence of operation for industrial systems
- Exhibit knowledge and hands-on ability to perform electrical repairs in an efficient and safe manner
- Exhibit knowledge and hands-on ability to perform soldering and brazing techniques in a safe manner
- Exhibit knowledge of equipment used in the HVAC field and use it in a safe manner
- Distinguish quality standards of products commonly used in professional HVAC operations and install HVAC equipment compliant with local codes

College Certificate Goals:

- Teach students the principles and technical application of installing, maintaining, and repairing heating, air conditioning and refrigeration systems according to industry standards
- Students will be familiar with operation and maintenance of low and high pressure boilers and/or operation, maintenance, installation and servicing of non-domestic refrigeration systems, depending on the certificate
- Students will be prepared to pass federal, state and local licensing/certification exams

College Certificate Outcomes:**3rd Class Refrigeration**

- Demonstrate knowledge of basic principles of electricity, electrical current, and circuitry for food preservation refrigeration systems
- Describe and apply refrigeration theory and refrigeration cycle, troubleshoot, diagnose and repair sealed systems
- Understand and demonstrate the knowledge of: relief valves rupture disks, fusible plugs, high and low pressure controls, safety heads, leak testing, condensers, expansion valves and evaporators, as well as correct start and stop procedures, causes of pressure problems and purging procedures
- Demonstrate proper application and use of tools, test equipment, safety procedures, and safety techniques of basic shop tools used in the refrigeration industry
- Students will be prepared to pass the local 3rd Class Refrigeration license examination as well as the EPA Certification Exam to be able to handle refrigerants

Continued on next page.

*HVAC continued***College Certificate Outcomes:****Geothermal Technology**

- Demonstrate knowledge of the basic principles of geothermal energy production
- Describe and apply reverse refrigeration theory and the reverse refrigeration cycle as well as troubleshoot, diagnose and repair sealed geothermal systems
- Demonstrate proper application and use of tools, test equipment, safety procedures, and safety techniques of basic shop tools used in the industry
- Exhibit knowledge of safety and equipment used in HVAC/Geothermal field
- Pass the GHEX Accreditation Examination for Geothermal installers

College Certificate Outcomes:**High Pressure Steam**

- Demonstrate knowledge of basic principles of steam boilers systems as well as electricity, electrical current, and circuitry for High Pressure Steam Boilers
- Describe and apply steam heating theory and troubleshoot, diagnose and repair systems
- Understand and demonstrate the knowledge of: boiler appliances and auxiliaries, pumps, regulators, gauges, valves and injectors as well as boiler inspection, maintenance and periodic system testing procedures. All requirements to operate, maintain, test and shut-down low and high pressure boilers and pass the local high pressure boiler exam will be demonstrated by the student
- Demonstrate proper application and use of tools, test equipment, safety procedures, and safety techniques of basic shop tools used to install, maintain and repair steam boilers
- Prepare to pass the local High Pressure Steam license examination

College Certificate Outcomes:**Sheet Metal Design and Fabrication**

- Demonstrate knowledge of duct and air handling system design
- Build simple and complicated sheet metal ductwork
- Demonstrate proper application and use of tools, test equipment, safety procedures, and safety techniques of basic shop tools used in the refrigeration and air condition industry
- Exhibit knowledge of safety and equipment used in HVAC field

Admission Requirements

Students are required to do the following:

- Fulfill all WCCCD admission requirements
- Declare intent to enter the program on WCCCD Admission Application or in the Student Services Office
- Complete an Educational Development Plan (Plan of Work), outlining the student's plan for program completion
- Fulfill course placement requirements based on the ACCUPLACER® assessment

- Short-Term Certificate: (SCERT-HHA)

About the Program

The Home Health Care Aide Short-Term certificate is designed to provide students with in-depth instruction and will prepare students for employment in the home health care industry. Home Health Care Aides (HHA) provide personal and homemaking services to ill, convalescing, elderly, and disabled persons and, if needed, to their families. Home Health Care Aides may provide services in a variety of environments including rehabilitation centers, long-term care centers and hospice; however, most assignments are usually in the patients' home. Graduates will learn to care for clients in a holistic, respectful and professional manner. Graduates will demonstrate the ability to properly follow directions/care plans, respect client privacy, as well as provide emotional comfort and support to diverse clients and their families. Graduates will be able to assist in client observation, ambulation, transfer, transport, personal grooming and hygiene in a safe and effective manner.

College Certificate Goals

- To prepare students to gain employment in a health care setting as a Home Health Care Aide
- To teach students the basic principles of safety as it relates to patient care in the home
- To teach students to comprehend, apply and integrate principles of home health care
- Prepare the student to be field ready with the tools necessary to be successful
- Learn to care for clients in a holistic, respectful and professional manner

College Certificate Outcomes

- Identify the role and scope of practice of the Home Health Care Aide as part of the holistic health care team
- Be able to immediately recognize any safety or medical emergency issues concerning a patient

- Demonstrate effective, efficient and culturally sensitive communication skills
- Adhere to HIPPA regulations at all times
- Understand the special needs of specific client populations including the elderly, physically and emotionally challenged, very young patients or those dealing with end of life concerns
- Explore concerns and feelings regarding end of life issues including death and dying and respecting client/family values
- Identify and understand the reporting process for any ethical concerns
- Identify the role of the Home Health Care Aide in the maintenance of a clean, safe and healthy environment

Admission Requirements

Students are required to do the following:

- Fulfill all WCCCD admission requirements
- Declare intent to enter the program on WCCCD Admission Application or in the Student Services Office
- Complete an Educational Development Plan (Plan of Work), outlining the student's plan for program completion
- Fulfill course placement requirements based on the ACCUPLACER® assessment

HOMELAND SECURITY

- College Certificate: (HLS-CERT)
- Certificates of Achievement: (BCS-ACERT) and (HSFE-ACERT)

About the Program

The Homeland Security College Certificate is designed to provide a comprehensive overview of the roots of terrorism and various international and national historic examples to understand this complex problem. Focusing on converting theory and awareness into pragmatic strategies designed to help practitioners develop informed responses to the threat of terrorism. The program will emphasis on the public, private, and legal responses to this threat and specific skills designed to help students respond strategically to real situation emergencies. Students will apply their knowledge and skills to develop specific plans at the local level to enhance public awareness and local security.

The Homeland Security College Certificate is designed for managers, administrators, officers and those responsible for developing and implementing strategies and procedures in Homeland Security.

College Certificate Goals

- To educate and prepare students and in-service emergency management providers on how to mitigate human physical consequences of natural and technological disasters
- To teach and provide a general foundation of the field of homeland security management as a precursor towards the associate in applied science degree

College Certificate Outcomes

- Students will be able to apply critical thinking and decision-making concepts to emergency and disaster management issues
- Demonstrate knowledge of critical thinking concepts to adapt intervention and assessment skills to support and supervise comprehensive, integrated and effective management in the event of natural, system-wide, or human-induced crisis
- Develop competence in applying a code of behavior consistent with the professional attitudes and ethical standards expected of homeland security management professionals
- Demonstrate an understanding of the importance of maintaining effective communication and collaborative relationships with all federal, state and local criminal justice organizations, human service agencies, area communities and community-based organizations

Admission Requirements

To be admitted into the Homeland Security certificate program Students must:

- Fulfill all WCCCD admission requirements
- Declare intent to enter the program on WCCCD Admission Application or in the Student Services Office
- Complete an Educational Development Plan (Plan of Work), outlining the student's plan for program completion
- Fulfill course placement requirements based on the ACCUPLACER® assessment

HOTEL AND RESTAURANT MANAGEMENT

- College Certificate: (CERT-HTM)

About the Program

The Hotel and Restaurant Management College Certificate program prepares students for immediate employment in the hotel industry. Students will learn about the different departments within the hotel. The areas of front desk, food and beverage, housekeeping, facility management, catering and sales will be explored. The course objectives are reached by the use of case analysis, technology, leadership and marketing training. The Hotel and Restaurant Management certificate is designed to prepare students for a broad range of positions across the hospitality industry.

College Certificate Goals

- To prepare students for careers in the hospitality field by providing a foundation for advancement and professional development

College Certificate Outcomes

- Students will be able to perform all entry-level functions in the rooms division, housekeeping area and food and beverage service departments
- Apply knowledge of the hospitality industry, within a specific career track within the industry, and demonstrate the unique professional requirements pursuant to a successful career
- Communicate effectively using written, oral and nonverbal skills including the use of technology in the gathering and presenting of information

- Interpret and analyze information to engage critical thinking and problem solving with regard to business performance of hospitality operations and budgeting
- Understand, articulate and demonstrate the practice of ethical, legal and safe professional behavior
- Demonstrate effective and competent use of necessary computer and software systems specific to the industry
- Knowledge and application of accounting principles, including, but not limited to budgets, labor, menu planning and inventories
- Demonstrate knowledge of and proficiency in completing security audits
- Demonstrates and presents an image of a self-confident, knowledgeable employee with excellent interpersonal skills interacting with guests, clients, and colleagues

Admission Requirements

Students are required to do the following:

- Fulfill all WCCCD admission requirements
- Possess a high school diploma or GED
- Submit a transcript (copy) of grades earned for transfer in any course completed at WCCCD
- Declare intent to enter the program on WCCCD Admission Application or in the Student Services Office
- Complete an Educational Development Plan (Plan of Work), outlining the student's plan for program completion
- Fulfill course placement requirements based on the ACCUPLACER® assessment

INFORMATICS

Associate of Applied Science Degree (INF-AAS)

- Short-Term Certificate (INF-SCERT)

About the Program

The Informatics program focuses on computer systems from a user-centered perspective and studies the structure, behavior and interactions of natural and artificial systems that store, process and communicate information. This coursework prepares the student in using information to identify and address information problems, transform large datasets into useful insights, and lead information projects. Includes instruction in information sciences, human computer interaction, and information system analysis.

This Program Offers:

- Associate of Applied Science: **60** credit hours
- Short-Term Certificate: **27** credit hours

Program Goals

- The informatics program will prepare students to be successful in data-intensive and user-centric environments in the information technology industry.

Program Outcomes

- Students will obtain software development skills and learn a formal framework for making inferences from experimental and observational data, focusing on the manner and purpose in which people interact with information and information systems.

College Certificate Goals

- This short-term certificate focuses on the application of computer-based technologies and services to collect, analyze, and manage information for organizations.

College Certificate Outcomes

Demonstrate basic principles of informatics and information management

INTERNATIONAL BUSINESS

Associate of Applied Science Degree: (IBU-AAS)

About the Program

This program is designed to prepare students for employment in international business, marketing, global supply chain management and other international related areas. This program also offers working professionals a certificate program that will enable them to refine their skills and prepare them to compete in any industry globally. The curriculum provides students with a solid background in language, culture, international politics and business. This program will provide the student with a better understanding of global political, social, economic, and trade relationships. Graduates of this program may work for a variety of organizations and businesses, both in this country and overseas. Foreign language skills and a technical or business specialty increases the graduate's employability.

This program provides students with the technical skills for entry-level positions as specialists in exporting and importing for the significant and growing international trade community. Most students focus on careers in import-export trading or management, international transportation and logistics, global supply chain management, international marketing, or various international business support services. Emphasis is placed on the contribution of speaking a foreign language, logistics, and preparing students for career(s) in an international trade marketplace.

This program offers courses that can prepare students to take the National Association of Small Business International Trade Educators (NASBITE) Certified Global Business Professional exam.

This Program Offers:

- Associate of Applied Science: **62** credit hours

Program Goals

- To teach students to become an effective leader in the international business arena
- To teach students an applied knowledge of global concepts to compete effectively in the ever-changing international business environment
- To learn a second language and see its use in international business
- To prepare students to successfully pass the National Association of Small Business International Trade Educators (NASBITE) Certified Global Business Professional exam

Program Outcomes

- Demonstrate the ability to plan and act strategically in an international business environment
- Demonstrate analytical and decision-making skills in international business and trade
- Analyze various international business practices and determine appropriate strategies for working across borders
- Develop basic written and verbal communication skills in at least one foreign language
- Describe current practices, issues, and concerns in international business and trade
- Summarize differences in business practices in different parts of the world and understand how these differences affect managing companies in various countries
- Explain the various ways to direct the allocation of materials, supplies, and finished products across international borders

Continued on next page.

IT PROJECT MANAGEMENT

- Certificate of Achievement (ITPRM –SCERT)

About the Program

The IT Project Management Certificate Program provides a broad-based understanding of foundational concepts in data networking, including the Open Systems Interconnection (OSI) reference model and the protocols that operate at each layer. The coursework also prepares students for the Network+ Certification. In addition, the program offers the required contact hours and essential information needed to take the Project Management Professional (PMP) exam.

This Program Offers:

- Short Term Certificate (SCERT):
22 credit hours

College Certificate Goals

- Teach students foundational skills in Preparation for entry-level careers in Cybersecurity and in IT healthcare, business and others.
- Provide students with course content and practical experience consistent with competencies required to pass the Network+ certification exam
- Meet the educational requirement to become certified by taking the Project Management Professional (PMP) exam with a 70% or higher proficiency score

Program Outcomes

- Demonstrate the ability to plan and act strategically in an international business environment
- Demonstrate analytical and decision-making skills in international business and trade
- Analyze various international business practices and determine appropriate strategies for working across borders
- Develop basic written and verbal communication skills in at least one foreign language

- Describe current practices, issues, and concerns in international business and trade
- Summarize differences in business practices in different parts of the world and understand how these differences affect managing companies in various countries
- Explain the various ways to direct the allocation of materials, supplies, and finished products across international borders

Admission Requirements

To be admitted into the Cyber Security Program students must:

- Fulfill all WCCCD admission requirements
- Declare intent to enter the program on WCCCD Admission Application or in the Student Services Office
- Complete an Educational Development Plan (Plan of Work) outlining the student's plan for program completion.

LIGHT RAIL ENGINEERING TECHNOLOGY

- College Certificate (CERT-LRT)
- Short-Term Certificate (SCERT-RRS)

About the Program

The Light Rail Engineering Technology College Certificate is designed to prepare students for employment in the expanding light rail industry. This program will also prepare the student to work within the expanding passenger and freight railroad industry. Railroads employ a substantial workforce to service, maintain, operate and manage their transportation networks. While railroads are required by federal law to train their own employees, the basic safety concerns, rules, orders and regulations are all standard in the industry. Students in this program will be exposed to these issues and become equipped to pass the standardized rail examinations required by each rail industry employer. Students will find employment with freight railroads, and passenger or light rail operations in railcar or track maintenance, dispatch, signaling, and many other related positions.

This Program Offers:

- Light Rail Engineering Technology College Certificate (CERT-LRT): **42** credit hours
- Railroad Rules and Safety Short-Term College Certificate (SCERT-RRS): **16** credit hours

Certificate Goals

- The program will allow for a basic understanding of the career opportunities within the railroad and light rail industry
- The program will prepare a student to have an understanding of railroad rules, regulations, operating procedures and safety provisions within the railroad and light rail industry

- The program will allow a student to obtain an understanding of the operation of railcar systems and or signaling/communication systems at use in the railroad industry nationwide
- The program will prepare a student to take the standardized application exam on basic railroad knowledge and skills for employment in the railroad/light rail industry

Certificate Outcomes

- Demonstrate a basic understanding of the operation of a rail line and railcar signaling/communication systems
- Be able to diagnose and conduct troubleshooting and repairs on signaling and communications systems along rail lines and on railcars
- Demonstrate a basic understanding of the career opportunities within the railroad and light rail industry
- Demonstrate and have an understanding of railroad rules, regulations, operating procedures and safety provisions
- Be prepared to take and pass standard railroad rules and safety examinations
- Be prepared to take an application exam on signaling and communication skills for employment in the railroad industry

Admission Requirements

Students are required to do the following:

- Fulfill all WCCCD admission requirements
- Declare intent to enter the program on WCCCD Admission Application or in the Student Services Office

MANUFACTURING TECHNOLOGY

- College Certificate: (CERT-MANT)
- Short-Term Certificate: (SCERT-MANT)

About the Program

The Manufacturing Technology College Certificate and Short-term Certificate Program provides instruction that allows students to become familiar with and use the tools, materials, and processes needed in the manufacturing phase of industry. Students are also exposed to occupations in the manufacturing field. Program courses cover structure of industry, elements of manufacturing, mass production and automation, primary metals industry, casting metal, forging and forming metal, measuring and layout (English and/or metric), machining and finishing metal, fastening and finishing metal, cutting and shaping, assembling and finishing, and opportunities in manufacturing. Each unit includes specific objectives, student competencies and related student activities.

Certificate Goals

- To instruct students on how to apply critical thinking and analytical problem solving skills in an advanced manufacturing setting
- To prepare the student to successfully complete the National Institute of Metalworking Skills (NIMS) certification exams
- To teach students to adhere to industry safety standards and procedures

Certificate Outcomes: Manufacturing Technology

- Demonstrate knowledge of safety standards as they apply to all manufacturing environments
- Demonstrate ability to measure and gage parts accurately
- Demonstrate and apply proficient use of point-to-point measuring equipment as well as surface scanning

- Demonstrate an understanding of hard part machining
- Manage and develop quality control documentation to ensure part quality adheres to design and manufacturing intent

Certificate Outcomes: Metrology

- Understand the principles, history, and concepts of metrology
- Understand the critical tracking of data as it applies to measurement
- Understand and apply modern tools and standards in measurement systems
- Be able to document, graph and present results in a useful documentation format

Admission Requirements

Individuals interested in the Manufacturing Technology program are required to fulfill the following requirements:

- College admission requirements
- Declare intent to enter the program on WCCCD Admission Application or in the Student Services Office
- Complete an Educational Development Plan (Plan of Work), outlining the student's plan for program completion
- Course placement requirements based on ACCUPLACER® assessment results

MECHATRONICS TECHNOLOGY/ROBOTICS AND AUTOMATION TECHNOLOGY

Associate of Applied Science Degrees:
(AAS-MET), (ROB-AAS)

- College Certificates: (CERT-MET), (ROB-CERT)
- Certificate of Achievement (MCA-ACERT)

About the Program

The Mechatronics Technology Associate of Applied Science Degree is designed to prepare technicians through cross-training to work in the diverse fields of mechanical, electrical, and industrial automation. Mechatronics technology and industrial automation is a combination of mechanical systems, electrical systems, fluid power control systems and computer control technology with sensors, transducers and actuators which are integrated to perform some facet of manufacturing. Robot sensors, conveyor systems and software are all components of Computer Integrated Manufacturing (CIM) which is an outcome of Mechatronics. Students with this diverse set of skills are better prepared for the evolving manufacturing industry and will be trained to manufacture a product or perform a task with minimal human intervention through automation that best meets the changing needs of a global economy.

Students who complete the program are prepared for work in a variety of industries to include food processing, pulp and paper metals manufacturing and automated warehousing.

This Program Offers

- Associate of Applied Science (Mechatronics Technology): **64** credit hours
- Associate of Applied Science (Robotics and Automation Technology): **61** credit hours
- College Certificate (Mechatronics Technology): **35** credit hours

- College Certificate (Robotics and Automation Technology): **31** credit hours
- Certificate of Achievement (Mechatronics Technology: Commerical Automation): **11** credit hours

Program Goals

- To prepare students for employment in the manufacturing industry through applied knowledge of manufacturing a product and/or perform a task with minimal human intervention through automation

Program Outcomes

- Students will be able demonstrate their knowledge and application of mechanical systems, electrical systems, thermal systems and computer control technology to manufacturing technology design problems.
- Identify and demonstrate the ability to analyze and interpret the behavior of a physical system through experimentation
- Utilize computer software and hardware tools to create, predict and develop solutions to manufacturing industrial engineering problems
- Design, model and manufacture components, systems and/or processes necessary to meet product specifications for a competitive industrial industry

Admission Requirements

Students are required to do the following:

- Fulfill all WCCCD admission requirements
- Fulfill course placement requirements based on the ACCUPLACER® assessment
- Declare intent to enter the program on WCCCD Admission Application or in the Student Services Office
- Complete an Educational Development Plan (Plan of Work), outlining the student's plan for program completion

MEDICAL ADMINISTRATIVE SPECIALIST (MAS)

Associate of Applied Science Degree: (MAS-AAS)

- College Certificate: (MAS-CERT)

About the Program

The Medical Administrative Specialist Program prepares students for work in the office of a doctor, clinic, hospital, or for employment wherever knowledge of medical terminology, professional procedures and ethics is required. It also provides excellent preparation for administrative positions in any business. The status of Certified Medical Administrative Specialist can be acquired upon completion of the required job experience and written examinations. To graduate from the program, a student must receive a grade of C or higher in all program courses.

Career Potentials include, but are not limited to: Medical Administrative Assistant, Clinical Administrative Coordinator, Patient Appointment Scheduler, Medical Receptionist, Medical Records Clerk, Medical Secretary, Health Unit Coordinator, Medical Billing Specialist, Insurance Claims Processor, Program Assistant, Admitting/Discharge Clerk, Department/Clinic Assistant, and General Office Receptionist.

Program Goals:

- To understand all aspects of the Medical Administrative Specialist field including medical terminology as well as billing and coding
- To understand the different types of communication in the healthcare industry (therapeutic, doctor/patient, multi-cultural, electronic systems, etc.)

Program Outcomes:

After successful completion of Medical Administrative Specialist, you will be able to function as an important member of the healthcare team in the area of office administration. You will also learn how to do the following:

- Communicate in the healthcare industry, including therapeutic and multicultural communication
- Reduce occupational hazards in the workplace, including bloodborne pathogens
- Safeguard patient confidentiality in the computerized medical office, discover the importance of the medical record, and learn the ambulatory use of the electronic medical record (EMR)
- Screen and take appropriate messages and fax confidential information
- Use different types of patient scheduling systems
- Recognize the contents of the medical record, including SOAP notes, consultations, discharge summaries and operative reports and distinguish what makes them accurate and complete
- Learn the aspects of payables and receivables and become familiar with bookkeeping and practice management software

After successful completion of Medical Administrative Specialist, you will be able to do the following:

- Adhere to legal concepts, such as advance directive, living will, power of attorney, and guardianship
- Explain the HIPAA Privacy Rule
- Safeguard and disclose protected health information (PHI)
- Recognize the implications of health insurance fraud and abuse
- Discover the five models of managed care organizations

Continued on next page.

Medical Administrative Specialist continued

- Assign accurate medical billing codes from the ICD-9-CM, CPT, and HCPCS Level II coding manuals
- Assign accurate medical billing codes" from the ICD-10-CM Official Draft Code Set
- Develop an insurance claim
- Use the electronic data interchange (EDI)
- Recognize health insurances delivered by private companies and government-sponsored programs

Admission Requirements

Students are required to do the following:

- Fulfill all WCCCD admission requirements
- Successfully complete a minimum of 12 college credits with a "C" or better and/or ACCUPLACER® scores that fulfill program requirements
- Declare intent to enter the Medical Administrative Specialist program on the WCCCD Application for Admission

- Short-Term Certificate: (SCERT-MES)

About the Program

This Medical Office Specialist Short-Term Certificate is a short-term program established to prepare students for employment in physician's offices, medical insurance companies and hospital offices. Some of the duties of a Medical Office Specialist include, but are not limited to, preparing patient insurance claims, processing accounts payable and accounts receivable, scheduling appointments, preparing patient files, coordinating the patient filing system, preparing medical correspondence, processing medical records, and scheduling hospital admissions.

Certificate Goals

- To prepare students to gain employment in a health care system or private practice medical office environment
- To prepare students with the complete skill set to assist a health care provider in all medical office, administration and support needs

Certificate Outcomes

- Apply customer service skills to interact professionally among clients, colleagues, and other health care professionals
- Utilize both oral and written skills to effectively communicate and interact with health care professionals, colleagues, administration and customers to enhance satisfaction
- Apply skills to find, build, research, manage and report both electronic and paper data efficiently
- Apply coding manual data to the billing process accurately

Continued on next page.

Medical Office Specialist continued

- Utilize knowledge and skills of medical terminology, code sets, reimbursement methodologies and regulations to accurately and thoroughly assign respective code sets
- Be able to compose well written medical correspondence
- Be able to maintain provider appointment schedules
- Understand all relevant medical terminology
- Establish and maintain accurate patient charts and electronic medical records with confidentiality
- Prepare insurance claims, referrals and prior authorizations accurately
- Perform medical billing, analyzing patient accounts and apply collection procedures
- Practice confidentiality, as well as legal and ethical standards

Admission Requirements

Students are required to do the following:

- Fulfill all WCCCD admission requirements
- Fulfill course placement requirements based on the ACCUPLACER® assessment
- Complete a WCCCD Program Application and submit to the Campus Academic Officer

MENTAL HEALTH

Associate of Applied Science (MEH-AAS)

- College Certificate: (MEH-CERT)

About the Program

The Mental Health Associate of Applied Science degree programs studies the fundamentals of mental health with a concentration in such areas as group process, social science, psychopathology and preventive and rehabilitative therapies. Clinical and classroom training familiarizes students with the delivery of services to adult clients. Students also study interviewing techniques and the dynamics of interpersonal relationships. The curriculum is designed for those who desire employment in human service settings.

This Program Offers:

- Associate of Applied Science Degree: **60** credit hours
- College Certificate: **37** credit hours

Program Goals

- Provide a basic foundation for students to serve Human Service clients and/or support human service agencies as an entry-level professional.

Program Outcomes

- Students will be able to demonstrate an applied understanding of the mental health profession to include trends in the delivery of human services and effective practices
- Identify, analyze and suggest appropriate strategies, services or intervention Strategies when developing proper case evaluation plans
- Demonstrate an understanding of the etiology, symptomatology, treatment and prognosis of mental disorders
- Effectively communicate in written, verbal and interpersonal skills when managing information and utilizing data to support client services

- Utilize scientifically supported models of treatment, recovery, relapse prevention and continuing care for individuals in recovery transitioning from a justice facility
- Demonstrate and apply theories of group dynamics
- Demonstrate an understanding of legal information useful in intervention strategies for consumers in human services

Admission Requirements

Students are required to do the following:

- Fulfill all WCCCD admission requirements
- Fulfill course placement requirements based on the ACCUPLACER® assessment
- Complete a WCCCD Program Application and submit to the Campus Academic Officer

**MUSLIM AND ISLAMIC
STUDIES**

Associate of Applied Arts (MUS-AA)

Program Description:

The Associate of Arts in Muslim and Islamic Studies provides students with a comprehensive foundation in the history, beliefs, cultures, and contemporary realities of Muslim communities around the world. Designed to support both academic advancement and community-based leadership, the program prepares students to transfer into four-year programs in Islamic Studies, Religious Studies, Global Studies, or related fields, or to pursue careers as Imams, chaplains, educators, or civic leaders. Through interdisciplinary coursework in Islamic law, ethics, history, Arabic language, and global Muslim experiences, students develop critical thinking, intercultural competence, and civic engagement skills essential for leadership in diverse societies.

This Program Offers:

- Associate of Arts- 61 credit hours

Program Outcomes

- Demonstrate foundational knowledge of Islamic beliefs, practices, and intellectual traditions, including the life of the Prophet Muhammad, major theological movements, and core religious texts.
- Analyze the historical development of Muslim societies, including classical civilizations, empires, and global events that shape contemporary Muslim experiences.
- Interpret the cultural, political, and social diversity of Muslim communities, with attention to geography, ethnicity, gender, and lived experiences in both global and American contexts.
- Communicate effectively in oral and written form, applying critical thinking and interdisciplinary methods to issues of religion, culture, identity, and civic life.

- Develop basic proficiency in Arabic, supporting religious literacy, academic inquiry, and cross-cultural engagement.
- Evaluate contemporary issues affecting Muslim communities, including Islamophobia, political conflict, globalization, reform movements, and interfaith relations.
- Demonstrate civic and ethical awareness, particularly in relation to Muslim American identity, U.S. society, and leadership in local and global communities.
- Engage in applied learning or service, through a capstone project or community-based experience that fosters leadership, collaboration, and cultural competence.

NURSING

Associate of Applied Science Degree: (NUR-AAS)

About the Program

The Nursing program at WCCCD offers an Associate of Applied Science degree in Nursing. Graduates of the Nursing program are eligible to take the National Council Licensure Examination for Registered Nurses (NCLEX-RN). Program requirements include specific courses in the nursing major and general education. The Nursing program is designed to prepare graduates to provide nursing care as staff nurses in a variety of health care settings.

The Nursing Program curriculum is designed as a five-semester program. NUR 110 and NUR 218 are offered as 15-week courses. The following courses are delivered in 7.5-week sessions: NUR 118, NUR 112, NUR 119, NUR 116, NUR 212, NUR 210, NUR 114, NUR 214, and NUR 216. **All nursing courses must be taken in sequence as outlined in the program curriculum plan.**

This Program Offers:

- Associate of Applied Science Degree:
69 credit hours

Nursing Mission

The mission of the WCCCD nursing program is to educate, prepare and empower student nurses to become competent registered nurses who exemplify professional practice in a compassionate caring manner. The program strives for excellence using best practice standards that promotes the health and wellness of individuals, families, groups, and communities in a culturally diverse society.

End-of-Program Student Learning Outcomes

Upon successful completion of the WCCCD Nursing Program, the student will:

- Apply professional accountability congruent with the roles, responsibilities, and values associated with nursing practice
- Integrate evidence-based principles as a foundation for nursing practice

- Demonstrate effective patient centered care to diverse populations in a variety of care environments
- Examine care standards with continuous scrutiny for the betterment of individuals, families, groups, and communities

Degree Application Requirements

The WCCCD Nursing program admits students twice a year in the Spring and Fall semesters. Admission is competitive and student selection is based on the following:

- High School transcript, copy of High School diploma or Certified GED scores showing date of completion
- Must be 18 years of age or older
- Official transcripts from ALL colleges and universities previously attended, including WCCCD
- Two (2) original Reference Letters; one from employer and one personal reference, signed and dated within 60 days of application submission. If unemployed, submit two personal references. Letters written by family and WCCCD faculty or staff are not accepted
- Entrance exam scores
- Essay. Typed, signed and dated 500-1,000 word essay describing, ***“How I plan to be successful in completing the Nursing Program”***
- Background Check via DISA Global Solutions required upon acceptance to program
- Attendance at information meeting. Submit an Original Information Meeting Attendance Form dated within a year of nursing application submission
- Completion of Nursing Program prerequisite courses

PLEASE NOTE: WCCCD Nursing Program does not accept the College Level Examination Program (CLEP) to fulfill any program requirements.

Students are also required to complete the following:

- Fulfill all of WCCCD admission requirements

- Fulfill WCCCD Nursing program admission requirements
 - Pass a background check, drug screen, and other health requirements
 - Complete a WCCCD Program Application and submit to the Nursing Department or a Health Science Center Operations Specialist.
- Admission into the Nursing program is contingent upon all requirements being successfully met.

Degree Requirements

- Students must complete all coursework with a grade of “C” or better to meet graduation requirements

CERTIFICATE TOTAL		20

Note: Certificate total hours may not include prerequisites.

Certificate Goals

This course will provide the professional registered nurse with the knowledge, core competencies, skills and concepts required to successfully take the Care Coordination and Transition Management Certification Exam.

Certificate Outcomes

- Students will be able to demonstrate patient advocacy
- Students will be able to demonstrate skills to education and engage patients and families
- Students will be able to demonstrate coaching and counseling of patients and families
- Accurately and effectively demonstrate patient-centered care planning
- Students will be able to demonstrate support for self-management Nursing process (proxy for monitoring and evaluation)
- Students will demonstrate effective teamwork and collaboration
- Exhibit proficiency in cross setting communications and care transitions
- Effectively conduct population health management

Certificate Application Requirements

To be admitted into the Care Coordination and Transition Management program, students must complete the following requirements for admissions prior to acceptance into the program:

- A completed application
- Official Transcripts from their school of Nursing
- Unrestricted Michigan RN license
- 1 year work experience as RN in Ambulatory Care, Home Care, or ER
- A clear background check
- Successful completion of all health requirements – Urine Drug Screen, CPR, Immunizations, Health Appraisal

NURSING – LICENSED PRACTICAL NURSE TO REGISTERED NURSE BRIDGE PROGRAM

Associate of Applied Science (RNB-RN-AAS)

About the Program

The Nursing program at WCCCD offers a Licensed Practical Nurse (LPN) to Registered Nurse (RN) Bridge program, leading to an Associate of Applied Science degree in Nursing. Graduates of the Bridge program are eligible to take the National Council Licensure Examination for Registered Nurses (NCLEX-RN). Program requirements include an unencumbered license as a License Practical Nurse with a minimum of 1 year of work experience as a LPN, and specific courses in the nursing major and general education. All Nursing courses are 7 - 7.5 weeks. The Nursing program is designed to prepare graduates to provide nursing care as staff nurses in a variety of health care settings.

This Program Offers:

- Associate of Applied Science Degree:
69 credit hours.

Nursing Mission

The mission of the WCCCD LPN to RN Bridge program is to educate, prepare and empower LPN student nurses to become competent registered nurses who exemplify professional practice in a compassionate, caring manner. The program strives for excellence using best practice standards that promotes the health and wellness of individuals, families, groups, and communities in a culturally diverse society.

End-of-Program Student Learning Outcomes

Upon successful completion of the WCCCD LPN to RN Bridge Program, the student will:

- Apply professional accountability congruent with the roles, responsibilities, and value associated with nursing practice.
- Integrate evidence-based principles as a foundation for nursing practice.
- Demonstrate effective patient centered care to diverse populations in a variety of care environments.
- Examine care standards with continuous scrutiny for the betterment of individuals, families, groups, and communities.

Degree Application Requirements

The WCCCD LPN to RN Bridge program admits students once a year in the Summer semester. Admission is competitive and student selection is based on the following:

- Must be a Licensed Practical Nurse
- Copy of current unencumbered Practical Nursing License granted by the State of Michigan
- 1 year of work experience as a Licensed Practical Nurse in a clinical setting
- Students must provide documentation of a minimum of 1,500 work hours as a LPN – Documentation must be on agency letterhead and attached with the application.
- Current Resume
- Completed Application
- Two (2) original Reference Letters; one from employer and one personal reference, signed and dated within 60 days of application submission. If unemployed, submit two personal references. Letters written by family and WCCCD faculty or staff are not accepted.
- Essay: Typed, signed and dated 500-1,000 word essay describing, “How I plan to be successful in completing the LPN to RN Bridge Program.”

- A Student Recommendation Form, required only if previously enrolled in a nursing program at another college.
- Attendance at information meeting. Submit an Original Information Meeting Attendance Form dated within a year of Bridge Program application submission.

PLEASE NOTE: WCCCD Nursing Program does not accept the College Level Examination Program (CLEP) to fulfill any program requirements.

Students are also required to complete the following:

- Fulfill all of WCCCD admission requirements
- Fulfill WCCCD LPN to RN Bridge program admission requirements
- Pass a background check, drug screen, and other health requirements
- Complete a WCCCD LPN to RN Bridge Program Application and submit to the Nursing Department at the Ted Scott Campus in Belleville.

Admission into the Nursing program is contingent upon all requirements being successfully met.

Degree Requirements

- Students must complete all coursework with a grade of “C” or better to meet graduation requirements

A.A.S. PROGRAM TOTAL 69

Note:

- Program total hours include prerequisites and co-requisites.
- Program totals do not include District remedial courses.
- Students must also complete College Degree
- Requirements in order to be eligible for graduation:
 - Complete at least 60 credit hours
 - A minimum of 15 credit hours of program requirements at WCCCD
 - PS 101 American Government (3 credit hours)
 - ENG 120 English II (3 credit hours)
 - Have a minimum grade point average of 2.0 upon completion
- Students interested in transferring to a 4-year institution are encouraged to take the following courses:
 - BIO 252 Pathophysiology (4 credit hours)
 - PSY 200 Lifespan Development (3 credit hours)

Students should see an Health Science Advisor for additional information.

NURSING ASSISTANT TRAINING

- Certificate of Achievement: (ACERT-CNA)

About the Certificate

The Nursing Assistant Training is a certificate comprised of one (1) course.

Program Description:

This program provides the theory and skills necessary to assist professional health care providers in providing direct patient care. Candidates will receive training to provide care in the classroom, lab and long-term facility settings. The curriculum is modeled according to the State of Michigan guidelines. Nurse aide students taking this course will be expected to adhere to guidelines and standards that will help them to be successful in the workplace setting.

Upon successful completion of the program, students are eligible to take the Michigan Nurse Aide Examination for Certified Nursing Assistant (CNA) Certification.

Admission Requirements

- A high school diploma or equivalent GED
- Must be 18 years of age or older
- Certified in Basic Life Support (BLS)
- Negative criminal background check
- Current physical examination conducted by a MD, PA, DO, or NP
- Negative Tuberculosis Test (TB) that is valid throughout the program
- Completed Hepatitis B series or a signed declination form
- 17-panel urine drug screen
- Current immunizations (i.e., COVID-19)
- Complete a WCCCD Program Application and submit to the Campus Academic Officer
- Seasonal Flu Vaccine
- Tetanus. Last date or evidence of current booster.

The NHS 100 Nursing Assistant course is available each semester as a 10-credit course, totaling 94 contact hours spread across a 4-week period. Lecture content spans 40 hours, accompanied by 30 hours of lab skills training. Clinical experiences occur in a long-term care facility, totaling 24 hours.

OFFICE INFORMATION SYSTEMS: E-BUSINESS

Associate of Applied Science Degree: (AAS-EBUS)

• Short-Term Certificate: (SCERT-EUS)

About the Program

The Office Information Systems E-Business Associate of Applied Science degree and Short-Term Certificate programs are designed to prepare students for successful careers as administrative assistants, in an e-Business environment. The program will prepare students to be proficient in the use of advanced computer programs, are capable of assuming some decision-making responsibilities, and are qualified to manage a business Web site. Students in e-Business develop a breadth of knowledge related to developing an e-business, including business-to-business (B2B) and business to customer (B2C) initiatives, and understanding the key e-business technologies.

Students are introduced to a variety of topics including assessing technical infrastructure requirements, understanding the impact of evolving legal and regulatory issues, strategies for obtaining funding, management, marketing and selling.

Students will obtain the skills needed to understand the e-commerce world, create e-commerce web sites and conduct business online.

This Program Offers:

- E-Business: Associate of Applied Science:

61 credit hours

- E-Business: Short-Term Certificate:

27 credit hours

Program Goals

- To teach student's fundamental marketing and management strategies pertaining to e-business
- To teach students proficiency in operating key e-business technologies
- To provide students knowledge of the financial, legal and regulatory issues in e-business

Program Outcomes

- Students will be able to demonstrate knowledge and competency in marketing and management strategies of e-business
- Understand and demonstrate proficiency in operating software and equipment related to e-business
- Demonstrate competency in applying Internet and Web search engine tools for locating information for selected projects
- Articulate and apply knowledge of marketing and management principles and the ethical, legal and regulatory compliance of e-business practices
- Demonstrate appropriate competency in interpersonal skills and attitudes for working in a business office environment

Certificate Goals

- To teach fundamental marketing and management concepts pertaining to e-business

Certificate Outcomes

- Understand issues related to e-business
- Compare and contrast e-business with traditional business
- Identify, classify and demonstrate management activities for e-business
- Identify legal and ethical issues for e-business

Admission Requirements:

Students are required to do the following:

- Obtain an Education Development Plan (Plan of Work), outlining the student's plan for program completion from an academic advisor
- Complete 15 credits of required program courses, including BUS 225 and BUS 228
- Declare intent to enter the program on WCCCD Admission Application or in the Student Services Office

Continued on next page.

OIS: E-Business continued

- Complete an Educational Development Plan (Plan of Work), outlining the student's plan for program completion
- Fulfill course placement requirements based on the ACCUPLACER® assessment

Prerequisite Work

Prior to beginning the OIS courses, students must have computer competencies, which include the ability to key text at a minimum rate of 35 words per minute. These skills can be obtained from your life experiences or by completing the following course: OIS 101

Program Requirements

- Students for the Office Information Systems program must have the academic preparedness and commitment to meet the rigorous course work for the program
- Students should follow the Recommended Sequence of Courses

OFFICE INFORMATION SYSTEMS: OFFICE SPECIALIST

Associate of Applied Science Degree: (AAS-OS)

- College Certificate: (CERT-OS)

About the Program

The Office Information Systems Office Specialist Associate of Applied Science degree and College Certificate programs are designed to prepare students for a variety of certifications in the computer related industries. Students currently employed in this field can obtain the skills needed to advance in management positions in their career.

This Program Offers:

- Office Specialist Associate of Applied Science: **61** credit hours
- Office Specialist College Certificate: **30** credit hours

Program Goals

- To prepare students as skilled office information specialist, proficient in the operation of state-of-the-art equipment and software
- To teach students to appropriately utilize and accomplish work-related tasks accurately and proficiently in an office environment
- To provide students knowledge of the finance and legal aspects of the office environment
- To provide the foundation to prepare students to successfully pass the Microsoft Office Specialist certification exam administered by an independent Microsoft Office contractor

Program Outcomes

- Students will be able to successfully pass the Microsoft Office Specialist certification exam, given by an independent Microsoft Office contractor, with a proficiency score of 70% or higher

- Understand and demonstrate proficiency in applying basic application of Microsoft Office suite applications to manage information and solve problems
- Demonstrate appropriate competency in interpersonal skills and attitudes for working in a business office environment
- Select, use and implement Internet and Web search engine tools for locating information for selected projects
- Apply critical thinking skills to solve problems through creative and appropriate methods

College Certificate Goals

- To prepare students to be proficient in and understand the functionality of Microsoft Office suite applications to manage information and solve problems

College Certificate Outcomes

- Understand and demonstrate competency in applying basic application of Microsoft Office suite applications
- Apply critical thinking skills to solve problems through creative and appropriate methods
- Demonstrate knowledge of and ability to implement Internet and Web search engine tools for locating information

Admission Requirements

Students are required to do the following:

- Complete 15 credits of required program courses, including BUS 225 and BUS 228
- Fulfill all WCCCD admission requirements
- Declare intent to enter the program on WCCCD Admission Application or in the Student Services Office
- Complete an Educational Development Plan (Plan of Work), outlining the student's plan for program completion

PARALEGAL TECHNOLOGY

Associate of Applied Science Degree: (PART-AAS)

About the Program

The Paralegal Technology Associate of Applied Science degree program provides students with the educational background and training required to become a paralegal, legal assistant or legal aide, able to assist a licensed attorney in providing legal services to their clients. The program provides the knowledge and skills regarding the legal system and substantive and procedural law necessary to perform many routine legal processes under the supervision of a licensed attorney.

Program Goals

- To teach students to articulate the needs and goals of clients relevant to the skills required for a paralegal assistant meeting current and future needs and practices
- Provide students with an understanding of the roles and functions of paralegals in law firms and occupational settings

Program Outcomes

Students will be able to:

- Define and properly use terminology relating to areas of legal practice including civil, criminal, family, probate and estate, property, tort and business organizations
- Apply knowledge, critical thinking and skills in legal research, writing, concepts and terminology to interpret and process simple legal documents
- Critically evaluate and identify legal problems and procedures in various areas of substantive laws
- Evaluate and respond appropriately to situations requiring legal, moral and ethical judgment, evidence, facts and legal issues

- Ability to use electronic software programs and technology, relevant to the profession, to conduct research and develop strategies for legal interpretation
- Understand, articulate and adhere to the ethical regulations and guidelines governing the legal profession

Admission Requirements

To be admitted into the Paralegal Technology program students must:

- Fulfill all WCCCD admission requirements
- Declare intent to enter the program on WCCCD Admission Application or in the Student Services Office
- Complete an Educational Development Plan (Plan of Work), outlining the student's plan for program completion
- Fulfill course placement requirements based on the ACCUPLACER® assessment
- Complete and submit the WCCCD Program Application to the PLT Faculty Discipline Chair or designee
- Complete the following courses at WCCCD or obtain equivalent transfer credit for the following courses: ENG 119, PS 101, BUS 225, and SPH 101

- Short-Term Certificate (SCERT-PCT)

About the Program

The Patient Care Technology Short-Term Certificate is designed to provide students with in-depth instruction to become a Patient Care Technician. This program will prepare students for employment in the expanding area of patient care. Skills obtained will allow for work in a variety of settings from acute care to home care.

Upon successful completion of this program, graduates will be eligible to sit for the following examinations through the National Healthcareer Association (NHA): **1)** Certified Patient Care Technician/Assistant (CPCT/A); **2)** Phlebotomy Technician Certification (CPT); and **3)** Certified EKG Technician (CET).

Possessing the listed certifications provides the student with advanced skills, increased earning power and provide broader opportunities within the health care sector as options for employment.

Certificate Goals

- To prepare students for employment as a Patient Care Technician through applied knowledge of patient caregiving
- To teach students the basic principles of safety as it relates to patient care in acute care facilities or home care
- To prepare students for national certification exams

Certificate Outcomes

- Students will be able to identify and act upon basic patient care needs from taking vital signs to cleanliness and physical care of the patient
- Students will be able to perform electrocardiograms (EKGs)
- Students will be able to perform phlebotomy procedures (taking blood)

- Students will be able to perform CPR and first aid when necessary
- Students will be able to assist other medical professionals when necessary
- Students will be able to obtain individual credentialing through the National Healthcareer Association (NHA)
- Students will be able to work independently or as a team member in patient care

Admission Requirements

Students are required to do the following:

- Fulfill all WCCCD admission requirements
- Fulfill course placement requirements based on ACCUPLACER® assessment
- Complete a WCCCD Program Application and submit to the Campus Academic Officer
- Students must meet all health requirements
- Students must successfully pass a certified background check
- Must be 18 years of age or older

PHARMACY TECHNOLOGY

Associate of Applied Science Degree: (PAT-AAS)

- College Certificate: (PAT-CERT)

About the Program

The Pharmacy Technology Associate of Applied Science degree and College Certificate programs are designed to prepare students for entry-level positions in general pharmaceutical services under the supervision of a licensed pharmacist. The pharmacy technician's responsibilities may include the preparation of medicines and assisting the pharmacist with the dispensing of medicines in accordance with standard procedures, laws, transcription of physicians orders, preparation of intravenous medications, maintaining inventory and patient profiles, and preparing bulk formulations.

The Pharmacy Technology Associate of Applied Science degree is a two-year degree program that allows for transfer to a four-year institution that offers a Bachelor of Science degree in pharmaceutical sciences. Students may choose to complete the certificate program accredited by the American Society of Health System Pharmacists and Accreditation Council of Pharmacy Education, secure employment, and/or continue their education.

This Program Offers:

- Associate of Applied Science: **89** credit hours
- College Certificate: **35** credit hours

Program Goals

- To teach students the policies and procedures governing hospital, retail and industrial pharmacy, to function and perform routine technical and clerical duties as a certified Pharmacy Technician

Continued on next page.

*Pharmacy Technology continued***Program Outcomes**

- Students will be able to demonstrate and apply knowledge of scientific concepts of anatomy, physiology and pharmacology as a pharmacy technician
- Students must pass coursework with a score of 80% or higher in order to be placed at clinical sites
- Perform accurate mathematical calculations necessary for the preparation and dispensing of a pharmaceutical product
- Effectively use computer software and technology, relevant to the pharmacy professional, to gather data, produce documents and process orders
- Effective use of written, oral and interpersonal communication skills when interacting with a diverse population of healthcare professionals and patients
- Understand, articulate and adhere to all ethical standards, moral and legal practices governing the profession
- The student may choose to take the national certification exam given by the Pharmacy Technician Certification Board as an option

College Certificate Goals

- To provide students a foundation into the policies and procedures governing pharmacies, to function and perform routine technical and clerical duties as a Pharmacist Technician

College Certificate Outcomes

- Students will proficiently pass coursework with a score of 80% or higher in order to be placed at clinical sites
- Perform accurate mathematical calculations necessary for the preparation and dispensing of a pharmaceutical product

- Effectively use computer software and technology, relevant to the pharmacy profession, to gather data, produce documents and process orders
- Effective use of written, oral and interpersonal communication skills when interacting with a diverse population of healthcare professionals and patients

Admission Requirements

Admission is competitive and based on academic performance, test scores and personal interviews. A limited number of students are admitted to the program each semester. Applications and other required information must be submitted prior to the start of class. Formal admission status must be achieved prior to enrollment. To be admitted into the Pharmacy Technology Program, students must complete the following:

- Fulfill all WCCCD admission requirements
- Possess a high school diploma or GED
- Must be 18 years of age or older
- Declare program intent on the WCCCD Admission Application or change program intent in the campus Admissions Office
- Complete the Pharmacy Technician Admission Application and turn in the application to the program director
- Fulfill course placement requirements based on the ACCUPLACER® Test
- Submit two letters of reference: professional or personal
- Show proof of TB test
- Meet with a Pharmacy Technology Program representative
- Fulfill either of the following prerequisites:
Pass Pharmacy Technician Assessment Test (PTAT) with a score of 85% or higher
–OR–
Pass PHT 100 with a grade of “B” or better
- Successfully complete a criminal background check. (Source will be specified)
- Successfully pass a drug screening exam (Source will be specified)

Degree Requirements

- Students must complete all course work with a grade of “C” or better to meet graduation requirements

PHLEBOTOMY TECHNICIAN

- Short-Term Certificate: (SCERT-PLT)

About the Program

The Phlebotomy Technician Short-Term Certificate program introduces students to the chief responsibilities of the position to include drawing blood and conducting other specimen collections. The phlebotomist must recognize any conditions that might alter collections, correlate types of lab tests to the written diagnosis, and communicate with both the laboratory and the patients to provide the best care possible. Graduates of the phlebotomy program will be competent in multiple skills of specimen collection, have a strong medical terminology background and possess excellent interpersonal skills.

Certificate Goals

- To provide students with the applied knowledge and technical skills to collect and process various blood, specimen and lab collections and procedures
- To prepare students to successfully pass the national certification exam as a registered phlebotomist

Certificate Outcomes

- Students will be able to apply proper phlebotomy technique to successfully collect, handle and process blood specimens including venipuncture and capillary punctures
- Proficiently perform basic laboratory testing procedures under appropriate supervision
- Effectively utilize appropriate personal protective devices and techniques to operate safely in a healthcare environment
- Effectively use computer software programs and technology, in a healthcare setting, to accomplish tasks of the profession
- Effective use of written, oral and interpersonal communication skills when interacting with patients, clients and healthcare professionals
- Understand, articulate and adhere to all ethical standards, moral and legal practices governing the profession

- Exhibit proficiency in successfully completing the national certification exam as a phlebotomist with a 75% or better proficiency rate

Admission Requirements

Students are required to complete the following:

- Fulfill all WCCCD admissions requirements
- Fulfill course placement requirements based on the ACCUPLACER® assessment
- Must be 18 years of age and possess a high school diploma or GED (copy required)
- After successfully completing PLB 100 with a “B” or better, the student must complete an Allied Health Application and declare program intent
- Successfully complete a criminal background check (*Source will be specified*)
- Successfully pass a drug screening exam (*Sources will be specified*)
- Complete a WCCCD Program Application and submit to the Campus Academic Officer

Certificate Requirements

- All science classes must be completed within (5) five years

PHYSICAL THERAPIST ASSISTANT

- Associate of Applied Science Degree: (PTA-AAS)

About the Program

The Physical Therapist Assistant (PTA) Associate of Applied Science Degree is designed to prepare students to become licensed physical therapist assistants who competently work under the supervision of physical therapists, in a variety of settings, by providing them with a broad background from which they may later choose to develop expertise as specialists. Students will find employment opportunities in a wide variety of settings including hospitals, skilled nursing facilities, outpatient clinics, rehabilitation facilities, specialty centers, and home care. Students will learn valuable practical skills, including, but not limited to, skills in manual therapy, therapeutic exercise, gait training, goniometry, strength assessment, and neurological rehabilitation. In addition, students gain an appreciation for lifelong professional development and serve as resources and advocates to meet the health needs of their communities.

This Program Offers

- Associate of Applied Science: **72** credit hours

Program Goals:

1. To graduate highly skilled clinicians who are prepared to enter the workforce as safe, legal, ethical, culturally competent, and effective entry-level physical therapist assistants.
2. To create an environment of academic excellence rooted in innovative, forward-thinking, and learner-centered instruction while remaining aligned with industry needs, Commission on Accreditation in Physical Therapy Education (CAPTE) standards, and American Physical Therapy Association (APTA) best practices.

3. To connect education to practice by inspiring a desire for lifelong learning and supporting opportunities for professional development, advocacy, and community outreach/service for students, faculty, and clinical partners.

Program Outcomes

- Prioritize and manage physical therapy interventions in a safe, effective, and patient-centered manner under the supervision and within the plan of care of a physical therapist.
- Analyze patient response to interventions and appropriately progress, modify, or regress interventions while competently implementing the plan of care as directed by the physical therapist.
- Illustrate professional behaviors and attributes (e.g., professionalism, accountability, and resource management) in adherence with the practice standards established by the American Physical Therapy Association.
- Document interventions accurately, promptly, and effectively to communicate the need and rationale for physical therapy interventions using appropriate medical terminology.
- Demonstrate commitment to self-assessment and lifelong learning.
- Utilize effective interpersonal communication skills to suit all situations and commensurate with the needs of the learner.
- Demonstrate cultural competence when providing care to individuals from a variety of lifestyles, cultures, ages, socioeconomic backgrounds, and abilities.
- Exceed CAPTE standards for graduation rates, license pass rates, and employment rates.

Admission Requirements

The PTA program is a highly selective program with limited enrollment, admitting only the top 24 qualified students per cohort. While students may declare the PTA major upon admission to the college, they must compete for a seat in the technical phase of the program which includes a secondary application process.

Continued on next page.

Physical Therapist Assistant continued

Students must complete all prerequisite courses and all application criteria in order to compete for a seat in the technical phase. Selection is based on earning points for prerequisite requirements, GPA, and entrance exam scores. The technical track phase consists of 50 semester hours of physical therapy coursework and 624 hours of unpaid clinical experience. The application deadline is May 15 of each academic year. After the application deadline, any students not accepted to the program must reapply to the following cohort.

Students are required to do the following:

- Fulfill all WCCCD admission requirements
- Successfully complete a minimum of 12 college credits with a “C” or better and/or ACCUPLACER® scores that fulfill program requirements
- Earned a “B” or better in PTT 101, BIO 240, and BIO 250.
- Declare intent to enter the Physical Therapist Assistant program on the WCCCD Application for Admission
- Must be 18 years of age or older
- Must complete physical exam and other health requirements
- Complete and pass a background check and drug screen
- Complete the Health Science application and indicate the Physical Therapist Assistant program as the program choice
- Complete the Test of Essential Academic Skills (TEAS) with a 60% or higher
- Obtain a minimum of eight (8) clinical observation hours
- Attend a mandatory PTA program meeting
- Submit two professional letters of recommendation

Based upon Michigan Law

The Wayne County Community College District's Physical Therapist Assistant Program has adopted the waiting periods specified in the State of Michigan Mental Health Code MCL 330.1134a.

Wayne County Community College District's partners may not accept students who have been convicted of certain crimes or test positive for certain drugs into a clinical learning environment. Therefore, students must undergo a Criminal Background Check at their own expense through CastleBranch.com to be considered for admission to the Physical Therapist Assistant program.

Students are required to disclose any and all federal, state (including states other than Michigan), or local crimes for which the student has been convicted to the Physical Therapist Assistant (PTA) Dean.

Convictions occurring before admission to the PTA program must be reported to the PTA Dean prior to acceptance into the program. Convictions occurring after acceptance into the program must be reported to the PTA Dean immediately.

A student is not eligible for admission to the Physical Therapist Assistant program for a period of years following completion of all terms and conditions of sentencing for conviction of certain crimes. The precise number of years a student must wait following sentencing depends upon the nature of the offense. Generally speaking, the more serious the offense, the longer the student must wait before eligibility is restored.

The following convictions will result in a LIFETIME ban from the PTA program:

- Felonies related to neglect or abuse of a patient in connection with the delivery of health care
- Felonies relating to health-care fraud
- Felonies related to the unlawful manufacture, distribution, prescription, or dispensing of a controlled substance if the conviction was entered on or after August 21, 1996

- Adulteration of drugs or medicine injurious to health
- Selling, distributing, delivering, or furnishing product containing ephedrine or pseudoephedrine

Accreditation Status

Effective April 30, 2024, Wayne County Community College District has been granted Candidate for Accreditation status by the Commission on Accreditation in Physical Therapy Education (3030 Potomac Ave., Suite 100, Alexandria, Virginia 22305-3085; phone: 703-706-3245; email: accreditation@apta.org). If needing to contact the program/institution directly, please call (313) 496-2818 or email ssagger1@wcccd.edu.

Candidate for Accreditation is an accreditation status of affiliation with the Commission on Accreditation in Physical Therapy Education that indicates the program may matriculate students in technical/professional courses. Achievement of Candidate for Accreditation status does not assure that the program will be granted Initial Accreditation.

PRACTICAL NURSING EDUCATION

- College Certificate: (CERT-PNE)

About the Program

This one-year program will prepare students to fulfill an immediate need in the workforce and also serve as a pathway to other medical careers. Students who enroll in the program will range from recent high school graduates to other adult individuals desiring career training. Students may come from a variety of cultural, educational, and socioeconomic backgrounds.

This course provides the theory and skills necessary to assist professional health care providers in providing direct patient care. Candidates will receive training to provide care in the classroom, skills lab, community health settings and long-term facility settings. The curriculum is modeled according to the State of Michigan guidelines. PN students enrolled in this program will be expected to adhere to guidelines and standards that will help them to be successful in the work place. Upon successful completion of the program, students are eligible to apply to the NCLEX-PN examination, the National Council Licensure Examination for Practical Nurses.

College Certificate Goals

The goal of the Practical Nursing Program is to produce accountable, adaptable generalists who are prepared to successfully complete the NCLEX-PN exam and function as practical nurses in diverse care settings.

College Certificate Outcomes

At the completion of this program of study, graduates will be able to:

- Promote the human dignity, integrity, self-determination, and personal growth of patients, oneself, and members of the health care team
- Graduates will be eligible to take the NCLEX-PN Licensure Exam

As defined by NLN, the four broad outcomes represent the expected culmination of all learning experiences provided during this practical nursing program, including the essential core nursing practice competencies, built upon seven core values and six integrating concepts.

Nurses must use their skills and knowledge to enhance human flourishing for their patients, their communities, and themselves

- Nurses should show sound nursing judgment employing critical thinking, clinical judgment, and integration of best evidence in practice as they make decisions that guide clinical care
- Nurses should continually develop their professional identity by internalizing the core values and perspectives recognized as integral to the art and science of nursing
- Nurses must approach all issues and problems in a spirit of inquiry which displays a persistent sense of curiosity that sharpens both learning and nursing practice

End-of-Program Student Learning Outcomes

At the completion of the WCCCD Practical Nursing Program, students will:

- Have the ability to apply professional accountability congruent with the roles, responsibilities, characteristics, and values aligned within the scope of practical nursing practice.
- Have the ability to integrate evidence-based principles into practice as a foundation.
- Demonstrate effective patient centered care to diverse populations in a variety of health care environments.
- Promote human dignity, integrity, self-determination, and personal growth of patients, oneself, and members of the health care team.
- Acknowledge care standards within the scope of practice of a Practical Nurse with continuous awareness for the betterment of individuals, families, groups, and communities.

Admission Requirements

Students are required to fulfill the following requirements:

- Fulfill all WCCCD admission requirements
- Must be 18 years of age or older

The WCCCD Practical Nursing Program admits students twice per year in the Spring and Fall Semesters. Admission is competitive and student selection is based on the following:

- Students interested in attending the Practical Nurse Program will be required to have a High School Diploma, or General Education Development (G.E.D.) Certificate.
- Additional Admission Requirements include the following:
 - Pre-requisite courses:
 - ENG 119 - English I (3 credits)
 - BIO 155 - Introductory Biology (4 credits)
 Students must complete the pre-requisite courses with a C or better to be admitted into the program.
 - Completion of the PN Program Application
 - Completion of the HESI PN Admission Exam with 75% or better in both Math and Reading
 - Two letters of recommendation
 - Entry Essay, typed signed and dated 500-1000 word essay describing, "How I plan to be successful in completing the Practical Nursing Program"
- Required upon Acceptance:
 - Background Check via www.castlebranch.com
 - Urine drug screen
 - Health Appraisal - including immunizations

PRE-ENGINEERING

Associate of Science Degree: (PREE-AS)

About the Program

The Pre-Engineering Associate of Science degree program is designed to provide the first two-years of an engineering program whose credits will transfer to a four-year college of engineering program. Adjustments in the listed recommended program may be necessary to meet the requirements of other colleges or universities for special fields of engineering. Students should contact the institution they intend to transfer to ensure that they will have the necessary courses to transfer.

Program Goals

- To provide the foundation and prepare engineering science majors to transfer to a four-year baccalaureate degree program

Program Outcomes

- Students will be able to understand the basic principles of the physical sciences
- Demonstrate an understanding of the major concepts of differential and integrated calculus
- Prepare, write, document and describe a computer program

Admission Requirements

Students are required to fulfill the following requirements:

- Fulfill all WCCCD admission requirements
- Declare intent to enter the program on WCCCD Admission Application or in the Student Services Office
- Complete an Educational Development Plan (Plan of Work), outlining the student’s plan for program completion
- Fulfill course placement requirements based on the ACCUPLACER® assessment
- Complete a WCCCD Program Application during the second semester in which they are enrolled and submit to the Campus Academic Officer

PRE-MORTUARY SCIENCE

Associate of Science Degree: (AS-PMS)

About the Program

Pre-Mortuary Science Associate of Science degree program prepares students for entrance into a mortuary science program and an eventual career as a mortician. This program is designed in accordance with the Mortuary Science program at Wayne State University, which is the only institution in Michigan that prepares students for State certification in mortuary science. Because entrance into the WSU program is competitive, a minimum requirement for application is completion of at least 68 credit hours with a grade of 'C' or better as outlined in the WSU graduate bulletin.

Program Goals

- To educate and develop students in all phases of funeral service to meet and exceed the standards of care in dealing with the health, safety and care associated in the preparation and care of the deceased
- To provide a general in a Pre-Mortuary Science Associate of Science studies as the precursor for a declared four-year degree

Program Outcomes

- Students will be able to successfully complete the Pre-Mortuary Science Associate of Science program of study with a "C" average or higher as a foundation to transfer to WSU or other four-year baccalaureate institutions
- Develop and demonstrate proficient and the technical skills in the ethical care of human remains

- Articulate, apply and practice federal, state and local regulatory guidelines to situations pertaining to the mortuary science profession
- Demonstrate applied knowledge of funeral service emphasizing and exhibiting high ethical, moral, community and personnel performance and integrity standards as they apply to the profession

Admission Requirements

Students are required to fulfill the following requirements:

- Fulfill all WCCCD admission requirements
- Declare intent to enter the program on WCCCD Admission Application or in the Student Services Office
- Complete an Educational Development Plan (Plan of Work), outlining the student's plan for program completion
- Fulfill course placement requirements based on ACCUPLACER® assessment
- Complete a WCCCD Program Application and submit to the Campus Academic Officer
- Complete prerequisite coursework with a "C" or better and a grade point average (GPA) of 2.50 on a 4.00 scale

Continued on next page.

PRE-PHYSICIAN ASSISTANT

Associate of Applied Science Degree: (PPA-AAS)

About the Program

The Pre-Physician Assistant program is designed to prepare students for transfer to a Physician Assistant program at a four-year college or university. The curriculum is academically rigorous and provides the knowledge base necessary to complete the baccalaureate degree and continue to the master's degree level physician assistant curriculum.

Program Goals

- To prepare the student with the knowledge and foundation in preparation of a four year baccalaureate degree

Program Outcomes

- Provide a service in an environment requiring special skills and knowledge in such areas as communications, transportation and record keeping
- Demonstrate core knowledge about established and evolving biomedical and clinical sciences and the application of this knowledge to patient care in their area of practice
- Demonstrate interpersonal and communication skills that result in effective information exchange with patients, their patients' families, physicians, professional associates, and the health care system
- Demonstrate care that is effective, patient-centered, timely, efficient, and equitable for the treatment of health problems and the promotion of wellness
- Demonstrate a high level of responsibility, ethical practice, sensitivity to a diverse patient population, and adherence to legal and regulatory requirements
- Assess, evaluate, and improve patient care practices

Admission Requirements

Students are admitted to the program each year for the Fall, Spring and Summer semesters. Students must have the Program's approval, a completed application, and other required information submitted by the due date. If there are openings after the application deadline, any remaining openings will be filled on a first come basis to qualified applicants.

Students are required to do the following:

- Fulfill all WCCCD admission requirements
- Successfully complete a minimum of 12 college credits with a "C" or better and/or ACCUPLACER® scores that fulfill program requirements
- Must be 18 years of age or older
- Must complete physical exam and other health requirements
- Complete background check
- Complete a WCCCD Program Application and submit to the Campus Academic Officer

Based upon Michigan Law

Students applying for admission to the Pre-Physician Assistant program will be subject to a criminal background check, the results of which could preclude an applicant from admission to Wayne County Community College District's Pre-Physician Assistant Program on the basis of any of the following:

- A felony conviction or conviction for an attempt or conspiracy to commit a felony within the past 15 years
- Any misdemeanor conviction involving abuse, neglect, assault, battery or criminal sexual conduct within the past 10 years
- Any misdemeanor conviction involving fraud or theft

PRE-SOCIAL WORK

Associate of Arts Degree: (PSW-AA)

About the Program

The Pre-Social Work Associate of Arts degree program provides a broad based two year Associate of Arts (A.A.) degree curriculum. The Pre-Social Work program is designed to:

- Provide a foundation in liberal arts coursework leading to a BSW degree at select four-year institutions
- Prepare students for culturally competent, ethical, effective and accountable generalist social work practice
- Provide academic support for the successful completion of the Pre-Social Work Associate of Arts degree while preparing for future educational and employment opportunities.
- Instill a knowledge base of the basic foundations of social work practice: purpose and mission, sanctions, values and ethics, knowledge and methods and skills

Program Goals

- To teach students to use the Social Work Mission while improving the social functioning and well-being of clients
- To teach students the Code of Ethics according to the National Association of Social Workers
- To instill in students the value and knowledge of advocacy for their clients

Program Outcomes

- Students will be able to implement themes of the Social Work Mission while assessing clients
- Students will be able to navigate through the Code of Ethics, while employing the most appropriate ethics
- Students will learn about various social programs, services, activities, agencies, organizations, and institutions which will be useful in advocating for clients

Admission Requirements

Students are required to do the following:

- Fulfill all WCCCD admission requirements
- Complete all prerequisite requirements
- Possess a high school diploma or GED
- Declare intent to enter the program on WCCCD Admission Application or in the Student Services Office
- Complete an Educational Development Plan (Plan of Work), outlining the student's plan for program completion
- Fulfill course placement requirements based on the ACCUPLACER® assessment
- Complete prerequisite courses with a grade "C" or better
- Complete an Individual Education Plan

PRODUCT DEVELOPMENT PROTOTYPING

Associate of Applied Science Degree: (PDP-AAS)

- Introduction to Rapid Prototyping Short-Term Certificate (PDP-SCERT)
- Advanced Rapid Prototyping Short-Term Certificate: (APDP-SCERT)

About the Program

This program introduces students to product development and prototyping opportunities with emphasis on core design concepts, testing analysis, and rapid prototyping through the use of modern graphic software, laser scanning technology, and industry standard rapid prototyping equipment. This program is well suited for students looking for a career in product development, current professionals who want to update their skill level, as well as entrepreneurs interested in working to develop their own ideas and products.

This Program Offers:

- Associate of Applied Science Degree:
60 credit hours
- Introduction to Rapid Prototyping Short-Term Certificate: **24** credit hours
- Advanced Rapid Prototyping Short-Term Certificate: **21** credit hours

Program Goals

- Introduce students to the broad scope of the product development process from concept to production
- Understand the necessity for product prototyping and testing as part of the design and product development process

Program Outcomes

- Demonstrate knowledge of the product design process
- Understand and be able to articulate the material and production processes

Continued on next page.

Product Development Prototyping continued

- Exhibit the ability to capture design intent through various sketching and design processes
- Accurately capture product functionality in modern design software
- Generate accurate prototype parts for testing and analysis
- Initiate and implement design modifications as the part evolves from concept to producible product
- Be able to generate reports throughout the various stages of product development and design testing

Certificate Goals

- Provide product prototyping skills used in additive manufacturing to beginning and/or advanced students preparing them for beginning or advanced employment opportunities

Certificate Outcomes: Introduction to Rapid Prototyping

- Demonstrate knowledge of the product design process
- Understand and be able to articulate the material and production processes
- Exhibit the ability to capture design intent through various sketching and design processes

Certificate Outcomes: Advanced Rapid Prototyping

- Accurately capture product functionality in modern design software
- Generate accurate prototype parts for testing and analysis
- Initiate and implement design modifications as the part evolves from concept to producible product
- Be able to generate reports throughout the various stages of product development and design testing

Admission Requirements

Students are required to do the following:

- Fulfill all WCCCD admission requirements
- Fulfill course placement requirements based on ACCUPLACER® test
- Declare intent to enter the program on WCCCD Admission Application or in the Student Services Office
- Complete an Educational Development Plan (Plan of Work), outlining the student's plan for program completion
- Students must complete a WCCCD Program Application and submit to Student Services or Academic Administrator

PROJECT MANAGEMENT

- College Certificate: (CERT-PRM)

About the Program

The Project Management Certificate will provide students with the information and skills necessary to secure an entry level position managing projects in business and industries such as IT, business, health care and others. The courses will provide the required contact hours and information needed to take the Project Management Professional (PMP) exam. Upon completion of the certificate program students will understand beginning, intermediate and advance project management software.

Students will learn skills necessary for the occupational positions which include, but are not limited to: Associate Project Manager, Project Manager, Program Manager, Scheduling Technician, and IT Specialist/Project Manager.

College Certificate Goals

- To provide students with a basic foundation of theory and practice of project management as it relates to project management positions in business, IT, healthcare and others

College Certificate Outcomes

- Students will be able to initiate, plan, execute, monitor, control and close a specified project to completion
- Meet the educational requirements to become certified by taking the Project Management Professional (PMP) exam with a 70% or higher proficiency score
- Identify, describe and explain appropriate techniques for oral, written and electronic communication vehicles when communicating with team members and stakeholders

Admission Requirements

Students are required to do the following:

- Fulfill all WCCCD admission requirements
- Fulfill course placement requirements based on the ACCUPLACER® assessment
- Declare intent to enter the program on WCCCD Admission Application or in the Student Services Office
- Complete an Educational Development Plan (Plan of Work), outlining the student's plan for program completion
- Complete a WCCCD Program Application and submit to the Campus Academic Officer

RADIOLOGIC SCIENCES

Associate of Applied Science Degree (RAD-AAS)

About The Program- Radiologic Sciences

The Radiologic Sciences program is in partnership with Detroit Medical Center (DMC) and Ascension Healthcare, it is designed to ensure that entry-level radiologic technologists possess the essential technical and clinical skills to produce quality radiographs, become part of a healthcare team, and provide quality patient care. Upon completion of the program, graduates are prepared to pass the certification examination offered by the American Registry of Radiologic Technology (ARRT).

This Program Offers

- Associate of Applied Science: **66** credit hours

Program Goals

To graduate qualified entry-level students to develop into competent and professional radiologic technologists who are prepared to successfully challenge the ARRT examination.

Program Outcomes

Upon completion of the program, the student will be able to:

- Possess the skills necessary for a radiologic sciences professional, who are responsible for the administration of ionizing radiation to humans for diagnostic, therapeutic or research purposes.
- Produce radiographic examinations that create the images needed for patient diagnosis.
- Maintain the highest degree of accuracy in radiographic positioning and radiation exposure.
- Exhibit professional characteristics, such as becoming part of a health care team, good judgment, and stewardship over the security and confidentiality associated with patient medical information.

Admission Requirements:

All prerequisites must be completed with a 2.0 or better. Transferring students must complete at least 12 credit hours at WCCCD. After the completion of the Sinai-Grace Hospital or Ascension Health Care component of the program, students will be granted a block of 30 credits in the radiologic sciences and be eligible for an Associate of Applied Science Degree in the Radiologic Sciences and therefore eligible to apply for certification as a Radiologic Technologist. Students must officially apply for their degree by completing and submitting the Wayne County Community College District Certificate and Degree Application.

Once the student has completed the prerequisites, they may then apply to the radiologic sciences program at the hospital.

- Complete the application
- Sign the Technical Standards Survey
- Provide 3 current letters of reference
- Provide official high school and college transcripts
- Undergo a background check and drug screen

Radiologic Sciences Program Hospital Options:

- Ascension St. John Hospital School of Radiologic Technology
<https://medicaleducation.ascension.org/michigan/st-john-radiologic-technology>
- Ascension Providence School of Radiologic Technology

SEMESTER AT HOSPITAL COMPONENTRAD 299 Radiology Hospital Task
and Skill Component 30**SEMESTER TOTAL 30****A.A.S. PROGRAM TOTAL: 66****RENEWABLE ENERGY
TECHNOLOGY**

Associate of Applied Science Degree: (AAS-RNW)

• College Certificate: (CERT-RNW)

About the Program

The Renewable Energy Technology program is designed to provide students with the theoretical knowledge necessary for a career in energy management and renewable energy technology fields, with special emphasis on solar panel (PV) installation. Students acquire hands-on skills in installation, operation, repair and replacement of related equipment. The program prepares students to pursue careers in the renewable energy field through coursework focused on solar and wind energy production and usage.

The AAS degree (requires a minimum of 63 credits of coursework) along with related job experience, will allow students to sit for the solar PV installer exam (offered by NABCEP) and the LEED AP exam (offered by the Green Building Counsel). The certificate program requires a minimum of 38 credits and depending on the work experience of the student, may also qualify the student to sit for the exams.

This Program Offers- Associate of Applied Science: **63** credit hours- College Certificate: **39** credit hours**Program Goals**

- To teach and provide students with the knowledge and skills for employment opportunities in the Renewable Energy industry
- To provide students currently employed in the industry with knowledge and skills relevant to renewable energy technology as well as a broader understanding of the scientific, economic and political context of the industry

- To provide current practitioners with continued learning education in renewable energy/energy efficiency field as a precursor towards a two-year associate's degree or four-year baccalaureate degree program
- To prepare students for relevant third-party certification exams in the Renewable Energy field

Program Outcomes

- Demonstrate basic principles of energy efficiency and conservation
- Identify, install, troubleshoot, and repair equipment to maintain energy production and efficiency

Certificate Goals

- Teach and provide students with the knowledge and skills for employment opportunities in the Renewable Energy industry
- Provide students currently employed in the Renewable Energy industry with knowledge and skills relevant to technology as well as a broader understanding of the scientific, economic and political context of the industry
- Provide current practitioners with continued learning education in renewable energy/energy efficiency field as a precursor towards a two-year associate's degree or four-year baccalaureate degree program
- Prepare students for relevant third-party certification exams in the Renewable Energy field

Certificate Outcomes

- Students will be able to demonstrate basic principles of energy efficiency and conservation
- Identify, install, troubleshoot, and repair equipment to maintain energy production and efficiency

SURGICAL TECHNOLOGY

Associate of Applied Science Degree: (SURT-AAS)

About the Program

The Surgical Technology and Surgical Assisting programs are accredited by the Commission on Accreditation of Allied Health Education programs (www.caahep.org) upon the recommendation of the Accreditation Review Council on Education in Surgical Technology and Surgical Assisting. The curriculum is designed to enable the student to perform a variety of duties, as well as provide technical support to the surgical team in the operating room before, during and after surgery. The surgical technologist is trained to maintain a sterile and safe surgical environment. Duties may include, but are not limited to, preparing sterile supplies; equipment, instruments, and drapes for surgical procedures, assisting the surgical team with gowning and gloving, and positioning patients for surgery, passing instruments, sponges, sutures and other supplies to the surgeon or the assistant, preparing specimens for laboratory analysis, sterilizing equipment, etc.

The Surgical Technology program offers:

1. Certificate in Central Service Technician Education: **17** credit hours
2. Associate of Applied Science in Surgical Technology Degree: **76** credit hours
3. Certificate in Surgical First Assistant Education: **36** credit hours

Program Goals

- To prepare the surgical technology student to proficiently exercise the duties and responsibilities, including pre-operative preparation, intra-operative procedures, and post-operative wound care.
- The surgical technology student will be able to demonstrate and apply technical competency in the surgical technology profession.
- The surgical technology student shall demonstrate expertise in applying sterile and aseptic techniques.

- The surgical technology student shall apply principles of pharmacology as related to the surgical technology profession.
- The surgical technology student will demonstrate critical thinking skills during all phases of operative procedural management.
- The surgical technology student shall maximize patient safety by facilitating a safe surgical environment.
- The surgical technology student will demonstrate self-direction and responsibility for maintaining surgical competency.
- The surgical technology student will develop effective written, oral, and interpersonal communication skills while working with a diverse team of medical professionals.
- To prepare entry-level Surgical Technologists who are competent in the cognitive (knowledge), psychomotor (skills), and affective (behavior) learning domains to enter the profession
- If required, fulfill course placement requirements based on the ACCUPLACER scores
- Declare intent to enroll in the Surgical Technologist program by submitting an Application for Program Admission in Health Science Programs to the Program Lead
- Must complete a criminal background check, physical exam (within one year of application submission), immunization history (MMR, HBV, Varicella, Tetanus, Seasonal Influenza, & TB), and a 10-panel urinalysis screening.
- Complete all prerequisites and co-requisites with a minimum grade of "C" or better
- Science courses (BIO 240, BIO 250, BIO 252, and BIO 295) cannot be older than five years from the date of application submission
- Submit unofficial transcripts from WCCCD and official transcripts (outside institutions) as needed for transfer credit
- Submit three letters of recommendation: two professional and one personal
- Submit valid Government Issued color photo identification
- Meeting with Program Lead to review and complete paperwork

Program Outcomes

- The surgical technology graduate will perform competently in the Scrub and Circulator roles under ARC/STSA standards.
- The surgical technology graduate will be proficiently prepared to complete the National Certification Examination for Surgical Technologists by successfully challenging the exam.
- We aim to equip graduating surgical technology students with the necessary skills to achieve a minimum success rate of 70% on the National Certification Examination for Surgical Technologists.

Admission Requirements

Students must fulfill the following requirements for admission into the Surgical Technology program:

- Fulfill all WCCCD admission requirements
- Be 18 years of age or older and have a high school diploma or GED

Note: If ACCUPLACER® scores are lower in any area, provide a transcript of the recommended course(s) completed with a "B" or better. All program applications are reviewed by the Surgical Technology Department Admissions Committee. Students who have completed the Central Service Technician program prior to application to the Surgical Technology Program are given preference. Students must submit all paperwork by July 15th for the start of the Fall Semester. Students beginning the program in the Spring Semester should submit all paperwork by September 15th. The ACCUPLACER® minimum passing composite score is 60. The reading comprehension sections must be at least 50. Test scores are considered valid for two (2) years if scores meet current requirements. Check the appropriate campus location for adherence to the above submission dates.

Continued on next page.

*Surgical Technology continued***Based upon Michigan Law**

Students applying for admission to the Surgical Technology Program will be subject to a criminal background check, the results of which could preclude an applicant from admission to Wayne County Community College District's Surgical Technology Program on the basis of any of the following:

- A felony conviction, or conviction for an attempt or conspiracy to commit a felony within the past 15 years
- Any misdemeanor conviction involving abuse, neglect, assault, battery or criminal sexual conduct within the past 10 years
- Any misdemeanor conviction involving fraud or theft

Degree Requirements

- As a condition of graduation, students must become members of the Association of Surgical Technologists (AST) and sit for the certification examination offered by the National Board of Surgical Technologists and Surgical Assistants (NBSTSA).
 - Membership fees (AST) and examination fees (NBSTSA) are the responsibility of the student
- Students must complete all core surgical technology coursework with a "B" or better to meet graduation requirements.
- Demonstrate procedural proficiency by completing a minimum of 120 surgical cases
- Possess current Basic Life Support (BLS) Healthcare Provider Certification
- Students have two attempts to pass surgical technology core courses successfully

SURGICAL TECHNOLOGY: CENTRAL SERVICE TECHNICIAN

- Short-Term Certificate: (SURT-SCERT)

About the Program

The Surgical Technology Central Service Technician program is a curriculum designed to enable students to perform duties relative to processing surgical instrumentation, equipment and supplies for the operating room, as well as other areas of the hospital that require sterile items.

Specifically, the Central Service Technician is responsible for the procurement and processing of surgical instrumentation, supplies and equipment. Central Service Technicians provide support to all patient care services in the health care facility that require sterile products. Responsibilities include instrument identification, decontaminating, cleaning, processing, surgical tray assembly, sterilizing, storing and distributing sterile supplies needed in patient care, primarily for surgical procedures. Heavy lifting and exposure to blood and body fluids are required.

Certificate Goals

- To prepare students with knowledge and technical skills to effectively perform duties relevant to a Central Service Technician
- To prepare students to successfully pass the National Certifying Examination for a Central Service Technician provided by IAHSCTMM (International Association of Healthcare Sterile Central Service Material Management). Students must take examination on their own after successful course completion

Certificate Outcomes

- Exhibit proficiency in successfully completing the National Certifying Examination for Central Service Technicians with a 80% or better proficiency rate

- Demonstrate expertise in the application of sterile and aseptic technique
- Demonstrate self-direction and responsibility for maintaining central sterilization competency
- Effectively use written, oral and interpersonal communication skills operating as a member of a diverse team of medical professionals
- Incorporate the safety principles, practices and standards regulations as governed by the profession

Admission Requirements

To be admitted into the Central Service Technician program, students are required to complete the following:

- Fulfill all WCCCD admission requirements
- Be 18 years of age or older and have a high school diploma or GED
- If required, fulfill course placement requirements based on the ACCUPLACER® scores
- Submit Allied Health Department application to program director or representative
- Must complete criminal background check, physical exam (within one year of application submission), MMR, Hepatitis B (HBV) shots (series of three shots), TB, Varicella, Tetanus, Influenza vaccination (seasonal), as well as a 10 Panel Drug/Alcohol Urine Screen. Proof of COVID 19 vaccination if required by clinical facility
- Complete all prerequisites with a grade of "C" or better.
- Submit unofficial transcripts from previously attended institutions (if applicable), as well as WCCCD
- Submit three letters of recommendation: two professional and one personal
- Provide valid Government Issued Color Photo ID (Driver's License/State ID and Passport Photo)
- Meet with the Program Director to review and complete paperwork

Continued on next page.

SURGICAL TECHNOLOGY: SURGICAL FIRST ASSISTANT

- College Certificate: (CERT-SFA)

About the Program

The Surgical First Assistant (SFA) College Certificate program is offered as one of four career options for students admitted into the Surgical Technology program. Enrollment in the program is limited due to the number of clinical-learner positions available at each of the clinical settings. A student's educational experience in the program includes both classroom course work (didactic) and practical (clinical) instruction in a peri-operative environment. Upon successful completion of the SFA Certificate program, students will also receive a Certificate of Completion and will be eligible to sit for the national certification examination.

A Surgical First Assistant works under the direction and supervision of the surgeon and in accordance with hospital policy and appropriate laws and regulations. The SFA provides aid in exposure, homeostasis, and other technical functions that help the surgeon carry out a safe operation with optimal results for the patient. A SFA must be knowledgeable in surgical procedures and the use of surgical instruments on tissues.

College Certificate Goals

- To prepare students with the knowledge and technical skills to effectively perform as a team member of the surgical team unit under the direct supervision of a doctor or registered nurse
- To prepare students to proficiently exercise the duties and responsibilities including peri-operative preparation and post-operative procedures
- To prepare students to successfully pass the National Certification Examination for Surgical First Assistants

College Certificate Outcomes

- Students will be able to demonstrate and apply technical competency as it applies to the duties and technical responsibilities of the position
- Exhibit proficiency in successfully completing the National Certification Examination for Surgical First Assistants with a 80% or better proficiency rate
- Demonstrate critical thinking skills during peri-operative and post-operative procedural management according to the facility policies, procedures and surgeon preferences
- Operate all equipment safely, effectively and efficiently while using appropriate protocols
- Demonstrate self-direction and responsibility for maintaining surgical competency
- Accurately and effectively demonstrate information literacy skills, written, oral and interpersonal communication skills operating as a member of a diverse team of medical professionals
- Incorporate the safety principles, practices and ethical standards and regulations as governed by the profession

Admission Requirements

To be admitted into the Surgical First Assistant program, students must complete the following requirements for admissions prior to acceptance into the program:

- Must complete criminal background check, physical exam (within one year of application submission), MMR, Hepatitis B (HBV) shots (series of three shots), TB, Varicella, Tetanus, Influenza vaccination (seasonal), as well as a 10 Panel Drug/Alcohol Urine Screen
- Fulfill course placement requirements based on the ACCUPLACER® assessment
- Must be 18 years of age or older
- Complete a WCCCD Program Application and submit to the Campus Academic Officer

Continued on next page.

*Surgical Technology: Surgical First Assistant
continued*

- Prerequisite courses may be required depending upon ACCUPLACER® assessment
- Complete all prerequisites with a grade of “C” or better. Students must complete all core classes with a “B” or better
- Students must complete the WCCCD Allied Health application
- Current CPR/BLS certification
- Submit official transcripts from WCCCD, as well as previous institutions
- Provide valid Government Issued Color Photo ID (Driver’s License/State ID and Passport Photo)
- Must be Certified surgical technologist (CST), or certified nurse-operating room (CNOR), or physician assistant – current certified (PA-C)
- Proof of liability insurance covering health care activities
- Proof of proficiency in Microbiology, Pharmacology, Anatomy and Physiology
- Proof of computer literacy
- Work history from employers
- Submit three letters of recommendation: two professional and one personal
- Proof of immunization against Hepatitis B or waiver
- Interview with the Program Director
- Students are allowed two attempts for successful program completion

All program applications are reviewed by the Surgical Technology Department Admission Committee. Students must submit all paperwork by November 15th for the start of the Spring Semester.

The Surgical First Assistant program offers a College Certificate and may be completed in 45 instructional weeks. The certificate option is designed to prepare students with the skills required for a broad range of surgical specialist positions.

College Certificate Requirements

- Students must complete all core course work with a grade of “B” or better to meet graduation requirements

TEACHER EDUCATION: ELEMENTARY EDUCATION

Associate of Arts Degree: (AA-TEEE)

About the Program

The Teacher Education Associate of Arts degree in elementary education offers career opportunities to complete the first two years of the baccalaureate degree requirements leading to teacher certification in special, elementary and secondary education. The program is designed to prepare prospective teachers to be innovative role models and leaders in academic environments. In order to acquire the skills and abilities necessary for excellence in teaching, students will participate in classes, fieldwork, support services and workshops.

Program Goals

- To prepare students with the knowledge and necessary foundation as the precursor for a declared four-year degree in Elementary Teacher Education
- To teach students the social, philosophical, historical perspectives and best practices in educational methodology that impact elementary education

Program Outcomes

- Students will be able to describe the policies, issues, and trends in the field of elementary education
- Analyze and identify major historical events in education and its impact with current educational trends
- Identify the psychological, cognitive, emotional, and physical characteristics of typically developing children, children with disabilities, and children who are culturally and linguistically diverse
- Demonstrate knowledge of and critically evaluate current instructional practices in elementary education to compare and contrast instructional strategies based on students' learning styles

- Design and implement individual development learning plans that include cognitive processes associated with critical thinking, creative thinking, problem solving, invention, memorization and recall that are appropriate for all students across the learning continuum
- Identify and explain the models of classroom and behavior management
- Identify strategies for working and advocating for families of culturally and linguistically diverse (CLD) students and students with disabilities in order to facilitate a child's educational program
- Identify community resources serving students with special needs and their families
- Demonstrate excellent written, verbal, critical thinking, and problem solving skills, which will allow them to effectively make connections between prior knowledge/ experience and new learning

Admission Requirements

Students are required to complete the following:

- Fulfill all WCCCD admissions requirements
- Declare intent to enter the Teacher Education program by completing a program application form
- Fulfill course placement requirements based on the ACCUPLACER® assessment
- Earn and maintain a minimum overall 2.5 grade point average
- Submit a completed program application for admission along with other supporting documentation as specified in the application
- Complete background check and drug screening

Students are required to do the following:

- Fulfill all WCCCD admission requirements
- Fulfill course placement requirements based on the ACCUPLACER® assessment
- Complete a WCCCD Program Application and submit to the Campus Academic Officer

VISUAL ARTS

Associate of Applied Science Degree: (VIS-AAS)

About the Program

The Associate of Applied Science (AAS) in Visual Arts is a two-year degree designed to prepare students for careers in the creative industries through a comprehensive, hands-on curriculum in traditional and digital media. This program offers foundational training in drawing, color theory, design principles, photography, digital illustration, and portfolio development, while introducing students to the latest industry tools and creative workflows. With a focus on applied learning, students will engage in studio-based projects that explore personal expression, professional visual communication, and real-world design challenges.

Students will graduate with a strong, diverse portfolio and the technical skills needed for entry-level positions in graphic design, media production, advertising, freelance artistry, and other visual arts professions. The program also supports transfer opportunities to four-year institutions offering bachelor's degrees in fine arts, Design, Multimedia Arts, and related fields. Whether students aspire to become professional artists, designers, or creative entrepreneurs, the AAS in Visual Arts lays the groundwork for a dynamic and fulfilling career in the visual arts sector.

This Program Offers

- Associate of Applied Science: **63** credit hours
- College Certificate: **39** credit hours

Program Goals

- Equip students with essentials skills in drawing, design, color theory, and composition to support range of visual art applications
- Prepare students to proficiently use industry-standard digital software and tools for creating, editing, and presenting visual work

- Encourage innovative thinking and conceptual development through creative challenges and real-world visual communication projects
- Guide students in developing a cohesive, high-quality portfolio that reflects technical skill, creative range, and personal artistic voice
- Train students to articulate artistic concepts, critique peer work constructively, and present their own projects professionally.
- Prepare graduates for immediate employment in entry-level positions within the creative industry or for transfer to four-year visual arts programs.
- Cultivate an understanding of the historical, cultural, and social contexts of visual art, encouraging thoughtful, reflective and inclusive practice.

Program Outcomes

- Apply fundamental skills in drawing, color theory, design, and composition across both traditional and digital media.
- Develop and present a professional, high-quality portfolio that shows a range of creative work and reflects a distinct artistic voice.
- Clearly articulate creative concepts, design choices, and artistic processes in both written and oral forms, including presentations and critiques.
- Apply critical thinking and visual problem-solving strategies to address real-world design challenges and communicate messages effectively.
- Qualify for entry-level positions in creative industries or successfully transfer into bachelor's degree programs in visual arts or related fields.

Admission Requirements

Students are required to do the following:

- Be 18 years of age or older (unless part of dual enrollment) or must have completed high school or hold a General Education Development (GED) Certificate
- Fulfil all WCCCD admission requirements
- Declare intent to enter the program on WCCCD Admission Application or in the Student Services Office
- Complete an Educational Development Plan (Plan of Work), outlining the student's plan for program completion
- Fulfill course placement requirements based on the ACCUPLACER assessment

WATER AND ENVIRONMENTAL TECHNOLOGY

- College Certificate: (CERT-WET)

About the Program

The Water Environment Technology (WET) College Certificate program offers the intellectual exposure and on-the-job experience required to operate and manage a wide range of water-treatment technologies. The program recognizes that the efficient application of water-treatment technologies is essential for the survival of earth's population and ecosystems, and that the technologist is largely responsible for the day-to-day compliance with treatment requirements. WET students study water and wastewater treatment processes, and are introduced to topics that include water chemistry, microbiology, toxicity and pollution prevention. Coursework and hands-on experience in utility equipment maintenance complete the technical program.

Completion of the program will help prepare graduates to write the entry level water and wastewater certification examinations administered by the Michigan Department of Environmental Quality.

Certificate Goals

- To prepare students with an understanding of methods related to the production of clean water and pollution control

Certificate Outcomes

- Students will be able to demonstrate an applied understanding of the basic principles of pollution assessment, management and control related to water quality
- Demonstrate knowledge of the main types and categories of pollution treatment processes and treatment systems
- Demonstrate critical thinking skills when applying knowledge of common water and wastewater production facilities related to pollution control
- Prepare students for individual credentialing by the Michigan Department of Environmental Quality (MDEQ) wastewater certification examinations with a 70% or better proficiency rate
- Understand and articulate knowledge of occupational health and safety standards and requirements related to environmental laws, statutes and regulations that govern water quality

Admission Requirements

Students are required to do the following:

- Fulfill all WCCCD admission requirements
- Fulfill course placement requirements based on the ACCUPLACER® assessment
- Complete a WCCCD Program Application and submit to the Campus Academic Officer

Associate of Applied Science Degree: (WELT-AAS)

- College Certificate

About the Program

The Welding Technology Associate of Applied Science degree and College Certificate programs are designed to provide students with in-depth instruction in the field of welding matched with the American Welding Society (AWS) certification Levels: 1, 2 and 3. Core program courses provide students with experience related to design, theory and use of welding equipment. Course learning objectives include: an introduction to welding; safe welding practices; identification of metals; oxygen fuel gas welding; oxygen fuel gas cutting; shielded metal arc welding; gas tungsten arc welding; gas metal arc welding fabrication, weld quality testing; working with specialized welding practices and troubleshooting. Each welding course consists of an introduction; competencies; general performance goals/objectives; specific performance objectives and mastery criteria. The certificates are stacked so that a student will complete a level and be ready to test out at the AWS certificate level while continuing on seamlessly for an associate degree.

This Program Offers:

- Associate of Applied Science:
64 credit hours (WELT-AAS)
- College Certificate – General:
32 credit hours (WLTGW-CERT)
- Short-Term Certificate – Advanced:
29 credit hours (SCERT-WLTAW)
- Short-Term Certificate – Specialized:
28 credit hours (SCERT-WLTSW)
- College Certificate – Artistic Welding:
37 credit hours (ARTW-CERT)

Program Goals

- To teach students to proficiently apply technical skills required in fabrication, construction, maintenance, apprenticeship and other metal working industries
- To prepare students to successfully register and pass the certification exam for Welders

Program Outcomes

- Students will be able to demonstrate competence in solving welding design problems and creating welding joints and steel welds by applying American Welding Society (AWS) economic justification and weld connection performance measures and methods
- Exhibit proficiency in successfully completing the certification exam for Welders with a proficiency score of 75% or better
- Demonstrate competence and applied knowledge of the welding, brazing and cutting processes and technology
- Demonstrate proficiency in blueprint reading, weld symbol interpretation, basic metallurgy and math reasoning applied to layout and fabrication techniques
- Demonstrate subject mastery and skill in welding and cutting processes by averaging 70% on respective program post-tests
- Apply critical thinking, mathematical reasoning to the welding process
- Incorporate the safety principles, practices, standards and regulations as governed by the profession
- Effective use of written, oral, interpersonal and listening skills operating as a member of a diverse team

Certificate Goals

- To teach students proficiency and apply technical skills required in fabrication, construction, maintenance, apprenticeship and other metal working industries

Certificate Outcomes

- Students will be able to demonstrate competence in solving welding design problems and creating welding joints and steel welds by applying American Welding Society (AWS) economic justification and welding connection performance measures and methods

Admission Requirements

Students are required to do the following:

- Fulfill all WCCCD admission requirements
- Fulfill course placement requirements based on the ACCUPLACER® assessment
- Complete a WCCCD Program Application and submit to the Campus Academic Officer

WELDING TECHNOLOGY: ARTISTIC

- College Certificate: (ARTW-CERT)

About the Program

The Artistic Welding Certificate is designed for the beginner or advanced welder or artist. The program will give students the opportunity to explore the basics of welding and metal sculpture. Students will learn basic safety, set-up and operation of Oxy-Acetylene cutting, MIG welding, TIG welding as well as Plasma cutting and fabrication equipment. Artistic development will be encouraged through fabrication techniques, critiques, and lectures. Students will develop a body of work that is cohesive in concept, material and/or subject. An artist statement and presentation of work during critiques will help the student become confident and prepared to display or sell work.

College Certificate Goals

- To introduce the student to working with metal to create a welded sculpture and to explore welding techniques that enhance sculptural expression
- To teach students welding proficiency and apply technical skills required in metal fabrication and construction applicable to art and also traditional metal fabrication

College Certificate Outcomes

- Students will be able to demonstrate proper safety, set-up and operation of welding equipment and fabrication equipment
- Apply critical thinking and mathematical reasoning to the welding process
- Be able to fabricate a 3-Dimensional Sculpture out of metal
- Be able to identify different metals
- Discuss their work in an objective and conceptual way
- Have a body of work that represents their concept, medium and/or subject

Continued on next page.

Artistic Welding continued

- Understand how space, shape and form are represented in their work
- Have knowledge of new artistic ideas and fabrication techniques

Admission Requirements

Students are required to do the following:

- Fulfill all WCCCD admission requirements
- Fulfill course placement requirements based on the ACCUPLACER® assessment
- Complete a WCCCD Program Application and submit to the Campus Academic Officer

COURSE DESCRIPTIONS

ACCOUNTING (ACC)

ACC 100 3 C/45 CH

Introduction to Accounting

Fundamental accounting techniques as related to small business firms. The accounting equation and account classification, journalizing, posting, adjustments and preparation of financial statements. For students desiring a single course in accounting or for students who need to strengthen a limited background prior to pursuing ACC 110.

ACC 105 3 C/45 CH

Income Tax Accounting

This course is a study of basic Federal and State Income Tax regulations with an emphasis on the skills necessary for the preparation of individual income tax returns. Included are filing requirements, determination of taxable income, allowable deductions, tax computation, tax credits, other taxes, payment methods, and audit procedures. Development of proficiency in the preparation of individual, federal, state and municipal tax returns.

ACC 110 4 C/60 CH

Principles of Accounting I

This course covers the fundamentals of financial accounting to include current accounting theories and practices, presented from a financial and managerial viewpoint. Other topics include journal and ledger techniques, working papers, financial statements, inventory evaluation, depreciation methods, financial resources and cost/revenue matching will also be reviewed.

ACC 111 4 C/60 CH

Principles of Accounting II

Prerequisite: ACC 110

This course covers the fundamentals of managerial accounting to include; partnership and corporate accounting, including bonds. Other topics include financial statement analysis, cash flow, manufacturing and cost accounting.

ACC 112 3 C/45 CH

Computerized Accounting Software

Prerequisite: ACC 110

Designed to introduce the student to applying their accounting knowledge to at least two software programs used by bookkeepers, accountants and other accounting personnel in the industry. Software programs that could be used in this course include Peachtree and Quick Books Pro. The class is taught in a computer classroom with 75% - 85% of the course being hands-on. Accounting skills applied to the software programs utilized include accrual accounting, non-customer cash receipts, sales and cash receipts, payroll expenses, journal entries, etc.

ACC 210 3 C/45 CH

Intermediate Accounting I

Prerequisite: ACC 111

An in-depth study of accounting theory, analysis of stockholder's equity (capital stock, retained earnings, dividends) assets cash, receivables, inventories and investments. Analysis of fixed assets, statement of cash flows, the time values of money and the difference in the preparation of balance sheets according to U.S. Accounting Principles and International Financial Reporting Standards (IFRS).

ACC 211 3 C/45 CH

Intermediate Accounting II

Prerequisite: ACC 210

This course is an analysis of Accounting for investments, pensions, current and long-term liabilities. Additional concepts include accounting for leases, stockholder's equity, accounting changes and prior period error corrections and earnings per share of common stock.

ADDICTION STUDIES (ADD)

ADD 100 3 C/45 CH

Addiction Counseling:

An Introduction to Addiction and Theories

This course provides theory and skill acquisition by utilizing intervention strategies designed to obtain therapeutic information, support recovery, and prevent relapse. This course explores the physical, emotional, psychological, and cultural aspects of the addictive process. Emphasis is placed on addiction to food, sex, alcohol, drugs, work, gambling, and relationships. This course provides foundational knowledge for counseling persons with addictive disorders. The student is introduced to theories, basic working definitions of substance abuse, the SAMSA manual, the DSM-V and Alcohol Related Disorders, Substance Induced Disorders. Competencies and requirements for MCBAP & IC&RC certification are defined and explained.

ADD 103 3 C/45 CH

Co-Occurring Disorders

Prerequisite: ADD 100

This course imparts the philosophies, practices, policies, and outcomes of the most generally accepted and scientifically supported models of treatment, recovery, relapse prevention, and continuing care for co-occurring disorders.

ADD 130 3 C/45 CH

Assessment, Diagnosis and Treatment of Addictions

Prerequisite: ADD 100

This is the first course in the methods sequence with the primary focus being on human service delivery to individual clients. Attention will be given to the development and enhancement of professional skills in social history taking, diagnostic assessment, and the relation of assessment to treatment planning/intervention with clients from various, diverse populations, and populations at risk.

AFRICAN-AMERICAN STUDIES (AAS)

AAS 120 3 C/45 CH

Sociology and the African-American Community

A survey of basic sociological concepts and theories of social organization from the African-American perspective. Emphasis on the nature of society and the factors affecting the development of culture; groups, and African-American institutions.

AAS 131 4 C/60 CH

American Government and African-American Struggle

Structure and function of American government. Critical inspection of city, state, and federal government operations and their responsiveness to the needs of African-Americans and other minorities.

AAS 140 3 C/45 CH

The Psychology of the African-American Experience

Fundamental concepts and principles of psychology from the African-American perspective. Emphasis on behavioral elements affecting black and white relations, and on linkages between the behavior of traditional and contemporary African people. The role of the black family in the struggle for equality and liberation is explored.

AAS 150 3 C/45 CH

African-American People in Michigan History

A course designed to give the student an historical perspective of the development of Michigan with emphasis on the accomplishments and roles the African-American has played in the development of the State and the surrounding region.

AAS 175 3 C/45 CH**History of African-American Music**

This course traces the development of African-American music in America. An analysis of African music and its influence on the western world as well as the contributions and development of the blues, gospel, jazz and classical artists, such as Mahalia Jackson, Marion Anderson, William Grant Still, Charlie Parker, John Coltrane, Duke Ellington, etc.

AAS 180 3 C/45 CH**Introduction to African Politics**

Examination of dynamics of African politics and nation-building and a comparison of various post-colonial African governments.

AAS 237 3 C/45 CH**Illegal Drug Traffic and the African-American Community**

Overview of illegal drug traffic and its impact upon the African-American community and the majority community, as well as the criminal justice system. Concentration on the development and functions of local and federal programs, the role of law enforcement and the courts, the rights of the accused, the trafficker and the current situation in the United States.

AAS 253 3 C/45 CH**African Caribbean Literature**

Study of African Caribbean literature encompasses the West Indian islands and adjacent countries South America; Guyana, Suriname, French Guiana and Belize in Central America. Emphasis will be on the linguistic and cultural influences on the prose and poetry of Caribbean literature.

ALLIED HEALTH (ALH)**ALH 105 3 C/45 CH****Medical Math**

Prerequisite: placement test

Mathematical concepts for the health profession. Application of mathematical principles relative to computations/calculations in the health professions.

ALH 110 3 C/45 CH**Medical Terminology**

Introduction to the terminology of health professions. Usage, definition, pronunciation and spelling of terms common to the health professions. Computerized study guides and audio cassette tapes are used to enhance student learning.

ALH 115 3 C/45 CH**Medical Computer Systems**

Exploration of computer systems used in the health care industry. Laboratory included.

ALH 214 3 C/45 CH**Pharmacology**

Introduction to Pharmacology.

ALH 230 3 C/45 CH**Medical Ethics**

This course defines the ethical principles and consideration for the allied health professional. Guidelines for practice and conduct relative to legal, moral, and ethical duties and responsibilities are evaluated. Medical Ethics examines the essentials of pertinent laws and ethical demands of the allied health professional. Real legal cases and stimulating exercises challenge learners to envision their responses to legal and ethical dilemmas in healthcare today.

Continued on next page.

*Allied Health (ALH) continued***ALH 240 3 C/45 CH**
Health and Wellness Services in the Community

This course is designed to provide students with an introduction to community health. Community health issues and the causes of health inequality will be examined. Power relations among racial, social, cultural and economic groups will also be discussed.

ALH 250 3 C/45 CH
Community Health Issues

This course will examine social, behavioral and environmental community health-related issues and the controversies that surround them. Group and class presentation work will be emphasized.

ALH 260 3 C/45 CH
Community Health Resources

This course examines health issues in the community in terms of organization, resources, programming, and special populations. Field trip experiences designed to connect and integrate theory with specific activities in a “real” environment are required in this course.

AMERICAN SIGN LANGUAGE (ASL)**ASL 100 3 C/45 CH**
American Sign Language I

This introductory course is designed to develop the basic skills of American Sign Language. It consists of a preparatory phase to attune students to communication in the manual-visual mode, followed by instruction and practice in vocabulary, sentence structure, elementary conversation, and literature.

ASL 105 3 C/45 CH
Orientation to Deafness

Prerequisite: ASL 110

This class is an overview of deafness that encompasses three major topics: the nature and experience of deafness; the education of deaf children and adults; and the adult deaf community. Medical, educational, psychological, social, and vocational aspects are considered.

ASL 110 3 C/45 CH
Introduction to Deaf Culture

This class is designed to introduce the student to the deaf community as a complex and diverse community with a rich heritage and prosperous future. This course focuses on three aspects of the deaf community and culture: 1) historical perspectives and cultural norms within the deaf community, 2) diversity within the Deaf community and 3) artistic expression and humor.

ASL 115 2 C/30 CH
Beginning Finger Spelling and Number Use

This introductory course is a continuation of the initial introductory American Sign Language course (ASL 101). Continuation and skill enhancement through instruction and practice is designed to create confidence for the student for interpretation of American Sign Language.

ASL 120 3 C/45 CH
American Sign Language II

Prerequisite: ASL 100

A continuation of the basic study of the language and culture of the deaf community, this course builds on the receptive and expressive sign vocabulary, the use of signing space, non-manual components of ASL grammar including facial expression and body postures, and introduction to conversational regulators. This class is an overview of deafness that encompasses three major topics: the nature and experience of deafness; the education of deaf children and adults; and the adult deaf community.

ASL 125 3 C/45 CH**Interpreting I***Prerequisites: ASL 105, ASL 115, and ASL 120*

This course will serve as an introduction for the ASL to English voice interpretation via lecture, textbook readings, and practical activities utilizing instructional videos.

ASL 130 2 C/30 CH**Intermediate Finger Spelling and Number Use***Prerequisite: ASL 115*

This course will provide students with advanced instruction and practice in both expressive and receptive fingerspelling skills and builds on principles and techniques established in Visual Gestural Communication.

ASL 150 3 C/45 CH**Principles of Interpreting***Prerequisites: ASL 105, ASL 115, and ASL 120*

This course will introduce a foundation to sign language interpretation including an overview of historical milestones in the field. This course will serve as an introduction to and application of the National Association of the Deaf - Registry of Interpreters for the Deaf (NAD-RID) Code of Professional Conduct for interpreters in specific situations. Included is practice in pre-interpreting skills, such as text translation, short-term memory improvement, and language processing.

ASL 200 3 C/45 CH**American Sign Language III***Prerequisite: ASL 120*

This course will build on the type of vocabulary established in ASL I and ASL II. This course will give students more practice in both the receptive and expressive aspects of ASL. The skills development of the language in regards to the grammatical structure, which is continued in ASL II, is further enhanced. The deaf culture in America, the nature and experience of deafness, and the education of deaf children and adults will

also be discussed briefly as they were comprehensively discussed in ASL II. Parts of the language to look for in this course include the location/descriptions of items in a room, complaints, suggestions, and requests.

ASL 220 3 C/45 CH**American Sign Language IV***Prerequisite: ASL 200*

This course will continue to help build vocabulary as well as give students practice in both the receptive and expressive aspects of ASL. Skills development of the language with regard to grammatical structure (established in ASL I-III), continues. Vocabulary of the language such as the location/descriptions of items in a room, complaints, suggestions, and requests are reinforced.

ASL 225 3 C/45 CH**Interpreting II***Prerequisite: ASL 125*

This course will include advanced instruction in ASL to English voice interpretation. Skills to be introduced include register, processing time, anticipation and prediction, closure, analyzing dialect and modality variation, pacing, and voice projection. Instructional videos and guest speakers will provide practical experience for students.

ASL 230 3 C/45 CH**Structure of American Sign Language***Prerequisites: ASL 125, ASL 150, and ASL 200*

An examination of ASL phonetics, phonology, morphology, syntax and semantics is reviewed. Linguistic facial expressions and uses of physical space in verb agreement, aspectual morphology, and classifier constructions; an exploration of acquisition, psycholinguistics and historical change will also be discussed. Class activities include drills where students will analyze their own production of ASL phonological parameters.

Continued on next page.

American Sign Language (ASL) continued

ASL 250 3 C/45 CH
Interpreting III

Prerequisite: ASL 225

This course provides a review and preparation for students in the various methods of assessment for certification. Practice in this course includes the application of voice to sign and sign to voice skills gained from prerequisite courses which introduced interpreting from simulated situations.

ASL 260 3 C/45 CH
Interpreting and Transliterating

Prerequisite: ASL 225

This course concentrates on the development of English to ASL interpreting skills. This course also includes practice of consecutive and simultaneous interpretation, transliteration skills through simulated situations and vocabulary review.

ASL 270 1 C/15 CH
Topics in Interpreting

This course will provide discussion topics in specialized areas of sign language interpreting for advanced interpreting students and working interpreters. Course may also include field trips as appropriate.

ASL 299 1 C/15 CH
Sign Internship

Prerequisite: Program Approval

This course provides an opportunity for students to participate in the interpreting process of ASL in actual work situations as well as the chance in assisting with day to day ASL agency duties. The student will be expected to arrange an internship with the participating agencies for a minimum of 90 actual hours.

ANESTHESIA TECHNOLOGY
(ANE)

ANE 100 3 C/45 CH
Introduction to Anesthesia Technology

This course focuses on the basic fundamentals of Anesthesia Technology including historical, practical, and safety aspects of the profession. This will also include the role of the Anesthesia Care Team and the scope of practice and specific duties of the Anesthesia Technologist, as well as the policies and standards of patient care practice. The course will also introduce the student to various regulatory associations and credentialing and examine future technologies in Anesthesia Technology. Topics covered will include: malignant hyperthermia, electrical and fire safety, patient position along with basic monitoring, and inhaled agents. Set up and function of basic equipment for anesthesia care such as EKG, B/P, and Pulse OX monitors.

ANE 105 3 C/45 CH
Basic and Advanced Principles of Anesthesia Technology

Prerequisites: ANE 100, ALH 110, BIO 155

This course focuses on the basic as well as advanced aspects of Anesthesia Gas Machines and Anesthesia related equipment. The set-up and function of basic equipment for anesthesia care, anesthesia machine check out and types of anesthesia will be discussed. Students will learn about the various medical gas cylinders and pipelines used in the medical atmosphere. Hemodynamic and gas monitoring, intravenous lines and skin preparation will be covered. Transducer set up for various types of surgery. Students will also be exposed to transfusion medicine and preoperative blood management. Topics covered will also include scope of practice, occupational health, electrical safety, fire safety and will include the anesthesia workstation. The students will also learn about the severity of latex allergic patients and being a part of the Anesthesia Care.

ANE 110 4 C/90 CH**Anesthesia Technology Instrumentation***Prerequisite: ANE 105*

This course focuses on the instrumentation utilized in providing anesthesia, hemodynamic monitoring equipment; function, application and troubleshooting. Invasive and non-invasive, emergent and nonemergent. Advanced knowledge of Anesthesia machine will be discussed and examined as well as intubation equipment techniques and emergency responses. Students will set up and learn the use of complex Anesthesia equipment. Students will diagnosis and troubleshoot minor repairs of Anesthesia equipment for proper function and maintenance. Students will demonstrate, cleaning, documentation, safety and asepsis. Students will explore policies and standards for quality assurance and process improvement. In addition students will identify the various Regulatory Associations and credentialing in Anesthesia Technology.

ANE 200 4 C/240 CH**Anesthesia Technology Clinical I***Prerequisites: ANE 110, BIO 240, BIO 250**Corequisite: ANE 205*

Prior to entering the clinical and patient care setting the student will acquire a Basic Life Support and an Advanced Cardiovascular Life Support card. This course serves as the first of three externship experiences, with a focus on the integration of the theory, simulation and practical application of basic skills acquired from previous didactic coursework in the clinical and patient setting. The student will first observe, and then provide support during surgical procedures. Students will be expected to maintain a weekly case log of all procedures, as well as detailed case reports of procedures involving direct patient care. Student will progress to independently set-up, and or assess efficacy of equipment, medications, and technique. Student will evaluate the circumstance of the patient, consult with the Anesthesia provider and assist in

the care of the patient. Student will interact with vendors and other departments.

ANE 205 3 C/45 CH**Anesthesia Technology Pharmacology***Prerequisites: ANE 110, BIO 240, BIO 250**Corequisite: ANE 200*

This course focuses on the pharmacokinetics and pharmacodynamics of drugs used in the administration of anesthesia and analgesia. Topics covered will include routes of administration, drug interactions, drug metabolism and elimination, and the various classes of anesthetic agents. Intravenous therapy and emergency mediations will also be covered.

ANE 210 4 C/240 CH**Anesthesia Technology Clinical II***Prerequisites: ANE 205, BIO 250*

This course serves as the second of three externship experiences, with a focus on the integration of theory, simulation and practical skills acquired from previous didactic coursework to be applied in the clinical and patient care setting. The student will progressively function as a member of the Anesthesia Care Team. Interact professionally with vendors and other departments. Students will be expected to maintain a weekly case log of all procedures, as well as detailed case reports of procedures involving direct patient care.

ANE 220 4 C/45 CH**Anesthesia Technology Seminar and Certification Preparation***Prerequisites: ANE 210, BIO 250**Corequisite: ANE 225*

This course serves as a capstone course for the anesthesia technology program. Students will discuss clinical scenarios and form patient care plans. Students will prepare for the national technologist credential exam. Students will review Anesthesia Technologist career opportunities now and future technologies.

Continued on next page.

*Anesthesia Technology (ANE) continued***ANE 225 6 C/360 CH****Anesthesia Technology Clinical III***Prerequisites: ANE 210, BIO 250**Corequisite: ANE 220*

This course serves as the third and final externship experiences, with a focus on the integration of theory, simulation and practical skills acquired from previous didactic coursework to be applied in the clinical and patient care setting. The student will progressively function as a member of the Anesthesia Care Team. Interact professionally with vendors and other departments. Students will be expected to maintain a weekly case log of all procedures, as well as detailed case reports of procedures involving direct patient care.

ANE 230 6 C/180 CH**Anesthesia Technology Clinical Experience III***Prerequisite: Program Admission, ANE 100, ANE 105, ANE 110, ANE 205*

This course serves as the only externship experience for the AAD anesthesia technology student, with a focus on the integration of theory, simulation and practical skills acquired from previous didactic coursework and training received on-the-job, to be applied in the clinical and patient care setting. The student will progressively function as a member of the anesthesia care team and surgical teams. Interact professionally with vendors and other departments. Students will be expected to maintain a weekly case log of all procedures, as well as detailed case reports of procedures involving direct patient care.

ANTHROPOLOGY (ANT)**ANT 150 1 C/15 CH****Introduction to Global Studies**

This is an international study course that provides students an opportunity to explore many aspects of globalization as a driving force in human life. This interactive class is designed to engage students in a public intellectual conversation that contributes to our common life together and to our understanding of the wider world. This course prepares students for travel overseas after which two to three weeks are spent in the cultural context of a country with opportunities to participate in research, journal writing, creative projects and group sessions. Travel destinations will vary.

ANT 151 3 C/45 CH**Introduction to Genealogical Research**

This course provides an overview of the principles, ethics and technology utilized to conduct a personal genealogical search. Students will learn ethical best practices, establish a genealogical proof standard, employ and execute basic search techniques and exhibit an understanding of genealogical records associated with the research process.

ANT 152 3 C/45 CH**Introduction to General Anthropology**

The physical and cultural nature and development of humans in relationship to their environment. Race and human variation, archaeology and its uses, the nature and function of culture and the relevance and application of anthropology in modern society.

ANT 153 4 C/ 60 CH**Introduction to Physical Anthropology**

A study of humans from a biological perspective: genetics, comparative behavior of human and nonhuman primates, human growth and development, the concept of “race” and racial variation, fossil evidence concerning human evolution. (Satisfies non-lab natural science requirement.)

ANT 154 3 C/45 CH**Introduction to Cultural Anthropology**

A comparative study of different cultures and lifestyles throughout the world. From a cross-cultural perspective, such concepts as kinship, sex roles, taboos, food and eating customs, folklore, magic and religious practices are studied.

ANT 155 3 C/45 CH**Genealogical Research I**

This course is designed to enable students to develop competence in writing life stories by analyzing, organizing, and developing ideas; to locate and use library and online resources for supporting ideas; and to adapt one’s writing to various audiences. Additionally, teaches how to conduct research and provide evidence for kinship linkages in an international country.

ANT 201 3 C/45 CH**Urban Life and Culture**

Prerequisite: One Course in ANT or SOC

Using the city and its cultural settings as a classroom and field laboratory, this course is designed to help students develop an awareness and understanding of the nature and diversity of cultural patterns and life-styles within urban America in general and metropolitan Detroit in particular. Various ethnic, religious, social and sexual life-styles and traditions are studied through field experiences and cultural informants.

ANT 210 3 C/45 CH**Anthropology of Sex and Culture**

Prerequisite: One Course in ANT or SOC

A cross cultural study of the range, diversity and cultural basis of human sexual behavior in the world and contemporary American Society.

ARABIC (ARA)**ARA 101 4 C/60 CH****Introduction to Arabic I**

Grammatical construction, vocabulary, simple idioms, oral and written drills to illustrate the linguistic pattern of the Arabic language.

ARA 102 4 C/60 CH**Introductory Arabic II**

Prerequisite: ARA 101

Continuing the study of grammatical construction, vocabulary, simple idioms, oral and written drills to illustrate the linguistic pattern of the Arabic language.

ARA 105 4 C/60 CH**Conversational Arabic I**

Prerequisite: ARA 102 or departmental approval

Application of skills learned in ARA 101 and 102 to conversation and dialogue. Attention given to various links between modern classical Arabic and the spoken language.

ARA 106 4 C/60 CH**Conversational Arabic II**

Prerequisite: ARA 102 or departmental approval

Application of skills learned in ARA 101 and 102 to conversation and dialogue. Attention given to various links between modern classical Arabic and the spoken language with particular stress on media, broadcast and various dialects (May be taken independently of ARA 105).

Continued on next page.

*Arabic (ARA) continued***ARA 201** 4 C/60 CH**Intermediate Arabic I***Prerequisites: ARA 101, ARA 102*

An in-depth study of grammatical construction, composition and idioms with emphasis on the use of modern Arabic language in literature, newspaper and radio.

ARA 202 4 C/60 CH**Intermediate Arabic II***Prerequisite: ARA 201*

An extended development of Arabic 201.

ART (ART)**ART 101** 3 C/45 CH**Drawing I***Supplies Cost Extra*

Introduction to perspective, composition, rendering and other fundamental techniques and elements of drawing. Explores the potentials working with various media with emphasis on drawing, value, perspective, rendering, proportion, color, and composition. All of the subject matter areas including still life, the figure and landscape are explored.

ART 102 3 C/45 CH**Drawing II***Supplies Cost Extra**Prerequisite: ART 101*

An introduction to advanced techniques in drawing. Explores the potentials working with various media with emphasis on drawing, value, perspective, rendering, proportion, color, and composition. All of the subject matter areas including still life, the figure and landscape are explored. Greater emphasis on personal expression.

ART 103 3 C/45 CH**Drawing III***Supplies Cost Extra**Prerequisite: ART 102*

This course explores the potentials working with various media with emphasis on drawing, value, perspective, rendering, proportion, color, and composition. All of the subject matter areas including still life, the figure and landscape are explored. Greater emphasis on personal expression.

ART 104 3 C/45 CH**Life Drawing***Supplies Cost Extra**Prerequisite: ART 101*

Life Drawing is a studio course in drawing from the life model. Class sessions include work in pencil, charcoal, ink, and/or other media. Emphasis is on value, structure, line, form, spatial relationships, composition, and personal statement. Studio sessions include drawing, discussions, lectures, and critiques. Coursework requires that students also draw outside of class for a minimum of 4 hours per week.

ART 111 3 C/45 CH**Design I***Supplies Cost Extra*

An introduction to Design and Composition. An exploration of line, value, texture, shape and space, color and mass through lectures, demonstrations and assignments related to these design elements through various projects.

ART 112 3 C/45 CH**Design II***Supplies Cost Extra**Prerequisite: ART 111*

An introduction to Two Dimensional Design and Composition. An exploration of line, value, texture, shape and space, color and mass through a series of lecture/demonstrations and “Hands-On” assignments. Various elements and materials including glass, wood, metals, ceramic and other materials will be investigated through various projects.

ART 115 3 C/45 CH**Basic Drawing for Animation**

This course will introduce students to the fundamental principles of drawing and drawing for animation. The student will learn the basic skills for drawing principles with an emphasis in game development providing the foundation for understanding and creating animation. Topics are how to draw: animals, human anatomy, natural setting and drawing effectively for animation. The student will develop the essential drawing skill necessary to be a successful animator.

ART 121 3 C/45 CH**Painting I***Supplies Cost Extra*

An introduction to opaque media painting. Explores the potentials of painting media with emphasis on drawing, value handling, color, and composition. All of the subject matter areas including still life, the figure and landscape are explored.

ART 122 3 C/45 CH**Painting II***Supplies Cost Extra**Prerequisite: ART 121*

Continuation of ART 121 with emphasis upon new techniques and materials and more complex subject matter. Explores the potentials of painting media with emphasis on drawing, value handling, color, and composition. All of the subject matter areas including still life, the figure and landscape are explored.

ART 123 3 C/45 CH**Painting III***Supplies Cost Extra**Prerequisite: ART 122*

Continuation of ART 122 with emphasis upon personal expression. Composition, individual painting techniques and development of a painting portfolio will be important aspects of the course.

ART 131 3 C/45 CH**Ceramics I***Lab fee*

Introduction to fundamental techniques of creating ceramics. Course covers hand-constructed clay objects, glaze preparation, glaze application, the kiln and firing. Supplies cost extra. (Meets six hours per week)

ART 132 3 C/45 CH**Ceramics II***Lab fee**Prerequisite: ART 131*

This course places an emphasis on the use of the potter's wheel and related skills. Students in this course will continue to use and improve their primary hand building (slab and coil) and wheel throwing techniques, while producing their required assignments. An exploration of glazing, stacking and firing of kilns, developing a potter's vocabulary, and a further study of Ceramic History are also covered by this course.

Continued on next page.

*Art (ART) continued***ART 151 3 C/45 CH****Sculpture I***Lab fee*

Introduction to the fundamental techniques of sculpture. (Meets six hours per week)

ART 152 3 C/45 CH**Sculpture II***Lab fee**Prerequisite: ART 151*

Continuation of ART 151 with emphasis upon new techniques and materials. (Meets six hours per week)

ART 171 3 C/45 CH**Printmaking I***Lab fee*

Introduction to basic printmaking, multi-color silkscreen printing, relief printing and engraving.

ART 172 3 C/45 CH**Printmaking II***Lab fee**Prerequisite: ART 171*

Additional printmaking methods including multi-color reductive woodcut and linecut, multi-etched etching, photo silk screen and paper lithography.

ART 173 3 C/45 CH**Printmaking III***Lab fee**Prerequisite: ART 172*

Advanced printmaking techniques and methods including stone lithography, photo silk screen, collagraph and other printing processes.

ART 174 3 C/45 CH**Printmaking IV***Lab fee**Prerequisite: ART 173*

Emphasis will be placed on individual expression and concentration in one or two printmaking methods.

ART 200 3C/45 CH**Art Portfolio Development**

This capstone course is designed to prepare Visual Arts students for transfer to four-year programs or entry into creative industry careers. Students will refine, curate, and present a professional portfolio that demonstrates their technical skills, conceptual development, and creative identity. Emphasis will be placed on critique, documentation, presentation formats, and artist statements. The course culminates in a final portfolio review and public exhibition.

ASTRONOMY (AST)**AST 101 3 C/45 CH****Introduction to Astronomy**

An introduction to the field of Astronomy, this course starts with an understanding of the universe in general terms and narrows the discussion to our galaxy and solar system. Topics include the galaxies, stars, planets, comets, asteroids, black holes and the universe as a whole. This course examines the ideas covering the birth, life and death of stars, planetary formation and environments, and also the ideas about the origin, structure and possible future of the universe. This is a non-laboratory course for non-science majors.

AUTO BODY TECHNOLOGY (ABT)

ABT 101 4 C/60 CH

Introduction to Auto Body Technology

Corequisite: ABT 103

Lab Fees

This introductory course covers skills needed to become a good auto body shop employee, the various career opportunities in the auto body industry, and the repair and finishing procedures used in a typical paint and body shop. The proper selection of hand and power tools for auto body work will be covered. Students will be exposed to panel and trim replacement, MIG welding and automotive finishes. The history of auto body design and the material differences used in auto bodywork over time will also be covered.

ABT 103 4 C/60 CH

Auto Body Work Environment and Safety

Corequisite: ABT 101

Lab Fees

Safety in any industry is paramount and this class covers environmental, safety, OSHA and other critical laws and regulations in the auto body paint and refinishing industry. Hazardous warning information for products used in auto refinishing is discussed as well as the proper use of personal protective equipment, the correct use of tools and equipment in the shop and customer safety obligations.

ABT 105 4 C/60 CH

Damage Analysis and Repair Estimating

Prerequisite: ABT 101

Lab Fees

This course provides students with exposure to damaged automobiles for the generation of collision analysis and the development of repair estimates. Damage assessment will lead to parts compilation and the calculation of final repair costs, including labor estimates. Additionally, effective and profitable auto body shop management will be discussed.

ABT 131 2 C/30 CH

Introduction to Electrical/Mechanical Repair

Lab Fees

This introductory course focuses on the basic principles and practices of electrical and mechanical repair when an auto has been damaged due to a collision. The course will introduce the most common mechanical and electrical repair issues required to restore vehicle to pre-collision condition.

ABT 141 4 C/60 CH

Auto Body Surface Preparation and Body Fillers

Prerequisite: ABT 105

Lab Fees

This course covers all aspects of auto body surface preparation after surface defects in panels and trim pieces have been corrected. Determining the auto body surface condition, the steps left to finish it and ready the auto body for painting are central to this course. Also covered are the correct mixing and application of body fillers to increase the quality of the finished repair.

Continued on next page.

Auto Body Technology (ABT) continued

ABT 201 **4 C/60 CH**

Basic Automotive Finishes

Prerequisite: ABT 141

Lab Fees

This course focuses on understanding the variety of automotive finishes, including chemical composition, mixing formulas, dry time and finish application technique. Application of base and clear coat systems, as well as primers, single stage coatings and sealers are covered. This hands-on course exposes a student to proper mixing of spray materials, proper spray gun techniques with various types of equipment, the use of reference manuals, and adherence to safety procedures in the industry.

ABT 203 **4 C/60 CH**

Advanced Finishes, Custom Painting and Detailing

Prerequisite: ABT 201

Lab Fees

Fundamental auto body finishing skills are further developed in this course with the addition of proper techniques for the application of metallic colors, spot repairs. Color blending, tri-coat finishes and specialty products. Basic custom painting techniques, advanced color mixing and matching, detailing, pin striping, and decal application will be covered. The removal of overspray and the proper cleaning of the exterior of the vehicle will also be emphasized.

**AUTOMOTIVE SERVICE
TECHNOLOGY (AUT)**

AUT 101 **3 C/45 CH**

Automotive Fundamentals

This course provides opportunities for students to study and apply basic automotive concepts and processes as they relate to the field of automotive technology. Areas of study include career opportunities and practices, basic safety, tool and equipment, measuring tools and equipment, fuel and ignition systems automotive specifications, electrical system basics, battery service, wheel and tire service, cooling and lubrication systems, and student organizations. Emphasis will be placed on career exploration, job seeking skills, and personal and professional ethics. Safety instruction is integrated into all activities.

AUT 110 **3 C/60 CH**

Hybrid/Ev Service & Safty

The course is designed to provide participants with comprehensive knowledge and practical skills related to servicing and maintaining hybrid/ electric vehicles (HEVs/EVs) while ensuring safety in the workshop environment.

AUT 114 **3 C/60 CH**
Electrical/Electronic Systems I

Lab fee

Prerequisite: Program Approval

Corequisite: AUT 115

This course is a required course in the Automotive Technology certificate and associate degree programs. This fundamental course provides students with the necessary skills and understanding to identify, describe, and locate basic parts of major electrical/electronic automotive systems. Electrical theory, operating principles, construction, and maintenance of various components will be applied in this class. Introduction to on-vehicle testing procedures and inspection of electrical components will be performed by students. There will be discussion and testing of on-board computers included. ASE certification requirements will be introduced in this course.

AUT 115 **3 C/60 CH**
Electrical/Electronic Systems II

Lab fee

Corequisite: AUT 114

This course is a required course in the Automotive Technology certificate and associate degree programs. This course provides students with the necessary skills and understanding to system construction and operations. Electrical theory, operating principles, construction, maintenance and repair of various components are included in the class. On-vehicle testing, inspection, and diagnoses will be performed by students. There will be discussion and testing of on-board diagnostic computers stressed in this course. In addition, ASE certification disciplines will be stressed and applied in this course.

AUT 116 **3 C/60 CH**
Electrical/Electronic Systems III

Lab fee

Prerequisites: AUT 114, AUT 115

Corequisite: AUT 117

This course is a required course in the Automotive Technology certificate and associate degree programs. This advanced course provides students with the necessary skills and understanding of system diagnosis and repair. The student will perform vehicle testing, diagnoses and repair. Students will be expected to perform the necessary service of OBD I and II vehicles with the use of scan tools and analyzers. In addition, ASE certification testing procedures will be implemented and applied in this course.

AUT 117 **3 C/60 CH**
Electrical/Electronic Systems IV

Lab fee

Prerequisites: AUT 114, AUT 115

Corequisite: AUT 116

This course is a required course in the Automotive Technology certificate and associate degree programs. This advanced course provides students with the necessary skills and understanding of advanced Inspection, diagnosis and repair of electrical/electronics in automotive vehicles. The student will perform advanced diagnosing, vehicle testing and repair on today's automobiles using the latest testing equipment. Students will perform the necessary service on OBD I and II vehicles with the use of scan tools and analyzers. In addition, sample ASE certification tests and procedures will be implemented and strongly applied in this course.

Continued on next page.

*Automotive Service Technology (AUT) continued***AUT 118 3 C/60 CH****Engine Performance I***Lab fee**Prerequisites: AUT 114, AUT 115, AUT 116, AUT 117**Corequisite: AUT 119*

This introductory course is designed to help the student identify engine and computer control systems on the modern automobile. Basic troubleshooting procedures will be used to diagnose the engines electrical, ignition, fuel and emissions systems. Other areas such as ASE certification techniques will also be introduced in this course.

AUT 119 3 C/60 CH**Engine Performance II***Lab fee**Prerequisites: AUT 114, AUT 115, AUT 116, AUT 117,**Corequisite: AUT 118*

This course is a continuation of AUT 118 and is designed to help the student identify the complex engine and computer control systems on the modern automobile. Basic troubleshooting procedures will be used to diagnose the engines electrical, ignition, fuel and emissions systems. Other areas such as ASE certification techniques will also be introduced in this course.

AUT 120 3 C/60 CH**Brakes I***Lab fee**Prerequisites: AUT114, AUT115, AUT 116, AUT 117**Corequisite: AUT 203*

This course is designed to provide students with the necessary skills and understanding to research, diagnose, repair and maintain the automotive braking systems. In addition, it will provide the necessary skills to be prepared for the ASE certification brakes exam. Hydraulic theory, brake operating principles, anti-locking brake theory and

systems, construction maintenance, and inspection will be performed by the student.

AUT 121 3 C/60 CH**Steering and Suspension I***Lab fee**Prerequisites: AUT114, AUT115, AUT 116, AUT 117**Corequisite: AUT 204*

This course is designed to introduce the student to basic components and operations of the automotive suspension and steering systems. Troubleshooting, inspection, and diagnosing of suspension and steering problems will be applied in this course. The student is expected to perform these techniques to show competency in this area. In addition, ASE principles for certification will be highly stressed and applied in this course.

AUT 122 4 C/75 CH**Automatic Transmission and Transaxle I***Lab fee**Prerequisites: AUT114, AUT115, AUT 116, AUT 117,**Corequisite: AUT 206*

This course is designed to provide students with the necessary skills and understanding to research, diagnose, repair, overhaul and maintain automatic transmissions, operating principles, hydraulics, power flow, testing and overhaul procedures for transmissions and transaxles. On-vehicle inspection, diagnosis and repair are performed by the student.

AUT 124 4 C/75 CH**Engine Repair I***Lab fee**Prerequisites: AUT114, AUT115, AUT 116, AUT 117**Corequisite: AUT 207*

Engine repair is the study of basic theory, design, service, and diagnosis of live automotive engines. Practical application of diagnosis, removal, inspection, measurement, repair, installation, and safety procedures will also be taught.

AUT 125 3 C/60 CH**Heating and Air Conditioning I***Lab fee**Prerequisites: AUT114, AUT115, AUT 116, AUT 117**Corequisite: AUT 208*

This course is designed to provide students with the necessary skills and understanding to research, diagnose, repair and maintain the automotive Heating, Ventilation, and Air Conditioning systems. In addition, it will provide the necessary skills to be prepared for the ASE certification exam.

AUT 126 3 C/60 CH**Manual Drive Train and Axles***Lab fee**Prerequisites: AUT114, AUT115, AUT 116, AUT 117**Corequisite: AUT 209*

This course is designed to provide students with the necessary skills and understanding to identify basic characteristics and components of the manual drive train and axle design. On-vehicle inspection, diagnosis, and repair are performed by the student. Identification of special tools used on these systems will also be explained. In addition, ASE principles for certification will be introduced to the student.

AUT 150 4 C/60 CH**Introduction to Alternative Fuels***Prerequisite: AUT 117*

Students will use various sources in the alternative fueled vehicle industry to learn what alternative fuels are available, which include an overview of alternative fuel engine technology, compressed natural gas technology, electronic diagnostic and integration methods, system specific electronics, emission testing, cylinder inspection, and driver orientation/safety/ vehicle inspection.

AUT 151 4 C/60 CH**Light Duty Diesel Engines***Prerequisite: AUT 117*

This course covers the operation of light duty diesel engines. Students will diagnosis and repair mechanical and electronic fuel injection systems, aid induction and exhaust systems, and perform general engine diagnosis according to engine manufacturer standards.

AUT 152 4 C/60 CH**Introduction to Electric and Fuel Cells***Prerequisite: AUT 117*

This course is designed to help prepare the student to enter the automotive repair and service industry in the area of alternative fuels and advance technology vehicle. It is an intensive study of vehicle electric and fuel cell theory, application, installation, diagnosis, service and safety regulations.

AUT 153 4 C/60 CH**Introduction to Gaseous Fuels***Prerequisite: AUT 117*

This course is designed to help prepare the student to enter the auto repair and service industry in the area of alternative fuels and advanced technology vehicles. It is an intensive study of three gaseous fuels - natural gas, propane and hydrogen. Theory, application, installation, diagnosis and safety regulations will be covered.

AUT 154 4 C/60 CH**Introduction to Hybrid Fuel Technology***Prerequisite: AUT 117*

This course covers the fundamentals of hybrid vehicle technology. The course is intended to give the student an understanding of the types of hybrid vehicles, hybrid vehicle components, how hybrid vehicles operate and basic service procedures; this will enable the student to obtain employment as an advanced technology vehicle technician.

Continued on next page.

*Automotive Service Technology (AUT) continued***AUT 155** **4 C/60 CH**
Introduction to Hydrogen Applications and Safety*Lab fee**Prerequisite: AUT 117*

This course will give the student an understanding of the properties of hydrogen, its use as a fuel for internal combustion engines and fuel cells, and the storage, transportation and safety considerations, enabling the student to obtain employment as an alternative fuel or advanced technology vehicle technician.

AUT 200 **3 C/60 CH**
Engine Performance III*Lab fee**Prerequisites: AUT114, AUT115, AUT116, AUT117, AUT 118, AUT 119**Corequisite: AUT 201*

This intermediate course is designed to help the student diagnose and repair the complex engine and computer control systems on the modern automobile. Basic diagnostic procedures will be used to troubleshoot and diagnose the engines electrical, ignition, fuel and emissions systems. Other areas such as ASE certification techniques will also be utilized in this course.

AUT 201 **3 C/60 CH**
Engine Performance IV*Lab fee**Prerequisites: AUT114, AUT115, AUT 116, AUT 117, AUT 118, AUT 119,**Corequisite: AUT 200*

This advanced course is designed to provide the student with hands-on techniques to inspection, diagnose and repair of complex engine and computer control systems on modern automobiles. Advanced diagnostic procedures will be used to troubleshoot and diagnose the engines electrical, ignition, fuel and emissions systems.

An understanding of employment opportunities, “pertaining to engine performance”, will be discussed. While utilizing these tasks, ASE certification principles will be highly stressed and applied in this course.

AUT 203 **3 C/60 CH**
Brakes II*Lab fee**Prerequisites: AUT114, AUT115, AUT 116, AUT 117,**Corequisite: AUT 120*

This course is a continuation of Brakes I and will be used to exercise the student’s abilities to perform theory, diagnosis and operations of automotive braking systems. The student will inspect, remove and replace braking system components, perform machining techniques, overhaul and repair braking systems. This automotive brakes class is a combination of (70%) laboratory experiences and (30%) lecture. Every student will be expected to participate in lab exercises and will be evaluated on an individual basis. The ASE certification requirements will be highly stressed in this course.

AUT 204 **2 C/45 CH**
Steering and Suspension II*Lab fee**Prerequisites: AUT114, AUT115, AUT 116, AUT 117,**Corequisite: AUT 121*

This course is a continuation course of Steering and Suspension I. This course is designed to provide the student with the knowledge and skills to inspect, diagnose and perform repair procedures on automotive steering and suspension systems, as well as introduction to basic inspection and diagnosing of steering and suspension problems will be applied in this course. Identification of special tools used on these systems will also be explained. In addition, ASE principles for certification will be introduced to the student.

AUT 206 3 C/60 CH**Automatic Transmission and Transaxle II***Lab fee**Prerequisites: AUT114, AUT115, AUT 116, AUT 117,**Corequisite: AUT 122*

This course is a continuation of Automatic Transmission and Transaxle I and will be used to exercise the student's abilities to perform research, diagnose, repair, overhaul and maintain automatic transmissions, operating principles, hydraulics, power flow, testing and overhaul procedures for transmissions and transaxles. On-vehicle inspection, diagnosis and repair are performed by the student.

AUT 207 3 C/60 CH**Engine Repair II***Lab fee**Prerequisites: AUT114, AUT115, AUT 116, AUT 117,**Corequisite: AUT 124*

This course is a continuation of Engine Repair I and will be used to exercise the student's abilities to perform theory, diagnosis and operations of automotive engines. Students measure, inspect, recondition, disassemble, and assemble various engine components.

AUT 208 3 C/60 CH**Heating, Ventilation, and Air Conditioning II***Lab fee**Prerequisites: AUT114, AUT115, AUT 116, AUT 117,**Corequisite: AUT 125*

This course is a continuation of Heating, Ventilation, and Air Conditioning I and will be used to exercise the student's abilities to perform theory, diagnosis and operations of automotive heating, ventilation, and air conditioning systems. In addition, it will provide the necessary skills to be prepared for the ASE certification exam.

AUT 209 2 C/45 CH**Manual Drive Train and Axles II***Lab fee**Prerequisites: AUT114, AUT115, AUT 116, AUT 117,**Corequisite: AUT 126*

This course is a continuation of AUT 126 and is designed to provide students with the necessary skills and understanding to diagnose, disassemble, and reassemble a manual transmission. On-vehicle inspection, diagnosis, and repair are performed by the student.

AVIATION TECHNOLOGY: AIR SCIENCE (ATP)

ATP 101 8 C/120 CH**Introduction to Aviation I**

The Introduction to Aviation is comprised of the following four components: Aircraft History, Mathematics, Aircraft Drawings and Physics. Students will learn basic computer and software application, study skills and the history of aviation with early balloons and gliders through modern transport jet aircrafts. An introduction to basic math formulas used by aviation technicians in performing daily tasks and elements necessary for effective understanding and interpretation of aircraft drawings will also be reviewed.

ATP 102 8 C/120 CH**Introduction to Aviation II**

This course will provide a solid foundation in the Federal Aviation Administration's (FAA) acceptable publications to include maintenance manuals, privileges and limitations of an Airframe and Powerplant license. Additional subjects include weight and balance, tools, safety and grounds operations and fluid lines and fittings skills based on industry standard practices.

Continued on next page.

*Aviation Technology: Airframe (AFM) continued***ATP 103 8 C/120 CH****Basic Electricity**

Students will be introduced to electrical theory and principles, and their application to aircraft systems. Aircraft electrical circuit diagrams, including solid state devices and logic functions, DC/AC circuit operation and electrical fundamentals will prepare the student for advanced electrical functions and troubleshooting.

ATP 104 8 C/120 CH**Materials, Fuel, Fire and Corrosion**

Students will learn and practice the process for cleaning aircraft parts and structures as well as methods employed to protect them from corrosion. Additional topics include aircraft repair and maintenance, aircraft fuel systems and all associated components and fire detection warning and protection systems related to the airframe and powerplant.

AVIATION TECHNOLOGY: AIRFRAME (AFM)

AFM 201 8 C/120 CH**Basic Sheet Metal**

Students receive a general introduction to the FAA's requirements for sheet metal fabrication and repair.

AFM 202 8 C/120 CH**Non-Metallic Structures and Finishes**

This course is designed to introduce the student to composite materials used in aircraft construction. Rules regarding installation of aircraft registration numbers will also be reviewed.

AFM 203 8 C/120 CH**Airframe Electrical**

This course will familiarize the student with basic airframe and powerplant electrical installation and troubleshooting.

AFM 204 8 C/120 CH**Aircraft Navigation and Communications**

This course will instruct students on the theory of all instruments and instrument systems used for flight navigation of an aircraft to include inspection, installation, service and FAA regulations.

AFM 205 8 C/120 CH**Assembly and Rigging and Aircraft Systems**

An in-depth study of cabin atmosphere control systems, assembly rigging hydraulics and pneumatics will be covered.

AFM 206 8 C/120 CH**Landing Gear Systems and Airframe Inspections**

Students will learn aircraft landing gear systems, position and warning systems and airframe inspection.

AVIATION TECHNOLOGY: POWERPLANT (PPM)

PPM 201 8 C/120 CH**Reciprocating Engine Operation**

Students will learn the theory and operation of reciprocating engine's powerplant instrument systems and reciprocating engine fuel metering systems.

PPM 202 8 C/120 CH**Reciprocating Engine Systems**

Students will learn "how to" identify, inspect, troubleshoot and service powerplant systems, engine induction, exhaust and ignition systems.

PPM 203 **8 C/120 CH**
Reciprocating Engine Overhaul and Troubleshooting

This course will provide theory and hands-on experience on reciprocating engine inspection, troubleshooting and overhaul systems.

PPM 204 **8 C/120 CH**
Propellers and Turbine Engine Operation

Students will learn the theory of aircraft propellers and be introduced to the future technician to gas turbine engines from the development of gas turbines and jet propulsion followed by a study of the major sections of a typical gas turbine engine.

PPM 205 **8 C/120 CH**
Turbine Engine Designs, Accessories and Instruments

This course is designed to develop an understanding of turbine engine accessories and design used on aircrafts to include turbojet, turbofan and turboprop engines.

PPM 206 **8 C/120 CH**
Turbine Engine Overhaul and Troubleshooting

Students will be introduced to the maintenance and inspections required for turbine engines. Students will also practice the systemic identification of problems that develop in turbine engines including intake, compressor, ignition, combustion, power, exhaust, bleed air and fuel.

BIO-MEDICAL EQUIPMENT REPAIR TECHNOLOGY (BET)

BET 110 **3 C/45 CH**
Bio-Medical Instrumentation and Safety I

Prerequisites: CT 205, EE 101, EE102, EE 107, EE 111, EE 115

Students will be introduced to the Bio-Medical profession and terminology. Usage, definition,

pronunciation and spelling of terms related to anatomy, medical equipment, electronic test equipment and safety will be introduced. Students will become aware of the fundamentals of medical equipment and testing concepts.

BET 210 **3C/45 CH**
Bio-Medical Instrumentation and Safety II

Prerequisite: BET 110

This course is designed to provide students with knowledge on how to properly manage and maintain medical equipment in the hospital setting. Fundamental principles related to Bio-Medical Equipment Repair Technology will also be discussed in this course.

BET 240 **3C/45 CH**
Bio-Medical Equipment Repair Technology Practicum I

Prerequisite: BET 110

This course provides observations and participation in structured learning roles and activities within a hospital setting or with an employer in the Bio-Medical field. Students will be required to complete 300 hours at an approved practicum site.

BET 250 **3C/45 CH**
Bio-Medical Equipment Repair Technology Practicum II

Prerequisites: BET 210, BET 240

This course provides observations and participation in structured learning roles and activities within a hospital setting or with an employer in the Bio-Medical field. Students will be required to complete 300 hours at an approved practicum site.

BIOLOGY (BIO)

BIO 125 4 C/60 CH

Biology for Non-Science Majors

Lab fee

A lecture and laboratory course designed for students who have had little or no prior instruction in biology. Four major topic areas will be studied; (1) ecology; (2) cells and genetics; (3) human biology; and (4) hands-on biological methods. Course highlights include using the Internet to reinforce biological concepts and engaging in exciting laboratory-based and lecture-based activities. Strategies to help students apply biology to their everyday life will also be emphasized.

BIO 151 4 C/60 CH

Human Ecology

A course which develops interrelationships among living things and their environment, with emphasis on these interrelationships in the human community including environmental organization, life processes and conservation in everyday life. The student will be encouraged to offer solutions for environmental problems created by technology.

BIO 155 4 C/60 HL/30 HLB

Introductory Biology

Lab fee

Lecture and laboratory introductory course for the non-science as well as the pre-professional transfer student. Biological concepts covering the chemical and cellular basis of life will be presented, including such topics as cell structure and function, DNA, bioenergetics, reproduction, metabolic principles, genetics. An introductory survey of living organism groupings with emphasis on plant and animal anatomy, physiology, ecology and evolution. (Meets six hours per week; four hours lecture and two hours laboratory).

BIO 156 4 C/60 HL/30 HLB

Organismal Biology/Classification and Biodiversity of Life

Lab fee

This is a second-semester lecture and laboratory course in the principles of organismal biology and biological diversity. It is intended for biology majors and students who intend to pursue careers in the health professions such as medicine, dentistry, or pharmacy. Topics such as ecology, evolution, systematics, and basic properties of a wide array of organisms will be taught.

BIO 165 4 C/60 HL/30 HLB

Botany

Lab fee

Prerequisite: BIO 155

Lecture and laboratory course emphasizing principles of plant biology, including a survey of the plant kingdom with representative life cycles and relationships between plant groups. Emphasis is placed on the development, anatomy, physiology and evolution of gymnosperms and angiosperms. (Meets six hours per week; four hours lecture and two hours laboratory).

BIO 175 4 C/ 60 HL/30 HLB

Zoology

Lab fee

Prerequisite: BIO 155

Principles of animal biology as they apply to major animal phyla. A survey of the animal kingdom with emphasis on evolutionary and comparative relationships of the various phyla. A comparative study of major animal phyla emphasizing anatomy, physiology and ecological principles. (Meets six hours per week; four hours lecture and two hours laboratory).

BIO 204 4 C/60 CH**Life Science for Elementary School Teachers***Lab fee: \$20.00**Prerequisite: ED 110, Program Admission*

Lecture and laboratory course dealing with life science concepts and the variety of strategies used to teach these concepts in elementary schools. Current State of Michigan life science teaching objectives and associated learning activities will be emphasized. In addition, students will develop a life science lesson and teach it to children in an elementary (K-8) school.

BIO 240 4 C/60 HL/30 HLB**Human Anatomy and Physiology I***Lab fee**Prerequisite: BIO 155*

Lecture and laboratory course on the structure and function of the human body. The cellular, tissue, organ and systems levels are considered. Emphasis is on the integumentary, skeletal, muscular and nervous systems including the special senses. The laboratory supplements the lecture with the use of microscopes to study the four basic tissues. The use of the torso, models, articulated/disarticulated skeletons, dissection of sheep brain and bovine eyes are used to study the other systems. (Meets six hours per week; four hours lecture and two hours laboratory).

BIO 250 4 C/60 HL/30 HLB**Human Anatomy and Physiology II***Lab fee**Prerequisite: BIO 240*

Lecture and laboratory course that is a continuation of the systems found in the human body: circulatory, respiratory, digestion, metabolism, urinary, endocrine and reproductive systems. Body fluid, electrolytes and acid/base balance are also included. The laboratory supplements the lecture topics with the use of the torso, dissection of bovine heart models, charts and slides. (Meets six hours per week; four hours lecture and two hours laboratory).

BIO 252

4 C/60 HL

Pathophysiology*Lab fee**Prerequisite: BIO 250*

This course is designed to introduce mechanism and manifestation of different human diseases. The basic science of pathology is concerned with the etiology and pathogenesis of disease. Essential information is provided for understanding the diagnosis of disease in the clinical setting.

BIO 295

4 C/45 HL/45 HLB

Microbiology*Lab fee**Prerequisite: BIO 155*

Lecture and laboratory course studying the biology of microorganisms. Lecture topics survey the microbes, their uniqueness of cell structure and function, growth, physiological characteristics, genetics, physical and chemical control and selected communicable diseases. The laboratory emphasizes the use of the microscope, staining procedures, cultural and physiological techniques, use of keys to identify representatives of the various microbes. (Meets six hours per week; four hours lecture and two hours laboratory).

BUSINESS (BUS)**BUS 112**

3 C/45 CH

Personal Business Affairs

Phases of business activity in which the individual or family is normally involved: consumer rights, banking, taxation, among others.

Continued on next page.

*Business (BUS) continued***BUS 150 3 C/45 CH****Introduction to Business**

An examination of the legal, economic and organizational environments in which modern business operates, including the global dimension of business. A survey approach to the functional areas of business-accounting, information systems, research, finance, management, supervision, human resources and marketing and how they relate to the overall organization.

BUS 155 3 C/45 CH**International Business and Trade**

Prerequisite: BUS 150

This course covers various methods for entering the international marketplace. Topics include national differences in political economy and culture, international trade theory, entering foreign markets, exporting/importing and countertrade, as well as the international monetary system. Emphasis is placed on the impact and dynamics of sociocultural, economic, and political factors in the foreign trade environment.

BUS 161 3 C/45 CH**Introduction to Big Data and Business Analytics**

Prerequisite: MAT 113

This course introduces concepts and possibilities for the business community when employing “Big Data.” Students enter the world of business analytics through the exploration of business careers and basic software tools. Course content presents business intelligence, data visualization, statistical analyses, and data mining theory and techniques. Instruction employs descriptive, predictive, and prescriptive analytics leading to data-based decision making. Incorporation of case study methodology engages real-world scenarios.

BUS 175 3 C/45 CH**Small Business Management**

General business concepts with special application to small businesses. Detailed treatment of credit practices, franchising, location, inventory and other topics particularly crucial in a small business setting. Cases will be used to develop the student’s ability.

BUS 177 3 C/45 CH**Small Business Financing**

Prerequisite: BUS 150

This course is a survey of financing policy for small business. Purchase discounts, borrowing, credit purchases, finance charges, consumer credit, financial management, financial statements, financial ratios and equity leverage are included.

BUS 210 3 C/45 CH**Supervision**

Prerequisite: BUS 150

In this course students will learn to identify the five supervisory roles of a leader: influencing people, communicating effectively, supervising work, coaching, and managing through conflict. A supervisor’s job is constantly affected by technological changes, a more competitive marketplace, and corporate restructuring and workflow redesign. Supervisors need to understand the traditional elements of directing the work of others and the specific skills required to do so: goal setting, budgeting, scheduling, delegating, interviewing, negotiating, handling grievances, guiding employees, and evaluating employee performance. Effective supervisory performance depends on a blend of skills, knowledge, attitudes and behaviors coupled with relevant experience.

BUS 215 3 C/45 CH**Interpersonal Communications in Business**

Managing an organization's people is often the most challenging and complex task that is required of a leader. In this course, you will acquire the knowledge and skills needed to manage people in a business setting by developing your human relations skills. Students will learn the principles and concepts of the behavioral sciences as they apply to interpersonal relationships. Emphasis is placed on developing effective human relations skills for the workplace, including teamwork, and motivating and influencing others.

BUS 221 3 C/45 CH**Business Statistics**

Prerequisite: MAT 113

Methods of gathering and presenting statistical data will be discussed. Basic concepts of probability, sampling and tests of significance for decision making are emphasized.

BUS 225 3 C/45 CH**Computer Applications in Business**

A study of the computer environment and practice of selected applications on the personal computer. Specific topics include Microsoft applications, the use of word processing with hands-on applications using Microsoft Word, spreadsheets with hands-on applications using Microsoft Excel, presentation and graphics using PowerPoint and Database management using Access. Other topics of current interest in information processing and office automation will be discussed (Course is 75-80% hands-on).

BUS 228 3 C/45 CH**Internet Web Page Design**

Prerequisite: OIS 101 Recommended, BUS 225 or CIS 110

A study of the Internet focusing on Web Page Design for Business Applications using software programs as well as the HTML (Hypertext Markup Language). Course content is designed to provide students with hands-on applications using the above software tools.

BUS 240 3 C/45 CH**Business Communications**

Prerequisite: ENG 119

An examination of the basic elements of oral and written communications applying basic skills already acquired in the business setting. A study and practice of writing letters, memoranda, short papers and a research paper drawing on business sources. Oral Presentations are required.

BUS 241 4 C/60 CH**Introduction to Machine Learning**

Prerequisite: BUS 161

This course provides a broad exploration of the various software tools used in business analytics forms the core of this course. Use of commonly available business data manipulation software (both commercially available and open-source types) will be utilized extensively in the course. Students will learn to comb through increasingly more complex business data sets using the correct software application to produce business intelligence. Also, the students are introduced to principles, algorithms, and applications of machine learning from the point of view of modeling and prediction. The class meets in a computer lab and hands-on work is to be expected throughout the course.

Continued on next page.

*Business (BUS) continued***BUS 261 3 C/45 CH****Business Applications of Big Data***Prerequisite: BUS 241*

The presentation of complex and relevant data in readily apparent ways is central to this course. Techniques in probability and statistics are continually explored and advanced while ways of exposing such business intelligence in easily digestible methods to decision makers is honed. Students will deal with actual business scenarios like sales, marketing, logistics and finance. Students are expected to bring in practical problems from fields of their own interest. Students practice presentation techniques and in leading discussions with relevant business data. Teamwork is an essential part of this course. The class meets in a computer lab and hands-on work is to be expected throughout the course.

BUSINESS LAW (BL)**BL 201 4 C/60 CH****Business Law I**

A survey of the American legal system designed to develop an understanding of the fundamentals of business law. Classes are conducted by using text and actual case studies for the purpose of observing the development and application of legal principles in a business activity. Topics covered include the nature of law, courts and court procedures, crimes and torts, contracts, sales and negotiable instruments.

BL 210 4 C/60 CH**International Business Law***Prerequisite: BL 201*

This course is designed to explore the fundamentals of international business law and examine the scope of how international disputes affect global trade.

Students who wish to pursue a career in the business field, especially those who are interested in international business, would gain knowledge useful in international business dealings.

CAREER AND PROFESSIONAL DEVELOPMENT (CPD)**CPD 100 1 C/15 CH****Career and Professional Development**

A course designed to assist students in making career choices. Development of self-confidence, motivation, human relation skills and stress reduction in the classroom and the work place are emphasized. Study skills, time management and conflict resolution are emphasized.

CPD 100-RM 1 C/15 CH**Career and Professional Development-Introduction to Research Methods**

This course provides an introduction to research methods. The course will focus on an introduction to various research designs including experimental and non-experimental, as well as quantitative and qualitative research methods. In addition, the course will focus on providing a practical understanding of several statistical tools.

CHEMISTRY (CHM)**CHM 105 4 C/60 HL/30 HLB****Introduction to Chemistry***Lab fee*

An introductory lecture and laboratory course in chemistry for persons without any previous high school chemistry or for those with an inadequate background for CHM 136. Topics include properties of matter, atomic theory and structure, chemical bonds, nomenclature, composition of

compounds, chemical equations and calculations from chemical equations and stoichiometry (meets six hours per week; four hours lecture and two hours laboratory).

CHM 136 **4 C/60 HL/30 HLB**
General Chemistry I

Lab fee

Prerequisites: CHM 105, MAT 112

First lecture and laboratory course in a two semester general chemistry sequence. It includes a study of stoichiometry, solutions and concentrations of solutions, the gaseous state, molecular geometry and chemical bonding theory, reactions in aqueous solutions and a descriptive study of liquids and solids (Meets six hours per week; four hours lecture and two hours laboratory).

CHM 145 **4 C/60 HL/30 HLB**
General Chemistry II

Lab fee

Prerequisite: CHM 136

This is the second lecture and laboratory course in a two-semester general chemistry sequence. It includes a study of chemical kinetics, chemical equilibrium, acid-base concepts, acid-base equilibria solubility and complex ion equilibria, thermodynamics and electrochemistry. Students participating in the REBUILD Detroit program who have selected the chemistry option should enroll in the appropriate section of CHM 145. The laboratory component for the REBUILD section will follow a RCN (Research Coordinated Network) model where students will explore various aspects of a research question for the entire semester.

CHM 155 **4 C/60 HL/30 HLB**
Survey Organic and Biochemistry

Lab fee

Prerequisites: CHM 105 or CHM 136

A lecture and laboratory course introducing the student to elementary structural organic chemistry as it relates to understanding biochemical reactions. The structure and function of protein, carbohydrates, lipids and nucleic acids are presented. The major metabolic pathways are explored. The role of food nutrition in optimizing metabolism and energy production is discussed (meets six hours per week; four hours lecture and two hours laboratory).

CHM 250 **4 C/60 CH**
Organic Chemistry I

Prerequisite: CHM 145

First lecture course of a one-year sequence in organic chemistry designed for chemistry majors and for students planning to attend professional schools. Topics include introduction to the nomenclature of organic compounds, stereochemistry, reaction intermediates, spectroscopy, kinetics, and thermodynamics (meets four hours per week).

CHM 252 **4 C/60 CH**
Organic Chemistry II

Prerequisite: CHM 250

Second course of a one-year sequence in organic chemistry designed for chemistry majors and for students planning to attend professional schools. Topics include aromatic structures and nomenclature, a more extensive study of reaction mechanisms and synthesis. The chemical basis of biological compounds will also be introduced (meets four hours per week).

Continued on next page.

*Chemistry (CHM) continued***CHM 255** **4 C/90 HLB****Laboratory for Organic Chemistry I and II***Lab fee**Prerequisite: CHM 250**Prerequisite or Corequisite: CHM 252*

Preparations, properties, and identification of organic compounds provide the student with basic laboratory skills in organic chemistry (meets six hours per week during the Fall and Spring semesters only; six hours laboratory).

CHINESE (CHN)**CHN 101** **4 C/60 CH****Elementary Chinese Language**

This course is designed for beginning students and aimed at developing the four skills of listening to, speaking, reading, and writing Chinese. Emphasis is on grammatical constructions, vocabulary, basic idioms, and phonetics. Special emphasis will be on development of conversational Chinese. An appreciation of Chinese culture will be an integral part of the course.

CHN 102 **4 C/60 CH****Elementary Chinese II**

This is the Second course of elementary Chinese. The course provides the fundamentals of basic sentence structure, basic grammars, and essential simplified characters, with particular emphasis placed on speaking and understanding Mandarin Chinese. Emphases are on grammatical constructions, vocabulary, and development of conversational Chinese. The course helps students obtain basic methods to learn Chinese, laying the foundation to study Chinese at higher level. An appreciation of Chinese culture will be an integral part of this course.

CIVIL TESTING AND INSPECTION TECHNICIAN (CIV)**CIV 100** **3 C/45 CH****Civil Technology Industry Overview**

Introduce first term students to the many career opportunities available in the industry. Interact with actual industry professionals on real life projects.

CIV 101 **3 C/45 CH****Introduction to Civil Technology Computing**

This course provides an introduction to computing software commonly used in the Transportation and Civil Construction industries. Software may include, but is not limited to, ArcGIS, ProjectWise, Bluebeam, and MicroStation.

CIV 150 **3 C/45 CH****Measurement & Surveying**

The course will explore the basic surveying concepts and the equipment involved will be learned. This will include hands-on experience and assignments.

CIV 155 **4 C/60 CH****Construction Materials and Testing I (Lecture and Laboratory)**

Students will begin to learn about soils, aggregates, concrete, hot mix asphalt and other materials that are incorporated into Civil/Infrastructure projects. An emphasis will be placed on Quality Control and Acceptance testing of aggregates and concrete in the Laboratory sessions. Incorporate training to prepare students for industry testing competency certifications.

CIV 160 3 C/45 CH**Construction Specifications, Plans and Safety**

This course explores the major components that go into communicating the execution of projects to Contractors. This will include plan reading and specification understanding and interpretation. Students will also be prepared to safely work on construction sites in preparation for their first internship experience.

CIV 200 3 C/45 CH**Soils and Foundation Technology**

The course provides the fundamentals of structure, composition, and engineering properties of aggregates, cement, steel, concrete, and asphalt. Field and Lab test studies for identification, classification, and control of materials.

CIV 210 4 C/60 CH**Construction Materials and Testing II**

Students will expand on their knowledge of soils, aggregates, concrete, hot mix asphalt and other materials. Industry competency certifications in Concrete and Aggregate will be incorporated into the class.

CIV 220 3 C/45 CH**Construction Inspection Documentation I**

This course provides an introduction to construction inspection requirements for elements essential to building civil and infrastructure projects. Emphasis will be placed on documentation requirements in the Inspector's Daily Reports (IDRs).

CIV 225 3 C/45 CH**Construction Inspection and Documentation II**

Expand the students' understanding of construction inspection and documentation. The course will include work with the current e-construction software used to administer projects (currently Field Manager and Projectwise). More advanced Inspection work and Office Technician tasks also will be explored.

CIV 240 3 C/45 CH**Highway Technology**

This course will introduce students to Intelligent Transportation System elements including traffic signals, operation control centers, static and temporary project messaging and connected vehicles.

CIV 245 3 C/45 CH**Site Aggregate Inspection and Testing**

Students will review the basics of aggregate sampling, washing, sieving, and determining crush content of aggregates for quality control during aggregate production and placement.

CIV 250 3 C/45 CH**Highway Design**

Students will learn elements needed to develop a set of Roadway and Bridge plans including specifications. Concepts in estimating, quantity development and geometric layout will be covered.

CIV 260 3 C/45 CH**Density Control**

The course introduces the theory of compaction on various materials, and provides training using MDOT density control tests, procedures and documentation.

Continued on next page.

Civil Testing and Inspection Technician (CIV)
continued

CIV 270 **3 C/45 CH**
Soils, Density and Radiation Safety

The course will expand on the students' understanding of soil, density control and the radiation safety measures needed to operate testing equipment. Industry competency certification in Density Control will be incorporated into the class

COLLEGE ORIENTATION (CCO)

CCO 100 **1 C/15 CH**
Community College Orientation

This course is designed to assist new students in making a successful adaptation to the college environment and enhancing basic study skills. The course emphasis is on improving students' academic, social and interpersonal skills through introduction to the life and study skills essential for academic success. This course is designed to increase student's awareness and use of resources both within and outside of the college (meets two hours per week for seven and one-half weeks).

COMPUTER AIDED DESIGN (CAD)

CAD 101 **4 C/60 CH**
Fundamentals of Computer-Aided Drafting Using AutoCAD

This is an introductory computer aided drawing and design course. As an elementary course, it will provide the student with an overview of drawings produced with the use of the computer. Students will explore software capability by generating various configurations and develop operational skills to include among others: input of graphic

commands, editing, filing, imaging, rotating and copying, plotting and printing for drawings. Auto CAD software will be used in this class.

CAD 102 **4 C/60 CH**
Advanced Computer Aided Design

Lab fee

Prerequisite: CAD 101

An advanced computer aided drafting course that focuses on developing those competencies necessary to produce exacting and precise detail 3-D engineering drawings. The course included three-dimensional data base manipulation and is enhanced with menu creation and advanced editing. Auto CAD software will be used in this class.

CAD 110 **4 C/60 CH**
Fundamentals of Computer-Aided Design Using NX

Lab fee

Prerequisite: DRT 102 or MAT 121

This course introduces students to the foundational concepts and skills required for effective computer-aided design using the NX software platform, formerly known as Unigraphics. Over the course duration, students will engage in a series of hands-on exercises and projects, developing proficiency in creating, interpreting, and editing 2D sketches and 3D models.

CAD 121 **4 C/90 CH**
Tool and Fixture Detailing

Lab fee

Prerequisite: CAD 102 or CAD 222

Study of the systems used in preparing detail drawings of assemblies. Includes detailing of blocks, pins, turned details, elements and castings

CAD 200 4 C/60 CH**UG Free Form Modeling***Lab fee**Prerequisites: CAD 102, CAD 222*

Definition of complex surfaces and their intersections. Includes cylinder, convolutes and double curved surfaces of all types.

CAD 203 4 C/60 CH**CAD Applications***Lab fee**Prerequisite: CAD 222*

This NX class introduces the student to the use of reference features and expressions to create and constrain sketch geometry in NX.

CAD 211 4 C/90 CH**Die Design and Panel Tipping***Lab fee**Prerequisite: CAD 102 or CAD 222*

Die design methods used for cutting dies. Use of standard components for dies employing standard die sets, punches, retainers, springs, and stripper bolts.

CAD 222 4 C/60 CH**Unigraphics Solids Modeling***Lab fee**Prerequisite: CAD 110*

An introduction to the fundamental three dimensional models in Unigraphics. Other Topics include Boolean Operations; solid and surface base modeling; create and edit features; analyze, move and hybrid models.

CAD 224 4 C/60 CH**UG/Assembly/Components/Drafting***Lab fee**Prerequisite: CAD 222*

Provides students with fundamentals of three dimensional drafting, geometric dimension and tolerances; and an introduction to organization of several different part files which share common data and components, subassemblies and assemblies.

CAD 226 4 C/60 CH**Advanced Unigraphics Solid Modeling***Lab fee**Prerequisite: CAD 222*

An advanced Unigraphics solid modeling course that provides students with the ability to model complex free-form surface parts applied to the automotive industry for component engine and sheet metal design.

COMPUTER INFORMATION SYSTEMS (CIS)

CIS 110 4 C/60 CH**Introduction to Computer Information Systems**

Designed as a first course for Computer Information Systems majors which will introduce the vocabulary and concepts of computer hardware and software. The computer information industry, career paths, systems, concepts, societal impacts and ethical issues will be discussed.

CIS 112 3 C/45 CH**Structured Design**

Designed to introduce problem solving methods, algorithm development and designing, coding, debugging and documenting programs using techniques of top-down, structured programming style.

Continued on next page.

*Computer Information Systems (CIS) continued***CIS 115 3 C/45 CH****Introduction to Virtual Reality**

This course is designed to introduce students to the field of virtual reality (VR) and provide students with hands-on experience in developing applications for modern virtual reality systems. In the course, students learn about the historical development of virtual reality technology and virtual reality as a research field, gain mastery of fundamental principles, algorithms, and design patterns in computer graphics, discover the perceptual science behind mixed reality technologies, and explore libraries and tools for creating VR experiences.

CIS 116 3 C/45 CH**Immersive Technologies and Design**

This course offers a practical introduction to immersive technologies in art and culture, which includes AR (Augmented Reality), MR (Mixed Reality), and VR (Virtual Reality). Students will learn technical and practical aspects of immersive media production including widely used real-time software platforms, techniques and workflows appropriate to immersive practice.

CIS 120 3 C/45 CH**Introduction to Database Concepts
(Formerly CIS 285)**

Prerequisite: CIS 110

This course is designed to introduce the student to the concepts of database design. The student will learn the fundamentals of SQL (Structure Query Language) using the most popular database management systems available today. The student will learn to create, query, update and change tables in database using SQL commands, as well as create reports, use forms, and embed SQL commands in another program.

CIS 130 4 C/60 CH**Introduction to Mobile Application Development**

Prerequisite: CIS 110

This course provides the foundation for building mobile applications. We will explore the tools and technologies that encompasses mobile application development. Areas of focus will be exploring the Android and iOS platform, programming languages, development tools, cloud computing platforms, and other key topics.

CIS 140 3 C/45 CH**Introduction to Artificial Intelligence**

This course provides an overview of the key concepts, techniques, and applications of artificial intelligence. Students will learn the fundamentals of AI, including problem-solving, machine learning, and AI ethics. They will also gain practical experience with AI programming and applications.

CIS 145 3 C/45 CH**Artificial Intelligence Prompt Engineering**

This course explores the evolution of Artificial Intelligence (AI) and introduces prompt engineering, the skill of crafting effective inputs to guide AI systems. You'll learn best practices for prompt writing, the impact of different prompt types, and strategies for fostering inclusive, unbiased AI. Through practical exercises, you'll develop the ability to use AI as a collaborative tool to enhance your work and support ethical, equitable outcomes across diverse applications.

CIS 200 4 C/60 CH**Python Programming Language***Prerequisite: CIS 112*

This course covers core programming basics—such as data types, control structures (selection and repetition), algorithm development, and functions—using the Python programming language. In addition, the fundamental principles of Object-Oriented Programming are discussed. Students will solve problems, explore the application of software development challenges, and will create practical applications.

CIS 201 4 C/60 CH**C# Programming Language***Prerequisite: CIS 112*

This course is an introduction to computer programming for Windows. Emphasis will be on the fundamentals of structured design, development, testing, implementation, and documentation, including language syntax, data and file structures, input/output devices, files, and databases. The following C# topics will be covered: Data types, control structures, functions, syntax, and semantics of the language, classes, class relationships, and exception handling C# syntax, basics of C# classes, interfaces, exception handling, assemblies, .NET collections, Windows Forms, and relational database programming. The Microsoft Visual Studio .NET IDE will be used for program development.

CIS 207 4 C/60 CH**Java Programming Language***Prerequisites: CIS 110, CIS 112*

This course is designed to introduce the student to Java programming including providing the knowledge and skills necessary for object-oriented programming. The student will learn how to program in JAVA which includes its syntax, its environment and its support for graphical user interface.

CIS 208 4 C/60 CH**Advanced Java Programming Language***Prerequisites: CIS 207*

This course is a continuation of exploring the Java platform and programming language. Concepts include further exploration with classes and objects, inheritance, polymorphism/interfaces, exception handling, JavaFX, file I/O, lambdas/streams, concurrency, Java FX, Server Side programming, Spring, a deeper look at strings/characters/regular expressions, and connecting to databases with JDBC.

CIS 209 4 C/60 CH**C Programming Language***Prerequisites: CIS 110, CIS 112*

This course is designed to develop an understanding of the C programming language. C is a general-purpose programming language widely used in both systems programming and application programming. Student will solve programming assignments using C what is a programming known for its brevity of expression, modern control flow and data structures, and a rich set of operators.

Continued on next page.

*Computer Information Systems (CIS) continued***CIS 210** **3 C/45 CH**
Introduction to Operating Systems*Corequisite: CIS 110*

This course introduces the learner to commonly used operating systems such as Linux, Windows and MAC OSX. The architecture, features and functions of operating systems and the tools used in their administration are presented. Topics such as operating system organization, text editors, file systems and networking will be covered as they apply to each operating system, and the use of tools to administer an operating system will be compared across platforms. GUI and command line interfaces will be utilized.

CIS 212 **4 C/60 CH**
Linux*Prerequisites: CIS 110, CIS 210*

In this course students will define and identify origins, benefits, drawbacks, and uses of the Linux operating system. The students will log in, enter commands, shut down and restart your Linux workstation, create and configure users and groups, and manage the file system. The students will use Linux text editors and redirection to create and modify files, archive files with tar, cpio, and other commands. The students will work in the X Window environment, manage print services, and add and update packages through package management utilities.

CIS 213 **3 C/45 CH**
Web Design Methodology and Technology*Prerequisites: CIS 110, CIS 241*

This course teaches students how to create and manage Web sites with Multimedia tools such as Macromedia Dreamweaver and Flash, FrontPage, Dynamic HTML, and various multimedia and CSS standards. Students will also implement strategies to develop third-generation Web sites, evaluate design tools, discuss future technology standards, and explore the incompatibility issues surrounding current browsers. This course also focuses on theory, design and Web construction.

CIS 215 **4 C/60 CH**
iOS Application Development*Prerequisites: CIS 130, CIS 207*

This course teaches students how to create applications for the Apple iPhone/iPad/iPod Touch platforms using the Apple tool set. Information covered includes design patterns and best practices for building, testing, and debugging native iOS apps.

CIS 217 **4 C/60 CH**
Android Application Development*Prerequisites: CIS 130, CIS 207*

This course teaches students how to create applications for the Google Android platform using Java. Information covered includes design patterns and best practices for building, testing, and debugging native Android apps. Students will learn how to make flexible layouts for different screen sizes and techniques for connecting UI elements to code.

CIS 220 4 C/60 CH**Application Development Capstone Project***Prerequisite: CIS 217*

This is the Capstone course for the Application Development program. The Capstone course is an independent study completed under the supervision and guidance of a faculty member. The purpose of the Capstone is to create an opportunity for students to apply skills learned in the application development program.

CIS 237 4 C/60 CH**Cisco CCNA***Prerequisites: CIS 110, CIS 240*

In this class the students will broaden their working knowledge of routing protocols. Through hands on work with Cisco switches and routers the student will install, configure and operate small networks.

CIS 240 3 C/45 CH**Networking Essentials***Prerequisite: CIS 110*

This course will be an introduction to network concepts. The students will describe the features and functions of networking components, and possesses the knowledge and skills needed to install, configure and troubleshoot basic networking hardware. Protocols and standards, network implementation, and network support are also covered in this course.

CIS 241 4 C/60 CH**Internet Foundations**

This course teaches students about internet connection methods, protocols, hypertext markup language, along with networking technologies. Students will learn about how websites are developed, wireless networking, and networking troubleshooting.

CIS 242 3 C/45 CH**Web Administration***Prerequisites: CIS 110, CIS 210, CIS 244*

This class is a comprehensive course that teaches students how to install a website and keep it in up and running. Students will also learn how to keep the hosting server working in different operating systems. At the end of this course, students will be able to provide essential services for anyone interested in establishing an effective e-business presence.

CIS 243 3 C/45 CH**Network Security Fundamentals***Prerequisites: CIS 110, CIS 210, CIS 240*

This course will teach students the latest security industry recommendations and how to properly protect servers from attacks in a variety of settings. Students will learn how to keep servers reconfigure the operating system to fully protect it, and scan hosts for known security problems. By the end of the course, students will have a solid understanding of the security architectures used by Windows and Linux.

CIS 244 3 C/45 CH**TCP/IP Concepts and Practices***Prerequisites: CIS 110, CIS 240*

In this course the students will learn Transmission Control Protocol/Internet Protocol (TCP/IP) key concepts and protocols. Network routing, network troubleshooting and network management also will be addressed.

Continued on next page.

*Computer Information Systems (CIS) continued***CIS 245 3 C/45 CH****Wireless Networking***Prerequisites: CIS 110, CIS 240*

This course will introduce the student to wireless networking over a range of applications, from local area networks to broadband wide area network links. Students will be able to describe the advantages and disadvantages of wireless communication in general, and understand the difference between radio and infrared. The course will cover WLANs, configuration and security problems.

CIS 246 4 C/60 CH**Oracle Database Administrator I***Prerequisite: CIS 120*

In this course the student will gain a conceptual understanding of the Oracle database and how its components work and interact with one another. Students will learn how to create a working database and properly manage it including performance monitoring, database security, user management, and backup/recovery techniques.

CIS 247 4 C/60 CH**Oracle Database Administrator II***Prerequisite: CIS 246*

In this class, the students will learn how to configure an Oracle database for multilingual applications. Students will practice various methods of recovering the database, using RMAN, SQL, and Flashback technology. They will use tools to monitor and improve database performance.

CIS 248 4 C/60 CH**Computer Support***Prerequisites: CIS 110, CIS 240, CT 211*

In this class the student will learn how to resolve end-user operating systems problems by phone or, by connecting to the system remotely. It also gives the students skills needed to support end-users from Microsoft windows in a corporate environment or at home. Students will also learn how to install, monitor, troubleshoot and resolve network security issues.

CIS 250 3 C/45 CH**E-Commerce Strategies and Practices***Prerequisites: CIS 110, CIS 241*

The E-Commerce Strategy and Practices course teaches students how to conduct business online and how to manage the technological issues associated with constructing an electronic-commerce website. Students will implement a genuine transaction-enabled business-to-consumer website, examine strategies and products available for building electronic-commerce sites, examine how such sites are managed, and explore how they can complement an existing business infrastructure. Students get hands-on experience implementing the technology to engage cardholders, merchants, issuers, payment gateways and other parties in electronic transactions.

CIS 255 4 C/60 CH**Swift Programming Language**

This course focuses on developing and writing Swift code in Swift Playgrounds with proper syntax. Participants will learn to program in Swift programming language for macOS, iOS, watchOS and tvOS. Course topics include Swift Application Programming Interface (API) including subroutine definitions, communication protocols, and tools for building software applications.

CIS 258 4 C/60 CH**JavaScript /PERL***Prerequisites: CIS 110, CIS 112*

This course teaches developers JavaScript Fundamentals and how to use the features of the JavaScript language. Students will also learn how to write JavaScript programs, script for the JavaScript object model, control program flow, validate forms, animate images, target frames, and create cookies.

CIS 259 4 C/60 CH**C++ Object Oriented Programming Language***Prerequisite: CIS 209*

Designed to foster an understanding of object oriented programming and to develop a working knowledge of the C++ programming language, this course stresses the use of objects and designing and implementing individual classes using C++. Students will be using computers to solve programming assignment which practice the syntax of C++.

CIS 260 3 C/45 CH**System Analysis and Design***Prerequisites: CIS 110, CIS 112*

This course is designed to introduce the systems design process in designing systems using project management techniques. Emphasis is placed on systems concepts and systematic thinking. Major topics include the basic tools and methods of traditional systems development, traditional analysis, design, and implementation through the data flow analysis and systems development life cycle approach, and methods for structured analysis and design.

CIS 266 3 C/45 CH**Introduction to Graphic Design***Prerequisite: CIS 110*

This course is designed to enhance the computer skills of those using graphics programs to prepare images for the Web or for print in 2D. Students will learn to enhance and create digital images using Photoshop; optimize images for speed of download; place and manipulate type in an image; work with layers and masks; use filters for special effects; work with background images and transparent gifs; create image maps; use Image Ready to create animations, slices, web photo gallery, and rollovers.

CIS 267 3 C/45 CH**Understanding and Developing Multimedia***Prerequisite: CIS 110**Recommended: CIS 266*

Students in this course will create dynamic media that communicates effectively through the use of sound, images, motion, and text. The students in this course will also examine in detail the concepts and tools necessary for producing their own interactive projects using a number of professional authoring tools, including Macromedia Flash and Dreamweaver.

Continued on next page.

*Computer Information Systems (CIS) continued***CIS 269** **3 C/45 CH**
Foundations of Cybersecurity

This course provides fundamental skills and understanding of the knowledge areas, topics, and tools of the cybersecurity discipline. It is assumed that students who take this course will have limited background in information systems. Students will learn the essentials of cybersecurity to include information security policies and countermeasures; network protocols and services; Linux operating system; security features in Windows; network attacks; protecting the network; endpoint security and analysis; cryptography and the public key infrastructure; security monitoring; intrusion data analysis; incident response and handling; and introduction to programming using Python.

CIS 270 **3 C/45 CH**
Network+

Prerequisites: CIS 110, CIS 240

This course will prepare students with the knowledge and skills to understand network technologies most commonly used today. The course also provides the broad-based knowledge of the underlying concepts of data networking, such as the Open Systems Interconnection (OSI) reference model and the protocols that operate at the various model layers. Students will be prepared for the Network+ certification exam administered by the Computing Technology Industry Association (CompTIA).

CIS 272 **3 C/45 CH**
Security+

This course provides the broad-based knowledge necessary to prepare for further study in specialized Cybersecurity fields and teaches primary topics relating to securing network services, network devices and network traffic. Students will learn about IT industry-wide security topics, including communication security, infrastructure security, cryptography, access control, authentication, external attack, and operational and organization security. Other topics included in this course are protocols used in Linux, UNIX, and Windows in addition to the TCP/IP suite component protocols, and Ethernet operations. Through lectures, discussions, demonstrations, textbook exercises, and classroom labs, students will also develop the skills and knowledge necessary to help prepare them for the Security certification exam.

CIS 274 **3 C/45 CH**
Certified Ethical Hacker

Prerequisite: CIS 272

This course provides the “how to” of Intrusion Detection, Policy Creation, Social Engineering, DDoS Attacks, Buffer Overflows and Virus Creation. Using virtual environments, students will learn and demonstrate how to scan, test, hack, and secure their own systems. Students will also develop an understanding of how perimeter defenses work scan and attack their own networks.

Through lectures, discussions, demonstrations, textbook exercises, and classroom labs, students will also develop the skills and knowledge necessary to help prepare them for the Certified Ethical Hacker (CEH) certification exam.

CIS 276**3 C/45 CH****Cyber Network Associate***Prerequisite: CIS 112, CIS 272*

This course provides the “how to” of installing, configuring, operating, and troubleshooting medium-size routed and switched networks. Using virtual environments, students will learn and demonstrate how to connect to a WAN, implement infrastructure-level network security (routers and switches), implement IP addressing schema, configure iOS devices, extend switched networks with VLANs, and manage IP traffic with access lists. Students will also develop a better understanding of how to make connections to remote sites via a WAN and mitigate network infrastructure level security threats.

Through lectures, discussions, demonstrations, textbook exercises, and classroom labs, students will also develop the skills and knowledge necessary to help prepare them for the Cisco Certified Network Administrator (CCNA) certification exam.

CIS 278**3 C/45 CH****Certified Authorization Professional***Prerequisites: CIS 110, CIS 240*

This course will prepare students to understand the formalized processes for assessing risk, establishing security requirements, proper documentation, and the implementation and maintaining of network authorization policies. Students will be taught using the CAP common body of knowledge and how to utilize it to harden an organization's security posture.

Through lectures, discussions, demonstrations, textbook exercises, and classroom labs, students will also develop the skills and knowledge necessary to help prepare them for the Certified Authorization Professional (CAP) certification exam.

CIS 282**4 C/60 CH****Cloud Computing**

This course examines the motivating factors, benefits and challenges of the cloud, as well as service models, service level agreements (SLAs), security, and example cloud service providers and use cases. We will discuss topics such as cloud infrastructures, virtualization, software defined networks and storage, cloud storage, and programming models. Students will work with Amazon Web services, Google Cloud and Microsoft Azure, use them to rent and provision compute resources and then program and deploy applications that run on these resources. Finally, students will understand the details of the MapReduce programming model and gain a broad overview of the Spark, Graph Lab programming models as well as message queues and stream processing.

COMPUTER NUMERICAL CONTROL (CNC)

CNC 111**3 C/45 CH****Introduction to Computer Numerical Control (CNC)***Corequisite: CNC 122**Lab Fees*

This course is an introduction to the basic concepts of computer numerical control (CNC). Topics include controls, coordinate systems, components, functioning systems of modern day CNC equipment, as well as an introduction to the fundamentals of blueprint reading. This class is designed for the entry-level student as an introduction to advanced manufacturing careers.

Continued on next page.

*Computer Numerical Control (CNC) continued***CNC 122 3 C/45 CH****CNC Machine Controls***Corequisite: CNC 111**Lab Fees*

This course is an introduction to programming language, program structure and command codes (G codes, M, I, J, etc.). Students will write and execute word address programs, and will continue to build skills in the areas of blueprint reading and Geometric Dimensioning and Tolerancing (GD&T). Students will also begin to utilize machine control systems to properly start-up and warm-up for CNC equipment.

CNC 230 3 C/45 CH**CNC Design I***Prerequisite: CNC 122**Corequisite: CNC 231**Lab Fees*

In this class students will learn the basics of 2D drawing creation utilizing state-of-the-art computer graphics systems and software leading to a broad understanding of the tools and techniques necessary to accurately design parts in a modern manufacturing environment.

CNC 231 3 C/45 CH**CNC Programming and Machining I***Prerequisite: CNC122**Corequisite: CNC230**Lab Fees*

In this course students will be introduced to the concepts, industry practices and basic fundamentals of 2D programming and machine set-up. Topics include machine start up, proper warm up procedures, loading and unloading of tools, and securing of stock within modern CNC equipment.

CNC 234 3 C/45 CH**CNC Design II***Prerequisite: CNC 230**Corequisite: CNC 235**Lab Fees*

In this class students will learn the basics of 3D solid model creation utilizing state-of-the-art computer graphics systems and software leading to a broad understanding of the tools and techniques necessary to accurately design parts in a modern manufacturing environment.

CNC 235 3 C/45 CH**CNC Programming and Machining II***Prerequisite: CNC 231**Corequisite: CNC 234**Lab Fees*

In this course students will be introduced to the concepts, industry practices and basic fundamentals of programming from a 3D solid model and continue to expand their knowledge of set-up and operation of modern CNC equipment.

CNC 240 3 C/45 CH**CNC Programming and Machining III***Prerequisite: CNC 235**Corequisite: CNC 245**Lab Fees*

In this course students will perform machine operations including set-up, loading and execution of programs to complete multiple parts with a significant amount of hands-on lab work required.

CNC 245 3 C/45 CH**CNC Intuitive Programming***Prerequisite: CNC 235**Corequisite: CNC 240**Lab Fees*

In this course students will be exposed to Intuitive Programming System (IPS). This software simplifies the development of full CNC programs. Students will learn how to access the IPS menus, turn the system on and off, as well as work-flow and the use of IPS Recorder.

CNC 250 3 C/45 CH
5-Axis Milling Operation and Programming

Prerequisite: CNC 245

Lab Fees

This course covers knowledge, basic operation and theory of the 5-axis milling machine including preparation, operation, and maintenance of the 5-axis milling machine. The class will also cover how to create a 5-axis milling machine program using Computer-aided Design and Computer-aided Manufacturing (CAD/CAM) software.

COMPUTER TECHNOLOGY (CT)

CT 203 4 C/75 CH
Digital Logic I

Lab fee

This course covers Boolean algebra, operation of digital combinational gates, flip-flop circuitry, shift registers and clock circuits and design combinational and sequential circuits. Laboratory is an essential phase of this course, which emphasizes the use of logic probes, logic pulsers and logic clips on gating circuits, flip-flops, counters, shift registers and multiplexers and demultiplexers.

CT 205 4 C/60 CH
Introduction to Microprocessors Applications

Prerequisite: CT 203, EE 111

Lab fee

An introduction to microprocessor systems and applications, instruction sets, algorithm development and detail description of microprocessor system hardware. The instruction set of Motorola and Arduino microprocessors are used to develop various industrial application programs. Laboratory experience involves program generation and interfacing.

CT 207 3 C/60 CH
Digital Logic II

Prerequisite: CT 203

An advanced course in digital electronics as applied in the modern digital computer. This course covers the various types of memories, ALU's, interfacing (A/D and D/A), conventional codes and large-scale shift register memories. Laboratory is an essential phase of this course which includes digital counters, multiplexers, memories and multivibrators. Techniques of interfacing and input/output devices are examined.

CT 209 4 C/90 CH
Computer Repair I - CompTIA A+

This course is designed to provide an in-depth study of various areas that are related to servicing computers and peripheral devices. Areas of study include assembly, disassembly of computers, upgrading hardware, troubleshooting hardware, installation and troubleshooting of current Windows Operating Systems. This course and CT 210 prepares students for the A+ certification exams.

CT 210 6 C/90 CH
Computer Repair II - CompTIA A+

Prerequisite: CT 209

The student will gain the experience required to build, troubleshoot and repair current microcomputer systems. This course provides in-depth troubleshooting of various Windows Operating Systems and covers introduction to networking. This course and CT 209 prepare students for the A+ certification exams.

Continued on next page.

*Computer Technology (CT) continued***CT 211 4 C/60 CH****Computer Networking I***Prerequisite: CT 209*

This course covers installing, configuring, and administering Microsoft Windows Operating Systems. Also include users, group, profiles and policies, security and access controls, network protocols, internetworking with groups, printing and faxing, performance tuning, application support, booting, registry, fault tolerance, and troubleshooting of Windows Operating Systems.

CT 213 4 C/60 CH**Computer Networking II***Prerequisite: CT 211*

This course covers managing and maintaining a current Microsoft Windows Environment. Topics include: creating and managing users and groups; administering server and web resources; managing hardware, access to files, disk and data storage, backup, disaster and basic security, and the latest network technology.

CT 215 4 C/60 CH**Computer Networking III***Prerequisite: CT 211*

This course covers implementing, managing, and maintaining a current Microsoft Windows Server Network Infrastructure and active directory. Topics include: networking overview; IP addressing; implementing and managing DHCP, DNS, WINS; configuring name resolution; remote access; routing and security templates, grouping, policies, implementation of active directory and network traffic.

CT 217 4 C/60 CH**Computer Networking IV***Prerequisite: CT 215*

This course covers an introduction to Microsoft Windows Directory Services Infrastructure. Topics include active directory overview, planning the active directory structure, directory sites, replication, groups, policies and certificates, planning and implementing active directory connectors, upgrading to Windows NT domain models to active directory.

CORRECTIONS (COR)**COR 100 3 C/45 CH****Introduction to Corrections**

Introduction to the history, theory and practice of corrections. The role of probation, parole, prisoner rights in correctional institutions and community based corrections. Course needed to satisfy the requirements to become a State of Michigan Corrections Officer. Before students enroll in COR 100 they should have completed the ENG 119 requirements designated by the ACCUPLACER® examination.

COR 101 3 C/45 CH**Introduction to Juvenile Justice***Prerequisite: CJS 100*

Overview of the juvenile justice system; its history, philosophy and interrelationship with other components in the criminal justice system. Evaluation of major court decisions effecting juvenile rights and specific diversion programs.

COR 105 3 C/45 CH**Introduction to Correctional Counseling***Prerequisite: CJS 100*

The course will differentiate between normal and criminal behavior. Discussions will include psychological influences as it relates to behavior as well as the role of environment and the family on behavior. Various correctional intervention strategies will be discussed. Course needed to satisfy the requirements to become a State of Michigan Corrections Officer.

COR 110 3 C/45 CH**Introduction to Deviant Behavior***Prerequisite: CJS 100*

Definitions and characteristics of behavior classified as deviant. Overview of theories and schools of thought for understanding deviant behaviors and their diagnosis, discrimination of minorities in Michigan, and formation of attitudes, ethics and values.

COR 200 3 C/45 CH**Social Science for Correctional Personnel***Prerequisite: CJS 100*

The course will define the personal, psychological and environmental meanings of culture in contemporary society. The impact and meaning of discrimination will be discussed. The student will be expected to identify ways in which the various environments impact the development of attitude formation. Professional responses in the correctional setting will be discussed.

COR 205 3 C/45 CH**Institution Corrections Personnel***Prerequisite: CJS 100*

This course will review the history and philosophy of correctional institutions' personnel and human growth and development. Study of institutional administration, management, supervision and personnel in parole, probation, community intervention strategies, treatment and control. Overview of specific problems of substance, medical and mental abuse. Course needed to satisfy the requirements to become a State of Michigan Corrections Officer.

COR 210 3 C/45 CH**Correctional Institution Facilities***Prerequisite: CJS 100*

An in-depth study of the purpose of prisons and correctional institutions. There will be discussion of the management and organization of correctional institutions with specific description of traditional job roles. Custodial care and safety/security issues will be discussed as well as other institutional concerns in reference to incarceration. Course needed to satisfy the requirements to become a State of Michigan Corrections Officer.

COR 215 3 C/45 CH**Correctional Fieldwork***Prerequisite: CJS 100*

This course will examine interpersonal relationships in correctional systems and the dynamics of attitude change. The course is a supervised work experience in a correctional setting under the direction of a faculty adviser and a field supervisor, in which students will maintain a log of their work activity and meet weekly with their advisor.

Continued on next page.

Corrections (COR) continued

COR 218 **3 C/45 CH**
Race Relations - COR Personnel

Prerequisite: CJS 100
Examines racial tensions as they relate to correctional personnel, including emphasis on case histories of institutional problems and psychological games. Confrontation tactics for attitude change, economic oppression and competition, educational deprivation and social injustices and their relationship to institutional actions are discussed. Examines the woman's identity, and life choices and position in society in relation to correctional work in the criminal justice system.

COR 255 **3 C/45 CH**
Legal Issues in Corrections

Prerequisite: CJS 100
This course is an overview of the major legal issues, trends and the political and social dimensions of convictions. An analysis of constitutional law, courts decisions, current legislation of the federal and state law affecting prisons and the judicial proceedings. Examines a forum for the legal rights of prisoners and the responsibilities of the legal system and the adjudication of juveniles and the alternatives to incarceration. Course needed to satisfy the requirements to become a State of Michigan Corrections Officer.

**COSMETOLOGY
MANAGEMENT (COS)**

COS 100 **3 C/45 CH**
Introduction to Cosmetology

This course provides an overview of the cosmetology profession. Students will explore foundational concepts, essential tools, health and safety standards, industry ethics, customer service, and introductory business principles related to salon operations. Emphasis is placed on professional image, emerging trends, and career opportunities within the cosmetology industry.

COS 175 **3 C/45 CH**
Cosmetology Management

Prerequisite: COS 100
Introduction to modern concepts in salon business management to include launching a salon business, attracting clientele, increasing sales, growing your personal income, and setting goals for the future. Students will learn and practice soft skills, track and record successes, and identify areas for improvement within personalized action plans. Salon specific content builds upon classes successfully completed within the certificate or complements real world experiences of new and established entrepreneurs.

COS 176 **3 C/45 CH**
Entrepreneurship Essentials for Salon Professionals

Prerequisite: COS 175
This course introduces students to the essential principles of entrepreneurship within the salon and spa industry. Emphasis is placed on business planning, brand development, financial literacy, legal and regulatory requirements, and leadership. Using the Milady Standard: Business Fundamentals curriculum, students will explore real-world applications in owning or managing a salon or spa, with the goal of preparing for self-employment or leadership positions in beauty-based businesses.

COS 177 3 C/45 CH**Human Resource Strategies for Salon Management***Prerequisite: COS 175*

This course introduces students to the essential human resource (HR) functions necessary to effectively manage a salon environment. Topics include recruitment, interviewing, hiring, staff training, performance management, legal compliance, labor relations, employee retention, and conflict resolution. Students will explore HR strategies tailored to the salon and spa industry to build a high-performing and professional workplace culture.

COS 178 3 C/45 CH**Social Psychology for Salon Professionals**

This course explores the principles of social psychology as they apply to professional salon environments. Students will examine interpersonal dynamics, client relationships, professional behavior, communication strategies, and emotional intelligence. Emphasis will be placed on understanding group behavior, personality traits, bias, motivation, and cultural awareness. Through real-world case studies and salon-based scenarios, students will build the interpersonal and psychological tools necessary for managing client interactions and maintaining a productive team environment.

CRAFT BREWING (BRW)**BRW 101 3 C/45 CH****Craft Beer Brewing and Beer Styles**

In this course, students will take a look at the history of beer from early civilization up to the present day. Students will make note of major paradigm shifts along with changes in technology that allow us to brew the way we do. The class will look at the industry of craft brewing from microbreweries to brew pubs. Emphasis will be placed on the State of Michigan and the business perspective of local breweries.

BRW 200 4 C/60 HL/30 HLB**Brewing Science***Prerequisite: BRW 101*

This class will cover the chemistry, biochemistry, and microbiology as it applies to the brewing process. Emphasis will be placed on yeast and fermentation science.

BRW 210 3 C/45 CH**Raw Materials, Soil, and Malting***Prerequisite: BRW 101*

In this course, the key raw materials (water and starch sources, i.e. grains, hops, and yeast) in beer will be discussed, as well as grain handling, the malting process and analysis. Other topics of discussion include the growth location of raw materials, soil chemistry and composition, as well as diseases associated with and affecting raw materials.

BRW 240 5 C/75 CH**Recipe Formulation***Prerequisite: BRW 101*

With the knowledge of the brewing systems, chemistry, fermentation science, calculations and raw materials, this class will formulate brewing recipes. The students will use specific yeast and other brewing processes to create their own recipe based on hops concentrations and adjuncts used.

BRW 245 4 C/60 HL/30 HLB**Batch Recipe Formulation***Prerequisite: BRW 240*

This course will build on the basics of craft beer recipe formulation and will offer insight into the challenges and opportunities of recipe scaling and batch production. This course will discuss and demonstrate different beer styles based on recipes and introduce professional scale standards for brewing.

Continued on next page.

Craft Brewing (BRW)) continued

BRW 260 **3 C/45 CH**
Brewing Internship I

Prerequisite: Program Approval

This course will provide students with an initial experience in an actual brewery. This course will apply the principles learned in the program and provide an opportunity for the student to observe professionals and develop working skills.

CRIMINAL JUSTICE (CJS)

CJS 100 **3 C/45 CH**
Introduction to Criminal Justice

This course examines the foundations of the Criminal Justice System and provides an historical perspective on the law's development. It also examines the main components of the Criminal Justice System including law enforcement (police), the court system, and corrections.

DENTAL (DEN)

DEN 100 **3 C/45 CH**
Professional Development

An introductory course designed to prepare the dental programs student to become a member of today's dental health team. Along with basic dental and medical terminology, an orientation to the profession of dentistry, the student is instructed in developing skills necessary for success as a member of the dental health team. Emphasis is placed on professional standards, ethics, assertive communication, empathy training, time management, goal setting and job preparation.

DEN 112 **2 C/30 CH**
Medical and Dental Emergencies

Prerequisite: Program Admission

This course will familiarize the student with common medical emergencies in the dental office. Preventive measures and management of these emergencies will be reviewed. Additionally, information on the basic physiology and pathophysiology occurring with common medical emergencies as well as variations in clinical signs will be presented. Reinforcement occurs throughout the students clinical experiences by real or simulated emergencies.

DEN 200 **2 C/30 CH**
Dental Radiology Theory

This course includes lectures on the nature, effects, and use of radiology in dentistry with special emphasis on radiation hazards and protection.

DEN 201 **2 C/30 CH**
Dental Radiology Lab

This course concentrates on the practical aspect of exposing, digital images, mounting of traditional radiographs and diagnostic radiographs with emphasis on the two intra-oral techniques: bisecting and paralleling. In addition, students will be able to identify normal radiographs landmarks. It is strongly recommended that this course be taken simultaneously with DEN 200 or after the completion of DEN 200.

DENTAL ASSISTING (DA)

DA 104

5 C/75 CH

Dental Materials

Prerequisite: Acceptance into the Dental Assisting Program

A lecture and laboratory course which provides the student with a fundamental knowledge of the Dental cements and materials commonly used in dental practice. Lecture: Presents physical, chemical, and manipulative characteristic of impression materials, cements, bases, cavity liners, cavity varnishes, waxes, composites, gypsum products, metals, and resins. Laboratory: Prepares students to correctly manipulate dental cements and materials. Students also acquire the skill to obtain preliminary impressions and occlusal registrations; pour, trim and polish study casts; fabricate custom impression trays from preliminary impressions; and demonstrate mixing techniques for dental cements and impression materials.

DA 106

4 C/60 CH

Dental Applied Sciences and Medical Emergency

Prerequisite: Acceptance into the Dental Assisting Program

This course provides an in depth study of oral anatomy as well as medical emergencies in the dental office. Topics covered in oral anatomy include: head and neck anatomy, tooth anatomy and morphology, embryology, and histology.

Dental charting for adults and children will also be covered. Medical emergencies will include: emergency carts/kits, administration of oxygen and emergency drugs, and the management of medical emergencies including the allergic reactions, syncope, circulatory, respiratory, epilepsy, diabetic and drug related emergencies. Monitoring of nitrous oxygen, face mask placement and emergency signs will also be discussed.

DA 110

4 C/60 CH

Clinical Dental Assisting

Prerequisite: Acceptance into the Dental Assisting Program

Lecture: Presents concepts of the dental health team including the history of dentistry and the dental career fields; professional development as a dental team member; dental equipment, chairside ergonomics; collection of patient data, medical/dental histories and vital signs; basics of four-handed technique (four-handed transfer, tissue retraction, irrigation, illumination, and evacuation); instrument identification and uses of dental terminology. Laboratory: To include the practice of four-handed dental techniques, instrument identification and restorative tray set-ups. Demonstrate Infection Control protocol during Set up and break down of dental units.

DA 115

2 C/30 CH

Infection Control and Preventive Dentistry

Prerequisite: Acceptance into the Dental Assisting Program

This lecture course provides students knowledge in Infection control protocol, disease transmission, Hazardous waste management. Instruction includes but not limited to Bloodborne Pathogen Standard and Standard Precautions. Preventive dentistry will provide the student with basic understanding of patient education with an emphasis on individualized oral health counseling. The course includes instruction in the following topics: dietary considerations for oral health, dental plaque and other deposits, disclosing agents, tooth stains and discolorations, fluorides, periodontal tissues, home care for appliances and techniques for the prevention of oral diseases.

Continued on next page.

*Dental Assisting (DA) continued***DA 117 5 C/150 CH**
Clinical Practice I*Prerequisite: DA 104, DA 106, DA 110, DA 115, DA 120, DEN 200, DEN 201*

This course is designed to perfect the students' competencies in performing dental assisting functions. Practice is provided in clinical chairside assisting in a dental setting. There is a one hour weekly seminar in conjunction with the field experience to integrate theoretical, laboratory, and clinical instruction and to provide opportunities for students to share their experiences. Assessment continues of student clinical skills. Developed professionalism is practiced and evaluated as well as student critical thinking abilities.

DA 120 2 C/30 CH
Dental Specialties*Prerequisite: Acceptance into the Dental Assisting Program*

This is a lecture course designed to expose the dental assisting student to the dental specialties. Areas covered are oral surgery, endodontics, orthodontics, pediatrics, prosthetics, periodontics and community dentistry. Providing post-operative instructions and tray set-ups for the specialties will be included.

DA 125 8 C/240 Seminar
Clinical Practice II*Prerequisite: DA 104, DA 106, DA 110, DA 115, DEN 200, DEN 201, DA 117, DA 120, DA 126, DA 203, DA 204*

This course is a continuation of Clinical Practice I. Students will be assigned to a dental practice settings for continued practice in chairside clinical dental assisting. There is a 15 hour seminar in addition to the field experience.

DA 126 3 C/45 CH
Pathology, Pharmacology and General Anatomy*Prerequisite: DA 104, DA 106, DA 110*

This course will cover general anatomy of various body systems with emphasis on the relationship of body systems to general and oral health. The course also provides a basic knowledge of the names, uses, and effects of drugs commonly used in dentistry. In addition, pathological conditions related to dentistry will be covered. The etiology of common dental diseases such as dental caries, oral cancer and periodontal disease will also be discussed. Microbiology and its relevance to oral pathological conditions will also be reviewed.

DA 127 2 C/30 CH
Dental Office Management*Prerequisites: DA 104, DA 106, DA 110*

This lecture course is an introduction to basic dental practice management procedures. In addition, using computer software to schedule appointments, maintain patient information and record keeping. Inventory of supplies, recall systems and third party payment plans will be presented.

DA 129 2 C/30 CH
Legal, Ethical and Communication Issues*Prerequisites: DA 104, DA 106, DA 110*

This lecture course includes basic concepts in oral and written communication and applied psychology. Emphasis will be placed on professional standards, ethics, effective communication and confidentiality. The purpose of this course is to prepare students to work effectively with patients and the allied health team within the law. Content areas include principles of human behavior, patient anxiety, special patients, coping mechanisms, principles of learning, verbal and nonverbal communications, and listening skills. The course will also explore the state and national dental practice acts as they pertain to members of the dental health team as well as explore the ethical role of team members through

role-playing situations. Students will also prepare a resume and job search plan.

DA 203 **3 C/45 CH**
Expanded Functions for the Registered Dental Assistant Lecture

Prerequisites: DA 104, DA 106, DA 110, DA 115, DA 120

This lecture course is designed to prepare the student to sit for the RDA examination in the State of Michigan. Expanded functions not already covered allowed under Michigan law will be taught. Content Area include didactic instruction in: placing, packing and carving Intracoronar Temporaries and Amalgam restorations. Placement and removal of a rubber dam, fabrication and cementation of temporary crowns, removing excess cement from supragingival surfaces, selective coronal polishing prior to application of anticariogenics materials, mouth mirror inspection and charting of the oral cavity, taking final impressions and bite registrations, removal of sutures, and the placement and removal of periodontal dressings.

DA 204 **4 C/60 CH**
Expanded Functions for the Registered Dental Assistant Lab/Clinic

Prerequisites: DA 104, DA 106, DA 110, DA 115, DA 120

This Clinic/laboratory course is designed to prepare the student to sit for the RDA examination in the State of Michigan. Expanded functions not already covered allowed under Michigan law will be taught. Topics to be included but not limited to are: placing, packing and carving Intracoronar Temporaries and Amalgam restorations. Placement and removal of a rubber dam, fabrication and cementation of temporary crowns, removing excess cement from supragingival surfaces, selective coronal polishing prior to application of anticariogenics materials, mouth mirror inspection and charting of the oral cavity, taking final impressions and bite registrations, removal of sutures, and the placement and removal of periodontal dressings. Assessment of student progress in attaining program and clinical competency is ongoing.

DANCE (DAN)

DAN 101 **3 C/45 CH**
Modern Dance I

Training in the technical, rhythmic, and creative elements of contemporary dance.

DENTAL HYGIENE (DHY)

DHY 101 **3 C/45 CH**
Fundamentals of Dental Hygiene

Prerequisite: Program Admission

Corequisite: DHY 120

Fundamentals of dental hygiene focuses on developing the cognitive, affective, and psychomotor skills necessary for delivery of preventive, educational and therapeutic services to the public. This course will prepare the dental hygiene student with cognitive, psychomotor, and affective skills for entry into clinical dental hygiene practice. Also, this course will expose the student to selected services and skills performed by the dental hygienist. Fundamentals of Dental Hygiene is an introduction to the principles of dental hygiene practice. The students will be presented with topics to prepare them to perform basic skills safely and effectively. Theory of taking a complete medical and dental history, intra/extraoral examination, dental charting, periodontal charting, basic instrumentation, and use of the explorer will be covered. Students will practice procedures in the clinical course DHY 120. Emphasis will also be placed on professional standards, ethics, effective communication and confidentiality.

Continued on next page.

*Dental Hygiene (DHY) continued***DHY 110 3 C/60 CH****Oral Anatomy and Physiology***Prerequisite: Program Admission*

This course provides an in-depth study of the morphology and function of primary and permanent teeth, including all of the structures involved in the mechanism of mastication, primary and permanent tooth eruption schedules and anatomical forms, function of primary and permanent dentition, vocabulary used to describe teeth and other structures in the oral cavity and the principles of occlusion. Included is a detailed study of the skeletal, muscular, circulatory and nervous systems of the head and neck.

DHY 111 3 C/45 CH**Histology and Oral Embryology***Prerequisites: DHY 101, DHY 110, DHY 120*

Basic principles of histology and embryology are reviewed with emphasis on tissues of the oral cavity and contiguous structures. Histology and embryology encompasses the development of the oral facial complex including the formation of the enamel, dentin and pulp, root formation, the attachment apparatus and the eruption and shedding of teeth.

DHY 120 3 C/90 CH**Clinical Techniques***Prerequisite: Program Admission**Corequisite: DHY 101*

This course is designed to develop skills in the techniques utilized for dental hygiene practice. Students will practice techniques on mannequins and student partners in the clinical setting. Each topic covered in the didactic course DHY 101 will be practiced and evaluated in this course.

DHY 121 3 C/45 CH**Oral Pathology***Prerequisites: DHY 110, DHY 111, DHY 131, DHY 132*

Oral Pathology will focus on the study of disease and the disease process with an emphasis on the detection, symptoms and treatment of diseases of the oral region and the oral manifestations of systemic diseases.

DHY 129 2 C/30 CH**Clinical Dental Hygiene I – Lecture***Prerequisites: DHY 101, DHY 120**Corequisite: DHY 130*

Clinical dental hygiene is that portion of the dental hygiene curriculum focused on developing the cognitive, affective and psychomotor skills necessary for delivery of preventive, educational and therapeutic services to the public. This course will prepare the dental hygiene student with cognitive, psychomotor and affective skills for entry into clinical dental hygiene practice. Also this course will expose the student to all of the selected services and skills performed by the dental hygienist.

DHY 130 3 C/120 CH**Clinical Dental Hygiene I – Lab***Prerequisites: DHY 101, DHY 120**Corequisite: DHY 129*

The delivery of comprehensive care is accomplished through adherence to the process of care: assessment of patient needs, formulation of a dental hygiene diagnosis, planning for the prevention and treatment of oral disease, implementation of various dental hygiene interventions (services) and evaluation of both the patient and practitioner efforts and oral health outcomes. Clinical dental hygiene focuses on developing the cognitive, affective and psychomotor skills necessary for the delivery of preventive, educational and therapeutic services to the public. Clinical practice is provided in collaboration with the clinical dental hygiene

faculty through an assessment of patient needs, planning for treatment and disease control. Treatment includes implementation of various clinical dental hygiene services and an evaluation of treatment effectiveness based on the patient and practitioners efforts. Sequential courses are designed to increase the student's speed and ability. Assessment of student progress in attaining program and clinical competency is ongoing.

DHY 131 2 C/30 CH

Clinical Dental Hygiene II – Lecture

Prerequisites: DHY 129, DHY 130

Corequisite: DHY 132

Clinical dental hygiene is that portion of the dental hygiene curriculum focused on developing the cognitive, affective and psychomotor skills necessary for delivery of preventive, educational and therapeutic services to the public. This course will expose the student to additional selected services and skills to enhance the students ability to provide comprehensive dental hygiene services.

DHY 132 3 C/72 CH

Clinical Dental Hygiene II – Lab

Prerequisites: DHY 129, DHY 130

Corequisite: DHY 131

The delivery of comprehensive care is accomplished through adherence to the process of care: assessment of patient needs, formulation of a dental hygiene diagnosis, planning for the prevention and treatment of oral disease, implementation of various dental hygiene interventions (services) and evaluation of both the patient and practitioner efforts and oral health outcomes. Clinical dental hygiene focuses on developing the cognitive, affective and psychomotor skills necessary for the delivery of preventive, educational and therapeutic services to the public. Clinical practice is provided in collaboration with the clinical dental hygiene faculty through an assessment of patient needs, planning for treatment and disease control. Treatment includes implementation of various

clinical dental hygiene services and an evaluation of treatment effectiveness based on the patient and practitioners efforts. Sequential courses are designed to increase the student's speed and ability. Assessment of student progress in attaining program and clinical competency is ongoing.

DHY 209 2 C/30 CH

Clinical Dental Hygiene III – Lecture

Prerequisites: DHY 130, DHY 131, DHY 132

Corequisite: DHY 210

This course expands on the foundations of clinical dental hygiene care. Through the incorporation of case studies students will develop critical thinking skills to review assessment data and formulate a dental hygiene diagnosis for the purpose of developing a dental hygiene care plan including plans for implementation and evaluation. Topics to support the process include, but are not limited to, the identification of risk factors for periodontal and dental disease (CAMBRA), advanced power scaling and instrumentation techniques, adjunctive clinical procedures and nutritional counseling.

Continued on next page.

*Dental Hygiene (DHY) continued***DHY 210 5 C/240 CH****Clinical Dental Hygiene III – Lab***Prerequisites: DHY 130, DHY 131, DHY 132**Corequisite: DHY 209*

The delivery of comprehensive care is accomplished through adherence to the process of care: assessment of patient needs, formulation of a dental hygiene diagnosis, planning for the prevention and treatment of oral disease, implementation of various dental hygiene interventions (services) and evaluation of both the patient and practitioner efforts and oral health outcomes. Clinical dental hygiene focuses on developing the cognitive, affective and psychomotor skills necessary for the delivery of preventive, educational and therapeutic services to the public. Clinical practice is provided in collaboration with the clinical dental hygiene faculty through an assessment of patient needs, planning for treatment and disease control. Treatment includes implementation of various clinical dental hygiene services and an evaluation of treatment effectiveness based on the patient and practitioners efforts. Sequential courses are designed to increase the student's speed and ability. Assessment of student progress in attaining program and clinical competency is ongoing.

DHY 211 3 C/45 CH**Pharmacology***Prerequisites: DHY 129, DHY 130*

Pharmacology embraces the physical and chemical properties of drugs, the preparation of pharmaceutical agents, the pharmacokinetics of drugs, and the effects of drugs on living systems. Pharmacology encompasses the therapeutic application of medicines, toxicity and practical and legal issues pertaining to the development, marketing and dispensing of drugs.

DHY 213 2 C/30 CH**Periodontology***Prerequisites: DHY 129, DHY 130*

Periodontology is the scientific study of the periodontium in health and disease. This course covers the diagnosis, treatment, and prevention of pathologic conditions affecting the supporting and surrounding tissues of the teeth, the gingiva, periodontal ligament, alveolar bone and cementum.

DHY 214 3 C/60 CH**Local Anesthesia and Pain Management***Prerequisites: Program Approval, DHY 211, DHY 131, DHY 132*

This course is designed to provide students with the basic and current concepts of local anesthetics, nitrous oxide sedation and pain control. Systemic effects, tissue diffusion and the toxicity of anesthetics and dental therapeutic agents used in dentistry will be reviewed. Assessment of the patient's health status, level of apprehension and pain threshold will be included in determining the indications and contraindications of pain control and alleviation of pain. Selection and administration of appropriate anesthetic agents and evaluation of the proper technique will be evaluated. The student will learn to administer local anesthesia, safely, effectively and painlessly. The student will learn to safely administer and monitor nitrous oxide oxygen sedation in compliance with Michigan Law.

DHY 219 2 C/30 CH**Clinical Dental Hygiene IV – Lecture***Prerequisites: DHY 209, DHY 210**Corequisite: DHY 220*

This course is a continuation of Clinical Dental Hygiene III (DHY 209). The role of the dental hygienist in treatment planning, providing preventive care for various population groups and dental practice management will be explored.

DHY 220 5 C/240 CH**Clinical Dental Hygiene IV – Lab***Prerequisites: DHY 209, DHY 210**Corequisite: DHY 219*

The delivery of comprehensive care is accomplished through adherence to the process of care: assessment of patient needs, formulation of a dental hygiene diagnosis, planning for the prevention and treatment of oral disease, implementation of various dental hygiene interventions (services) and evaluation of both the patient and practitioner efforts and oral health outcomes. Clinical dental hygiene focuses on developing the cognitive, affective and psychomotor skills necessary for the delivery of preventive, educational and therapeutic services to the public. Clinical practice is provided in collaboration with the clinical dental hygiene faculty through an assessment of patient needs, planning for treatment and disease control. Treatment includes implementation of various clinical dental hygiene services and an evaluation of treatment effectiveness based on the patient and practitioners efforts. Sequential courses are designed to increase the student's speed and ability. Assessment of student progress in attaining program and clinical competency is ongoing.

DHY 221 3 C/60 CH**Dental Biomaterials***Prerequisites: DHY 101, DHY 120*

Biomaterials is the science and technology of materials used in dentistry. Chemical, physical and manipulative characteristics of various restorative and procedural materials will be explored in the prevention and treatment of oral disease. Laboratory experiences develop skills in working with these materials and illustrate the characteristics and uses of dental materials.

DHY 223 3 C/45 CH**Dental Health Education***Prerequisites: DHY 130, DHY 131, DHY 132*

Dental health education is concerned with the knowledge, attitudes, skills and behaviors necessary to promote oral health and prevent oral disease through educational efforts. This course will explain the principles and theories of education which will enhance the ability of the dental hygiene student as an oral health educator. The approach taken will provide students with the knowledge and skills necessary to meet the needs of community groups as distinct from the traditional clinical approach designed to meet the needs of individual patients.

DHY 225 3 C/45 CH**Management of Special Patients***Prerequisites: DHY 209, DHY 210*

Introduces the characteristics and unique dental health needs of patients with medical, physical, mental, social, emotional, the elderly, and selected medical and compromising conditions. Emphasis is placed on modified dental hygiene treatment integrating the dental hygiene process of care for these special patient populations.

DHY 226 1 C/15 CH**Advanced Periodontology***Prerequisite: DHY 213*

Advanced Periodontology is designed to acquaint the dental hygiene student with the clinical diagnosis and treatment of periodontal diseases with special emphasis on the surgical techniques utilized.

Continued on next page.

*Dental Hygiene (DHY) continued***DHY 227 1 C/15 CH****Radiology II***Prerequisites: DEN 200, DEN 201*

Continuation of the science and clinical practice of oral radiography, including radiographic interpretation, normal anatomy on periapical and extraoral films, recognition of abnormalities and the limitations of radiography.

DHY 229 2 C/30 CH**Clinical Dental Hygiene V – Lecture***Prerequisites: DHY 219, DHY 220**Corequisite: DHY 230*

This course is a continuation of Clinical Dental Hygiene IV and offers other aspects of clinical practice to include career alternatives, job seeking skills, resume preparation, licensure requirements, rules and regulations and state practice acts. Course information will assist the student in applying legal and regulatory concepts to the practice of dental hygiene.

DHY 230 5 C/144 CH**Clinical Dental Hygiene V – Lab***Prerequisites: DHY 219, DHY 220**Corequisite: DHY 229*

The delivery of comprehensive care is accomplished through adherence to the process of care: assessment of patient needs, formulation of a dental hygiene diagnosis, planning for the prevention and treatment of oral disease, implementation of various dental hygiene interventions (services) and evaluation of both the patient and practitioner efforts and oral health outcomes. Clinical dental hygiene focuses on developing the cognitive, affective and psychomotor skills necessary for the delivery of preventive, educational and therapeutic services to the public. Clinical practice is provided in collaboration with the clinical dental hygiene faculty through an assessment of patient needs,

planning for treatment and disease control. Treatment includes implementation of various clinical dental hygiene services and an evaluation of treatment effectiveness based on the patient and practitioners efforts. Assessment of student progress in attaining program and clinical competency is ongoing.

DHY 231 4 C/60 CH**Community Dentistry***Prerequisites: DHY 209, DHY 210*

This course is designed to introduce dental hygiene students to the basic principles of dental public health and community dentistry and the responsibilities of the dental hygienist in promoting dental health. The health care system, including the social, political, psychological and economic forces directing the system will be discussed. Special emphasis is placed on the role of the dental hygienist in community practices as distinct from the private practice of the dental hygienist.

DHY 233 2 C/30 CH**Dental Hygiene Seminar***Prerequisites: DHY 219, DHY 220*

Provide a comprehensive approach and review of the theories and practice of dental hygiene. This course is designed to apprise students of national and regional state board requirements, strengthen test-taking skills and provide an opportunity for review of topic areas evaluated on these board examinations.

DIETETIC TECHNOLOGY (DT)**DT 130 3 C/45 CH****Fundamentals of Nutrition***Prerequisite: BIO 155*

Fundamentals of Nutrition provides a sound and concise introduction to the science of human nutrition. Students explore the six essential

nutrients and their functions in the body. These functions are developed around three fundamental problems of sustaining human life that nutrition solves: energy, tissue building, and regulation and control. Students are also introduced to the application of these nutrition concepts to normal adults, prenatal, infant, pre-school and elderly populations.

DIGITAL MEDIA PRODUCTION (DMP)

DMP 101 3 C/45 CH Story Elements for a Digital Environment

Lab Fees

This seminar course explores how meaning, message and story are conveyed through images. Students will learn about storyboarding, story elements and organizations, archetypes, visual and perception theory, the organization of visual elements to create meaning, the history of the image, typography, visual imagery in cinema and the use of the image in digital media today.

DMP 102 3 C/45 CH Digital Video Production I

Lab Fees

Certification: This course will help the student to prepare Apple Certified Pro in Final Cut Pro exam.

Digital Media Production teaches student basic camera components, project organization and management, basic video production values such as story elements, lighting design, camera use, framing, and camera angles. Students will also learn the fundamentals of digital editing software, file organization and management, sound integration, and DVD creation.

DMP 103 3 C/45 CH Digital Video Production II

Prerequisite: DMP 102

Lab Fees

Certification: This course will help the student to prepare Apple Certified Pro in Final Cut Pro exam.

Digital Media Production teaches student basic video production values such as scriptwriting, story elements, lighting design, camera use, camera angles, project management and the fundamentals digital video capture and editing basics on Final Cut Pro.

DMP 104 3 C/45 CH Digital Audio Production and Broadcasting

Lab Fees

This is an introductory course in digital signal processing, the fundamental elements of digital audio signal processing, such as sinusoids, spectra, the Discrete Fourier Transform (DFT), digital filters, transforms, transfer-function analysis, and basic Fourier analysis in the discrete-time case. The labs focus on practical applications of the theory, with emphasis on working with waveforms and spectra. This course will teach students will produce live web casts (capturing and transmission of live courses) in Windows Media, Real Media, QuickTime and MPEG formats as well as convert traditional video to almost any digital format including CD-ROM and DVD and publish sound files to the web.

Continued on next page.

*Digital Media Production (DMP) continued***DMP 105** **3 C/45 CH**
Media Programming*Lab Fees*

This class develops media literacy skills, so that students can critique the basic dynamics that shape current media programming and give a clearer perspective of the boundaries between the real world and the simulated media world. This cutting-edge approach, which encourages the acquisition of strong knowledge structures and analytical skills, includes broadcast (television and radio), print, and digital media. The class examines the history of the modern communications industry, the regulatory process that governs what it can do, and the technical process that produces content and scheduling.

DMP 107 **3 C/45 CH**
Digital Audio Production II*Prerequisite: DMP 104**Lab Fees*

This course expands on the fundamentals of audio production as it pertains to film and video begun in DMP 104. Students will learn advanced techniques in audio production. Students will assemble their own advanced audio productions as a part of this class.

DMP 111 **3 C/45 CH**
Television Programming*Lab Fees*

This course covers techniques utilized by television stations in their programming. Emphasis is placed on commercial, cable and public television facilities and their relationship to the community.

DMP 112 **3 C/45 CH****Broadcast Operations***Lab Fees*

This course is an introduction to the theory and techniques of radio programming and production, including the development and design of programming for audio broadcast production. Learners will explore the history of radio and program formats; make decisions about the use of effective words; music and sounds; and apply production techniques by creating and critiquing radio programs, public affairs and documentary programming, commercials, promotional and public service announcements, and music programs.

DMP 113 **3 C/45 CH****Acting For The Camera***Lab Fees*

The basic physical and vocal skills required in performing before the camera are explored and developed through exercises improvisations and scene. The course covers acting theory, television and motion picture terminology, and script and role analysis.

DMP 114 **3 C/45 CH****Writing for the Media***Prerequisite: ENG 119**Lab Fees*

This course covers basic writing for different audiences and different media outlets. Various writing styles and formats will be studied such as new stories, screenplays, press releases, radio and print advertising, writing for the internet, blogs and websites.

DMP 115**3 C/45 CH****Media Marketing***Lab Fees*

This course gives students a basic understanding of media market strategies and shows how public relations firm interface with the broadcast industry. Students learn the different strategies used by the different media.

DIGITAL PHOTOGRAPHY TECHNOLOGY (DPT)

DPT 110**3 C/45 CH****Digital Photography I**

This is an introductory course that focuses on teaching students how to operate single lens reflect (SLR) digital cameras. The student will learn about digital cameras and equipment used to process digital images. Students will learn how to properly use camera controls, and to capture and expose digital images. Students should own or have access to the use of a digital camera with manual and automatic controls.

DPT 112**3 C/45 CH****Product Development, Framing and Matting**

In this course students will learn how to use the correct materials, tools, and techniques necessary for digital photo product development. Students will develop hands on skills in photo composition, cropping, cutting, sizing, inking fabrications, packaging mock-ups, layouts, framing and matting.

DPT 115**3 C/45 CH****Digital Photo Imaging I***Prerequisite: DPT110*

This course introduces students to computer based digital image processing. Through the use of digital production equipment (such as cameras, scanners, printer, and photo imaging software) students learn will how to process images in a digital processing environment.

DPT 119**3 C/45 CH****Photographic Lighting***Prerequisite: DPT 110*

This course will teach students how quality of light affects the subject. Students will learn the language of lighting including the softness and hardness of light as it relates to ideas and the emotional structure of the subject. Students gain an understanding of light variations and unique qualities, as well as design personal sensitive lighting set-ups which express the various lighting subject moods.

DPT 120**3 C/45 CH****Forensic Photography***Prerequisite: DPT 110*

This course expands on lessons in beginning digital photography, with special emphasis on the application of photography to criminal and civil investigations, including the preparation of courtroom presentation. Emphasis is placed on aspects of design, composition, perception and content. Students will gain a scientific understanding of how to make informed choices in black-and-white and color digital photography.

DPT 205**3 C/45 CH****Digital Photography II***Prerequisite: DPT 110*

This course is a continuation of Digital Photography I. Using digital cameras, students will add to their basic skills and apply them to popular shooting situations. Topics include seeing the light, manipulating light with reflectors, using flash as main and fill light, portraiture, close up photography, and shooting at night. In this class emphasis will be on specific assignments geared to help the student find the image in the environment. The student should have a working knowledge of the camera as less time is spent on equipment and computer manipulation and more time spent on solving technical, aesthetic, and communication problems.

Continued on next page.

*Digital Photography Technology (DPT) continued***DPT 210 3 C/45 CH****Studio Photography***Prerequisite: DPT 110*

This course introduces the use of artificial lighting to create photographic illustrations in a controlled environment. Lighting techniques are demonstrated and applied in a series of photographic exercises with tabletop still life and portraiture. Both "hot lights" and electronic flash are used to achieve total control of composition, color, contrast and reflection. Emphasis is placed on the technical mastery of complex equipment, coupled with an aesthetic understanding of the physical principles of light.

DPT 219 3 C/45 CH**Commercial Photography***Prerequisite: DPT 110*

In this course students will receive training in specialized camera, studio and location photography of merchandise, facilities and other subjects for promotional advertising. Students will learn how to interpret and produce layouts as well as the working partnership between photographers and art directors.

DPT 220 3 C/45 CH**Architectural/Environmental Photography***Prerequisite: DPT 110*

This course introduces the concepts and techniques applied in architectural/environmental photography. Emphasis is put on skill development in both interior and exterior photography. This course utilizes various camera formats to thoroughly comprehend the architectural subset of commercial photography. Topics include available, artificial and mixed lighting, use of filters, metering techniques, camera and lens selection, and location photography safety techniques.

DPT 235 3 C/45 CH**Photojournalism***Prerequisites: DPT 110*

This course in photojournalism and introduction to documentary photography will focus on creating photographs for the media, be it digital or print. The student will cover the history and ethics of contemporary photojournalism and documentary photography. Students will work on weekly assignments, small picture packages and one long-term project.

DPT 255 3 C/45 CH**Capstone Portfolio Project***Prerequisite: Department Approval*

This advanced-level course is designed to build on techniques learned in previous photographic technology courses. Students design and develop a creative and technical proposal with instructor guidance on a highly developed project that reflects what they have learned in the program and explores the unlimited, imaginative possibilities of artistic and commercial application to Imaging Technology of the student special interest. Group approach and class critiques will be important elements of the production of the capstone portfolio project.

DRAFTING (DRT)**DRT 101 3 C/45 CH****Blueprint Reading**

Fundamentals of blueprint reading as applied to specific problems. Designed for pre-engineers, draftsmen, machine operators, machine repairmen, electronic technicians, inspectors and supervisors.

DRT 102 4 C/90 CH
Fundamentals of Mechanical Drawing

Prerequisite: DRT 101

Fundamentals of Mechanical Drawing Basic course of students with minimal high school experience. Emphasizes use of instruments, introduction to drafting, introduction to drafting practices, geometric construction, lettering, line work, orthographic projection and three-dimensional visualization from two-view drawings, section cutting, auxiliary views and dimensioning systems.

DRT 112 3 C/45 CH
Technical Drawing Applications

Prerequisite: DRT 102

This course is focused on detailed drawings of a variety of parts, based on projection techniques, sectional views, threads and fasteners, dimensional fundamentals and other conventional drawing practices. Students will execute charts and graphs for data display and analysis and practice required instrument skills to produce ink drawings.

DRT 113 3 C/45 CH
Descriptive Geometry

Prerequisite: DRT 102

Occupational oriented solutions to descriptive geometry problems involving points, lines, planes and single and double curved surfaces and their intersections.

DRT 115 2 C/30 CH
Geometric Dimensioning and Tolerancing

Prerequisites: DRT 101, DRT 102

The theoretical and practical application of dimensioning and tolerance, as used in the world wide industry for the production of parts. GDT is the standard that defines clear and consistent application for precise interpretation of tolerances on geometric and characteristics. The standard is intended for the more advanced engineer, drafter, product designer, machinists, or inspector. At present, this is a Prerequisite in the Automotive Industry for employment in design, engineering,

or manufacturing. Emphasis is placed upon building a solid foundation in understanding dimensioning and tolerance terms, as well as definitions and concepts as stated in ANSI Y 14.5 M 1982 and ASME Y 14.5 M 1994 (two CH).

EARLY CHILDHOOD EDUCATION (ECE)

ECE 101 3 C/45 CH
Introduction to Early Childhood Education

Students will be prepared to promote Child Development and Learning from children birth to age eight. Their knowledge base will allow them to understand children's characteristics and needs and the multiple interacting influences on children's development and learning to create environments that are healthy, respectful, supportive, and challenging for each child.

ECE 104 3 C/45 CH
Methods and Techniques in Child Care:

Infant and Toddler Development-Field Experience I

Prerequisites: ECE 101, EMT 101; program admittance, police clearances, FIA clearance, immunizations, physical exam and food handler's card

Students will explore methods that meet the needs and stimulate the development of infants and toddlers. Students will learn various child management techniques that ensure an environment that is socially, emotionally, communicatively, cognitively, creatively and physically supportive. A multicultural approach to learning is emphasized. Students will be required to complete 45 hour field experience in an infant and toddler setting. Course will meet partial requirements in preparation for the CDA assessment. Students will meet with their instructor on a bi-weekly basis. Class recommended for those completing the State of Michigan Child Care Directors' 12 credit hours requirement and will work with infants and toddlers.

Continued on next page.

*Early Childhood Education (ECE) continued***ECE 106 3 C/45 CH****Methods and Techniques in Child Care:****Preschool Development–Field Experience II**

Prerequisites: ECE 101, EMT 101; program admittance, police clearances, FIA clearance, immunizations, physical exam and food handler's card

Students will explore methods that meet the needs and stimulate the development of preschool children ages 2 1/2 to 5. Students will learn various child management techniques that ensure an environment that is socially, communicatively, emotionally, cognitively, creatively and physically supportive. A multicultural approach to learning is emphasized. Students will be required to complete a 45 hour field experience in a preschool setting. Course will meet requirements in preparation of the CDA assessment. Students will meet with their instructor on a bi-weekly basis. Class recommended for those who are meeting the State of Michigan Child Care Directors' 12 credit hours requirement and will work with preschoolers.

ECE 111 3 C/45 CH**Child Assessment Techniques**

Prerequisites: ECE 101, EMT 101

Students will understand that child observation, documentation, and other forms of assessment are central to the practice of all early childhood professionals. The students will be knowledgeable of effective systematic observation, documentation, and the goals, benefits, and uses/strategies of assessment. Additionally, students will learn how to partner with parents and other professional in a respectful and responsible manner to positively influence the development of every child.

ECE 120 3 C/45 CH**Building Family and Community Relationships**

Corequisite: ECE 101, EMT 101

Students will be prepared to understand successful early childhood education depends upon partnerships with children's families and communities. The students will be knowledgeable, understand, and value the importance and complex characteristics of children's families and communities. Additionally, students will learn how to create respectful, reciprocal, relationships that support and empower families and to involve families in their child's development and learning.

ECE 157 3 C/90 CH**Child Care Practicum and Seminar I**

Prerequisites: ECE 101, ECE 104 or ECE 106, and EMT 101

A supervised practical learning experience in which students work with children (infant and toddlers or preschool ages) in actual facilities under the direction of certified professional staff. Students preparing for the CDA certification will use the field placement to prepare for assessment. Students will meet with their instructor on a bi-weekly basis for a seminar. Student will be required to complete 90 hours field placement experience in a childcare/pre-school setting.

ECE 210 3 C/45 CH**Special Populations**

Prerequisites: ECE 101, EMT 101

A survey class with an emphasis on the identification of the cognitive, communicative, creative, emotional, physical and social growth of infants, toddlers and preschoolers with special needs, accelerated, physical, and emotional; and methods used in the address of these needs to stimulate development. Class will aid CDA students in the completion of the CDA portfolio.

ECE 211 2 C/30 CH**CDA Assessment Preparation***Prerequisites: Program Approval*

This course focuses on the preparation of the Child Development Associate (CDA) certificate. Students will be able to demonstrate knowledge of the CDA process, requirements, eligible settings, and guided in creating their Resource File, Parent Questionnaires, and the CDA Assessment Observation Instrument. Students will complete the Professional Portfolio, in preparation for the CDA credential which is awarded by the Council for Professional Recognition.

ECE 227 3 C/90 CH**Child Care Practicum and Seminar II***Prerequisites: ECE 104, ECE 106, ECE 157*

A supervised practical learning experience in which students work with children (infants and toddlers or preschool ages) in actual facilities under the direction of certified professional staff. Students preparing for the CDA certification will use the field placement to prepare for CDA assessment. Students will meet with their instructor on a bi-weekly basis for a seminar. Additionally, students will be required to complete 90 hours of field placement experience in a childcare/pre-school setting.

ECE 230 3 C/45 CH**Program Management and Supervision***Prerequisites: ECE 101*

This course will focus on the administrative program management, and supervision fundamental to the operation of early childhood programs and centers. Includes establishment of an organizational system, budget development and controls, licensing, business proposal writing, staffing, staff evaluation and supervision. CDA course requirement. Class recommended for those who are meeting the State of Michigan Child Care Directors' 12 credit hours requirement.

ECE 257 3 C/45 CH**Infant Literature; Birth to 36 Months***Prerequisites: ECE 101, ENG 119, PSY 101*

The "Infant Literature" course is designed in response to developing literature foundations among infants and toddlers ages two weeks to 36 months, and identifies methods to assist parents. Recommended for CDA students who are seeking certificate upgrade.

ECE 260 3 C/45 CH**Professionalism for Early Childhood Educators**

This course will allow students to serve as informed advocates for young children, for the families of the children in their care, and for the early childhood profession. Students will know and use ethical guidelines and other early childhood professional guidelines. Students will obtain professional oral and written communication skills that effectively support their relationships and work with young children, families, and colleagues. Students will develop and sustain the habit of reflective and intentional practice in their daily work with young children and as members of the early childhood profession.

ECONOMICS (ECO)

ECO 101 3 C/45 CH**Principles of Economics I**

This course is the study of macroeconomics. The following topics are discussed: operation of the national economy, unemployment, inflation, money and banking and international economic relations.

Continued on next page.

*Economics (ECO) continued***ECO 102 3 C/45 CH****Principles of Economics II***Prerequisite: ECO 101*

This course is a continuation of Economics 101, Microeconomics. Supply and demand, theory of the firm, price determination and resource allocation is discussed.

ECO 232 3 C/45 CH**Consumer Economics**

This course is an analysis of consumer oriented issues; the economics of the cost and availability of consumer credit, insurance options, personal investments, housing and personal income taxation.

ECO 272 3 C/45 CH**Money and Banking***Prerequisite: ECO 102*

This course is an analysis of the factors influencing bank reserves and the money supply. The ability of the Federal Reserve System to shape these factors; monetary policy and the determination of national income are discussed.

ELECTRICAL/ELECTRONICS (EE)

EE 101 4 C/90 CH**Survey of Electrical and Electronics Technology***Corequisite: EE 107*

The fundamentals of direct current (DC) as applied to all aspects of the electrical/ electronic field. Direct current electron flow theory, OHMS's law, series and parallel and compound circuits, network theorems, capacitors, magnetic circuits, inductors, American Wire Gauge, and different type of cables will be covered. The course also includes introduction to sinusoidal waveforms and

ac circuits. Students experimentally verify the fundamental discussed in the course by constructing and testing circuits. Instruments such as multimeters, power supplies, signal generators, and oscilloscope are used.

EE 102 4 C/ 90 CH**Circuit Analysis***Prerequisite: EE 101**Corequisite: EE 115*

This course deals with fundamental concepts of AC waveforms, effective and average values of both current and voltage, series parallel and compound circuits, inductive and capacitive time circuits, time constants, resonance, passive filters bandwidth, Q of a circuit, polyphase systems and transformers. Instruments such as multimeters, AC power supplies, signal generators, oscilloscopes are used.

EE 103 3 C/45 CH**Residential Wiring***Prerequisite: EE 101*

This course covers electrical symbols, schematic diagram, terms, series and parallel circuits, Ohm's Law, repair and operation of single phasemotor and three phase motor controls. Also, lightening-both incandescent and fluorescent, lighting and ballast specifications, safety precaution and troubleshooting techniques, identification of load and control circuits, load common and ground connection. Use of electrical lighting instruments, multimeters, other circuit testing instruments. Ground fault circuit interrupters (GFCI), receptacles and circuit breakers.

EE 105 2 C/45 CH**Electronic Fabrication and Design**

This course serves as an introduction to electronic fabrication and design techniques. Students will learn about circuit drafting, PCB design and etching, assembly, soldering and use of hand tools. Students are required to build circuits assigned by the instructor.

EE 107 **4 C/60 CH**
Mathematics for Electrical/Electronics I

Corequisite: EE 101

Provides detailed coverage of areas of introductory algebra needed by the technician to solve Electrical/Electronics circuits. The course includes fundamental of algebra, ratio, proportion, variation, basic geometry and trigonometry, linear systems, determinants and matrices, factoring and quadratic equations, exponents and radicals, exponential, and logarithmic function. Emphasis is placed on practical application to the solution of DC circuits.

EE 111 **4 C/90 CH**
Solid State Fundamentals

Prerequisite: EE 101

This course will cover diodes, transistors, power supplies, limiters, clippers, clampers, voltage multipliers, biasing, amplifiers and frequency effects. Students will assemble and test electronic circuits discussed in the course. Instruments such as DC power supplies, multimeters, oscilloscope, signal generators, transistors and diode testers will be used.

EE 115 **4 C/60 CH**
Mathematics for Electrical/Electronics II

Prerequisite: EE 107

Corequisite: EE 102

Trigonometry, trigonometry identities and equation, complex numbers are used to analyze and solve AC circuits. Also include analytic geometry and quadratic systems, polynomial function, series and polynomial formula, and introduction to derivative and integral will be covered.

EE 203 (Formerly TCM 203) **3 C/60 CH**
Communications I

Lab fee

Prerequisite: EE 111

A study of the fundamental concepts of communications systems and techniques. Topics covered include amplitude, frequency, phase and pulse modulation concepts, two way systems, basic TV systems and noise and information theory. Introduction to the circuitry of the A-M and F-M superheterodyne receiver, with emphasis on amplifier coupling, AM and FM detectors and similarities and differences between the AM and FM systems.

EMERGENCY MEDICAL TECHNOLOGY (EMT)

EMT 101 **2 C/30 CH**
First Aid

This course is designed to provide the citizen responder with the knowledge and skills necessary in an emergency to help sustain life, reduce pain, and minimize the consequences of injury or sudden illness until professional help arrives.

Continued on next page.

*Emergency Medical Technology (EMT) continued***EMT 105** **3 C/67.5 CH**
Medical First Responder

This course is an overview of emergency medical services, including Basic Life Support (BLS), patient assessment, triage, patient handling and management, bleeding and shock control, management of fractures, childbirth and other medical emergencies. This is a State of Michigan approved course. If all comprehensive written and practical examinations are passed successfully the students are eligible to apply for licensure exams. This program is recommended for police officers, security officers, corrections officer, health professionals, fire fighters, or anyone who may have a duty to act during emergency situations.

EMT 114 **4 C/90 CH**
Basic EMT I

Prerequisite: Program Admission

Lectures and lab sessions of this course include current principles and techniques in EMS operations, medical/legal issues, anatomy and physiology, patient assessment, respiratory emergencies, oxygen therapy, airway management, cardiovascular disease, CPR, triage, patient handling. This is a State of Michigan approved course. If all comprehensive written and practical examinations and corequisites are completed successfully the students are eligible to apply for licensure exams.

EMT 124 **4 C/90 CH**
Basic EMT II

Prerequisite: Program Admission

The lectures and lab sessions of this course include principles and techniques in communicable diseases, stress management in EMS, traumatic injuries, abdominal illness, shock, IV maintenance, diabetes, the Central nervous system, rescue, extrication, geriatric, obstetrical, gynecological, pediatrics, environmental emergencies and hazardous materials behavioral emergencies, poisons, and substance abuse. This is a State of Michigan approved course. If all comprehensive written and practical examinations and corequisites are passed successfully the students are eligible to apply for licensure exams.

EMT 126 **1 C/30 CH**
Basic EMT Clinical Experience

Prerequisite: Program Admission

This course is designed to provide Hospital and EMS experience to EMT Basic students to learn the psychomotor, affective and apply cognitive skills needed for entry level work as an Emergency Medical Technician Basic. These include but are not limited to Patient Assessment, Spinal Immobilization, Bleeding Control, and Donning and doffing of PPE's. This is a State of Michigan approved course. If all comprehensive written and practical examinations and corequisites are completed successfully the students are eligible to apply for licensure exams. Students are required to complete an orientation session prior to attending the clinical experience.

EMT 218 **5 C/75 CH**
Emergency Medicine Preparatory

Prerequisite: Program Admission

This course will integrate human anatomy, physiology, pathophysiology and medical math into patient assessment and treatment.

EMT 221 10 C/150 CH**Paramedic I***Prerequisite: Program Admission*

This course will include lecture and lab sessions on EMS systems, the role and responsibilities of the paramedic, medical legal issues, airway management, cardiology, pharmacology, venous access and administration.

EMT 231 10 C/150 CH**Paramedic II***Prerequisite: Program Admission.*

This course will include lecture and lab sessions on patient assessment, infectious and communicable diseases, behavioral and psychiatric disorders, pulmonary, gynecology, obstetrics, trauma, environmental conditions, allergies and anaphylaxis, neonatology, pediatrics, and geriatrics.

EMT 236 6 C/135 CH**Paramedic Clinical Exp. I***Prerequisite: Program Admission*

This course is designed for EMT Paramedic students to practice the psychomotor skills in a hospital and EMS setting needed for entry level work. These include but are not limited to Medication administration, IV therapy, Cardiac Monitoring, and Airway Management.

EMT 241 3 C/45 CH**Paramedic III***Prerequisite: Program Admission*

This course will include lecture on neurology, endocrinology, gastroenterology, renal/urology, toxicology and hematology.

EMT 242 2 C/30 CH**Paramedic IV***Prerequisite: Program Admission*

This course will include lecture on ethics, life span development, abuse and assault, patients with special challenges, acute interventions for the chronic care patient, and the well-being of the paramedic.

EMT 243 2 C/30 CH**Paramedic V***Prerequisite: Program Admission*

This course will include lecture on ambulance operations, medical incident command, rescue awareness and operations, hazardous materials incidents, illness and injury prevention and crime scene awareness.

EMT 244 3 C/45 CH**Paramedic VI***Prerequisite: Program Admission*

This course will include lecture and lab session on assessment based management.

EMT 246 6 C/90 CH**Paramedic Clinical Exp. II***Prerequisite: Program Admission*

This course is designed for paramedic students to practice their assessment skills in a hospital and EMS setting. It is needed for an entry level paramedic. The assessments can include but not limit to patients complaining of Chest Pain, DIB, Abdominal Pain, Syncope and Traumatic Injury.

EMT 256 6 C/30 CH**Paramedic Field Internship***Prerequisite: Program Admission*

This Internship is designed for paramedic students to apply skills and knowledge from previous classes in an EMS setting to develop into an entry level paramedic.

EMERGENCY RESPONSE AND SAFETY (ERS)

ERS 102 1 C/15 CH

Confined Space Rescue I

This course covers OSHA's confined space operations standard 29CFR1910.146. Topics include hazard assessment of permit-required confined spaces, hazard elimination techniques, and technical rescue operations that meet NFPA 1670 Standard on Operations and Training for Technical Search and Rescue Incidents and NFPA 1006 Standard for Technical Rescue Personnel. The course can accommodate all NFPA levels of certification.

ERS 103 2 C/30 CH

Confined Space Rescue II

This course covers OSHA's confined space operations standard 29CFR1910.146. Topics include hazard assessment of permit-required confined spaces, hazard elimination techniques, and technical rescue operations that meet NFPA 1670 Standard on Operations and Training for Technical Search and Rescue Incidents and NFPA 1006 Standard for Technical Rescue Personnel. The course can accommodate all NFPA levels of certification.

ERS 104 1 C/15 CH

Hazwoper I

This course covers OSHA's Hazardous Waste Operations and Emergency Response standard 29CFR1910.120. Specifically designed for workers who utilize hazardous materials in industrial processes, or respond to emergencies involving hazardous materials releases. Topics include storage, hazard assessment, hazard elimination, appropriate use respiratory protection and personal protective equipment. The class can be adjusted to accommodate all OSHA and NFPA levels of certification.

ERS 105 2 C/30 CH

Hazwoper II

This course covers OSHA's Hazardous Waste Operations and Emergency Response standard 29CFR1910.120. Specifically designed for workers who utilize hazardous materials in industrial processes, or respond to emergencies involving hazardous materials releases. Topics include storage, hazard assessment, hazard elimination, appropriate use respiratory protection and personal protective equipment. The class can be adjusted to accommodate all OSHA and NFPA levels of certification.

ERS 106 1 C/15 CH

Trench Rescue I

The course is designed to prepare emergency rescue personnel for excavation emergencies. Topics include hazard assessment of excavation sites, shoring, patient packaging, rope rescue techniques, and hands-on field exercises that meet NFPA 1670 Standard on Operations and Training for Technical Search and Rescue Incidents and NFPA 1006 Standard for Technical Rescue Personnel. The course can accommodate all NFPA levels of certification.

ERS 107 2 C/30 CH

Trench Rescue II

The course is designed to prepare emergency rescue personnel for excavation emergencies. Topics include hazard assessment of excavation sites, shoring, patient packaging, rope rescue techniques, and hands-on field exercises that meet NFPA 1670 Standard on Operations and Training for Technical Search and Rescue Incidents and NFPA 1006 Standard for Technical Rescue Personnel. The course can accommodate all NFPA levels of certification.

ERS 108 1 C/15 CH**Rescue from Heights I**

This course is designed to prepare emergency rescue personnel for responses that involve patients suspended from fall-protection. The course covers OSHA's fall-protection requirements, suspension trauma precautions and patient care, rescue system rigging, and hands-on rope rescue exercises from various heights. Training meets NFPA 1670 Standard on Operations and Training for Technical Search and Rescue Incidents and NFPA 1006 Standard for Technical Rescue Personnel.

ERS 109 2 C/30 CH**Rescue from Heights II**

This course is designed to prepare emergency rescue personnel for responses that involve patients suspended from fall-protection. The course covers OSHA's fall-protection requirements, suspension trauma precautions and patient care, rescue system rigging, and hands-on rope rescue exercises from various heights. Training meets NFPA 1670 Standard on Operations and Training for Technical Search and Rescue Incidents and NFPA 1006 Standard for Technical Rescue Personnel.

ERS 110 2 C/30 CH**OSHA General Industry Safety**

A comprehensive Occupational Safety and Health program designed for anyone in the construction industry directly responsible for safety. Includes an in-depth overview of common OSHA standards and hands-on exercises.

ERS 112 2 C/30 CH**Incident Command Systems ICS 300**

This course satisfies both OSHA's standard 1910.120 and NFPA 1500 recommendations when responding to emergencies involving Hazardous materials and the National Incident Management System (NIMS) and NFPA 1561 standards when responding to any emergency situation. The course covers expanding incidents,

history of ICS, the organizational structures within the system and the responsibilities of each component, and consolidated action plans. Table-top and interactive exercises assess participant comprehension.

ERS 113 2 C/30 CH**Incident Command Systems ICS 400**

Students will be able to demonstrate the duties, responsibilities, and capabilities required to perform in a management capacity for major and complex incidents/events using Area Command.

EMERGENCY ROOM/MULTI-SKILLED HEALTH CARE TECHNOLOGY (ERT)

ERT 210 6 C/90 CH**Emergency Room Technology**

Prerequisite: Program Admission

This course provides the Basic EMT with the principles and techniques necessary to provide additional patient care within a hospital, urgent care, or primary health care environment.

ERT 215 6 C/135 CH**Emergency Room Technician Clinical Experience**

Prerequisite: Program Admission

This course is designed for the Emergency Room Technician student to practice the psychomotor skills in a hospital setting needed for entry level work. These skills may include but are not limited to EKG, phlebotomy, insertion of Foley catheters and sterile procedures.

ENGLISH (ENG)

ENG 111 3 C/45 CH

Introduction to Reading Skills

Prerequisite: Admission by referral only through assessment

This is the first course in reading development. It is designed to assist students in developing reading skills and becoming efficient and effective readers. The student concentrates on the major components of reading skills: visual and auditory discrimination, alphabet recognition, word attack, vocabulary and comprehension.

ENG 112 3 C/45 CH

Career and Technical Reading I

Prerequisite: ENG 111

This is an intermediate course in reading, designed to assist students in developing college reading skills and becoming efficient and effective readers. The student concentrates on the major categories of reading skills, comprehension, vocabulary and speed, applying these skills in career and technical areas and resources.

ENG 113 3 C/45 CH

Career and Technical Reading II

Prerequisite: ENG 112

This course focuses on the development of effective and efficient reading and study skills for college work. Emphasis is on the acquisition of study habits and skills, such as test-taking, note taking, outlining, vocabulary, speed-reading and critical thinking, and on the mastery of reading materials of all kinds used in various professional fields and disciplines.

ENG 114 3 C/45 CH

Career and Technical Writing I

This course is designed to assist students in basic writing skills. The student will learn to recognize and produce units of clear writing, beginning with simple, compound and complex sentences.

Through the use of reading selections, the student will learn to identify and formulate topic sentences and organize groups of sentences into a larger unit of meaning, the paragraph. At the same time, attention is given to the mechanics of sentence formation, grammar, spelling and vocabulary.

ENG 115 3 C/45 CH

Career and Technical Writing II

Prerequisite: ENG 114

This course is designed to assist students in developing writing skills. The student learns to recognize and produce units of written communication. It focuses on the paragraph as the basis for larger units of expression. Beginning with the paragraph, the student progresses to the short essay (five paragraphs) by the end of the semester. Grammar, diction and organization are stressed.

ENG 119 3 C/45 CH

English I

This course will provide opportunities for students to work with a variety of forms that will lead to the mastery of effective organization, topic development and appropriate styles, including the development of processes of thoughtful and analytical reading skills. Written work is required weekly.

Students that may need additional support may be advised to take ENG 1190.

ENG 1190 4 C/60 CH/45 L/15 LAB

English I

This course will provide opportunities for students to work with a variety of forms and appropriate styles, including the development of processes of thoughtful and analytical reading skills. Written work is required weekly. This course comes with additional contact hours and supplemental instruction.

ENG 120 3 C/45 CH**English II***Prerequisite: ENG 119*

This course provides continued practice for clear expository writing. It is designed for the development of analytical expression and critical literary judgment and serves as an introduction to research procedures.

ENG 134 3 C/45 CH**Technical Communications***Prerequisite: ENG 119*

This course focuses on the identification of the basic elements of written communication in technical fields and the production of communications appropriate to the technical field. Oral communication is also promoted.

ENG 190 3 C/45 CH**Introductory Journalism***Prerequisite: ENG 119*

This is the study of news gathering and the writing of simple news stories and features.

ENG 192 3 C/45 CH**Advanced Journalism***Prerequisite: ENG 190*

This course is the continued study in news writing with emphasis on special story types - economic news, movies, drama reviews and editorials.

ENG 212 3 C/45 CH**Women in Literature**

This course focuses on the woman's roles as it is portrayed in plays, poetry and novels through the last century and the emergence of the female author as an important literary force.

ENG 228 3 C/45 CH**Introduction to Folklore and Mythology***Prerequisite: ENG 120*

This course is a general survey of myths and folklore as the primary literature of different cultures.

ENG 231 3 C/45 CH**Introduction to Poetry***Prerequisite: ENG 120*

This course is a study of poetic structures and poets, both traditional and modern.

ENG 232 3 C/45 CH**Introduction to the Novel***Prerequisite: ENG 120*

This course is an analysis of the novels structure, determination and evaluation of theme and technique and the writing of critical essays.

ENG 233 3 C/45 CH**Introduction to Drama***Prerequisite: ENG 120*

This course is a study of plays from the ancient Greek period to the present.

ENG 234 3 C/45 CH**English Bible as Literature***Prerequisite: ENG 120*

This course is an examination of the literary aspects of the Bible and study of a number of its literary forms and devices.

ENG 240 3 C/45 CH**Introduction to Shakespeare***Prerequisite: ENG 120*

This course is an introduction to Shakespeare, his plays, comedies, tragedies and histories.

ENG 250 3 C/45 CH**American Literature, 1800 to Present***Prerequisite: ENG 120*

This course is a survey of major American writers in relation to their social and cultural environment. Writers will be chosen not only on their own literary merits, but also as representative of important periods, attitudes and styles.

Continued on next page.

*English (ENG) continued***ENG 252 3 C/45 CH**
English Literature Across the Centuries*Prerequisite: ENG 120*

This course is a survey of major British writers from the middle ages to the twentieth century. They are selected both on their own literary merits and because they represent the attitudes and values of their historical periods.

ENG 260 3 C/45 CH
Introduction to African-American Literature

This course focuses on the historical and thematic overview of the African-American writer from 1760-1899. Particular attention shall be given to the early slave narrative using formal analytical techniques, thus introducing students to the various modes of critical and literary thought. Emphasis shall be placed upon some literary styles and forms including folklore, spirituals, gospel and historical tradition.

ENG 261 3 C/45 CH
African-American Literature in the Twentieth Century*Prerequisite: ENG 120*

This course is a survey of all directions and phases of African-American writing from 1900 to the present. Particular attention is given to the writers of the Harlem Renaissance, major African-American novelists and contemporary poets. Such literary styles as the essay, short story, the novel and dialectic writing are explored. Masters of these literary styles, such as Chesnutt, Baraka, Locke, Hughes, Walker, Wright, Brooks, Ellison, Hayden and Angelou are studied.

ENG 266 3 C/45 CH
African-Caribbean Literature*Prerequisite: ENG 120*

This course is a study of African-Caribbean literature, encompassing the West Indian Island and adjacent countries of South American - Guyana, Suriname, French Guiana and Belize in Central American. Emphasis will be on the diverse linguistic and cultural influences on the prose and poetry of Caribbean literatures. Study will also be on the writing of expatriates of the Caribbean.

ENG 270 3 C/45 CH
Professional and Technical Report Writing*Prerequisite: ENG 119*

This course is designed for the advanced student in pre-professional or transfer programs; the designing and presentation of various forms of communications, both written and oral, as solutions to technical problems. The primary focus is report writing. The case approach is used, allowing students to actively engage in problem-solving situations.

ENG 275 3 C/45 CH
Advanced Expository Writing*Prerequisite: ENG 120*

An advanced course in expository writing which will build on the rhetorical and analytical strategies taught in ENG 119 and 120. The class will focus primarily on writing an effective argument.

ENG 280 3 C/45 CH
Creative Writing*Prerequisite: ENG 120*

Practice in writing in a variety of literary forms, as well as the analyzing of literary models and responding critically to the work of other students.

ENG 285 3 C/45 CH**Children's Literature***Prerequisite: ENG 120*

A survey of children's literature, acquaintance with quality books for children and criteria for evaluating them.

ENG 290 3 C/45 CH**Latino Literature I***Prerequisite: ENG 119*

This course will examine major 20th century Spanish-American writers and their works. These writers, living in the United States, will be referenced with other Latin-American writers (outside the United States) to show the cultural and historical links among them.

ENG 292 3 C/45 CH**Latino Literature II***Prerequisite: ENG 119*

This course includes a comprehensive survey of nationally renowned and emerging Latino writers, musicians, and screen writers, covering cultural, racial, and gender identity, political activism, sexual orientation and spirituality.

ENGLISH AS SECOND LANGUAGE (ESL)

ESL 100 1 C/15 CH**Conversational English for Non-English Speakers***Corequisites: ESL 101 or ESL 102*

Conversational English is a co-requisite for English as Second Language (ESL) 101 or 102. The focus of this course is to improve students' understanding of the American and the other cultures that are part of ESL courses.

ESL 101 2 C/30 CH**English as Second Language I***Corequisite: ESL 100**Prerequisite: Referral or by placement test.*

This course will provide students with a basic vocabulary to enable them to have simple conversational exchanges. Audio as well as computer-based material is used to reinforce and expand the skills program in the classroom. This course is for the beginning students whom English is a second language.

ESL 102 2 C/30 CH**English as Second Language II***Prerequisite: ESL 101 or by placement**Corequisite: ESL 100*

This course guides students through the four language learning components: Listening, Reading, Speaking, and Writing. Students will learn to recognize and apply aspects of American pronunciation and focus on grammatically contextualized paragraphs. In addition, students will explore American culture.

ENTREPRENEURSHIP (ENT)

ENT 100 3 C/45 CH**Introduction to Entrepreneurship**

This course is designed to introduce students to the entrepreneurial process from conception to birth of a new venture. The students will examine elements in the entrepreneurial process- personal, sociological, and environmental- that give birth to a new enterprise.

Continued on next page.

*Entrepreneurship (ENT) continued***ENT 205 3 C/45 CH****Operations Management for Small Businesses**

Production and Operations Management is important to the overall strategy and competitiveness of a small business owner. This course focuses on specific tools used to manage and enhance a firm's operations and production, such as facility layout, product design, aggregate planning, inventory management, and forecasting.

ENT 210 3 C/45 CH**Human Resource Management for Small Businesses**

In an ever-changing world, entrepreneurs must adapt and flex, push and explore. This course surveys and analyzes contemporary techniques for managing a strategically oriented human resource function in a small business setting. Topics include staffing, rewarding, developing, and maintaining organizations, jobs and people.

FACILITY MAINTENANCE (FM)**FM 101 3 C/45 CH****Basic Facility Maintenance***Lab Fees*

This course covers the fundamentals of work orders, work descriptions, engineering and architectural print reading, the mechanical and electrical nature of the work, location and identification of the problem, tools and material requirements to schedule work.

FM 102 3 C/45 CH**Plumbing and Pipe Fitting***Lab Fees*

This course covers mechanical blueprint reading, pipes and valves construction, valve operation, repair and maintenance, BOCA mechanical codes

for plumbing and pipe fitting methods of pipe connection, uses of sewer augers, size and cutting of piping materials, reading pressure gauges to determine fluid pressure, copper pipe letter codes to determine pipe thickness, repair, maintenance and operation of back flow preventers. Also, basic function of plumbing sanitation, fitting, piping, vents, traps, potable, hot water supply drain, waste and sewer, etc. will be covered.

FM 103 3 C/45 CH**Carpentry***Lab Fees*

This course covers carpentry terms, usage of carpentry equipment, basic construction materials, fractional arithmetic, wood jointing and fastening methods, types and sizes of fasteners, types of hinges, backing and latching devices, door sizes review, maintenance and installation. Also door code identification, counter tops and their standard heights, repair, repair maintenance and installation of counters, construction, repair and maintenance will be covered.

FM 104 3 C/45 CH**General Maintenance***Lab Fees*

This course covers preventive maintenance of mechanical equipment such as air compressors, pumps, hydraulic systems, troubleshooting of a wide variety of hospital/nursing home/hotel/office building equipment, gas and arc welding methods and procedures, alignment of flexible couplers for electric motors, packing glands, cut and installing glass panes. Use of various types of paint products and painting of walls, ceilings, floor coverings, use of hand and power tools in accordance with OSHA requirements, replacement of V-belts and alignment of pulleys and sheaves, selection and application of lubrication to machines and the adjustment of speed (RPM) of pulleys operated equipment and machines will be covered.

FM 105**3 C/45 CH****Grounds Maintenance***Lab Fees*

This course covers the maintenance of lawns and gardens, the mowing of lawns and grassy trees, the selection and use of proper fertilizers, irrigation of grounds, maintaining lawn and garden equipment, installing irrigation systems, building and install fencing. Also the removal of snow and ice, plowing below snow, scraping ice, spreading chemical/ice melters, clearing storm drains. The cleaning of outside areas: removing litter, sweeping/vacuuming entrances, cleaning outside of the building, the repair and installation of outside signs and the setup of seasonal displays/decorations will be covered.

FM 106**3 C/45 CH****Safety and Support Services***Lab Fees*

This course is a survey of the health and legal consideration affecting the work environment and includes historical backgrounds, safety standards, health standards, resources in hazard recognition, inspection procedures, complaint procedures and relevant legislation, law and judicial decisions. Also reviewed are OSHA and MIOSHA regulations, compliance and enforcement, health and safety committees, and the safe operation of hand and power tools, lock-out tag-out procedures, use and handling of sharp containers and blood borne pathogen safety.

FM 299**3 C/45 CH****Facility Maintenance Co-op***Lab Fees*

This course provides fieldwork experience.

FASHION DESIGN (FAD)**FAD 100****2 C/30 CH****Introduction to the World of Fashion**

This introductory course explores the many dimensions of the fashion industry and helps students discover their individual design interests and career pathways. Students will learn about a wide range of fashion careers, including independent designer, merchandiser, buyer, stylist, and fashion influencer. Topics include the fashion cycle, trend forecasting, technological innovations, sustainable design, costume/fashion history, and garments designed for action and function. Through field trips, readings, group projects, and a final presentation, students will begin to shape their direction in the fashion world.

FAD 101**3 C/45 CH****Industry Sewing***Corequisite: FAD 102**Lab Fees*

This course introduces students to basic sewing techniques used in the industry with emphasis on both hand finishing and power sewing machines. Students produce a completed garment by applying all of the techniques taught in this course.

FAD 102**3 C/45 CH****Basic Draping Techniques***Corequisite: FAD 101**Lab Fees*

This course introduces students to the foundational skills of fashion draping using industry techniques. Students will explore draping on dress forms to develop basic bodice, skirt, and dress forms while learning the principles of proportion, fit, grain, balance, and 3D garment shaping. Emphasis is placed on hands-on practice, critical observation, and developing an understanding of how fabric behaves on the human form.

Continued on next page.

*Fashion Design (FAD) continued***FAD 103 3 C/45 CH****Color and Design Theory***Lab Fees*

This course will examine the principles of color theory and design. Students will gain an understanding of color relationships, as well as learn to identify, and analyze the principles and elements of design. Students will utilize these theories and principles in the creation of their own unique designs.

FAD 104 3 C/45 CH**Textile and Materials***Lab Fees*

This is an introductory course for those students interested in a career in the fashion, textile, and apparel industry. This course includes the study of the selection of fashion, textiles, and apparel goods and their properties, design and production. Examine and analyze properties and identification for textile fibers, yarns and fabric construction through scientific exploration. Includes finishes, regulations, performance, processes, applications, and care in fashion design.

FAD 105 4 C/60 CH**Fashion Illustration***Prerequisite: ART 104*

An advanced exploration of perspective, composition, color investigation, color relationships, media, and idea development. This course emphasizes the perfection of fashion figure poses, the accurate illustration of garments and the development of the students own sketching style. Students will learn how to portray fashion flats, technical flat drawings, and realistic compositions of the figure. As the semester progresses, students draw from live models to develop an awareness of the proportions and movement of the elongated fashion figure while maintaining correct

anatomical structure. This course will provide the student with a drawing skillset that will help to illustrate a garment's proportions, material breakdown, and seam construction.

FAD 106 3 C/45 CH**Pattern Drafting***Prerequisite: FAD 100**Lab Fees*

This course provides an overview of pattern drafting and an introduction to construction. Students develop the fundamentals of patternmaking using basic slopers. The bodice skirt, sleeve, and collar variations are executed to learn the variety of design options possible through flat pattern technique. Different methods of pattern making, from using the dart for fit to adding shape for fullness, are explored, as well as taking body measurements for fit. Students develop an understanding of how to use the basic block in construction muslin samples.

FAD 107 3 C/45 CH**Computer Aided Pattern Drafting***Prerequisites: FAD 105, FAD 202**Lab Fees*

Students are introduced to the programs Adobe Illustrator and Photoshop. Students learn and develop skills in core programs through techniques using fashion design principles. Students are provided with a digital foundation and will develop competencies using computer-aided design technology from the Adobe Suite of Products: Illustrator and Photoshop for producing patterns flats, and designs for apparel. This class will use a combination of techniques applicable to the fashion industry from design conception through basic flat pattern design.

FAD 108 3 C/45 CH**Creative Design Applications***Prerequisites: FAD 101, FAD 102, FAD 106**Lab Fees*

This course will allow students to explore their individual design styles more in depth. Students will learn about different types of design through the following topics: technological applications, environmental influences on fashion, sustainable design, the fashion cycle, garments for action and function, and trend forecasting.

FAD 109 3 C/45CH**Fundamentals of Fashion Retail Buying & Merchandising**

This course introduces students to the fundamental principles of fashion retail buying and merchandising. Students will learn how to develop merchandise plans, forecast fashion trends, evaluate vendor performance, analyze consumer buying behavior, and interpret the retail calendar. Emphasis is placed on both the creative and analytical aspects of buying and merchandising within various retail formats.

FAD 110 2 C/30CH**Basic Sewing**

This course introduces students to the fundamental skills of sewing. Students will learn how to operate a sewing machine, read patterns, and construct basic garments and home decor items. Emphasis will be placed on sewing techniques, fabric selection, and garment construction.

FAD 111 2 C/30CH**Fashion Mathematics**

Fashion Mathematics provides students with a foundational understanding of the mathematical principles used in fashion design and garment production. The course will explore measurements, proportions, pattern grading, costing, conversions, and calculations essential for accurate and efficient fashion creation. Emphasis will be placed on

practical applications in the fashion industry.

FAD 200 3 C/45 CH**Computer Aided Drafting for Fashion Apparel Design***Prerequisites: FAD 100**Lab Fees*

This course introduces students to digital tools essential in the fashion design industry, with a focus on Adobe Illustrator and Photoshop. Through hands-on instruction, students will create digital sketches, technical flats, and presentation boards. Emphasis will be placed on applying fashion design principles to develop patterns, manipulate textiles digitally, and present original fashion concepts. The course lays a foundational skill set in computer-aided design (CAD) technology for apparel production and communication.

FAD 201 3 C/45 CH**Advanced Industry Sewing***Prerequisites: FAD 101**Lab Fees*

This is an advanced sewing class that teaches students apparel production sewing techniques. They will examine the transition of apparel products from designer's samples to finished production merchandise. The course will focus on learning Tech Design skills and approaches to fit, construction, and unique tailoring techniques. Students will work in groups to create seasonal sketches, research trends, color, and fabrics. By the end of the course, students will construct a minimum of three or more garments based on their approved designs.

Continued on next page.

*Fashion Design (FAD) continued***FAD 202 3 C/45 CH****Computer Aided Pattern Drafting***Prerequisites: FAD 200**Lab Fees*

Students will develop competencies using computer aided design technology for producing patterns for apparel. This class will use a combination of lecture, demonstration and hands on computer experience to teach the skills needed for creating digital patterns including flat pattern manipulation, grading, pattern development and editing and marker making. Students will digitize basic slopes/blocks and manipulate them into original apparel designs on the computer.

FAD 205 5 C/75 CH**Couture Sewing Techniques***Lab Fees*

This hands-on course introduces students to the foundational techniques of couture sewing. Emphasis is placed on precision cutting, fabric handling, hand stitching, shaping, and finishing techniques essential to haute couture garment construction. Students will practice working with specialty fabrics, employ traditional hand-sewing techniques, and apply high-end construction and finishing methods. The course culminates in a finished couture-level garment or design project.

FAD 209 3/45CH**Fashion Supply Chain Management**

This course introduces students to the essential components of the fashion supply chain, from concept to consumer. Emphasis is placed on sourcing, production, logistics, inventory management, sustainability, and ethical practices. Students will explore both domestic and global supply chain operations and develop strategic thinking around supply chain decisions in the fashion and apparel industries.

FAD 215 3 C/45 CH**Fashion History- The Evolution of Dress, Culture, and Style**

This course explores the history of fashion across all continents, focusing on the 20th and 21st centuries. Students will examine how dress reflects identity, culture, environment, and politics in Africa, Asia, Europe, North America, South America, Australia/Oceania, and Antarctica. Emphasis will be placed on how fashion responds to historical events, social movements, trade, and cultural expression. Students will critically engage with diverse perspectives on style, materials, and innovation, culminating in a final project that reflects a broad understanding of the evolution of dress and style across regions and cultures.

FAD 218 3 C/45CH**Fashion Visual Merchandising and Display***Prerequisites: FAD 109*

This course focuses on the art and strategy behind visual merchandising and display in fashion retail environments. Students will study the principles of design, color theory, window displays, in-store visual communication, and digital presentation techniques. Through both theoretical study and hands-on projects, students will learn to create compelling visual merchandising displays that enhance customer engagement and drive sales.

FAD 219 3 C/45 CH**Fashion Illustration II: Advanced Digital Design Portfolio***Prerequisite: FAD 202**Lab Fees*

This course is designed for fashion designers who want to create a professional fashion design portfolio using digital tools and techniques. Students will advance learning by utilizing various software programs, including Adobe Illustrator, Photoshop, and other relevant digital tools, to create a comprehensive and visually appealing fashion design portfolio ready for industry presentation. Through a series of practical

assignments and projects, students will develop the skills necessary to showcase their fashion design ideas and technical abilities using digital mediums.

FAD 220 3 C/45 CH

Fashion Design Capstone

Prerequisites: FAD 106, FAD 105

Lab Fees

The Fashion Design Capstone is the culminating course in the Associate of Applied Science in Fashion Design program. It requires students to synthesize and apply the comprehensive knowledge and technical skills acquired in previous fashion courses. Students will research, design, construct, and present a cohesive fashion collection informed by current trends, sustainable practices, market analysis, and cultural influences. The course will culminate in a final presentation or portfolio review showcasing their collection and professional readiness.

FAD 221 2C/30 CH

Fashion Show Production and Promotion

This experiential course explores the fundamentals of fashion show production and promotion. Students will gain hands-on experience in all aspects of executing a fashion event, including concept development, venue design, staging, promotion, model coordination, styling, and event marketing. The course culminates in a live fashion presentation executed by the students.

FAD 222 2C/30 CH

Fashion Portfolio Presentation

This course gives students the opportunity to develop a personal portfolio of creative work that reflects their professional goals in the fashion industry. Students will refine previously completed work and create new materials as needed to build a cohesive and professional portfolio tailored to their chosen career path (e.g., fashion designer, technical designer, stylist, merchandiser, or illustrator). Emphasis will be placed on layout, visual

storytelling, branding, and presentation skills.

FINANCE (FIN)

FIN 100 1 C/15 CH

Personal Finance

A practical interactive course for everyone interested in financial literacy in a wide variety of industries and examples. Topics include money management concepts, borrowing, earning power, investing, financial services and risk management and insurance, time management, and decision making including case studies that significantly impact individuals, communities, and organizations within our society.

FIRE PROTECTION TECHNOLOGY (FPT)

FPT 100 2 C/30 CH

Incipient Fire Brigade

This course is designed to provide a student with the basic knowledge necessary to become a member of an Incipient Fire Brigade. Members of a Fire Brigade fight small (incipient) size fights in normal work clothes. Topics include organization and responsibilities, fire behavior, fire hoses, nozzles and appliances, portable fire extinguishers, fire detection and signaling systems, fixed fire extinguishing systems, hazard recognition, incident management, and loss control.

Continued on next page.

*Fire Protection Technology (FPT) continued***FPT 110 8 C/120 CH****Fire Fighter I***Prerequisite: Program Admission**Corequisites: FPT 115*

This course is designed to provide a student with the knowledge necessary for entry level positions on fire departments. Topics include fire fighter safety, personal protection equipment, hose operations, ladders, fire prevention, and others. Students who complete all course requirements will be eligible to take the State of Michigan Fire Fighter Training Council (MFFTC) written and practical examinations leading to certification as a Fire Fighter I. This course must be taken in conjunction with FPT 115.

FPT 115 5 C/75 CH**Fire Fighter I Lab***Prerequisite: Program Admission**Corequisite: FPT 110*

This course is designed to provide student with the psycho motor skill necessary for entry level positions in the fire department. Skills include hose operations, ladders, personal protective equipment, and others. Students who complete all course requirements will be eligible to take the State of Michigan Fire Fighter Training Council (MFFTC) written and practical examinations leading to certification as a Fire Fighter I. This course must be taken in conjunction with FPT 110.

FPT 120 5 C/75 CH**Fire Fighter II***Prerequisite: MFTTC Fire Fighter I Certification**Corequisites: FPT 125*

This course is designed to provide student with the additional knowledge necessary for entry level positions on fire departments. This course builds on the knowledge acquired in FPT 110. Topics include vehicle extrication and hazardous materials

operations. Students who complete all the requirements will be eligible to take the State of Michigan Fire Fighter Training Council (MFFTC) Fire Fighter II written and practical examinations leading to certification as a Fire Fighter II. This course must be taken in conjunction with FPT 125.

FPT 125 3 C/45 CH**Fire Fighter II Lab***Prerequisite: MFTTC Fire Fighter I Certification**Corequisites: FPT 120*

This course is designed to provide student with the additional knowledge necessary for entry level positions in the fire department. This course builds on the knowledge acquired in FPT 115. Skills include vehicle extrication and hazardous materials operations. Students who complete all the requirements will be eligible to take for the State of Michigan Fire Fighter Training Council (MFFTC) written and practical examinations leading to certification as a Fire Fighter II. This course must be taken in conjunction with FPT 120.

FPT 150 3 C/45 CH**Principle of Emergency Services**

This course provides an overview to fire protection: career opportunities in fire protection and related fields: philosophy and history of fire protection/service: fire loss analysis: organization and function of public and private fire detection services: fire departments as part of local government; laws and regulations affecting the fire service; fire service nomenclature: specific fire protection functions; basic fire chemistry and physics; introduction to fire protection systems: introduction to fire strategy and tactics.

FPT 155 3 C/45 CH**Fire Prevention**

This course provides fundamental information regarding the history and philosophy of fire prevention, organization and operation of a fire prevention bureau, use of fire codes, identification and correction of fire hazards, and the relationships of fire prevention with built-in fire protection systems, fire investigation, and fire and life-safety education.

FPT 160 3C/45 CH**Fire Behavior and Combustion**

This course explores the theories and fundamentals of how and why fires start, spread, and how they are controlled.

FPT 165 3 C/45 CH**Fire Protection Systems**

Prerequisite: FPT 155, FPT 160, MAT 113

This course provides information relating to the features of design and operation of fire alarm systems, water-based fire suppression systems, special hazard fire suppression systems, water supply for fire protection, and portable fire extinguishers.

FPT 170 3 C/45 CH**Strategy and Tactics**

Prerequisite: FPT 150

This course provides in-depth analysis of the principles of fire control through utilization of personnel, equipment, and extinguishing agents on the fire ground.

FPT 175 4 C/60 CH**Hazardous Materials Chemistry**

This course provides basic fire chemistry relating to the categories of hazardous materials including problems of recognition, reactivity, and health encountered by firefighters.

FPT 180 3 C/45 CH**Occupational Safety and Health for the Fire Service**

This course introduces the basic concepts of occupational health and safety as it relates to emergency services organizations. Topics include risk evaluations and control procedures for fire stations, training sites, emergency vehicles, and emergency situations involving fire, EMS, hazardous materials, and technical rescue. Upon completion of this course, students should be able to establish and manage a safety program in an emergency service organization.

FPT 185 3 C/45 CH**Fire Protection Hydraulics and Water Supply**

Prerequisite: MAT 113

This course provides a foundation of theoretical knowledge in order to understand the principles of the use of water in fire protection and to apply hydraulic principles to analyze and to solve water supply problems.

FPT 205 4 C/60 CH**Introduction to Fire and Emergency Services****Administration**

Prerequisite: FPT 150

This course introduces the student to the organization and management of a fire department and the relationship of government agencies to the fire service. Emphasis is placed on fire service leadership from the prospective of the company officer.

Continued on next page.

*Fire Protection Technology (FPT) continued***FPT 210 6 C/90 CH****Fire Service Management I**

Prerequisites: MFTTC Fire Fighter II Certification and three years experience on an organized fire department.

This program is designed to prepare fire fighters for advancement in the fire service. It is based on the Michigan Fire Fighters Training Council (MFFTC) Company Officer Prerequisite curriculum. Topics include Educational Methodology, Incident Safety, Incident Management and Strategy and Tactics. Students meeting all course requirements are eligible to continue on to the MFFTC Company Officer Course.

FPT 215 3 C/45 CH**Building Construction for the Fire Service**

Prerequisite: FPT 150

This course provides the components of building construction that relate to fire and life safety. The focus of this course is on firefighter safety. The elements of construction and design of structures are shown to be key factors when inspecting buildings, preplanning fire operations, and operating at emergencies.

FPT 220 6 C/90 CH**Fire Service Management II**

Prerequisite: FPT 210

This program is designed to prepare fire fighters for advancement in the fire service. It is based on the Michigan Fire Fighters Training Council (MFTTC) Company Officer curriculum. Topics build on those from Fire Service Management I. This program meets National Fire Protection Association (NFPA Standard 1021, Fire Officer Professional Qualifications. Student meeting all course requirements are eligible to take the MFFTC examination for certification.

FPT 225 3 C/45 CH
Principles of Fire and Emergency Services Safety and Survival

This course introduces the basic principles and history related to the national firefighter life safety initiatives, focusing on the need for cultural and behavior change throughout the emergency services.

FPT 230 4 C/60 CH**Fire Service Management III**

Prerequisite: FPT 220

This program is designed to prepare fire fighters for advancement in the fire service. It is based on the Michigan Fire Fighters Training Council (MFTTC) Leadership and Health and Safety curriculum. Topics include problem solving, ways to identify and assess the needs of the Company Officer's subordinates, methods for running meetings effectively, decision-making skills for the Company Officer, ethics, use and abuse of power at the Company Officer level, delegation to subordinates, assess personal leadership styles through situational leadership, discipline subordinates, and applies coaching/motivational techniques for the Company Officer.

FPT 235 3 C/45 CH**Legal Aspects of the Fire Service**

This course introduces the Federal, State, and Local laws that regulate emergency services, national standards influencing emergency services, standard of care, tort, liability, and a review of relevant court cases.

FPT 240 3 C/45 CH**Fire Service Management IV***Prerequisite: FPT 230*

This course builds on the previous Fire Service Management courses, offering an in-depth look various topics. Topics considered budget management, marketing for the fire service, public relations, labor relations, and risk management. This course is designed for upwardly mobile individuals who seek to move into the upper ranks within the fire service.

FPT 245 3 C/45 CH**Fire Investigation I***Prerequisites: FPT 150, FPT 160, FPT 165*

This course is intended to provide the student with the fundamentals and technical knowledge needed for proper fire scene interpretations, including recognizing and conducting origin and cause, preservation of evidence and documentation, scene security, motives of the fire setter, and types of fire causes.

FPT 246 4 C/60 CH**Fire Investigation II***Prerequisite: FPT 245*

This course is intended to provide the student with advance technical knowledge on rule of law, fire scene analysis, fire behavior, evidence collection and preservation, scene documentation, case preparation, and testifying.

FPT 250 3 C/45 CH**Fire Service Management V***Prerequisite: FPT 240*

This course continues the process of developing upwardly mobile individuals within the fire service. Topics in this course offer in-depth work in the following areas labor issues, labor law, diversity, dealing with NFPA standards, complying with OSHA regulations, and dealing with regulatory agencies. The course is designed to prepare those individuals to be fire chief.

FPT 255 3 C/45 CH**Fire Inspection Principles and Practice**

The course provides fundamental information regarding the history and philosophy of fire prevention, organization and operation of a fire prevention bureau, use of fire codes, identification and correction of fire hazards, and the relationships of fire prevention with built in fire protection systems, fire investigation, and fire and life safety education. It is designed to enhance the student's knowledge of fire prevention and its purpose within fire service organizations.

FPT 260 3 C/45 CH**Industrial and Commercial Fire Protection***Prerequisite: FPT 255*

This course considers the intricacies and differences between residential and commercial/industrial fire fighting. Students will discuss the strategies and tactics for a successful operation at larger structures, and the unique challenges for these types of operations. Topics include offensive and defensive operations, accountability, emergency escape techniques, and aerial operations.

Continued on next page.

*Fire Protection Technology (FPT) continued***FPT 265 4 C/60 CH****Search and Rescue Operations I***Prerequisite: FPT 120*

This course will prepare the student to plan and respond to various technical rescue incidents. This includes development of an action plan, Scene safety considerations, trench collapse and rescue, confined space rescue, and building collapse. The student will take into account patient considerations including extrication of victims and patient packaging. Shoring of collapsed structures is discussed in length.

FPT 270 3 C/45 CH**Search and Rescue Operations II***Prerequisite: FPT 265*

Course is meant to build on FPT 265 Search and Rescue Operations I. Topics include: types of Rescue Companies, qualifications for rescuers, specialized equipment, low angle rescue, high angle rescue, water rescue, and elevator rescue. This is not a hands on class, but is meant to give the student an in-depth perspective of theory and knowledge in the subject area.

FPT 275 3 C/45 CH**Hazardous Materials in Fire Service Operations***Prerequisite: FPT 120*

This theory based class enhances knowledge in hazardous materials for the hazardous materials responder. The student will look in-depth at topics such as the physical and chemical properties of hazardous materials, USDOT regulation for hazardous materials, emergency response to hazmat incidents, potential hazards at these incidents, and hazmat prevention techniques.

FPT 280 3 C/45 CH**Current Concepts in Fire Service***Prerequisite: FPT 120*

The student will review current issues affecting the fire and emergency service as well as their own organizations. Each week the student will research and report on current and pertinent topics within the fire service and their effect on their organization. The student will use many resources in doing research including fire department policy and procedure, Federal and State legislation and regulation, books, magazines, and the Internet.

FPT 285 3 C/45 CH**Fire Officer Internship***Prerequisite: FPT 220*

This course has two tracks that can be followed. The first allows the student to work within their own department. Students will submit and carryout a project for use within the department. The project must be of value to the department. A written report on the final outcome of the project must be submitted, or, an internship with a fire department of the student's choice or a department of choice by the college. This track will be to enhance the student's abilities and skills as an officer. The student would work with various individuals in the host department, and keep a log of their activities.

FRENCH (FRE)**FRE 101 4 C/60 CH****Elementary French I**

This course is designed for beginning students and aimed at developing the four skills of understanding, speaking, reading and writing French. Emphasis is on grammatical constructions, vocabulary, basic idioms and phonetics. Special emphasis will be on the development of conversational French.

FRE 102

4 C/60 CH

Elementary French II*Prerequisite: FRE 101*

Continued emphasis will be on the four basic skills, fundamental grammatical construction and vocabulary. Expanded training in reading, writing and composition. Emphasis is on French conversation and idiomatic constructions.

FRE 201

4 C/60 CH

Intermediate French I*Prerequisite: FRE 102*

This course is an expansion of essential principle of grammatical idiomatic usage through oral and written exercise, emphasis is on French conversation, and continued development on reading French.

FRE 202

4 C/60 CH

Intermediate French II*Prerequisite: FRE 201*

The focus of this course is on reading French on an advanced level and a continued emphasis on idiomatic usage in both speaking and writing French.

GEOGRAPHY (GEG)**GEG 202**

3 C/45 CH

World Regional Geography

This course is a study of the spatial relationships between human societies, cultures and natural resources in the various regions of the world. Through lectures, geographic films and field experiences, the course examines the cultural and physical landscape to illustrate how they relate to and interact with each other as part of a total region.

GEOLOGY (GEL)**GEL 210**

4 C/90 CH

Physical Geology Lecture

Geology is the scientific study of the Earth. Physical geology is concerned with earth materials, changes in the interior and surface of the earth, and the dynamic forces that cause those changes. The course is organized beginning with a focus on earth materials, minerals, igneous rocks and volcanoes, processes of weathering, sediments and sedimentary rocks, soils, and metamorphic rocks.

Internal earth processes are emphasized, covering the processes of mountain building, structural geology and maps, plate tectonics, earthquakes, and the earth's interior and the sea floor. The final focus is on surface processes including streams and groundwater, glaciers, deserts, wind and shoreline processes. (meets six hours per week, four hours lecture, two hours laboratory).

GERMAN LANGUAGE (GRM)**GRM 101**

4 C/60 CH

Elementary German I

This course is designed to provide the learner with a solid background in the four language skills: understanding, speaking, reading and writing. Students will learn elementary pronunciation, vocabulary and grammatical principles necessary for comprehending and expressing simple ideas in both spoken and written German. Students will develop reading and listening skills and be introduced to diverse aspects of German life and culture. A variety of technologies, media and other supplementary materials will be used to enhance learning.

GRM 102**4 C/60 CH****Elementary German II***Prerequisite: GRM 101*

This course is a continuation of Elementary German I and further builds listening, speaking, reading and writing skills within communicative contexts. Students will continue to expand their knowledge of pronunciation and grammatical principles, which can be applied to everyday conversational situations. Topics of Germanic culture will also be presented. A variety of technologies, media and other supplemental materials will be used to enhance learning.

GRM 201**4 C/60 CH****Intermediate German I***Prerequisite: GRM 102*

This course will focus on increasingly advanced German communication skills in a cultural context. It develops listening, speaking, reading and writing skills and deepens the students' knowledge of pronunciation and grammatical principles. Topics of Germanic culture will also be presented. A variety of technologies, media and other supplemental materials will be used to enhance learning.

GRM 202**4 C/60 CH****Intermediate German II***Prerequisite: GRM 201*

This course will focus on the development of advanced communication skills in a cultural context. It further develops listening, speaking, reading and writing skills and deepens the students' knowledge of pronunciation and grammatical principles. Topics of Germanic culture and the European Union and its' monetary system will also be presented. A variety of technologies, media and other supplemental materials will be used to enhance learning.

GEOTHERMAL SYSTEMS TECHNOLOGY (GTT)

GTT 101**3 C/45 CH****Principles of Thermogeology**

This course will cover the basic principles of the Earth's heat sources and their use as alternative, renewable, and baseload energy. Attention will be given to the Earth's formation, its core as a heat source, and its crust for solar energy storage. Ground source heat and its use as a renewable energy heating and cooling source will be emphasized. Field experience to geothermal sites will be conducted.

GTT 105**4 C/60 CH****Applications of Geothermal Systems**

This course will explore the variety of geothermal systems installed around the world. The student will focus on emerging energy issues and challenges the nation and the geothermal REHC industry face in regard to economics, energy conservation, and energy use challenges to local economies. The course will emphasize how geothermal systems integrated with other renewable energy sources can play a significant role in successfully addressing these challenges. Students will learn how to systemically reduce the use of fossil fuels in local economies and municipalities while concurrently establishing sustainable local communities and buildings. Students will experience building sites or drilling sites geothermal/ground source heat.

GTT 201**3 C/45 CH****Geothermal REHC Technology***Prerequisites: GTT 101, GTT 105*

This course is designed to provide the students with the knowledge of Geothermal HVAC/R technology. Ground Source Heat Pump trainer and conventional Gas Forced Air equipment will be used to articulate how the stability of the Earth's heat can heat and cool homes and commercial buildings. Sustainable systems for individuals, communities, and municipalities are surveyed as well as their environmental impact and cost-benefit analysis. Calculating Geothermal Renewable Energy Heating and Cooling (REHC) system efficiency ratings and calculating payback periods will be surveyed. Current incentives, tax credits, rebates, and local and national legislation will be researched.

GTT 220**4 C/60 CH****GHEX Accreditation Exam Preparation***Prerequisites: GTT 201*

This course provides the student with practical field experience and hands-on techniques for the fusion of the two primary ground heat exchangers used in the day-to-day installation of a ground-source heat exchanger (GHEX) using today's industry standards. This course culminates the completion of the Geothermal REHC Technology Certification by taking the student through the process of preparing for the International Ground Source Heat Pump Association's Accredited Installer examination.

GERONTOLOGY (GER)**GER 110****3 C/45 CH****Introduction to the Study of Aging**

This is an introduction to the major issues in the field of gerontology with emphasis on the normal process of aging. Topics include physiology, psychology, economics, political issues, demography, sociology, education and community programs.

GER 115**3 C/45 CH****Programs/Services to the Aged**

This course provides a comprehensive view of the national, state and local structures, both public and private which provide services for the aging population. Included is an examination of the major legislative programs, agencies and regulations affecting the elderly.

GER 120**3 C/45 CH****Health and Physical Processes of Aging***Prerequisites: GER 110*

Physiological changes which are normal to the aging process and to the health and well-being of the elderly are studied by examining issues unique to aging, including sensory abilities, exercise, nutrition and drug use and misuse. Present patterns of health, illness and disease behavior, as well as rates of utilization of health and medical facilities and services will be investigated. Longevity and the quality of life are considered with an emphasis on preventive care, health maintenance and alternatives to institutionalization.

Continued on next page.

*Gerontology (GER)) continued***GER 125** **3 C/45 CH**
Mental Health and the Aging*Prerequisites: GER 110*

This course focuses on the mentally healthy older adult from a social-psychological perspective. It investigates the changing nature of social roles, emotional and social consequences of multiple losses, redefinition of needs in relationship to family and friends as well as the topic of retirement and the use of time.

**GLOBAL SUPPLY CHAIN
MANAGEMENT (LOG)****LOG 101** **3 C/45 CH**
Principles of Logistics

This course provides general knowledge of current management practices in logistics management. A study of the basic concepts in product distribution including distribution planning and terminology, transportation methods, traffic management, location strategies, inventory control and warehousing.

LOG 102 **3 C/45 CH**
Purchasing*Prerequisite: LOG 101*

This course provides a general knowledge of purchasing for today's supply chains. The student will be introduced to cross-functional teaming, purchasing and supply performance, supplier integration into new product development, supplier development, strategic cost management and total ownership cost (TOC) and many other topics.

LOG 103 **3 C/45 CH**
Introduction to Supply Chain Management*Prerequisite: LOG 101*

This course is designed to provide a general knowledge of Supply Chain Management (SCM) and the associated functions necessary for delivery of goods and services to customers. This course will focus on what employees and managers must do to ensure an effective Supply chain exists in their organizations. Topics include: introduction to SCM, E-Commerce, materials management, information technology, measuring SCT performance, purchasing and distribution and research and case studies.

LOG 104 **3 C/45 CH**
Materials Management*Prerequisite: LOG 101*

This course will introduce students to materials management by learning the planning production process, master scheduling, material requirement and forecasting material demands and inventory levels. This course is designed to build on the student's knowledge of supply chains and how effective material management improves supply chain performance.

LOG 105 **3 C/45 CH**
Inventory and Warehouse Management*Prerequisite: LOG 101*

This course emphasizes the relationships of inventory and warehouse management to customer service and profitability of the wholesale distributor. The course will focus on the role of computerized systems and resulting information for effective management of inventory and the warehouse under various conditions.

LOG 110 3 C/45 CH**Transportation and Distribution***Prerequisite: LOG 101*

Transportation and Distribution course examines the structure and importance of the commercial transportation industry in the logistics sector of business. The course includes discussions of regulations, economics, characteristics, and development in major transportation modes.

LOG 200 3 C/45 CH**International Supply Chain Management***Prerequisites: LOG 101, LOG 103*

This course is a study of global logistics with an emphasis on looking at the whole world as one potential market. Additionally, an analysis of the global supply chain and current issues such as import/export regulations will also be reviewed.

HEATING, VENTILATION AND AIR CONDITIONING (HVA)

HVA 100 5 C/75 CH**Introduction to HVAC and Hermetic Systems***Lab Fees*

This course covers theories, application and principles of refrigeration and hermetic (sealed) systems with an emphasis on refrigeration cycles, components, and accessories. Topics include thermodynamics, common refrigerants and their chemical make-up, as well as chemical properties of refrigerants and the resulting conditions. This course covers application, installation and servicing of hermetic systems including domestic refrigerators, freezers, room coolers, water coolers and humidifiers. The use of heat pump (reverse refrigeration effect), direct, centrifugal, rotary compression and absorption methods along with their mechanical construction of same will also be discussed.

HVA 103 4 C/60 CH**Commercial Refrigeration***Prerequisite: HVA 100**Corequisite: HVA 108**Lab Fees*

This course covers application, installation and servicing of commercial-industrial refrigeration, including operating and testing of low, medium and high temperature systems and the types of refrigeration equipment needed to obtain large cooling requirements. In addition, emphasis is placed on dehydration, refrigerant, charging, recovery, recycling and reclamation procedures, as well as techniques using a multi-user recovery/recycling machine. This course provides training necessary for the EPA certification exam.

HVA 104 4 C/60 CH**Air Conditioning I***Prerequisite: HVA 100**Corequisite: HVA 105**Lab Fees*

This course covers all the heating, ventilation, and air conditioning (HVAC) equipment needed to maintain conditions that equate to healthy standards of human comfort. Also, heating and cooling load calculations factoring in degree/day measurements as used by utility companies will be reviewed. This course is offered in a Fast-Track format with HVA105.

HVA 105 4 C/60 CH**Air Conditioning II***Prerequisites: HVA 100**Corequisite: HVA 104**Lab Fees*

This course covers advanced design, application installation and servicing of commercial air conditioning units. In this course, emphasis will be including testing, starting, balancing and troubleshooting cooling systems, as well as the use and chemical properties of all refrigerants. This course is offered in a Fast-Track format with HVA104.

HVA 106 5 C/75 CH**Basic Heating and Heating Controls***Lab Fees*

This course covers the fundamentals of heat energy, the laws of thermal dynamics, and all conditions necessary for complete combustion using oil and natural gas. Topics include the safe design, construction, installation, venting, alteration, service and testing of heating equipment needed to maintain state comfort standards, as well as how heating controls operate and how they are wired. This course will also review reading and understanding of ladder, schematic diagrams, pictorial diagrams and control operations.

HVA 108 4 C/60 CH**Refrigeration Controls***Prerequisite: HVA 100**Corequisite: HVA 103**Lab Fees*

This course covers commercial refrigeration controls, and needed safety devices - how they operate, how they are wired and their uses. Also included are the use and functions of schematics diagrams, pictorial diagrams and control operations. This course provides training necessary for the EPA certification exam.

HVA 109 5 C/75 CH**Ventilation and Duct Fabrication***Prerequisite: HVA 106**Lab Fees*

This course covers sheet metal design, layout, and construction. Sizing and installation of air handling systems based on selected blueprints is included in this course, as well as construction of common ducts and sheet metal components.

HVA 110 4 C/60 CH**Forced Air and Hydronic Heating***Prerequisite: HVA 106**Lab Fees*

This course covers application, installation and service of steam and Hydronic heating systems, including equipment selection, layout, construction, testing, adjusting and troubleshooting. Radiant Heating Systems are also studied.

HVA 111 3 C/45 CH**Applied Electricity in Air Conditioning and Heating***Prerequisites: HVA 100 or HVA 106**Lab Fees*

In this course, the student will learn the fundamentals of electricity as applied to air conditioning, heating and refrigeration, electrical symbols, circuits, electric meters, alternating current, single 3-phase motors, testing, motor protection and troubleshooting.

HVA 115 5 C/75 CH**Physical Properties of Air and Duct Design***Prerequisite: HVA 109**Lab Fees*

This course covers advanced commercial, industrial and architectural sheet metal duct design, layout, fabrication and installation. Custom duct work for difficult installation will be discussed, designed and fabricated in this course.

HVA 118 3 C/45 CH**Codes and Regulations***Prerequisites: HVA 100, HVA 106**Lab Fees*

This course provides the student with the Heating and Refrigeration Safety Code of the American Standard Association as approved by the American Society of Heating, Refrigerating and Air Conditioning Engineers and the cities of Detroit and Dearborn. This course covers scope and purpose, derivation, refrigerant, classification, systems required for various establishments, installation requirements, piping valves, fittings and related parts and safety devices.

HVA 120 3 C/45 CH**Advanced Heating and Heating Controls***Prerequisite: HVA 106**Lab Fees*

This course covers state-of-the-art heating units as well as the basics of geothermal and passive solar equipment used to assist in heating residential and commercial establishments. In addition, principles of sustainable construction and sustainable mechanical systems are discussed.

HVA 200 3 C/45 CH**Introduction to Boiler Plant Maintenance***Prerequisite: HVA 106**Lab Fees*

This course examines low pressure boilers found in residential and light commercial applications. Topics covered include boiler construction, boiler fittings, steam tables, steam cycles, feed water systems, fuel systems, draft systems, boiler water treatment, and principles of boiler operation and boiler operator procedures.

HVA 205 3 C/45 CH**Steam I***Prerequisite: HVA 200**Lab Fees*

This course examines high pressure fire tube and water tube boilers along with their various applications. Topics covered include boiler design and construction, boiler fittings, steam and water auxiliaries, fuel burning equipment, draft, instrumentation and combustion controls, boiler water treatment, steam boiler operation and licensing.

HVA 210 3 C/45 CH**Steam II***Prerequisite: HVA 205**Lab Fees*

This course introduces students to the field of Stationary Engineering as it relates to the operation of fossil fuel based power plants. Topics covered include the steam plant cycle, coal fired boilers, oil and gas fired boilers, industrial and small power plants, super heat steam temperature control, furnace design, boiler settings, boiler accessories, combustion of fuels, pumps, steam turbines, super heaters, condensers, cooling towers, and waste to energy plants.

HVA 215 3 C/45 CH**Boiler Plant Accessories***Prerequisite: HVA 200**Lab Fees*

This course covers boiler foundations and supports, safety devices, water walls, headers drum materials, laying up of boilers, heat absorption rates of contamination of various water surfaces, pumps, injectors, regulators, turbines, collectors and various traps, separators and draft regulators. The use of make-up air heat exchangers will be examined. This course provides training necessary for the High Pressure Boiler Operators licensure exam.

HISTORY (HIS)

HIS 151 3 C/45 CH

World Civilization I Pre-History – 1500 CE

This course is a Global History studying the development of civilizations from the end of the Pleistocene Epoch through the European Renaissance. The course focuses upon the political, economic, and cultural development and achievements of, and the connections and networking between, various civilizations and societies of the world.

HIS 152 3 C/45 CH

World Civilization II 1500 CE - Present

This course is a Global History surveying major civilizations of the world in the post-European Renaissance period featuring the development of politics, economics, science, and culture. Emphasis is placed on the increasing interdependence of all Earth's societies.

HIS 220 3 C/45 CH

History of Michigan

This course covers the historical development of Michigan from the period of the French exploration to the present. The major political, social and economic developments of the state. Emphasis on southeastern Michigan, especially the metropolitan Detroit area.

HIS 230 3 C/45 CH

Patterns of American Life: A Cultural History of 17th to 19th Century America

This course traces the growth of American society from colonial days through the nineteenth century. Influences such as immigration, religion, frontier settlement, technology, the family, and education are explored.

HIS 249 3 C/45 CH

U.S. History I 1607 - 1865

This course covers the political, social and economic development of the United States from colonization through the Civil War. Emphasis is placed on colonial America, the Revolutionary War, the Constitution, the slavery question and the Civil War.

HIS 250 3 C/45 CH

History of the United States II 1865 to Present

This course covers the rise of the United States as an industrial leader and world power. Emphasis on the transition from slavery to freedom, the growth of big business, the Great Depression, postwar America and America's wars.

HIS 255 3 C/45 CH

History of American Labor

This course covers the growth of organized labor from early craft unions, through the struggles of the industrial revolution, to the present multi-organizational federations. Analysis of current problems, organizational forms and activities of organized labor.

HIS 261 3 C/45 CH

African-American History I

This course is an American history course that focuses on the role the African-American has played in American history up to 1865. A survey of the African background, the Colonial period and the African-American experience from the American Revolution to the Civil War. This course provides students with a general background on the development of the American nation and the significant role played by African-Americans prior to the Civil War.

HIS 262 **3 C/45 CH**
African-American History II

This course is an American history course from 1865 to the present. The course focuses upon the African-American during the Reconstruction period and the thoughts and actions of African-Americans during the Twentieth Century as expressed through various leaders and organizations. This course provides students with a general background on the development of the American nation and the significant role played by African Americans from the period of the Civil War to the present.

HOME HEALTH CARE (HHA)

HHA 200 **4 C/60 CH**
Home Health Aide Skills

This course covers basic theory and skills needed for a Home Health Aide to assist patients in the home care and assisted living settings. Topics include client observation, ambulation, transfer, transport, personal grooming and assistance. Safety of patient and caregiver are stressed throughout the course. Skills and techniques learned are demonstrated in the lab hours imbedded in the course.

HOMELAND SECURITY (HLS)

HLS 100 **3 C/45 CH**
Introduction to Homeland Security

This course is designed to introduce the audience to fundamental components and concepts of homeland security. Topics that will be discussed are: History and origins of terrorism, critical infrastructure-identify and protect, national security strategies and organizations and an introduction to weapons of mass destruction.

HLS 101 **3 C/45 CH**
Introduction to Understanding Terrorism

Prerequisite: HLS 100

This course is designed to provide a history of terrorism both foreign and domestic. It will explore terrorism, both foreign and domestic. It will explore topics such as new adversaries, motivation, and tactics for global terrorism to include the exploration of domestic acts occurring in the U.S.

HLS 102 **3 C/45 CH**
Business and Industry Crisis Management

This course is designed for business and industry. Topics include: contingency planning, business area impact analysis, risk communication and management, crisis management, disaster recovery and organizational continuity.

HLS 103 **3 C/45 CH**
Emergency Management Principles

This course is designed for tourism, hospitality and travel management industries. Topics include: overview of disaster threats to tourists, industry managerial experiences, assessing tourist business vulnerabilities, industry disaster planning and customer and employee expectations.

HLS 104 **3 C/45 CH**
Terrorism and Emergency Management

This course is designed for emergency response personnel. Topics include: history of terrorism in the United States, domestic and international terrorism, law enforcement/national security aspects, applying emergency management framework, the structure of antiterrorism programs, preparing and responding to major events.

Continued on next page.

Homeland Security (HLS) continued

HLS 105 **3 C/45 CH**
Hazards Risk Management

This course is designed for emergency response personnel. Topics include: contribute to the reduction of growing toll of disasters in the United States by providing an understanding of a process that provides a framework that may be applied at all levels of communities and governments, to identify, analyze, consider, implement and monitor a wide range of measures that contribute to their well-being.

HLS 201 **3 C/45 CH**
Introduction to Intelligence

Prerequisite: HLS 100
This course is designed to introduce the student to the intelligence community of the U.S. government. The student will learn the importance of information sharing between the intelligence community and local law enforcement agencies. Topics will include: the history of intelligence, sources of intelligence, the various steps in gathering intelligence, and how intelligence applies to Homeland Security.

HLS 202 **3 C/45 CH**
Homeland Security Emergency Management

Prerequisite: HLS 100
This course is designed for emergency response personnel and will survey emergency and disaster management. Topics include: the history of domestic and international terrorism; natural and technological hazards and risk assessment; and the emergency management disciplines of mitigation, response, recovery, preparedness and planning.

HLS 203 **3 C/45 CH**
Counterterrorism for First Responders

Prerequisite: HLS 100
This course is designed for the first responders that are first on the scene of terrorism incidents whether they are foreign or domestic. The must provide security to the site, give aide to the wounded and literally put out the fire. The first responders will be prepared to handle all types of hazardous materials and effectively deal with chemical and biological events. The course provides step-by-step procedures for recognition and identification procedures for handle terrorist events.

HOTEL MANAGEMENT (HTM)

HTM 105 **3 C/45 CH**
Introduction to Hotel and Restaurant Management

The focus of this course is on analysis and understanding of the interdependent nature of major departments within a hotel operation. Emphasis will be placed on food and beverage, front office and rooms division, sales, human resources and facility management.

HTM 106 **3 C/45 CH**
Hotel and Restaurant Management

This course is designed to provide students with an in-depth study of Hotel and Restaurant Management. Special attention will be paid to supervision, procurement, computer systems, and the international hotel and restaurant management market.

HTM 200 3 C/45 CH**Hotel and Restaurant Operations**

The focus of this course is on analysis and understanding of food, beverage service and controls for hotel dining rooms, restaurants, banquets, and cafeterias. Emphasis will be placed on food and beverage management, menu planning, personnel, merchandising, operational reports, and equipment. The course will also cover operational regulations pertaining to safety, health, taxes, and licenses. The course will teach students how to successfully manage food and beverage operations found in lodging properties including coffee shops, gourmet dining rooms, room service, banquets, lounges, and entertainment/show rooms.

HTM 210 3 C/45 CH**Customer Service Management**

This course will introduce you to the rewarding careers available in the hotel front desk management. Hotel general managers are required to meet the challenges of day to day operations while practicing solid future planning. This course will present the technological advantages today's hotel manager have at their disposal and the challenges of hiring, training, scheduling and empowering workers to achieve top quality results. This course is specifically designed to train students to enter front desk in an assistant or supervisory role. The hotel's front desk is the control center for the property and workers at the supervisory level, and above must be well trained and motivated in order to achieve business objectives of a high yield, high occupancy rate, and above all top quality service.

HTM 225 3 C/45 CH**Special Events and Catering Management**

The focus of this course will be on management and operations of conventions, meetings, banquets, trade shows, and exhibition for both profit and nonprofit organizations. Emphasizes on programs, planning, budgeting, contracts, marketing, facility selection, and exhibit and convention planning. Special emphases will be put on catering sales and management.

HTM 299 3 C/45 CH**Hotel Management Practicum**

This course provides a forum where students can acquire entry level knowledge and skills in the hospitality industry while in a performance setting. Students apply the knowledge and skills acquired at WCCCD in an appropriate hospitality establishment approved by the instructor.

HUMANITIES (HUM)

HUM 101 3 C/45 CH**Introduction to the Visual Arts**

This course provides an overview of the visual arts and its importance in our lives. The course covers the visual arts in regards to basic elements, such as line, space, color and light. Through a global lens, it also delves into specific art forms, such as painting, sculpture, film and architecture. The course is designed for those desiring to become a better informed and appreciative audience member of the visual arts. Field trips may be required to enhance the student's learning process and experience.

Continued on next page.

*Humanities (HUM) continued***HUM 102 3 C/45 CH****Introduction to the Performing Arts**

This course covers the importance of music, dance, poetry and drama in contemporary life. This question is examined in relation to the individual and society with emphasis on HOW to listen to the music and the words. The course is designed for people who make up audiences and for the student who would like to be a more creative person and a better informed consumer.

HUM 103 3 C/45 CH**The Art of Humanities**

This course uses a thematic approach in examining philosophy, literature, drama, art and music.

HUM 126 3 C/45 CH**Foundations of African-American Art**

This course covers a survey of African American visual arts and artists from 1900 to the present. Particular emphasis will be given to the artists of the Harlem Renaissance. Major artists such as Tanner, Heyden, Lawrence, VanDerZee, Polk, Bearden, Catlett, White, and Hunt will be studied. The influence of traditional African art on contemporary African American Art will also be explored.

HUM 141 3 C/45 CH**Introduction to the Theater**

The course is designed to increase the student's understanding of theatre through a study of the fundamental principles and techniques of playwriting, acting, directing, technical theatre, and production. The course is designed for those desiring to become a better informed and appreciative audience member of the theatre. Field trips may be required to enhance the student's learning process and experience.

HUM 211 3 C/45 CH**Music Appreciation**

This is an intensive study of music with emphasis on perception and style. Musical composition and performance styles are emphasized with examples of listening that range from early symphonies to contemporary music of today. The course is designed for those desiring to become a better informed and appreciative audience member of music. Field trips may be required to enhance the student's learning process and experience.

HUM 212 3 C/45 CH**Music History**

This is a study of the historical development of music.

HUM 221 3 C/45 CH**Art Appreciation**

Consumerism and aesthetics are stressed in this intensive study of visual arts. The course includes theories of color, design and current views on the educational value of children's art and recommendations for collecting art for home and office.

HUM 222 3 C/45 CH**Art History**

A chronological survey, the course focuses on the subjects, stories and symbols of visual art. Diverse cultures and styles are studied with examples that include Biblical scenes, African legends and contemporary American trends.

HUM 231 3 C/45 CH
Introduction to Film

This course covers a general approach to film, offering a comprehensive view of motion pictures as a communications medium, an industry, and an art form. This class includes historical highlights, aesthetic approaches and criticism and fundamentals of production. Students will be expected to view, identify and critique movies in the context of basic filmmaking principles and techniques.

HUM 232 3 C/45 CH
Film History

This course covers a historical approach to motion pictures from the early experimenters and pioneers. It includes the major trends in U.S. and world film production, the relation of film to society and film as communications medium and art form.

HUMAN SERVICES (HUS)

HUS 105 3 C/45 CH
Group Expression for Self Growth I

The focus of this course is student development of self-perception, self-understanding and self-growth through group interactions with other students in interpersonal competence acquisition groups. Students will examine their personal values, beliefs, motivations and goals.

All students pursuing certificates and degrees in Child Care Training, Corrections, Law Enforcement Administration, Mental Health Worker, Pre-Social Work, Registered Social Work Technician, and Substance Abuse Counseling are required to complete this course.

HUS 135 3 C/45 CH
Professionalism in Human Services

Prerequisite: HUS 105

This course covers professional ethics, values, behaviors and communication skills are addressed. This course prepares the student for a field-site situation.

HUS 200 4 C/60 CH
Group and Social Process

In this course the student will learn systematically to analyze group effectiveness with focus upon group dynamics research findings and theory of group process. Roles of group members and how to manage them; group leadership; decision making in groups; group goals; stages of group development and communication within groups. This course covers conflicts of interest, the use of power, cohesion and norms, problem solving, structured group decision-making skills, discussion and growth groups. Effective group facilitation, conflict resolution skills and effective group implementation into Human Service Settings will also be learned. Students learn how groups develop and function, as they participate in an experiential classroom format. Class activities will require and encourage student group interaction, communication, and cooperation, as they read and analyze textbook assignments and related references.

HUS 246 3 C/45 CH
Independent Study: Human Services

In this course students explore questions of special interest through research under the direction of a faculty advisor. Basic research methodology is introduced; written reports are required. It's a substitute for an unavailable required course in the last semester when graduation requirements are not met.

INFORMATICS (INF)

INF 100 1 C/15 CH

Online Learning and Digital Access

Corequisite: INF 105

A hands-on course for non-majors dealing with personal computers in a wide variety of settings. Topics include: basic computer concepts, computer hardware, operating systems, the Internet, online safety and security, email, computer applications including word processors, presentation graphics, databases, and the impact of computers on society.

INF 105 3 C/45 CH

Foundations of Informatics

Corequisite: INF 100

Introduction to informatics, basic problem solving and elementary programming skills. It also provides a survey of computing tools in the context of selected disciplines.

INF 200 3 C/45 CH

Evaluating Information Sources

Prerequisite: INF 105

This course is designed to introduce students to the world of reference and information service. Core abilities will include the evaluation of print and electronic information sources, basic research methodology, search strategies, and standard bibliographic formats for determining the authority, currency and overall quality of resources.

INF 201 3 C/45 CH

Human-Computer Interaction

Prerequisite: INF 105

This course discusses the application of psychological and physiological theory and experimental findings to the design of human-computer interaction. Topics include: an overview of applicable research methods; visual, auditory, and other perception modalities; cognition; decision making; display and control design; stress; and social aspects of design.

INF 220 3 C/45 CH

Informatics Capstone Project

Prerequisite: INF 105, INF 200, INF 201

This course is designed to apply theory learned in the classroom and provide job experience. It will also allow the students to see first-hand the information center's role in community and their role in the profession. Several seminar discussions will be included to analyze their position with the assistance of their instructor. The student will evaluate this experience and have the opportunity to offer their insight.

JAPANESE (JPN)

JPN 101 4 C/60 CH

Elementary Japanese I

This course is an introduction to Japanese language and development of Japanese culture and its characteristics. This course is recommended for educators and others who require or desire an intensive overview of the language.

JPN 102 4 C/60 CH

Elementary Japanese II

Prerequisite: JPN 101

This course is a continuation of JPN 101 and is designed to provide basic knowledge of Japanese language for practical communication. It is designed to develop skills in reading, writing, speaking and listening. It also provides information about everyday life and culture in Japan. Students learn more advanced sentence structures and expressions.

LAW ENFORCEMENT ADMINISTRATION (LEA)

LEA 201 3 C/45 CH

Introduction to Law Enforcement

Prerequisite: CJS 100

This course introduces the student to the field of law enforcement and explores its historical, philosophical and operational development in the United States. It exposes the student to the different perspectives of the police role and familiarizes students with the concept of discretion as it applies to policing and law enforcement. This course also examines the constitutional limits imposed on the police in their use of excessive and/or deadly force.

LEA 210 3 C/45 CH

Highway and Traffic Control

Prerequisite: CJS 100

This course covers the basic law enforcement practices and responsibilities for the safe and efficient movement of vehicles and pedestrians. It also examines law enforcement's relationship with city planners, engineers, court personnel and the judiciary in encouraging safe commuting habits and adherence to the law.

LEA 225 2 C/30 CH

Law Enforcement Administration: Seminar I

Prerequisites: CJS 100, LEA 201

Corequisite: LEA 226

This course is an overview of law enforcement administration in both theory and practice. Case studies will be employed to help students understand and resolve the many problems facing law enforcement officers and administrators. Students will be invited to share their life experiences and to offer their own unique perspectives during class.

LEA 226 4 C/60 CH

Law Enforcement Administration: Practicum

Prerequisite: CJS 100, LEA 201

Corequisite: LEA 225

This course provides an internship experience for students in a supervised law enforcement setting. Students will engage in administrative and community policing work and may possibly accompany law enforcement officers on patrol. Students will be required to maintain an activity logbook and/or make written reports on their daily duties and field activities.

LEA 230 3 C/45 CH

Fundamentals of Criminal Investigation

Prerequisites: CJS 100, LEA 201

This course teaches the basic principles of criminal investigation. The course will examine, among other things, the following major subjects: surveillance techniques, crime scene investigation, the collection and preservation of evidence, the use of informants, and interview and interrogation techniques.

LEA 231 3 C/45 CH

Criminal Law and Justice I

Prerequisite: LEA 230

This course examines the substantive content of the criminal law and court processes. It explores the historical development of the law and traces the origins of American jurisprudence to the English common law. The course also examines the limitations on government power and the protections afforded the accused in a criminal prosecution.

Continued on next page.

Law Enforcement Administration (LEA) continued

LEA 232 3 C/45 CH
Criminal Law and Justice II

Prerequisite: LEA 231

This course is a continuation of LEA 231 which includes the laws of arrest, search and seizure, the rights of the accused, duties of police officers, laws of evidence and criminal trials, survey and examinations of the roles of the police officer, the judge, jury, defense counsel and prosecution in the judicial process.

LEA 235 3 C/45 CH
Race Relations For Law Enforcement

Prerequisites: CJS 100, LEA 201

This course covers racial and cultural tensions as they relate to law enforcement. Techniques which consist of case histories, psychological confrontations, attitude changes, economic oppression, education deprivation and social injustices.

LEA 250 3 C/45 CH
Social Problems in Law Enforcement

Prerequisites: CJS 100, LEA 201

This course covers the role of today's police officer in a multicultural society. It includes examination of the problems and causes of tension in social interactions and techniques in alleviating them.

LEA 253 3 C/45 CH
Law Enforcement Capstone

Prerequisites: LEA 225, LEA 226

The capstone course is a culmination of the student's learning experiences that require demonstration of competencies gained throughout the program. Assessment may be accomplished using portfolios, actual testing, case studies and additional field work approaches.

LIGHT RAIL ENGINEERING
TECHNOLOGY (LRT)

LRT 101 3 C/45 CH
Rail Transportation and Railroad Careers

This introductory course covers the history of rail development and operations in North America and an exploration of railroad careers to assist students in choosing a suitable career path. Included in the course are discussions of the economic impact of rail transportation, the various modes of rail transportation (passenger and freight), and the political reality of the industry. Local field trips to rail and light rail settings are an important part of the class structure.

LRT 102 3 C/45 CH
Railroad Rules, Regulations, Standards and Practices

Prerequisite: LRT 101

This course provides an overall understanding of governmental rules, regulations, standards and practices as they apply to railroad operations. The class includes a review of the Code of Federal Requirements – Title 49 (Transportation Standards), Railroad Standards and Practices Manual (AREMA) and the NORAC Operating Rules (Northeast Operating Rules Advisory Committee). Students are required to take the NORAC Rules Exam during the class and will learn to write rail orders, timetables and rules.

LRT 201 3 C/45 CH
Safety in the Railroad Workplace

Prerequisite: LRT 102

This course covers the principles, policies and regulations governing safe work practices in the rail industry. The learner will be guided through an understanding of how "Safety Culture" gets established in all work settings. The meaning of track signs and signals will be covered as well as working with telemetry devices, getting on and off static and moving equipment, crossing over static

equipment, using radios, providing flag protection, and troubleshooting. Railway safety inspections pre-departure and in route will be covered.

LRT 202 3 C/45 CH

Reading and Interpreting Railroad Diagrams

Prerequisites: LRT 102, EE 101, EE 102

This course provides an overall understanding of how to read and interpret electrical diagrams commonly used in the rail industry. The course will include a review and discussion of the following topics: Ladder Diagrams, Contactors, Motor Starters, Motors, Programmable Logic Controller, and other related railroad electrical symbols.

LRT 240 4 C/60 CH

Railroad Signaling and Switching

Prerequisite: LRT 102

This course provides a basic understanding of a railroad signal system, including track circuits and all applicable federal laws and guidelines. Included is the basic concept of marshalling (making sure the railcars are arranged in the correct sequence) and efficient, effective switching procedures.

LRT 242 4 C/60 CH

Railroad Communications

Prerequisites: LRT 240

This course introduces students to a basic understanding of railroad communications. Course topics include: frequency and pulse modulation, AM and FM transmitters and receivers, electromagnetic radiation, digital data communication, and all applicable laws and regulations.

MANAGEMENT (MGT)

MGT 205 3 C/45 CH

Principles of Management

Prerequisite: BUS 150

A presentation of the basic organizational concepts in light of the general framework of planning, organizing, coordinating and controlling. Case studies will be used to explain the relationship of the functional areas of an organization to the company's overall objective.

MGT 210 3 C/45 CH

International Management

Prerequisite: BUS 150

This course covers international management strategies and lays a foundation for studying the global business environment – varying political, economic and legal environments, globalization, international organizations and regional integration. Topics include, but are not limited to, formulating and implementing strategy and strategic alliances, developing a global management cadre, motivating and leading, staffing, training, and compensation for global operations. Students explore the cross-cultural environment – the dimensions of culture and cross-cultural communication. Emphasis is placed on the management role of these functions.

MGT 299 3 C/45 CH

Retail Management Practicum

This course provides a forum where students can acquire entry level knowledge and skills in retail management while in a performance setting. Students apply the knowledge and skills acquired at WCCCD in an appropriate retail establishment approved by the instructor.

MANUFACTURING TECHNOLOGY (MAN)

MAN 101 3 C/45 CH Manufacturing Process I

An introduction to precision measuring tools used in tooling and manufacturing processes. In the shop, emphasis is placed on exercised and projects that embody the process and operation of using hand tools, layout tools, and machine tools, such as hack saws, belt and disc sanders, drill press, vertical mill machines and surface grinders. Classroom emphasis is placed on related information that is essential to the set up and operations of machine tools, and to perform basic processes and operations in the shop.

MAN 105 3 C/45 CH Basic Metrology

In this course students will be introduced to the concepts and practices of dimensional metrology and the modern processes, software and equipment used to ensure a high level of precision, accuracy and repeatability.

MAN 115 3 C/45 CH Manufacturing Process II

Prerequisite: MAN 101

This course is a further study in manual machining exposing the students to additional hands-on machining processes utilizing lathes, and surface grinders with hands-on lab projects required.

MAN 120 3 C/45 CH Survey of Material Science

Lab fee

Prerequisite: MAN 101

This is a study of the atomic structure, bonding, crystallization, and physical and mechanical properties of metals. The classification and selection of materials as well as heat-treating and hardness testing will be examined.

MAN 205 3 C/45 CH

Advanced Metrology

Prerequisite: MAN 105

In this course students will continue their study of dimensional metrology and utilize state-of-the-art surfacing software in conjunction with point-to-point measuring tools and 3D scanning equipment.

MAN 215 3 C/45 CH

Quality and Inspection

Prerequisite: MAN 105

This course is designed to give students a background in precision techniques of part measurement and testing procedures. Emphasis is placed on modern tools and techniques to track accuracy of manufactured parts.

MAN 220 3 C/45 CH

Fixture Design and Construction

Prerequisites: MAN 115, CNC 234

In this course students will gain knowledge and understanding of proper construction and utilization of fixtures in clamping and holding irregular shaped parts within modern CNC equipment.

MAN 225 3 C/45 CH

Introduction to Hard Machining

Prerequisite: CNC 235

In this course students will study strategies and techniques for hard part machining including risks, rewards, tooling considerations and impact of hard machining on tool life and cycle times in a modern manufacturing facility.

MARKETING (MKT)

MKT 200 3 C/45 CH

Principles of Marketing

Prerequisite: BUS 150

A basic course with direct application to marketing functions and policies. Course includes consumer and industrial marketing concepts, service marketing, standardization and grading, pricing and government regulations.

MKT 240 3 C/45 CH

Principles of Digital Marketing

The Principles of Digital Marketing course provides an overview of the fundamentals of tools and techniques in Digital Marketing. WCCCD Students will learn the fundamentals of Digital Marketing platforms and planning techniques required for successful digital marketing infrastructures transformation. An introduction to the theory and practice of digital marketing includes email marketing, mobile marketing, and social media marketing. Emphasis will be placed on marketing strategies emerging from new technologies (Cloud, Internet, AI and hands on projects). This course intends to provide students with a strategic and tactical perspective of the field of digital marketing.

MATHEMATICS (MAT)

MAT 105 3 C/45 CH

Pre-Algebra

This course is an introduction to variables in building mathematical and problem solving skills. Strong emphasis will be placed on operations with signed numbers.

MAT 110 3 C/45 CH

Business Mathematics

Prerequisite: MAT 105

This course covers solving problems relating to bank and sales records, percentages in business, financial charges and statements, payrolls and taxes, insurance, bonds, stocks and annuities.

MAT 111 3 C/45 CH

Pre-College Mathematics

This course covers solving problems with arithmetic, building skills in using whole numbers, fractions, decimals, and introduction to variables in building mathematical and problem solving skills. Strong emphasis will be placed on operations with signed numbers as well as solving first and second degree equations, operations on polynomials, operations on rational expressions, word problems, graphing, solving linear equations and systems of linear equations, and inequalities. Introductory concepts will be extended to include absolute value equations, rational exponents, complex numbers, quadratic equations, slope of a line, conic sections, functions and logarithms. Students will use customized software that includes videos, homework assignments, quizzes and tests available via internet to extend time on task.

With the guidance of instructors and time tasks in a math lab, students accelerate through math competencies on a progressive and individual basis.

MAT 112 3 C/45 CH

Elementary Algebra

Prerequisite: MAT 105

This course covers topics which include solving first and second degree equations, operations on polynomials, operations on rational expressions, word problems, graphing and solving linear equations and systems of linear equations and inequalities.

Continued on next page.

*Mathematics (MAT) continued***MAT 113 3 C/45 CH****Intermediate Algebra**

The emphasis of this course is on extending introductory concepts. New concepts presented are absolute value equations and inequalities, rational exponents, complex numbers, quadratic equations and inequalities, the slope of a line, conic sections, functions and logarithms.

MAT 1130 4 C/60 CH/45 L/15 LAB**Intermediate Algebra**

The emphasis of this course is on extending introductory concepts. New concepts presented are absolute value equations and inequalities, rational exponents, complex numbers, quadratic equations and inequalities, the slope of a line, conic sections, functions, and logarithms. This course comes with additional contact hours and supplemental instruction.

Students that may need additional support may be advised to take MAT 1130.

MAT 121 3 C/45 CH**Technical Mathematics I**

Prerequisite: MAT 105

This course covers application of arithmetic and basic algebra in technical problems, applying rules in arithmetic (whole numbers, fractions, decimals, percentage) to solve technical problems.

MAT 122 3 C/45 CH**Technical Mathematics II**

Prerequisite: MAT 121 or placement test

This course is a continuation of MAT 121, using algebra to solve technical problems through the applications of equations, exponents and graphing methods in industrial work.

MAT 128 3 C/45 CH**Math for Elementary Teachers I**

Prerequisite: MAT 112

The course provides the future elementary school teacher with a perspective for understanding mathematics taught in the elementary school. Topics include the study of problem solving techniques, fundamental concepts and structure of number systems, sets, numeration systems, integers, number theory and rational numbers.

MAT 129 3 C/45 CH**Math for Elementary School Teachers II**

Prerequisite: MAT 128

This course is a continuation of MAT 128 which provides the future elementary teacher with background for understanding mathematics taught in the elementary school. Topics include probability, statistics, geometry, motion geometry, coordinate geometry and concept of measurement.

MAT 131 3 C/45 CH**Descriptive Statistics**

Prerequisite: MAT 113 or placement test

This course is a basic course for students in business administration, education, psychology, and/or economics. It is a preparation for inferential statistics, providing a definition of statistics, measurements, working out distributions, frequency polygons, measuring central tendency and variability and finding correlation and regression.

MAT 135 4 C/60 CH**Quantitative Reasoning***Prerequisite: MAT 113 or placement test*

This course in Quantitative Reasoning surveys the way that mathematics is used in business and industry. As our society grows more technologically complex, the ability to interpret and analyze quantitative information has become an increasingly essential skill. The topics in this course are intended to develop analytic reasoning and the ability to solve quantitative problems. Topics include: the construction and interpretation of graphs, spatial visualization and geometry, descriptive statistics, math of business and finance, functions and modeling, probability and logic. Emphasis will be placed on the appropriate use of units and dimensions, estimates, and mathematical notation.

MAT 155 4 C/60 CH**College Algebra***Prerequisite: MAT 113, or by placement*

This course includes the solution of linear, quadratic and fractional equations and inequalities, lines, parabolas and circles are studied. The concept of function is presented and polynomial, rational, inverse, exponential and logarithmic functions are studied and graphed. The use of graphing technology or a computer algebra system is required.

MAT 156 4 C/60 CH**Trigonometry***Prerequisite: MAT 155 or by placement*

In this course the translation of functions is reviewed. New topics include the study and graphing of trigonometric functions, inverse trigonometric functions, right triangle trigonometry, trigonometric identities and equations, the Laws of Sines and Cosines with applications, and Polar Coordinates are introduced.

MAT 171 4 C/60 CH**Analytic Geometry and Calculus I***Prerequisite: MAT 156 or by placement*

In this course the functions and their graphs are reviewed. The concepts presented include limits, derivatives, differentiation of algebraic and trigonometric functions, applications of the derivative, definite and indefinite integrals.

MAT 172 4 C/60 CH**Analytic Geometry and Calculus II***Prerequisite: MAT 171*

This course covers the study of integration techniques, applications and integrals, limits and indeterminate forms, infinite sequence and series, improper integrals and an introduction to parametric and polar coordinates. The use of graphing technology or a computer algebra system is required.

MAT 271 4 C/60 CH**Analytic Geometry and Calculus III***Prerequisite: MAT 172*

In this course the concepts presented include plane curves, polar coordinates, vectors, surfaces, vector-valued functions, partial differentiation and multiple integration with applications. The study of vector calculus includes line and surface integrals with applications.

MAT 272 4 C/60 CH**Linear Algebra***Prerequisite: MAT 271*

This course covers core materials, vectors, spaces, linear transformations and matrices, systems of linear equations, determinants and digitalization.

Continued on next page.

*Mathematics (MAT) continued***MAT 273 4 C/60 CH****Differential Equations***Prerequisite: MAT 272*

This course covers the following topics: the study of first order equations, higher order equations, linear systems of differential equations, power series solutions, and the Laplace transform. The use of a computer algebra system is required.

MECHATRONICS TECHNOLOGY (MCT)

MCT 203 3 C/60 CH**Electrical Machinery and Controls***Prerequisite: EE 102*

This course covers the principles involved in the function of DC and AC motors and generators and their connection, operation and load characteristics. Study of different types of speed controls and starters, characteristics of single phase motors and polyphase machines including synchronous and induction motors, transformer characteristics such as losses, efficiencies, paralleling transformers and transformer testing are included. Laboratory experiments to examine the characteristics of the various DC and AC motors and generators, using various speed controllers and starters.

MCT 207 2 C/45 CH**Introduction to Hydraulics and Pneumatics**

Survey of basic industrial hydraulics and pneumatics, including hydraulic laws and principles, necessary calculations, ANSI symbols, drawing of complete schematic diagrams of circuits studied, controls and motors used in hydraulic and pneumatic systems measuring devices and complete hydraulic and pneumatic systems. Lab coat is required.

MCT 208 3 C/60 CH**Programmable Logic Controllers***Prerequisites: CT 203*

Programmable controller hardware, relay ladder diagram and logic programming, timers and counters, arithmetic function, process control and data acquisition, data communication, computer numerical control computer controlled machines and programmable controller's installation and troubleshooting systems will be covered. Allen-Bradley RSLogix 500, and RSLogix 5000 family programmable controllers will be used in the lab.

MCT 210 3 C/60 CH**Programmable Logic Controllers – Siemens**

Siemens programmable controller hardware such as I/O modules, I/O devices and software such as times and counters, arithmetic, compare and move instructions, data communications, installation and troubleshooting will be covered. Students will learn ladder diagram programming using Siemens PLC family.

MCT 215 3 C/60 CH**Advanced Programmable Logic Controllers***Prerequisite: MCT 208*

This is an advanced course in Programmable Logic Controllers in programming and hardware using Allen-Bradley programmable logic controllers family. Students will use programmable logic controllers in industrial automation environments. PLC installation, maintenance and RSLogix 5000 will be covered in this course.

MEDICAL BILLING SPECIALIST (MBS)

MBS 108 3 C/45 CH

Medical Coding

This course is designed to give students an overview of the medical insurance industry, and teach basic CPT and ICD-9 and 10 coding as used in medical insurance billing. It is part of the preparation for entry-level jobs in a doctor's office or other medical facility.

MBS 112 3 C/45 CH

Medical Billing

This course is designed to give students the information and skills necessary to file and collect health insurance claims and use related software. Skills to manage the financial functions of a physician's office are included such as Front Office Management, Filing CMS 1500 and CMS 1450 forms, and patient record keeping. Information is also provided on starting a medical billing business from home.

MBS 122 3 C/45 CH

Advanced Coding

This course is designed for the student with prior billing and coding training or experience. Students will gain advanced knowledge and skill in coding more complex cases through a review of major body systems and solving real life problems. Compliance and reimbursement issues are included.

MBS 124 3 C/45 CH

Advance Coding CPT

This course is designed to give students advanced knowledge and skill in coding for medical insurance claims, and improved collection techniques to ensure successful claims reimbursement. It is organized according to the sections in the CPT book and answers frequently asked questions from real life situations.

MBS 126 4 C/60 CH

Medical Billing Practicum Experience

Practicum experience is 200 hours in a medical office setting receiving hands on experience in areas of medical administration which may include but not limited to medical records, scheduling, process of payments, follow-up, professional agencies and patient communication.

MEDICAL OFFICE SPECIALIST (MOS)

MOS 120 3 C/45 CH

Medical Office Management

Prerequisites: ALH 110, BUS 225

This course provides an in-depth look and examination of the role and functions of a Medical Office Specialist in today's Health Care settings. Topics include customer service skills, medical report preparation, data management, appointment system management, and other similar medical office systems tasks.

MOS 140 3 C/45 CH

Patient Care Management

Prerequisites: ALH 110, ALH 115

This course outlines the role of the Medical Office Specialist as it relates to Patient Case Management. Concepts of interacting within a Healthcare team or system, multiculturalism, and maintenance of patient care records will be thoroughly discussed in this class.

MOS 150 5 C/75 CH

Medical Administrative Specialist Practicum

Practicum experience is 240 hours in a medical office setting receiving hands-on experience in areas of medical records, medical billing, scheduling, and other general duties and responsibilities.

MENTAL HEALTH (MEH)

MEH 100 3 C/45 CH

Introduction to Mental Health

This course is an introduction to community mental health. This will provide students with the principles, values, attitude and skills needed to provide quality care in a community mental health setting. This is a foundation course with the intent to provide students with readily understandable set of principles that will enable them to talk with, engage, understand, and develop collaborative goals with mentally ill persons.

MEH 120 3 C/45 CH

Direct Care Services in Community Settings

Prerequisite: MEH 100

This course is for persons who provide direct care services in the behavioral health field to include persons with disabilities in the home and community settings. This course is highly experiential and involves the exploration of a wide-range of situations you will face in your role as a direct care provider.

MEH 130 3 C/45 CH

Behavioral Health and Criminal Justice

This course provides a comprehensive look at mental health in the criminal justice system. Topics within this course include the criminalization of individuals with mental illnesses, the process of deinstitutionalization, law enforcement responses, legal issues and mental health within the jails and prisons. Students will have the knowledge and skills necessary to serve justice-involved persons with severe mental illness and successfully work with and within the criminal justice system.

MEH 135 3 C/45 CH

Mental Health in Criminal Justice

Prerequisite: MEH 100

This course imparts the philosophies, practices, policies, and outcomes of the most generally accepted and scientifically supported models of treatment, recovery, relapse prevention, and continuing care for individuals in recovery transitioning from a justice facility.

MEH 240 3 C/45 CH

Psychopathology and Behavior I

Prerequisite: MEH 100

This course is a study and review of psychopathology with emphasis upon the etiology, symptomatology, treatment and prognosis of mental disorders.

MEH 250 3 C/45 CH

Applied Behavioral Analysis

Corequisite: MEH 251

In this course students will learn about the many different behaviorally-based teaching strategies used for children with Autism Spectrum Disorders. This course will focus on using behavior analysis and how it is used with autism and other special needs populations. Although this course focuses on the treatment of autism it is directly applicable to many therapeutic situations with many different populations.

MEH 251 3 C/45 CH

Field Experience in Applied Behavioral Analysis

Corequisite: MEH 250

This course provides students the opportunity to spend supervised time in the field practicing skills learned in the behavioral interventions for autism and related disabilities courses. Students will work directly with multiple children using a variety of Applied Behavior Analysis techniques. Students will then learn to implement behavior plans under the supervision of experienced Early Intervention staff and Board Certified Behavior Analysts (BCBA).

MUSIC (MUS)

MUS 100 3 C/45 CH

Introduction to the Fundamentals of Music

This course is an introduction to the vocabulary of music, basic terms, notation and appreciation. No credit for music majors.

MUS 101 3 C/45 CH

Fundamentals of Music I

This course is a basic class in the discipline of music, musical elements, theory, notation, scale formation, terminology and ear training.

MUS 102 3 C/45 CH

Fundamental of Music II

Prerequisite: MUS 101

This course is a continuation of MUS 101 with increased emphasis on ear training.

MUS 110 3 C/45 CH

Class Piano I

This course is a study of the fundamentals of piano, including keyboard techniques.

MUS 111 3 C/45 CH

Class Piano II

Prerequisite: MUS 110

This course is a continuation study of the fundamentals of piano, including keyboard techniques.

MUS 121 3 C/45 CH

History of Jazz I

This course provides an introduction to the history of jazz theory, technique, innovators and contributors.

MUSLIM WORLD STUDIES (MWS)

MWS 101 3 C/45 CH

Muslim Worldview and Foundations

Introduces the foundational beliefs, worldview, and ethical teachings of Islam. Explores core concepts such as tawhid, prophethood, scripture, worship, and community life, along with the role of Islamic thought in shaping personal and societal values.

MWS 102 3 C/45 CH

Islamic Civilization

This course examines the development of Islamic civilization from the 7th to 15th centuries, focusing on its global contributions in science, philosophy, art, literature, and architecture. Students will explore the cultural, intellectual, and political achievements of Muslim societies across regions such as the Middle East, North Africa, Persia, and Islamic Spain. Emphasis is placed on the diversity of Muslim experiences and the lasting influence of Islamic thought on world history.

MWS 103 3 C/45 CH

Global History of Islam

This course surveys the global history of Islam from its origins in 7th-century Arabia to the contemporary Muslim world. Emphasis is placed on political, economic, and social developments across different regions, including the Middle East, South Asia, Africa, and the West. Students will examine the expansion of Islamic empires, colonial and post-colonial transitions, reform movements, and the challenges and opportunities facing Muslim societies in the modern era.

MWS 106**3 C/45 CH****Islam and International Relations**

This course explores the international relations of Muslim-majority countries and the influence of Islamic thought on global politics. Topics include the political history of the Middle East, the role of religion in diplomacy and conflict, transnational Islamic movements, the impact of colonialism, and Muslim engagement with superpowers and international institutions. Students will analyze current events and historical case studies to understand how Islam intersects with global political systems and international security.

MWS 107**3 C/45 CH****Contemporary Issues in the Muslim World**

This course examines pressing contemporary issues facing the Muslim world, including political instability, religious reform, gender equity, education, extremism, global migration, and the impact of Western policies and modernity. Students will explore these topics in historical, cultural, and geographic context, with special attention to how they affect Muslim communities both globally and within the United States. The course encourages critical analysis of competing narratives, reform movements, and evolving interpretations of Islam in the 21st century.

MWS 112**3 C/45 CH****The Life and Legacy of Prophet Muhammad**

This course provides an in-depth study of the life and legacy of the Prophet Muhammad, from his early years in Mecca to the establishment of the first Muslim community in Medina. Students will explore key moments of revelation, leadership, conflict, and reconciliation as recorded in early Islamic sources. Emphasis is placed on the Prophet's role in shaping Islamic beliefs, ethics, law, and society, as well as the lasting impact of his teachings across history and cultures.

MWS 114**3 C/45 CH****Islam and Muslims in America**

This course explores the diverse history and experiences of Muslims in America, from the arrival of enslaved African Muslims to the growth of immigrant communities and contemporary Muslim life post-9/11. Students will examine key religious, cultural, and political developments that have shaped Muslim identity in the U.S., including the rise of Nation of Islam, Sunni and Shi'a communities, interfaith dialogue, Islamophobia, and media representation. The course emphasizes the intersection of race, religion, and American identity through the lens of Muslim experiences.

MWS 205**3 C/45 CH****Islamic Law and Ethics**

This course introduces students to the foundations of Islamic legal thought (fiqh) and ethical reasoning. It examines the primary sources of Islamic law—Qur'an, Sunnah, consensus (ijmā'), and analogical reasoning (qiyās)—and explores how these sources guide Muslim practice across diverse historical and cultural contexts. Key topics include ritual and personal law, family and inheritance law, social justice, moral conduct, and contemporary debates in Islamic ethics. Students will engage with case studies and global perspectives to understand how Islamic principles are applied in modern life.

MWS 299**3 C/45 CH****Capstone Seminar in Muslim and Islamic Studies**

This capstone seminar provides students with an opportunity to synthesize and apply their learning from the Muslim and Islamic Studies program. Students will complete a research project or community-based initiative that explores a contemporary issue, historical question, or cultural topic related to the Muslim world. The course includes peer presentations, critical readings, and guided reflection on how Islamic studies can inform academic, professional, and personal.

NURSING (NUR)

NUR 110 4 C/120 CH 30 L/90 LAB

Nursing Foundations

Prerequisites: ENG 119, BIO 155, BIO 240, BIO 250, BIO 295, ALH 105, Admission to the Nursing Program

Corequisites: NUR 112, NUR 118, NUR 119

This course provides an introduction to the nursing profession including history, standards of practice, legal and ethical issues, nursing process, and foundational nursing skills. An emphasis is placed on the roles and responsibilities of the nurse as a caregiver. Students will apply the skills learned a supervised laboratory practicum to develop care for clients in today's changing health care environment.

NUR 112 4 C/120 CH 30 L/90 CL

Medical Surgical Nursing I

Prerequisites: ENG 119, BIO 155, BIO 240, BIO 250, BIO 295, ALH 105, Admission to the Nursing Program

Corequisites: NUR 110, NUR 118, NUR 119

This course focuses on the application of the nursing process to the care of the adult patient experiencing medical-surgical health conditions in a variety of health care settings. Use of evidence-based practice is integrated to provide the student with current trends to better facilitate the development of clinical reasoning skills. Content includes a focus on cultural and psychosocial influences in the care of diverse patient populations.

NUR 114 3 C/90 CH 22.5 L/67.5 CL

Obstetric Nursing

Prerequisites: ENG 119, BIO 155, BIO 240, BIO 250, BIO 295, ALH 105, NUR 110, NUR 112, NUR 118, NUR 119, Admission to the Nursing Program

Corequisites: NUR 116, PSY 101

This course focuses on the application of the nursing process to the care of obstetric patient, the newborn, and the family unit in a variety of health care settings. The course also explores women's health across the life span. Emphasis is on the nursing student as a caregiver and the responsibilities this entails related to women's health. Use of evidence-based practice is integrated to provide the student with current trends to better facilitate the development of clinical reasoning skills. Content includes a focus on cultural and psychosocial influences in the care of diverse populations.

NUR 116 4 C/120 CH 30 L/90 CL

Medical Surgical Nursing II

Prerequisites: ENG 119, BIO 155, BIO 240, BIO 250, BIO 295, ALH 105, NUR 110, NUR 112, NUR 118, NUR 119, Admission to the Nursing Program

Corequisites: NUR 114, PSY 101

This course is a continuation of Medical-Surgical Nursing I with application of the nursing process in the care of the patient experiencing health-illness conditions in a variety of health care settings. Use of evidence-based practice is integrated to provide the student with current trends to apply in clinical reasoning. Emphasis is on the nursing student as a caregiver and the responsibilities this entails. Content includes a focus on cultural and psychosocial influences in the care of diverse patient populations.

Continued on next page.

*Nursing (NUR) continued***NUR 118 2 C/30 CH****Physical Assessment**

Prerequisites: ENG 119, BIO 155, BIO 240, BIO 250, BIO 295, ALH 105, Admission to the Nursing Program

Corequisites: NUR 110, NUR 112, NUR 119

This course focuses on the nursing knowledge necessary to perform and document a physical assessment. Common conditions and deviations of physical assessment are identified. Students apply the nursing process and demonstrate assessment skills in a supervised laboratory practicum.

NUR 119 2 C/30 CH**Pharmacology**

Prerequisites: ENG 119, BIO 155, BIO 240, BIO 250, BIO 295, ALH 105, Admission to the Nursing Program

Corequisites: NUR 110, NUR 112, NUR 118

This course examines the nursing process for managing the pharmacological care of the patient in today's changing health care environment. It explores safe medication administration with a focus on medication drug classification, concepts, and principles. Dosage calculations for safe medication administration are also incorporated. An emphasis is on the nursing student as a caregiver and the responsibility involved administration of medications.

NUR 210 3 C/90 CH 22.5 L/67.5 CL**Psychiatric Nursing**

Prerequisites: ENG 119, BIO 155, BIO 240, BIO 250, BIO 295, PSY 101, ALH 105, NUR 110, NUR 112, NUR 114, NUR 116, NUR 118, NUR 119, Admission to the Nursing Program

Corequisites: NUR 212, SOC 100

This course introduces the student to the dynamics of human behavior during psychiatric illness. Principles and concepts of mental health, mental health interventions, and therapeutic environments are explored. Use of evidence-based practice is integrated to provide the student with current trends to better facilitate the development of clinical reasoning skills. Student skills in the application of the nursing process are sharpened in managing care of the diverse psychiatric patient.

NUR 212 4 C/120 CH 30 L/90 CL**Medical Surgical Nursing III**

Prerequisites: ENG 119, BIO 155, BIO 240, BIO 250, BIO 295, PSY 101, ALH 105, NUR 110, NUR 112, NUR 114, NUR 116, NUR 118, NUR 119, Admission to the Nursing Program

Corequisites: NUR 210, SOC 100

This course is a continuation of Medical-Surgical Nursing II with application of the nursing process in the care of the patient experiencing health-illness conditions in a variety of health care settings. Use of evidence-based practice is integrated to provide the student with current trends to apply in clinical reasoning. Emphasis is on the nursing student evolving into the role of professional nurse and the responsibilities this entails. The student's application of the nursing process is enhanced in managing care of the adult patient.

NUR 214 3 C/90 CH 22.5 L/67.5 CL**Pediatric Nursing**

Prerequisites: ENG 119, BIO 155, BIO 240, BIO 250, BIO 295, ALH 105, NUR 110, NUR 112, NUR 114, NUR 116, NUR 118, NUR 119, NUR 210, NUR 212, SOC 100, PSY 101, Admission to the Nursing Program
Corequisites: NUR 216, NUR 218

This course focuses on the nursing care of the pediatric patient and family unit. The concepts of growth and development related to the pediatric patient will be examined. Use of evidence-based practice is integrated to provide the student with current trends to apply in clinical reasoning. An emphasis is on the nursing student evolving into the role of the professional nurse and the responsibilities this entails. The student's application of the nursing process is enhanced in managing care of the pediatric patient and family.

NUR 216 4 C/120 CH 30 L/90 CL**Medical Surgical Nursing IV**

Prerequisites: ENG 119, BIO 155, BIO 240, BIO 250, BIO 295, ALH 105, NUR 110, NUR 112, NUR 114, NUR 116, NUR 118, NUR 119, NUR 210, NUR 212, SOC 100, PSY 101, Admission to the Nursing Program
Corequisites: NUR 214, NUR 218

This course is a continuation of Medical-Surgical Nursing III with application of the nursing process in the care of the patient experiencing health-illness conditions in a variety of health care settings. Use of evidence-based practice is integrated to provide the student with current trends to apply in clinical reasoning. Emphasis is on the nursing student evolving into the role of professional nurse and the responsibilities this entails. The student's application of the nursing process is enhanced in managing care of the adult patient.

NUR 218 2 C/30 CH**Nursing Issues, Transitions and Leadership**

Prerequisites: ENG 119, BIO 155, BIO 240, BIO 250, BIO 295, ALH 105, NUR 110, NUR 112, NUR 114, NUR 116, NUR 118, NUR 119, NUR 210, NUR 212, SOC 100, PSY 101, Admission to the Nursing Program
Corequisites: NUR 214, NUR 216

This course focuses on the successful transition of the graduate student nurse into safe clinical practice as a professional nurse. This course prepares students with the necessary NCLEX preparatory skills. It also highlights management and leadership issues impacting health care today. Emphasis is on the student evolving into the role of professional nurse with responsibility for prioritizing nursing actions and judgments related to the delivery of safe and effective client care.

NUR 219 10 C/75 CH**Care Transitions and Transition Management Theory**

The course will consist of lecture, computer lab and clinical practicum experiences with a variety of teaching methodologies incorporated throughout the course. Student learning outcomes are based on the NLN Core Concepts of Professional Nursing Practice. Core concepts are specific to the role of the Care Coordination/Transition Management RN, and prepare the student for the Care Coordination and Transition Management Certification Exam.

Continued on next page.

Nursing (NUR) continued

NUR 220 **10 C/80 CH**
CCM - Clinical Practicum

The course will consist of the clinical practicum component to assist the nurse in the development of mastery in clinical practice. The student will participate in a variety of community clinical settings that will foster the growth and development of proficiency and the ability to demonstrate a critical attitude towards their practice by drawing on experiences exposed to in daily practice and relating the experiences back to relevant theory content.

**NURSING ASSISTANT
TRAINING (NHS)**

NHS 100 **10 C/94 CH**
Nursing Assistant

This course provides the theory and skills necessary to assist professional health care providers in providing direct patient care. Candidates will receive training to provide care in the classroom, lab and long-term facility settings. The curriculum is modeled according to the State of Michigan guidelines. Nurse aide students taking this course will be expected to adhere to guidelines and standards that will help them to be successful in the workplace setting. Upon successful completion of the course, students are eligible to take the Michigan Nurse Aide Examination for CNA Certification.

**OFFICE INFORMATION
SYSTEMS (OIS)**

OIS 101 **3 C/45 CH**
Keyboarding Fundamentals

In this course, the student will master the microcomputer keyboard using the touch method and work toward developing higher levels of typing speed and accuracy. The student will type horizontal/vertical documents, memos, tables, postal cards, personal letters, business letters, and manuscripts. The student will type from printed script and rough draft copies. When this course is completed, the student will type a minimum of 30 words per minute on straight-copy material with no more than five errors on five-minute timings. A minimum of three hours of lab per week and a lab fee required.

OIS 227 **3 C/45 CH**
Desktop Publishing I

Recommended: OIS 101
This course provides a basic step-by-step introduction to industry specific desktop publishing software. Coverage in the class includes the creation of a publication, working with styles and graphics, and working with tables and templates.

OIS 228 **3 C/45 CH**
Desktop Publishing II

Prerequisite: OIS 227
A hands-on class using industry specific desktop publishing software with emphasis on the design aspect of Desktop Publishing. This hands-on approach to learning includes developing a balanced layout, developing graphics, importing text, the use of paper color, type, size and styles, framing techniques, and the use of grids, kerning, and leading. Maximizing eye appeal and readability is stressed as several multi-page documents will be created for actual publication or use. Emphasis will be placed on layout and design of the page for the best advertising, marketing, and user appeal.

OIS 251 3 C/45 CH**Microsoft Word Specialist***Prerequisite: BUS 225**Recommended: OIS 101*

This course is designed for those students interested in using a full-featured word processing computer program to create a professional looking documents and modifying them easily. Also this course is designed to assist the students preparing to take the Microsoft Office Specialist (MOS) certification for expert level.

OIS 252 3 C/45 CH**Microsoft Excel Specialist***Prerequisite: BUS 225**Recommended: OIS 101*

This course is designed for those students interested in using a full-featured excel spreadsheet to organize data, complete calculations, make decisions, graph data, develop professional looking reports, publish organized data on the Web and access real-time data from Web sites. Also this course is designed to assist the students preparing to take the Microsoft Office Specialist (MOS) Excel certification for expert level.

OIS 253 3 C/45 CH**Microsoft PowerPoint Specialist***Prerequisite: BUS 225**Recommended: OIS 101*

This course is designed for those students interested in improve their skills to create, present, and collaborate on computer presentations. This class is using Microsoft PowerPoint software, as a visual communication tool, to create remarkable presentations with enhanced multimedia capabilities. Also this course is designed to assist the students preparing to take the Microsoft Office Specialist (MOS) PowerPoint certification for expert level. MOS PowerPoint certification recognizes individuals who have achieve a certain level of mastery with Microsoft PowerPoint product.

OIS 254 3 C/45 CH**Microsoft Access Specialist***Prerequisite: BUS 225**Recommended: OIS 101*

This course is designed for those students who want to improve their skills to create or make use of a robust database solution. This class uses Microsoft Access software, as a powerful database management system, that allows you to organize, access, and share information in databases in a very easy way. Also this course is designed to assist the students preparing to take the Microsoft Office Specialist (MOS) Access certification for standard level. MOS Access certification recognizes individuals who have achieve a certain level of mastery with Microsoft Access product.

OIS 280 3 C/45 CH**Office Administration and Professional Development**

The student will develop a personal plan of action leading to completion of short and long range goals, apply principles leading to success, enhance interpersonal relationship skills and analyze the corporate structure and its mechanisms. Emphasis will be on developing positive work attitudes, time management, interpersonal style, professional growth and stress management.

PARALEGAL TECHNOLOGY (PLT)

PLT 105 3 C/45 CH**Legal Interviews and Investigations***Prerequisite: Program Admission*

This course reviews interviewing techniques and investigation methods from the perspective of the legal assistant. It covers fact gathering from both public and private sources and reporting of data in a form suitable for law office use.

Continued on next page.

*Paralegal Technology (PLT) continued***PLT 120 3 C/45 CH****Legal Research Writing I***Prerequisite: Program Admission**Co-Prerequisites: PLT 105, PLT 135*

This course is an introduction to the American legal system, legal research and writing skills. Students are introduced to printed and online resources available through the law library and the Internet.

PLT 130 3 C/45 CH**Law Office Procedures and Management***Prerequisite: Program Admission*

This course will provide students with an understanding of the role of the paralegal in the law office. Students will examine the structure of a law office, time and records management, billing methods, technology and computers, administrative procedures, client relations, office operating procedures, and professionalism in the workplace.

PLT 135 3 C/45 CH**Professional Responsibility/Legal Ethics***Prerequisite: Program Admission*

This course examines the various issues of professional responsibility and legal ethics that a paralegal encounters. The course will assist the student in developing an awareness and understanding of the professional codes of ethics that govern the legal profession and impact those codes have on the daily responsibilities of the paralegal. Topics covered include client interviews and form preparation, as well as substantive and procedural aspects of the process from the paralegal's perspective.

PLT 140 3 C/45 CH**Business Organization and Corporation Law I***Prerequisite: Program Admission*

This course is a survey of the various types of business organizations operating in the United States. The course will assist the student in developing an awareness and understanding of the fundamental legal issues arising from the selection, formation, and implementation of a business entity. Topics covered include an overview of sole proprietorships, partnerships, and other unincorporated entities as well as various types of corporations.

PLT 150 3 C/45 CH**Legal Composition and Research II***Prerequisite: Program Admission*

This course is a continuation of Legal Research and Writing I. Students will participate in supervised library based research projects, including a mock legal problem, preparation of a legal memorandum, reports, and draft pleadings.

PLT 160 3 C/45 CH**General Practice Survey***Prerequisite: Program Admission*

This course is an introduction to common areas of legal practice undertaken by sole practitioners and small firms. Students will examine civil and criminal litigation, as well as transactional matters.

PLT 170 3 C/45 CH**Probate Law and Practice***Prerequisite: Program Admission*

This course is an introduction to probate law and procedure with an emphasis on adult and minor guardianships, conservatorships, decedent's estates and involuntary commitments. Students will also acquire knowledge in probate jurisdictional issues.

PLT 180 3 C/45 CH**Civil Litigation Practice and Procedure***Prerequisite: Program Admission*

This course covers the necessary preparation required to assist attorneys in the pre-trial, trial, and an appeal process. Substantive legal areas discussed include tort and contract matters.

PLT 200 3 C/45 CH**Survey of Property Law***Prerequisite: Program Admission*

This course is an introduction to the law of personal property and real property. Topics covered include: title to personal property, gifts, estates in land, future interests, mortgages and landlord/tenant matters.

PLT 210 3 C/45 CH**Administrative Law and Procedures***Prerequisite: Program Admission*

The course reviews applicable evidence and procedural requirements for workers compensation and social security laws, civil rights and EEOC.

PLT 220 3 C/45 CH**Criminal Law Practice and Procedures***Prerequisite: Program Admission*

This course covers the study of substantive criminal law, classifications of crimes and principles of criminal liability.

PLT 230 3 C/45 CH**Family Law***Prerequisite: Program Admission*

This course introduces the student to child custody issues, divorce matters, and domestic relations. Related issues include the role of the police department, social services, the Probate Code and Friend of the Court issues. Students will gain a working knowledge of Michigan family law.

PLT 245 3 C/45 CH**Debtor Relief and Creditor Rights***Prerequisite: Program Admission*

The course will assist the students in developing an awareness and understanding of the fundamental legal issues regarding creditor rights, debtor relief and responsibility and trustee activities. Topics covered include client interviews and form preparation, as well as substantive and procedural aspects of the process from the paralegal's perspective. Creditor Rights and Debtor Relief explores the process of consumer and commercial bankruptcy will be examined.

PLT 255 3 C/45 CH**Credentialing Exam Preparation***Prerequisite: Program Admission*

This course is a comprehensive review of the subjects covered on the Certified Legal Assistant (CLA) examination. Topics include: communication, ethics, American legal system, as well as several substantive areas of law.

PLT 260 3 C/45 CH**Immigration Law***Prerequisite: Program Admission*

This is a course dealing with the rights and responsibilities of aliens and issues involved in representing them before the INS and in the courts. Emphasis on federal immigration law and policy.

PLT 265 3 C/45 CH**Paralegal Practicum***Prerequisite: Program Admission*

This is an academic internship opportunity for students to gain practical legal experience in a structured professional environment. Students meet periodically with the course instructor for orientation and evaluation.

PATIENT CARE TECHNOLOGY (PCT)

PCT 200 **5 C/75 CH**

Introduction to Patient Care

Prerequisites: ALH 110, ALH 115, PLB 100, EMT 105

This course provides the student with the principles and techniques to provide patient care within the hospital, urgent care, and/or home health care environment. Students will learn to work under the supervision of nursing or medical staff in the role of the Patient Care Technician.

This Involves multi-skilled direct and in-direct patient care responsibilities including but not limited to diagnostic procedures such as 12-lead electrocardiography, phlebotomy and specimen collections. Emphasis will be placed on safety, documentation, standard precautions, legal and ethical considerations and OSHA standards.

PCT 202 **5 C/80 CH**

Patient Care Clinical

Prerequisite: PCT200

This course provides the student with clinical experience in applying the principles and techniques of patient care within the hospital, urgent care, and/or home health care environment.

PHARMACY TECHNOLOGY (PHT)

PHT 100 **3 C/45 CH**

Introduction to Pharmacy Technology

Introduction to Pharmacy Technology will provide students with an overview of the role of a Pharmacy Technician in today's health care setting. Ethical and legal aspects of the pharmacy practice will be discussed. A review of the necessary math skills to perform the duties of a pharmacy technician will be emphasized. Drug classification, drug processes and development will be introduced as well.

PHT 105 **5 C/100 CH**

Orientation to Pharmacy Technology

Lab fee

Prerequisite: PHT 100

Corequisite: PHT 115

This course provides an overview of the scope, philosophy, roles and responsibilities of a pharmacy practitioner, pharmacy delivery system, ethical and legal considerations, the team approach in pharmacy, and explains how pharmacy technicians can assist pharmacists by being certified as Basic Life Support (BLS) Healthcare Providers. Field trips, guest lecturers, laboratory and teleconferences are included. This course will focus on the role of pharmacy technicians in various work settings, medical and Pharmaceutical terminology, prefixes, suffixes, symbols, abbreviations used to interpret prescription orders, and the legal and ethical issues specific to pharmacy, and exploration of computer systems used in the modern pharmacy. Procedures for national certification are introduced as well.

PHT 115 **5 C/80 CH**
Pharmaceutical Interpretations and Calculations

Lab fee

Prerequisite: PHT 100

Corequisite: PHT 105

This course applies basic mathematics in the calculations required for determination of proper dosages, conversion operations, as well as in preparation of parenteral solutions for injection (IVs, chemotherapy, etc.). Detailed instruction in the techniques used in dosage preparation (aseptic technique, safe handling of chemotherapy, etc.) exploration of computer systems used in the modern pharmacy for processing orders will be provided. This course will provide students the skills needed to correctly fill medication orders. Students will learn to interpret medication orders, understand manufacturers' labels, calculate drug dosages, and translate prescriptions. Laboratory included.

PHT 120 **5 C/100 CH**
Drug Distribution Systems and Pharmacology

Lab fee

Prerequisites: PHT 105, PHT 115

Corequisite: PHT 135

This course provides detailed instruction in the systems used and dosage forms used for the distribution of medications including unit dose, traditional, and ward stock systems used in inpatient facilities, as well as parenterals, and exploration of computer systems used in the modern pharmacy. It includes discussion of drug storage requirements, an introduction to inventory control, and methods of dispensing prescriptions to ambulatory patients will be addressed. Emphasis will be placed on technician responsibilities in each of these systems. Explains the use and side effects of prescription, non-prescription medications, and alternative therapies (e.g., herbal products, dietary supplements, homeopathy, life style modification) used to treat common disease states, including those that affect different body systems. Laboratory included.

PHT 135 **5 C/100 CH**
Pharmacy Practice Settings

Lab fee

Prerequisite: PHT 105, PHT 115

Corequisites: PHT 120

This course provides an overview of the organization, functions, and services provided by both institutional and community pharmacies. The role of the pharmacist and the pharmacy technician in each of these settings will be studied. Discussion topics include ethical, legal, and professional issues. Emphasis is placed on pharmacy standards and on hospital and organizational (as in the case of health maintenance organizations and community pharmacies) policy and procedures. Areas of focus include demonstrating proper aseptic techniques in the preparation of parenterals, using the computer for pharmaceutical calculations, processing, information, and inventory management, accurately maintaining medication inventory within the hospital pharmacy and other units associated with the hospital, understanding correct procedures for receiving inventory into the hospital pharmacy, using automated dispensing and replenishment systems used in pharmacy settings, accurately interpreting and filling medication orders, applying safety protocols and standards appropriate to the hospital setting, the technicians' role when they are responding to emergency situations, communicating effectively with health care professionals in a culturally diverse society, interpreting, analyzing, and translating the abbreviations, symbols, and terms used in medication orders, preventing calculation errors, and performing calculations needed for preparation of mixtures, compounds, and oral dosages. Laboratory included.

Continued on next page.

Pharmacy Technology (PHT) continued

PHT 155 **7 C/320 CH**

Pharmacy Technology Practicum

Prerequisites: PHT 120, PHT 135

Corequisite: PHT 220

Supervised practice in an ambulatory and institutional pharmacy setting. This course is designed for students to demonstrate skills learned in the classroom and to be evaluated by a preceptor.

PHT 220 **5 C/60 CH**

Pharmacy Capstone Course

Lab fee

Prerequisites: PHT 120, PHT 135

Corequisites: PHT 155

This course is an overview of all pharmacy technician program courses and concepts, with a comprehensive review of the Pharmacy Technician curriculum, and an emphasis on the reviewing and preparation of materials which comprise the Pharmacy Technician Certification Board examination. The student must also develop a capstone project proposal, to be approved by the instructor. The proposed project may be a case study, research paper, portfolio of work with written explanation, etc. The student will learn test taking skills, review pharmacology, math calculations, and prescription processing. Continuing education will be discussed as well as registration for pharmacy technicians based on state board of pharmacy regulations.

PHILOSOPHY (PHL)

PHL 101 **3 C/45 CH**

Comparative Religions I

This course covers the development of traditional religions and it explores world concepts with an emphasis on Judaism, Christianity and Islam.

PHL 102 **3 C/45 CH**

Comparative Religions II

Prerequisite: PHL 101

This course focuses on contemporary styles in religions, with an examination of movements, forces and problems shaping the new religious consciousness. An analysis of the structure and relationships of the various movements and their impact on the American scene is provided.

PHL 201 **3 C/45 CH**

Introduction to Philosophy

This course cover basic problems in philosophy. Readings encompasses ethics, politics, science and metaphysics to give students experience in critical thinking to promote objectivity.

PHL 211 **3 C/45 CH**

Introduction to Logic

This is a course designed to impact principles of clear and consistent thinking through the techniques of logic to avoid fallacies and eliminate ambiguous ideas.

PHL 221 **3 C/45 CH**

Ethics

This course is a survey of ethical theories which have characterized human beings, with practical applications to current problems in human values.

PHLEBOTOMY (PLB)

PLB 100 3 C/45 CH

Introduction to Phlebotomy

Study basic phlebotomy concepts such as skin punctures, venipunctures, arterial punctures, and bleeding times. Master specimen collection, preservation of specimens from various sources, and specimen processing. Explores concepts of professionalism in health care.

PLB 105 3 C/110 CH

Phlebotomy Practicum

Prerequisite: ALH 110, ALH 115; Complete PLB 100 and PLB 110 with a "B" or better.

Students will be given the opportunity to practice specimen collection from a variety of sources while in a clinical setting. Students will also receive both classroom and laboratory review in order to sit for the National Certification offered at the end of this course. Students must successfully pass the college designated background check and drug screen to be placed in a clinical setting. Students must complete a minimum of 30 venipunctures and 10 capillary sticks on live individuals in addition to 80 clinical contact hours.

PLB 110 3 C/45 CH

Pediatric Phlebotomy

Become familiar with various pediatric blood collection procedures and equipment. Use hands-on, simulated classroom exercises and observe practices in a clinical setting.

PHYSICS (PHY)

PHY 101 4 C/90 CH

Physics for Elementary School Teachers

Lab fee

Lecture and laboratory course dealing with physics concepts and strategies for teaching these concepts in elementary [K-8] schools. Current State of Michigan physics teaching objectives and associated learning activities will be emphasized. Using such community resources as the Detroit Science Center, playgrounds, and amusement parks to teach physics will be emphasized. In addition, opportunities are provided for WCCCD students to teach physics to a small group of children (under teacher supervision) in local elementary schools.

PHY 115 4 C/90 CH

Fundamentals of Physics

Lab fee

This course covers the fundamental principles and theories of physics, and should be taken by students who need a natural science elective, and those who need to take higher level physics courses and have not had high school physics. (Meets for six hours per week – four hours lecture, two hours lab).

PHY 235 4 C/90 CH

General Physics I

Lab fee

Prerequisite: PHY 115 or high school physics MAT 156

This is an algebra and trigonometry based course and it is designed to partially fulfill the physics requirements for pre-medicine, pre-dentistry, pharmacy, electrical/electronics, teaching and law. The sequence PHY 235 and PHY 245 is not intended for engineering and science students. Topics include mechanics and thermal physics. (Meets for six hours per week – four hours lecture, two hours lab).

Continued on next page.

*Physics (PHY) continued***PHY 245** 4 C/90 CH**General Physics II***Lab fee**Prerequisite: PHY 235*

This is an algebra and trigonometry based course, and it is a continuation of PHY 235. Topics include electricity, electromagnetism, optics, atomic physics, nuclear physics, radiation, quantum physics and relativity. (Meets for six hours per week – four hours lecture, two hours lab).

PHY 265 4 C/90 CH**Physics for Scientists and Engineers I***Lab fee**Prerequisite: PHY 115 or high school physics MAT 171*

This is a calculus based course and partially meets the requirements for engineering and science students. Topics include mechanical physics, oscillations, wave motion and thermodynamics. (Meets for six hours per week – four hours lecture, two hours lab).

PHY 275 4 C/90 CH**Physics for Scientists and Engineers II***Lab fee**Prerequisites: PHY 265, MAT 172 or concurrent enrollment in MAT 172*

This is a calculus based course. It is a continuation of PHY 265. Topics include electricity, magnetism, optics and modern physics. (Meets for six hours per week – four hours lecture, two hours lab).

PHYSICAL SCIENCE (PSC)**PSC 110** 4 C/60 CH**Physical Science-Physics, Chemistry and Geology**

A course for non-science majors covering topics in chemistry, physics and environmental science to develop an understanding of how science, technology and society influence each other, and how to use this knowledge in everyday decision-making.

PHYSICAL THERAPIST ASSISTANT (PTA)**PTA 102** 2 C/30 CH**Clinical Pathology**

Prerequisites: BIO 240, BIO 250, ENG 119, PS 101, PSY 101, SPH 101, PTT 101, Admission into the Technical Track of the Physical Therapist Assistant Program
Corequisites: PTA 103, PTA 104, PTA 105, PTA 106, PTA 107

Explores pathologies commonly encountered in physical therapy settings including orthopedic, neurological, rheumatological, cardiopulmonary, and acute medical conditions. The pathologies introduced in this course are further explored in courses throughout the physical therapist assistant curriculum. Emphasis is placed on anatomical and physiological considerations, etiologies, and therapeutic management of common conditions encountered in physical therapy settings. 30 hours of direct instruction is required. Must complete with a 77% (C) or better.

PTA 103 3 C/30 L/60 HLB/90 CH**Functional Mobility**

Prerequisites: BIO 240, BIO 250, ENG 119, PS 101, PSY 101, SPH 101, PTT 101, Admission into the Technical Track of the Physical Therapist Assistant Program
Corequisites: PTA 102, PTA 104, PTA 105, PTA 106, PTA 107

Introduces students to fundamental patient care skills including patient interviewing, bed mobility activities, wheelchair utilization, assistive device fitting and training, transfer activities, positioning and draping, rapport development, written and verbal communication, hand washing, aseptic techniques, body mechanics, guarding, and basic exercises. This lecture/lab course provides students the opportunity to develop these basic patient care skills and apply this knowledge to simple patient case scenarios prior to part-time and full-time clinical experiences. Patient and clinician safety, levels of independence along the mobility spectrum, professional behavior, and standard precautions are emphasized. 30 hours of direct instruction and 60 hours of lab is required. Must complete with a 77% (C) or better.

PTA 104 3 C/30 L/60 HLB/90 CH**Clinical Kinesiology**

Prerequisites: BIO 240, BIO 250, ENG 119, PS 101, PSY 101, SPH 101, PTT 101, Admission into the Technical Track of the Physical Therapist Assistant Program
Corequisites: PTA 102, PTA 103, PTA 105, PTA 106, PTA 107

Building upon Human Anatomy and Physiology I, this course provides an understanding of normal human movement and gives a clinical perspective to the science movement as it pertains to the musculoskeletal system, osteokinematics, arthrokinematics, and biomechanics. During this lecture/lab course, students will have an opportunity to learn the fundamentals of posture, positioning, and normal gait. Clinical application of kinesiology to support functional movement development across the lifespan and observational

gait analysis are emphasized. 30 hours of direct instruction and 60 hours of lab is required. Must complete with a 77% (C) or better.

PTA 105 2 C/30 CH**Neuromuscular Foundations**

Prerequisites: BIO 240, BIO 250, ENG 119, PS 101, PSY 101, SPH 101, PTT 101, Admission into the Technical Track of the Physical Therapist Assistant Program
Corequisites: PTA 102, PTA 103, PTA 104, PTA 106, PTA 107

Explores theories, processes, and structures that determine the execution and control of voluntary movements as it builds on prerequisite knowledge from BIO 240. Emphasis is placed on normal and abnormal physiology of the neuromuscular system including the relationship between the nervous system and motor control, motor learning, and skill acquisition. This lecture-based course builds a foundation for courses later in the curriculum that will address the assessment and intervention of patients with neurological conditions from a physical therapy perspective. 30 hours of direct instruction is required. Must complete with a 77% (C) or better.

Continued on next page.

*Physical Therapist Assistant (PTA) continued***PTA 106** **2 C/30 CH****Functional Movement Development**

Prerequisites: BIO 240, BIO 250, ENG 119, PS 101, PSY 101, SPH 101, PTT 101, *Admission into the Technical Track of the Physical Therapist Assistant Program*
Corequisites: PTA 102, PTA 103, PTA 104, PTA 105, PTA 107

Presents current theories and perspectives about human growth and development across the lifespan. The relationship between lifespan development and the delivery of physical therapy interventions to patients of varying socioeconomic statuses, ages, genders and cultural beliefs is emphasized. This lecture-based course builds a foundation for courses later in the curriculum that will address the assessment and intervention of diverse patient populations. 30 hours of direct instruction is required. Must complete with a 77% (C) or better.

PTA 107 **2 C/30 CH****Clinical Documentation for the PTA**

Prerequisites: BIO 240, BIO 250, ENG 119, PS 101, PSY 101, SPH 101, PTT 101, *Admission into the Technical Track of the Physical Therapist Assistant Program*
Corequisites: PTA 102, PTA 103, PTA 104, PTA 105, PTA 106

Explores the administrative aspects of physical therapy services including documentation, electronic health records, medical terminology, professional liability, chart reviews, and billing and coding. SOAP note writing is emphasized. This lecture-based course builds a foundation for courses later in the curriculum that will address timely and accurate documentation of physical therapy treatment sessions. 30 hours of direct instruction is required. Must complete with a 77% (C) or better.

PTA 110 **3 C/30 L/60 HLB/90 CH****Patient Assessment**

Prerequisites: BIO 240, BIO 250, ENG 119, PS 101, PSY 101, SPH 101, PTT 101, PTA 102, PTA 103, PTA 104, PTA 105, PTA 106, PTA 107

Corequisites: PTA 112, PTA 114, PTA 115, PTA 220

Explores patient assessment and data collection techniques while integrating the knowledge and basic patient care skills taught during the previous semester. During this lecture/lab course, students will have an opportunity to practice common physical therapy assessment techniques such as goniometry, manual muscle testing, muscle length and girth testing, and gait assessment using standardized methods. 30 hours of direct instruction and 60 hours of lab is required. Must complete with a 77% (C) or better.

PTA 112 **3 C/30 L/60 HLB/90 CH****Therapeutic Exercise**

Prerequisites: BIO 240, BIO 250, ENG 119, PS 101, PSY 101, SPH 101, PTT 101, PTA 102, PTA 103, PTA 104, PTA 105, PTA 106, PTA 107

Corequisites: PTA 110, PTA 114, PTA 115, PTA 220

Explores therapeutic exercise theory and application. Exercise physiology in rehabilitation and various orthopedic conditions are studied, with emphasis on diagnosis-specific precautions and treatment guidelines. During this lecture/lab course, students will have the opportunity to apply concepts and principles related to therapeutic exercise and functional mobility. 30 hours of direct instruction and 60 hours of lab is required. Must complete with a 77% (C) or better.

PTA 114 3 C/30 L/60 HLB/90 CH**Manual Therapy Techniques**

Prerequisites: BIO 240, BIO 250, ENG 119, PS 101, PSY 101, SPH 101, PTT 101, PTA 102, PTA 103, PTA 104, PTA 105, PTA 106, PTA 107

Corequisites: PTA 110, PTA 112, PTA 115, PTA 220

Explores theory and basic techniques for manual therapy interventions. Peripheral joint and soft tissue mobilization are emphasized. This lecture/lab course provides students the opportunity to practice hands-on techniques to inhibit pain, recognize joint hyper/hypomobility, reduce muscle guarding, improve fascial mobility, and increase range of motion. Management of common musculoskeletal conditions including assessment, treatment interventions, and manual therapy techniques are addressed. 30 hours of direct instruction and 60 hours of lab work is required. Must complete with a 77% (C) or better.

PTA 115 2 C/30 CH**Professional Preparation**

Prerequisites: BIO 240, BIO 250, ENG 119, PS 101, PSY 101, SPH 101, PTT 101, PTA 102, PTA 103, PTA 104, PTA 105, PTA 106, PTA 107

Corequisites: PTA 110, PTA 112, PTA 114, PTA 220

Explores professionalism in the practice of physical therapy including effective communication, interdisciplinary approach, and typical organizational structure. Students will have the opportunity to practice effective communication using case studies. Operational issues affecting the PTA in today's healthcare arena, including documentation and reimbursement are emphasized. This lecture-based course builds a foundation for clinical experiences later in the curriculum and provides an orientation to the clinical experience process. Career-readiness training, including resume and cover letter writing, and development of a professional portfolio is also provided. 30 hours of direct instruction is required. Must complete with a 77% (C) or better.

PTA 204 3 C/30 L/60 HLB/90 CH**Neuromuscular Rehabilitation**

Prerequisites: BIO 240, BIO 250, ENG 119, PS 101, PSY 101, SPH 101, PTT 101, PTA 102, PTA 103, PTA 104, PTA 105, PTA 106, PTA 107, PTA 110, PTA 112, PTA 114, PTA 115

Corequisites: PTA 205, PTA 210, PTA 212

Explores common neuromuscular pathologies, contemporary rehabilitation concepts, and accepted therapeutic interventions for these conditions. Clinical implications and applications of treatment approaches will be discussed based on current best practices utilizing the International Classification of Functioning (ICF) model. Students will be provided the opportunity to learn basic neurological treatment theories and techniques for use with patients with various neurological disorders. This lecture/lab course emphasizes the application of strategies to facilitate functional mobility in persons with neurological disorders. 30 hours of direct instruction and 60 hours of lab is required. Must complete with a 77% (C) or better.

PTA 205 2 C/30 CH**Pediatric Management**

Prerequisites: BIO 240, BIO 250, ENG 119, PS 101, PSY 101, SPH 101, PTT 101, PTA 102, PTA 103, PTA 104, PTA 105, PTA 106, PTA 107, PTA 110, PTA 112, PTA 114, PTA 115

Corequisites: PTA 204, PTA 210, PTA 212

Explores principles of pediatric habilitation and rehabilitation pertinent to the practice of physical therapy. Students will have the opportunity to learn about pathological conditions and neurological management interventions encountered in pediatric physical therapy. Patient/family-centered care, awareness of cultural diversity, psychosocial aspects of disability, and evidence-based practice are emphasized. 30 hours of direct instruction is required. Must complete with a 77% (C) or better.

Continued on next page.

*Physical Therapist Assistant (PTA) continued***PTA 210 3 C/30 L/60 HLB/90 CH****Therapeutic Modalities**

Prerequisites: BIO 240, BIO 250, ENG 119, PS 101, PSY 101, SPH 101, PTT 101, PTA 102, PTA 103, PTA 104, PTA 105, PTA 106, PTA 107, PTA 110, PTA 112, PTA 114, PTA 115

Corequisites: PTA 204, PTA 205, PTA 212

Explores the contemporary usage and basic foundation of therapeutic modalities. The scientific basis of musculoskeletal rehabilitation involving therapeutic modalities will be examined. Emphasis will be placed on fundamental concepts of tissue healing and pain control. During this lecture/lab course, students will have the opportunity to learn common physical therapy modalities including cryo/thermotherapy, traction, ultrasound and electrical stimulation. 30 hours of direct instruction and 60 hours of lab is required. Must complete with a 77% (C) or better.

PTA 212 3 C/45 CH**PTA Seminar in Specialty Practice**

Prerequisites: BIO 240, BIO 250, ENG 119, PS 101, PSY 101, SPH 101, PTT 101, PTA 102, PTA 103, PTA 104, PTA 105, PTA 106, PTA 107, PTA 110, PTA 112, PTA 114, PTA 115

Corequisites: PTA 204, PTA 205, PTA 210

Introduces students to a variety of physical therapy specialties. Acute and long-term care, cardiopulmonary rehabilitation, geriatrics, orthotics & prosthetics, pelvic floor rehabilitation, and lymphedema management will be emphasized. Assessment and treatment of common diagnoses in these groups are addressed. Other topics may be presented based on community resources and guest presenters. 45 hours of direct instruction is required. Must complete with a 77% (C) or better.

PTA 220 2 C/10 L/80 CL/90 CH**Clinical Education I**

Prerequisites: BIO 240, BIO 250, ENG 119, PS 101, PSY 101, SPH 101, PTT 101, PTA 102, PTA 103, PTA 104, PTA 105, PTA 106, PTA 107

Corequisites: PTA 110, PTA 112, PTA 114, PTA 115

Provides an integrated, unpaid two-week work experience in an affiliated physical therapy setting, under the direction of a licensed physical therapist or physical therapist assistant who serves as clinical instructor (CI). Students are given the opportunity to practice skills in clinical documentation, professionalism, communication, patient assessment, and plan of care implementation. Emphasis on appreciating the PT/PTA relationship, beginning to manage a caseload, and participating in the interprofessional team. Students must successfully complete both the clinical site portion and the Blackboard assignments in order to pass this component of the program. 10 hours of direct instruction/student work + 80 clinical contact hours is required. Must complete with a 77% or better.

PTA 230 6 C/15 L/272 CL/287 CH**Clinical Education II**

Prerequisites: BIO 240, BIO 250, ENG 119, PS 101, PSY 101, SPH 101, PTT 101, PTA 102, PTA 103, PTA 104, PTA 105, PTA 106, PTA 107, PTA 110, PTA 112, PTA 114, PTA 115, PTA 204, PTA 205, PTA 210, PTA 212

Corequisites: PTA 240

Provides an unpaid eight-week work experience in a clinical setting, under the supervision of a licensed physical therapist or physical therapist assistant who serves as clinical instructor (CI). Students will have the opportunity to integrate and apply academic knowledge and clinical skills learned over the course of the curriculum. Safety while practicing and perfecting assessment and intervention techniques is emphasized. Successful completion of all previous clinical and didactic coursework is required to participate in this course. In-services are a required component of this course. Clinical competence will be assessed by the student's CI using the Clinical Performance Instrument (CPI). 15 hours of direct instruction/student work + 272 clinical contact hours is required. Must complete with a 77% or better and meet all clinical requirements.

PTA 240 6 C/15 L/272 CL/287 CH**Clinical Education III**

Prerequisites: BIO 240, BIO 250, ENG 119, PS 101, PSY 101, SPH 101, PTT 101, PTA 102, PTA 103, PTA 104, PTA 105, PTA 106, PTA 107, PTA 110, PTA 112, PTA 114, PTA 115, PTA 204, PTA 205, PTA 210, PTA 212

Corequisites: PTA 230

Provides an unpaid eight-week work experience in a clinical setting, under the supervision of a licensed physical therapist or physical therapist assistant who serves as clinical instructor (CI). Students will have the opportunity to integrate and apply academic knowledge and clinical skills learned over the course of the curriculum. Safety while practicing and perfecting assessment and

intervention techniques is emphasized. Successful completion of all previous clinical and didactic coursework is required to participate in this course. In-services are a required component of this course. Clinical competence will be assessed by the student's CI using the Clinical Performance Instrument (CPI). 15 hours of direct instruction/student work + 272 clinical contact hours is required. Must complete with a 77% or better and meet all clinical requirements.

POLITICAL SCIENCE (PS)**PS 101 3 C/45 CH****American Government**

This course is an examination of America's democracy, its principles, processes and political institutions. Emphasis is placed on the functioning of the national government and the making of public policy.

PS 104 3 C/45 CH**Introduction to Political Science**

Introduction to Political Science describes the nature of political science, explains the ways in which political scientists study politics and offers introductory treatment of all major topics normally thought of as constituting political science. This course emphasizes a comparative approach to political systems and institutions. The U.S. role as an actor in a global setting will be emphasized.

PS 160 3 C/45 CH**International Politics**

Prerequisite: PS 101

This course covers the dynamics of the basic factors motivating the behavior of nations and an analysis of the major areas of global political concern.

Continued on next page.

*Political Science (PS)) continued***PS 235 3 C/45 CH****State and Local Government***Prerequisite: PS 101*

This course is a survey of state and local government, including structure, institutions and processes. The course stresses intergovernmental relations.

PS 275 3 C/45 CH**Public Administration Internship***Prerequisite: PS 101*

A course designed to give students the opportunity to experience the activities of an agency or institution related to government and public administration. Internships are available in a U.S. representative's office, political party offices assisting a candidate for public office, a nonpartisan community office, or an interest group office.

PRACTICAL NURSING EDUCATION (PNE)

PNE 101 4 C/120 CH 30 L/90 CL**Fundamentals of Practical Nursing***Prerequisite: Program Admission**Corequisites: PNE 110, PNE 102*

This course introduces the student to the art and science of nursing care, including its history and current trends. Subsequent courses are built upon the concepts and skills learned in this course. The first semester course explores historical and contemporary nursing practice and health care delivery systems. Emphasis is on the practical nursing student as a caregiver and the responsibilities this entails in the clinical setting. The laboratory component has a focus on the acquisition of the nursing skills necessary for progression to clinical sites and subsequent courses.

Students have an opportunity to practice skills on a simulation model and peers. The course is organized according to the practical nurse program outcomes of Human Flourishing, Nursing Judgment, Professional Identity, and Spirit of Inquiry with supporting integrating concepts and core values described by the National League for Nursing (NLN). Additionally, Quality and Safety Education for Nurses (QSEN) competencies are addressed. Students learn the nursing process and the skills necessary for application of the nursing process in participating in care of the client in today's changing health care environment.

PNE 102 3 C/45 CH**Physical Assessment for the Practical Nurse***Prerequisite: Program Admission**Corequisites: PNE 110, PNE 101*

This course is designed to provide students the opportunity to learn and practice history taking and physical examination skills with emphasis on adult individuals. The focus is on symptom analysis along with physical, psychosocial, and growth and development assessments. Upon completion of this course, the students should be able to utilize critical thinking skills in identifying health alterations, formulating nursing diagnosis and documenting findings appropriate to nursing.

PNE 103 4 C/120 CH 30 L/90 CL**Beginning Medical/Surgical Nursing***Corequisite: PNE 104**Prerequisites: Program Admission, PNE 110, PNE 101, PNE 102*

This course is designed to provide an introduction to the basic concepts of Medical Surgical Nursing with an emphasis on meeting the needs of the whole client. Topics cover will include the nursing process as it relates to various disease processes and health promotion. The various body systems and the disease process associated with them will be covered in the areas of etiology, diagnosis, clinical signs and symptoms, treatment and nursing

implications/interventions. The basis for this instruction will be evidence based practice.

PNE 104 3 C/45 CH

Basic Principles of Pharmacology

Corequisite: PNE 103

Prerequisites: Program Admission, PNE 110, PNE 101, PNE 102

This course is designed to give the student an understanding of specific drug groups emphasizing physiological classifications and generic nomenclature. The course integrates knowledge of physiology, chemistry, nursing fundamentals, calculations, interpretation of medication orders, as well as the knowledge and ability to administer medications safely. Discussion of specific physiological drug groups are organized according to their use in treating alterations in health and disease processes. This course also provides opportunities to develop competencies necessary to meet the needs of medication administration and incorporate using the nursing process. This course introduces students to basic principles of pharmacology and the knowledge necessary to safely administer medication. Course content includes legal implications, pharmacokinetics, pharmacodynamics, calculations of drug dosages, medication administration, and an overview of drug classifications. Upon completion of this course, the student should be able to calculate and administer medications safely in the clinical setting.

PNE 105 4 C/120 CH 30 L/90 CL

Advanced Medical/Surgical Nursing

Corequisite: PNE 106

Prerequisites: Program Admission, PNE 110, PNE 101, PNE 102, PNE 103, PNE 104

This course is designed to provide a continuation of the basic concepts of Medical Surgical Nursing with an emphasis on meeting the needs of the whole client. Topics cover will include the nursing process as it relates to various disease processes and health promotion. The various body systems and the disease process associated with them will be covered in the areas of etiology, diagnosis, clinical signs and symptoms, treatment and nursing implications/interventions. The basis for this instruction will be evidence based practice.

PNE 106 3 C/90 CH 22.5 L/67.5 CL

Basic Principles of Mental Health Nursing

Corequisite: PNE 105

Prerequisites: Program Admission, PNE 110, PNE 101, PNE 102, PNE 103, PNE 104

This course is designed to promote the understanding that all nursing has a behavioral health component. Principles of mental health are taught, as well as characteristics and treatment of mental health disorders, and domestic violence recognition and interventions. Therapeutic nursing techniques emphasizing communication skills, normal and abnormal behaviors, treatment modalities and developmental needs are applied to meet the psychological needs of the client and to foster the nurse-client relationship. This course provides an overview of psychosocial adaptation and coping concepts used when caring for clients with acute and chronic alterations in mental health in a variety of settings.

Continued on next page.

C = Credits CH = Contact Hours CL = Clinical HL = Hours Lecture HLB = Hours Lab

for remediation and a review of selective content, specific to the practice of practical nursing.

PRE-PHYSICAL THERAPIST ASSISTANT (PTT)

PTT 101 2 C/30 CH

Introduction to Physical Therapy

This course introduces students to the foundations and principles of the profession, the history of physical therapy, and the roles of the members of a rehabilitation team. Basic theory and practice of contemporary physical therapy are emphasized, with a detailed analysis of the boundaries between the physical therapist, the assistant, and the technician. Professional organizations including the American Physical Therapy Association (APTA) are discussed. The course also examines current issues and trends in physical therapy. 30 hours of direct instruction is required. Must complete with an 80% (B) or better to be eligible to apply to the physical therapist assistant program.

PRINT TECHNOLOGY (PRN)

PRN 101 3 C/45 CH

Introduction to Print Technology

This course offers students an opportunity to refine their skills with the process of offset lithography. Projects provide opportunities to apply their skill and to understand image concept and design, image assembly, film conversion, platemaking, duplicator, presswork and bindery operations.

PRODUCT DEVELOPMENT PROTOTYPING (PDP)

PDP 100 3 C/45 CH

Introduction to Rapid Prototyping

Lab Fees

This course introduces students to the fundamental principles of rapid prototyping including materials, processes and equipment consideration. Emphasis will be placed on part preparation, file format types, as well as basic components and maintenance of modern rapid prototyping equipment.

PDP 105 3 C/45 CH

Product Development Process

Lab Fees

This course will cover the principles of the product design process from concept to feasibility including functionality and manufacturability. The entire design through prototyping and testing process will be discussed.

PDP 110 3 C/45 CH

Design Concepts I – 2D Graphics

Lab Fees

This introductory class in 2D design will teach the basics of 2D drawing creation utilizing state-of-the-art computer graphics systems and software leading to a broad understanding of the tools and techniques necessary to accurately design parts in a modern manufacturing environment.

Continued on next page.

*Prototyping (PDP) continued***PDP 115 3 C/45 CH****Introduction to 3D Printing***Prerequisite: PDP 100**Lab Fees*

In this course students will learn proper setup and operating processes to generate basic 3D prototype models utilizing state-of-the-art rapid prototyping equipment.

PDP 120 3 C/45 CH**Introduction to Model Surfacing***Prerequisite: PDP 100*

In this course students will gain a fundamental understanding of 3D surface capture, processing, and editing using state-of-the-art surfacing software.

PDP 150 3 C/45 CH**Design Concepts II – 3D Graphics***Prerequisite: PDP 110**Lab Fees*

In this class students will learn the basics of 3D solid model creation utilizing state-of-the-art computer graphics systems and software leading to a broad understanding of the tools and techniques necessary to accurately design parts in a modern manufacturing environment.

PDP 200 3 C/45 CH**Advanced Rapid Prototyping***Prerequisite: PDP 100**Lab Fees*

In this course students will expand upon their knowledge of rapid prototyping including printer optimization, high resolution and large models.

PDP 205 3 C/45 CH**3D Surface Scanning***Prerequisite: PDP 100, PDP 120**Lab Fees*

In this course students will be introduced to state-of-the-art surface scanning equipment, as well as setup, calibration and project processing techniques.

PDP 210 3 C/45 CH**Design Concepts III – Assembly***Prerequisite: PDP 150**Lab Fees*

In this course students will be introduced to the assembly structure including top-down and bottom-up assemblies as well as assembly clearance analysis.

PDP 225 3 C/45 CH**Surface – Quality Control***Prerequisite: PDP 100, PDP 205**Lab Fees*

In this class students will use modern surfacing software to perform surface analysis, set up deviation gauges, and generate reports.

PDP 250 3 C/45 CH**Reverse Engineering***Prerequisite: PDP 100, PDP 150**Lab Fees*

In this course students will develop proper techniques and processes for re-creation of an existing product or part (reverse engineer).

PROJECT MANAGEMENT (PRM)

PRM 101 3 C/45 CH

Introduction to Project Management

Lab Fees

An overview of the key concepts of project management including the history, practices and methods common to project management will be covered. Students will learn the basics of project management using Project Management Institutes™ approach. This course satisfies the education requirement for project management professional certification. It is not a PMP test preparation course.

PRM 105 3 C/45 CH

Project Management Tools

Prerequisite: PRM 101

Lab Fees

An overview of project management tools will be provided. Students will learn Microsoft Project to develop project schedules, assign resources, and learn the features and functions of the software including enterprise (web) functionality.

PRM 210 3 C/45 CH

Intermediate Project Management

Lab Fees

This course will provide in depth coverage of the 9 knowledge areas of project management and integration with other project management models and business practice. The role of the project/program manager will be explored in relation to day to day management of a project.

PRM 215 3 C/45 CH

IT Project Management

Lab Fees

IT projects have unique requirements. This course will cover the different methods of IT project management including waterfall, phase gate spiral

planning and management. Students will understand the key issues and risks in IT projects including requirements gathering test methods and the need to balance product requirements with project timing.

PRM 220 3 C/45 CH

Advanced Project Management

Prerequisite: PRM 105 or PRM 215

Lab Fees

Students will be able to develop a clear project management schedule including communication plan, issue and risk management plan, resource management using project management principles and methods.

PSYCHOLOGY (PSY)

PSY 101 3 C/45 CH

Introductory Psychology

This course introduces students to theories, principles, concepts and research in psychology. Topics include biological foundations of behavior and mental processes, learning and cognition, personality and social behavior, mental health and mental disorders and lifespan development. PSY 101 is the foundational course in psychology. It is a prerequisite for all other psychology courses.

PSY 200 3 C/45 CH

Lifespan Development (Formerly HSC 200)

Prerequisite: PSY 101

This course is an introduction to lifespan development - the scientific study of human development from conception until death. Students will be introduced to major theories, important research, and basic processes of development with an emphasis on biological, psychological, social, and cultural factors that shape human development across the lifespan

Continued on next page.

*Psychology (PSY) continued***PSY 202 3 C/45 CH****Human Sexuality***Prerequisite: PSY 101*

This course focuses on the physiological, psychological, personal and interpersonal aspects of human sexual behavior. It examines changing sex roles and patterns, personal beliefs and value systems.

PSY 220 3 C/45 CH**Child Growth and Development***Prerequisite: PSY 101*

This course covers the developmental sequence from conception to adolescence, with specific emphasis on the normal child. Examines psychological, social and biological factors that influence the developing child. Students will not receive credit for both PSY 220 and 225. Recommended for students who wish to meet State of Michigan requirements to administrate in child care settings.

PSY 225 5 C/75 CH**Child Growth and Development Practicum***Prerequisite: PSY 101*

This practicum will include supervised experiences working with children (this course also includes lecture material from PSY 220). Child care centers, day care nurseries, psychology clinics for children and Children's Hospital are the various settings where students will have opportunities to utilize practical methodology as well as develop new techniques in child growth and development training. Students will not receive credit for both PSY 220 and 225.

PSY 230 3 C/45 CH**Psychology of Adjustment***Prerequisite: PSY 101*

This course covers the evaluation of human effectiveness, psychopathology, the healthy personality and systematic research on problems of adjustment. Students will not receive credit for both PSY 230 and 235.

PSY 235 5 C/75 CH**Psych of Adjustment Practicum***Prerequisite: PSY 101*

This practicum includes supervised experiences working directly with youth and adults in settings such as group homes, learning disabilities centers and day care centers.

PSY 250 3 C/45 CH**Psychology of Personality***Prerequisite: PSY 101*

This course covers major personality theories and other personality assessments. It explores various aspects of personality development and change.

PSY 260 3 C/45 CH**Social Psychology***Prerequisite: PSY 101*

This course is an introduction to social psychology. It includes social influence processes, group dynamics, attitude formation interpersonal attraction, intimacy, aggression and discrimination.

PSY 265 3 C/45 CH**Intimate Relationships***Prerequisite: PSY 101*

This course covers the impact of intimate relationships on our emotional and social well-being. It examines ways intimate relationships are formed, maintained and end. Gender is a central organizing construct.

PSY 285 6 C/90 CH**Transpersonal Psychology with Practicum**

Prerequisites: six hours of Psychology, ENG 120 and consent of instructor

In a seminar setting, students study the branch of wisdom and science that concerns itself with psychological and well-being. Inquiry will be expanding to include Africa and a worldview. The practicum will include a supervised two week trip to Africa or another country.

PSY 299 3 C/45 CH**Psychology Seminar**

Students will explore special topics in psychology in a seminar setting. Topics will vary each year. The course is designed for students who wish to participate in advanced study of theories, concepts and research in a particular topic.

RADIO/TELEVISION (RTV)**RTV 101 3 C/45 CH****Writing for Radio/TV**

Corequisite: RTV 102

This course will provide students with a thorough, up-to-date coverage of the principles and techniques for, and approaches to writing for television, radio and the internet. Topics include writing for a variety of formats such as commercials, news, sports talk shows, interviews and music shows.

RTV 102 3 C/45 CH**Advanced Writing for Radio/TV**

Corequisite: RTV 101

This course will provide students with the theory and practice of voice-overs and audio production, as well as the relationship of audio work to other aspects of media production. Through this course students will be exposed to: basic audio terminology and concepts, appropriate microphone usage and placement, and recording and editing single and multiple audio tracks and how to work comfortably in a recording studio environment.

RADIOLOGIC SCIENCES (RAD)**RAD 299 30 C/2000+ CH****Radiology Task and Skill Component**

The Radiology Task and Skill Component, offered in partnership with DMC Sinai-Grace and Ascension Healthcare, is a comprehensive program designed to develop proficiency in radiologic technology through hands-on experience and didactic learning. Participants will master essential radiographic procedures, including patient positioning, radiation safety, equipment operation, and image quality evaluation.

This component emphasizes critical thinking, ethical conduct, and adherence to professional standards, preparing students to meet the demands of diagnostic imaging. Students will gain valuable experience in diverse clinical setting, including general radiography, fluoroscopy, and advanced modalities such as CT and MRI. The program incorporates competency-based evaluations, ensuring students develop the necessary skills for patient care, effective communication, and compliance with HIPAA and radiation protection guidelines. All applicants must apply to one of the partnering hospitals to complete this component of the Radiologic Sciences AAS program.

RECREATIONAL LEADERSHIP (RL)

RL 110 3 C/45 CH Recreational Leadership Techniques

This course covers the theories, principles and practice of planning, organizing and conducting effective recreational programs for various groups, with emphasis on group involvement.

REGISTERED NURSING BRIDGE (RNB)

RNB 200 3 C/45 CH PN to RN Transformation Course

Prerequisite: Acceptance into the program

This course prepares the licensed practical nurse to perform as a registered nurse by expanding the LPN knowledge base and exploring the scope of practice of the RN. The course begins with a review of acquired clinical skills and knowledge, nursing process, communication, client teaching, and critical thinking and introduces higher level of cognition including clinical reasoning and clinical judgment. Also addressed is the philosophy of associate degree nursing, outcomes of the LPN to RN completion program, and the scope and standards of practice for the professional RN. Critical concepts upon which the curriculum is based are discussed and include patient-centered care, teamwork and collaboration, informatics, evidence-based practice, safety, quality improvement, leadership and professionalism.

In addition, the results of entrance testing provide a blueprint for the LPN student to use for content review and remediation.

RNB 201 4 C/30 L/90 CL/120 CH Intermediate Medical Surgical Nursing

Prerequisite: RNB 200

This course is a continuation of the Medical-Surgical Nursing experience gained from practical nursing program content. Emphasis is based on applying the nursing process in the care of the patient experiencing health-illness conditions in a variety of healthcare settings. The use of evidence-based practice is integrated to provide the student with current trends to apply in clinical reasoning. Emphasis is on the nursing student evolving into the role of professional nurse and the responsibilities this entails. The student's application of the nursing process is enhanced in managing the care of the adult patient.

RNB 202 3 C/22.5 L/67.5 CL/90 CH Mental Health Nursing

Prerequisites: RNB 200, RNB 201

Corequisite: RNB 203

This course introduces the student to the dynamics of human behavior during psychiatric illness. Principles and concepts of mental health, mental health interventions, and therapeutic environments are explored. Use of evidence-based practice is integrated to provide the student with current trends to better facilitate the development of clinical reasoning skills. Students skills in the application of the nursing process are sharpened in managing care of the diverse psychiatric patient.

RNB 203 3 C/22.5 L/67.5 CL/90 CH**Obstetrical Nursing***Prerequisites: RNB 200, RNB 201**Corequisite: RNB 202*

This course focuses on the application of the nursing process to the care of obstetric patients, the newborn, and the family unit in a variety of health care settings. The course also explores women's health across the life span. Emphasis is on the nursing student as a caregiver and the responsibilities this entails related to women's health. Use of evidence-based practice is integrated to provide the student with current trends to better facilitate the development of clinical reasoning skills. Content includes a focus on cultural and psychosocial influences in the care of diverse populations.

RNB 204 4 C/30 L/90 CL/120 CH**Complex Medical Surgical Nursing***Prerequisites: RNB 200, RNB 201, RNB 202, RNB 203*

This course is a continuation of Intermediate Medical-Surgical Nursing with application of the nursing process in the care of the patient experience health-illness conditions in a variety of health care settings. Use of evidence-based practice is integrated to provide the student with current trends to apply in clinical reasoning. Emphasis is on the nursing student evolving into the role of professional nurse and the responsibilities this entails. The student evolving into the nursing process is enhanced in managing care of the adult patient.

RNB 205 3 C/22.5 L/67.5 CL/90 CH**Pediatric Nursing***Prerequisites: RNB 200, RNB 201, RNB 202, RNB 203, RNB 204**Co-requisite: RNB 206*

This course focuses on the nursing care of the pediatric patient and family unit. The concepts of growth and development related to the pediatric patient will be examined. Use of evidence-based practice is integrated to provide the student with current trends to apply in clinical reasoning. An emphasis is on the nursing student evolving into the role of the professional nurse and the responsibilities this entails. The student's application of the nursing process is enhanced in managing care of the pediatric patient and family.

RNB 206 3 C/30 CH**Transitions to Professional Practice***Prerequisites: RNB 200, RNB 201, RNB 202, RNB 203, RNB 204**Co-requisite: RNB 205*

This course focuses on the successful transition of the graduate student nurse into the safe clinical practice as a professional nurse. This course prepares students with the necessary NCLEX preparatory skills. It also highlights management and leadership issues impacting health care today. Emphasis is on the student evolving into the role of professional nurse with responsibility for prioritizing nursing actions and judgments related to the delivery of safe and effective client care.

RENEWABLE ENERGY TECHNOLOGY (RET)

RET 101 3 C/45 CH **Renewable Energy Principles**

This course will cover basic principles and history of conventional energy and alternative energy sources. Industry and government status of geothermal, wind, solar, biomass, fuel cells and other energy sources will be highlighted. Alternative and traditional energies will be defined and compared in terms of today's use. The evolving energy career areas will be discussed.

RET 142 3 C/45 CH **Wind Power**

In this course, students will analyze the historical concepts, modern applications, and future utilization of wind power. The usages of small, medium, and large wind turbines in urban, rural and industrial settings will be examined. Students will gain general knowledge on the economic and environmental issues associated with wind energy sources and they will also become familiar with site assessments for project planning.

RET 143 3 C/45 CH **Wind Power and Hydropower**

Prerequisite: RET 101

In this course, students will analyze the historical concepts, modern applications, and future utilization of wind and hydropower. The usages of small, medium, and large turbines for energy production in urban, rural and industrial settings will be examined. Students will gain general knowledge on the economic and environmental issues associated with wind and hydropower energy sources and they will also become familiar with site assessments for project planning.

RET 144 3 C/45 CH **Solar Power**

Prerequisite: RET 101

This course encompasses several different aspects of solar power. Students will explore the basics of solar energy which includes radiation, heat transfer, flat-plate collectors, thermal energy storage, and solar thermal applications. In this course, students will also become knowledgeable of passive solar building and photovoltaic systems. Topics to be explored include: solar radiation, building heating and cooling loads, energy efficient design and construction, passive solar heating, proper implementation of thermal mass, passive cooling, cell physics, types of PV cells, PV system components, and PV energy storage.

RET 210 4 C/60 CH **Advanced Photovoltaic Concepts and Commercial Applications**

Prerequisite: EE 101, EE 102, RET 144

This is an advanced course in solar energy which expands upon the use of photovoltaic commercial and utility scale systems. Included are troubleshooting and maintenance practices, as well as battery back-up and off-grid applications. The course satisfies the contact hour requirement for taking the North American Board of Certified Energy Practitioners (NABCEP) exam for PV installers in combination with other requirements

ROBOTICS AND AUTOMATION TECHNOLOGY (ROB)

ROB 202 3 C/60 CH Introduction to Robotics

This course is an introduction to the field of robotics technology. It will provide the student with a historical overview of the use and development of robotics. It will also include a discussion of the different types of robots (e.g., Point-to-Point, Continuous path, Electric, Hydraulic, Pneumatic, etc.), and an introduction to robotics programming. ABB Industrial Robots and ABB Robot Studio will be used.

ROB 212 3 C/60 CH Industrial Robotics Application I

Prerequisite: ROB 202

This is an advanced course in robotics programming for automated handling. Also includes flexible manufacturing, sensor, concept of machine vision, and troubleshooting of hardware and software. Emphasis will be on ABB robotics hardware, software and programming using ABB Robot Studio.

ROB 216 3 C/60 CH Robotics Vision and Communications

Prerequisite: ROB 212

This course is robotics programming that uses industrial sensors and cameras for various programming applications such as parts inspection, locating parts, assembling and quality control. Also, students will learn how to interface and connect I/O devices, sensors and cameras to robot controllers and utilize them in their projects.

ROB 218 3 C/60 CH Robotics Maintenance and Calibration

Prerequisite: ROB 212

This course involves troubleshooting components of robotic controllers such as electrical, electronics, computer, power supply, relays as well as manipulator components. Students will be able to use manuals and documentation to identify faults and learn how to troubleshoot faults as well as perform standard robots' calibration.

ROB 220 3 C/60 CH Industrial Robotics Application II

Prerequisite: ROB 212

This is a continuation of the Industrial Robotics Application Programming I course with emphases on applications such as welding, sparing and other applications that require more complex instructions. Also, students will use software to simulation for multi-robotics applications. This course introduces students to other applications of robotics in medical environmental safety and security.

SECURITY (SEC)

SEC 100 3 C/45 CH Introduction to Security

This overview course will explore essential elements of security providing a sound foundation for participation in the field. Topics include security functions, physical security measures, information security, risk assessments, investigations, homeland security, and career opportunities. This course will facilitate knowledge of the discipline. The practical considerations addressed will enable the student to understand and explain the relationship between security and policing, compare and contrast crime causation theories, and identify specialization opportunities within the discipline.

Continued on next page.

*Security (SEC) continued***SEC 103 3 C/45 CH****Legal Guidelines for Security***Prerequisite:* CJS 100

This course is designed to develop a fundamental understanding of criminal law, tort law, regulations, privacy laws, employment laws, contract law, and liability issues. Knowledge of these elements will enable students to identify and modify behaviors that are in violation of regulations and laws and to develop and implement policies and procedures that reduce the risk of litigation.

SEC 204 3 C/45 CH**Physical Security***Prerequisite:* CJS 100

This course addresses major elements of physical security – protective equipment, site surveys, building schematics, security systems, illumination, target hardening, access control, and principles of Crime Prevention Through Environmental Design (CPTED). Based upon this knowledge, students explore how these factors relate to various environments such as with corporate, hospital, transportation, school, retail, residential and industrial settings. Students will be able to prepare a basic site survey, detect physical security vulnerabilities, evaluate physical security needs based on the needs of the client, promote the principles and foundations of physical security, and formulate and defend assertions.

SEC 205 3 C/45 CH**Asset Protection and Incident Response***Prerequisite:* CJS 100

This course explores various aspects of asset protection involving both personnel and property. The course addresses investigative techniques, personnel training for asset protection, threat assessments, travel security protocols, and emergency plans and protocols. Students will develop skills for determining risk assessments, critique and evaluate executive and asset protection plans, emergency plans, and emergency operations. The course will enable students to develop and create sound security plans for personnel safety and asset protection during normal and emergency situations.

SEC 207 3 C/45 CH**Security Administration***Prerequisite:* CJS 100

This course focuses upon the systemic application of security principles and measures for a campus, department, and/or program; it focuses upon the administration and management dynamics of security operations. Topics include policy development, fiscal management, training techniques and strategies, organizational productivity, hiring practices, performance reviews, ethics, public relations, internal relations, and media relations. Students will develop proficiency in describing management principles and operations regarding these topics related to security administration.

SEC 208 3 C/45 CH**Security Capstone Course**

Prerequisites: CJS 100, SEC 100, SEC 103, SEC 204, SEC 205, LEA 230, HLS 100, CIS 110

This Capstone course is intended for students who are in the last semester of the Criminal Justice: Public/Private Security program. This course is intended to assess the cumulative abilities of the student as learned in all previous classes in the program. It may involve a field placement for a maximum of 50% of the class time. The field placement will involve evaluation by the assigned faculty member and a carefully chosen "field supervisor." It may also involve the production of a portfolio and/or writing assignments.

SOCIAL WORK (SW)

SW 101 3 C/45 CH**Introduction to FLD Practice of SW/Practicum**

Students will explore the history of social work, employment, qualifications and opportunities, employment tasks and methods of working with a diverse population. Three shadowing practica are included in this course to expand the students knowledge of various employment opportunities.

SW 102 3 C/45 CH**Exploring Human Behavior in the Environment**

Prerequisite: SW 101

This course introduces students to the notion that individuals are a function of their interaction with the bio-psycho-social contexts. Students will explore theory and knowledge of human psychosocial development, behavior, and functioning, from infancy through death within a framework of culture, ethnicity, social class, race, gender, and sexual orientation. The interplay between and among micro, mezzo, and macro systems of individuals, groups, families, and communities as they influence human growth and

development will be explored. Special emphasis on understanding the impact of poverty, oppression, discrimination, exploitation, and violence.

SW 104 3 C/45 CH**Introduction to Child Welfare**

This course is designed as an introductory level exploration of child welfare issues of neglect and abuse. Students will review historical problems experienced by children and examines violence against and maltreatment and welfare laws and programs. Focus on special practice problems in public child welfare, protective services, assessment of at risk children, in home family centered practice and implementation of the Child Welfare Act. Students will be introduced to various levels of prevention and policy formulation.

SW 105 4 C/60 CH**Social Work Field Instruction I**

The field education is an integral part of the Registered Social Work Technician Program. It will provide opportunities for students to acquire knowledge and skills needed for the competent practice in human service settings. Students will have an opportunity through practice and experience to apply concepts, theories and principles learned in the classroom. 180 Contact Hours in field placement.

SW 106 4 C/60 CH**Social Work Field Instruction II**

Prerequisite: SW 105

This is a continuation of Field Instruction I, students will expand the knowledge acquired in SW 105. The courses of instruction that students receive in this area are essential to the acquisition of the knowledge and skills needed for the competent practice in human service settings. 185 Contact Hours in field placement.

Continued on next page.

*Social Work (SW) continued***SW 108 2 C/30 CH****Case Documentation**

This course is designed to provide a reference on documentation and record-keeping practices for community-based service agencies. It also serves to highlight the minimum standards of case documentation that students should strive to achieve.

SW 110 3 C/45 CH**Case Management and Service Care Navigation**

This course provides an approach to providing supports and service to persons who are mentally ill with multiple health and social needs. The course details how to navigate systems of supports and services which are best provided through case management, care coordination and navigation.

SOCIOLOGY (SOC)**SOC 100 3 C/45 CH****Introduction to Sociology**

In this course students will examine basic sociological concepts such as theories of social organization research, methods of research, culture, society and social groups, the socialization process, social class and social mobility, race and ethnic relations. Social institutions such as education, family, religion and government will also be discussed.

SOC 103 3 C/45 CH**Social Problems**

Prerequisite: SOC 100

This course is a study of current social issues including crime, poverty, domestic abuse, drug addiction, environment, urbanization, racism, sexism, family issues and unemployment. This course provides an overview of the origins, existing policies and proposed solutions to social problems. Course content includes both theory and practice.

SOC 104 3 C/45 CH**American Studies**

This course follows an established model of critical inquiry based on an inter-disciplinary study of American culture and national identity. Through a wide range of approaches, students will explore how the American experience and identity are produced by language, representations and the construction of cultural discourse. This course provides a critical understanding of how social identities of race, class, gender and nationalism function to define the evolving state of the American condition.

SOC 120 3 C/45 CH**Death and Dying**

Prerequisite: SOC 100

This course is a survey and analysis of concepts, theories and contemporary issues related to death and dying. Among the areas to be studied are bereavement, grief, suicide and funeral service practices.

SOC 144 4 C/60 CH**Field Work I: Community Placement and Seminar**

The purpose of the seminar is to promote the integration of social work concepts and theories learned in the classroom with social work practice and skills learned in the field experience.

SOC 225 3 C/45 CH**Sociology of Work**

In this course students will examine the study of work in American society. There will be an analysis of the structure of the American workforce, the impact of technology, automation, alienation, job enrichment, problems and changing patterns in the workforce with a focus on pressures associated with constant societal changes.

SOC 226 4 C/60 CH**Field Work II: Community Placement and Seminar**

Field Work II Community Placement and Seminar is a continuation of the integration of social work concepts and theories and its practical application towards field work experience.

SOC 230 3 C/45 CH**Ethnic Minorities**

Prerequisite: One course in ANT or SOC, Early Childhood students do not need a Prerequisite

This course covers the contributions of ethnic minorities which give our society a unique cultural diversity. Local ethnic differences and problems and multiethnic cooperation is viewed through sociological, anthropological, historical perspectives.

SOC 245 3 C/45 CH**Marriage and Family**

Prerequisite: SOC 100

In this course the family is studied cross culturally with emphasis on the contemporary American Family. Topics include gender role socialization, mate selection, alternatives to marriage, the multi-ethnic family and intergenerational issues.

SOC 250 3 C/45 CH**Juvenile Delinquency**

Prerequisite: SOC 100

In this course students will examine the problem of juvenile delinquency as it exists in the United States. An analysis of the various forms of delinquency will be highlighted. There will be an

overview of the societal implications of juvenile delinquency ranging from the individual, the family and the community. Juvenile delinquency will be evaluated from a macro perspective by examining the role of schools, court systems, and legal implications with an overview of prevention initiatives and rehabilitation programs.

SPANISH (SPA)**SPA 101 4 C/60 CH****Elementary Spanish I**

This course covers grammatical constructions, vocabulary, basic idioms, basic phonetics and oral drill.

SPA 102 4 C/60 CH**Elementary Spanish II**

Prerequisite: SPA 101

This course covers completion of fundamental constructions, vocabulary, emphasis on spoken language. Further training in reading, writing, Spanish conversation and the use of idiomatic constructions.

SPA 201 4 C/60 CH**Intermediate Spanish I**

Prerequisite: SPA 102

This course covers a review of essential grammatical principles and further development of reading skills and idiomatic usage.

SPA 202 4 C/60 CH**Intermediate Spanish II**

Prerequisite: SPA 201

Reading on more advanced levels. Continued emphasis on writing and spoken Spanish.

SPEECH (SPH)

SPH 100 3 C/45 CH

Interpersonal Communication

In this course there will be the study of the application of the basic skills necessary for interpersonal communication with emphasis on group discussion.

SPH 101 3 C/45 CH

Fundamentals of Speech

In this course there will be the study and application of basic principles underlying effective oral communication with emphasis on public speaking.

SPH 105 3 C/45 CH

Improving the Speaking Voice

Prerequisite: SPH 101

This course covers the study of the underlying principles and actions pertinent to the development of appropriate vocal and articulatory skills: breath control, voice production, vocal resonance and inflection.

SPH 131 3 C/45 CH

Introduction to Radio, TV and Mass Communication

This course is the study of growth and development of radio, television and other forms of mass communication.

SPH 201 3 C/45 CH

Advanced Public Speaking

Prerequisite: SPH 101

This covers an advanced study, preparation and delivery of informative and persuasive speeches.

SURGICAL FIRST ASSISTANT (SFA)

SFA 200 3 C/45 CH

Fundamentals of Surgical First Assisting - Lecture

Prerequisite: Admission to the Surgical First Assistant Program

This course is designed for Certified Surgical Technologists who intend to develop their competencies in the fundamentals of the theory and practice of a First Surgical Assistant. The course teaches the responsibilities of a First Surgical Assistant on how to use peri-operative monitoring equipment, conduct diagnostic tests, and execute surgical procedures.

SFA 210 3 C/45 CH

Advance Surgical Pharmacology - Lecture

Prerequisite: Admission to the Surgical First Assistant Program

This course is a continuation of Surgical Pharmacology (SUR 140) and teaches what medications the surgical first assistant will most frequently use in surgical and anesthetic procedures.

The course will examine anesthesia as a complex and specialized area of pharmacology. Another focus will be on local and general anesthetics, neuromuscular blocking agents, analgesics, antibiotics, drugs that affect blood coagulation, and drugs used to manage circulatory disorders. Safe handling of anti-neoplastic drugs will also be taught.

SFA 220 3 C/45 CH

Surgical Management of Patients – Lecture

Prerequisites: BIO 252, SFA 200, SFA 210

This is an introductory course on the theory and practice of caring for the surgical patient by the surgical first assistant during the pre-operative, intra-operative, and post-operative phases of a surgery.

The student will also learn the role of the first assistant during the pathological and physiological processes and when the first assistant must apply intervention techniques.

SFA 230 3 C/45 CH**Surgical First Assistant Techniques – Lab***Prerequisites: BIO 252, SFA 200, SFA 210*

SFA 230 is intended for certified surgical technologists, OR nurses, and certified surgical first assistants so that they can develop their competencies in the fundamentals of the surgical skills and surgical techniques of a first surgical assistant. The course focuses on the surgical first assistant's moral and legal responsibility for performing manipulative clinical procedures, whether for diagnosis, monitoring, or treatment, and includes the theoretical knowledge and practical techniques necessary to assist the surgeon before, during, and after surgery in the use of equipment, hemostasis, instruments, material and suturing.

SFA 235 8 C/360 CH**Clinical Preceptorship – Clinical***Prerequisites: BIO 252, SFA 200, SFA 210, SFA 220, SFA 230, SFA 253*

This course is a clinical practice of basic surgical skills for surgical first assistant students. A student enrolled in the course is assignment to a qualified preceptor – a surgeon who provides direct supervision and guidance during each rotation. Each student in the course is required to complete a specified number of cases - 115 to 135 cases (approximately 300 hours) with 100 percent skill competency.

SFA 245 8 C/360 CH**Clinical Preceptorship II – Clinical***Prerequisites: BIO 252, SFA 200, SFA 210, SFA 220, SFA 230, SFA 253, SFA 235*

This course is a clinical practice, part II, of basic surgical skills for surgical first assistant students. A student enrolled in the course is assignment to a qualified preceptor – a surgeon who provides direct supervision and guidance during each rotation. Each student in the course is required to complete a specified number of cases - 115 to 125 135 cases

(approximately 300 hours) with 100 percent skill competency.

SFA 253 4 C/60 CH**Surgical Anatomy Lecture and Lab***Prerequisites: BIO 252, SFA 200, SFA 210*

SFA 253 is an introductory course that systematically investigating the structure and organization of the human body. This course has been specifically prepared for the surgical first assistant certificate program.

SURGICAL TECHNOLOGY (SUR)

SUR 100 3 C/60 CH**Orientation to Surgical Technology**

This comprehensive course provides students with foundational knowledge and practical skills essential for success in the field of surgical technology. It covers the multifaceted aspects of the profession, including relevant governing bodies and standards. Students will gain an overview of the operating room environment, the hierarchy of surgical personnel, and supporting departments. Emphasis is placed on understanding patient needs, the specific roles and responsibilities of surgical technologists and the surgical team, as well as developing effective communication skills. Through a combination of lecture and hands-on lab experiences, students will actively engage with the surgical environment to build confidence and readiness for clinical practice.

Continued on next page.

*Surgical Technology (SUR) continued***SUR 101 3 C/45 CH****Central Service Technician - Lecture***Prerequisite: ALH 110, BIO 155**Corequisites: SUR 100*

This course provides the fundamentals of central processing supply, and processing and distribution. Instruction and practice is given in instrument identification, cleaning, sterilizing, packaging and distribution aseptic technique, patient-centered practices and theories, customer service, and overall policies and practices of central service supply departments.

SUR 102 4 C/180 CH**Central Service Technician – Lab and Clinical***Prerequisites: ALH 110, BIO 155, SUR 100, SUR 101*

The course teaches the student the following skills required for certification as a central service technician: cleaning; decontamination; processing (inspection, assembling, and packaging) and sterilization of reusable patient care central services supplies and equipment; and distribution of these supplies and equipment to the units that require them. Students have four, face to face lab sessions while placed in a clinical setting. The student is responsible for transportation to the clinical site. Students who complete this program are eligible to take the Healthcare Sterile Processing Association (HSPA) Certification Examination.

SUR 110 3 C/60 CH**Surgical Technology Principles***Prerequisites: ENG 119, ENG 120, BIO 155, BIO 240, BIO 250, BIO 295, PSY 101, ALH 110, SUR 100**Corequisites: SUR 120, SUR 125.*

Surgical Technology Principles is a comprehensive course designed to equip students with essential knowledge and practical skills required for proficiency in surgical technology. The course combines 30 hours of focused lecture instruction covering surgical procedures, procedure-specific equipment and supplies, aseptic techniques, and patient care within the operating room environment, with 30 hours of hands-on lab experience. Through this integrated approach, students gain a thorough understanding of key principles and practices, reinforced by practical application to ensure readiness for clinical practice and success in the field.

SUR 120 4 C/90 CH**Surgical Specialties and Techniques I***Prerequisites: ENG 119, ENG 120, BIO 155, BIO 240, BIO 250, BIO 295, PSY 101, ALH 110, SUR 100**Corequisites: SUR 110, SUR 125*

Surgical Specialties and Techniques I is designed to provide students with an in-depth understanding of surgical procedures, patient care, and sterile techniques across a variety of surgical specialties within the operating room environment. This course combines 30 hours of focused lecture instruction with 60 hours of hands-on lab experience. Through lecture, students will learn about surgical equipment, aseptic techniques, and perioperative protocols essential to the profession. The extensive lab component allows students to actively practice these skills, applying theoretical knowledge in simulated surgical settings to build competence and confidence.

SUR 125 4 C/90 CH**Surgical Technology Skills Laboratory**

Prerequisites: ENG 119, ENG 120, BIO 155, BIO 240, BIO 250, BIO 295, PSY 101, ALH 110, SUR 100

Corequisites: SUR 110, SUR 120

Surgical Technology Skills Laboratory is a hands-on laboratory course that immerses students in the fundamental activities and procedures performed by surgical technologists. Through procedure-specific practical exercises and simulated surgical scenarios, students develop proficiency in aseptic technique, instrumentation setup and handling, equipment operation, and the use of surgical supplies and pharmaceuticals. Emphasis is placed on patient safety, sterile field maintenance, and effective team communication. This course serves as essential preparation for clinical placement by providing realistic, supervised practice to build confidence and competence in the operating room environment.

SUR 130 4 C/90 CH**Surgical Specialties and Techniques II**

Prerequisites: ENG 119, ENG 120, BIO 155, BIO 240, BIO 250, BIO 295, PSY 101, ALH 110, SUR 100, SUR 110, SUR 120

Corequisites: SUR 140, SUR 145

Surgical Specialties and Techniques II – Lecture is a continuation of Surgical Specialties and Techniques I, designed to expand students' knowledge and proficiency in advanced surgical specialties. This course emphasizes complex surgical anatomy, specialty-specific procedures, and the integration of advanced techniques used in both open and minimally invasive surgeries. Topics also include perioperative wound management, procedural sequencing, and the critical thinking skills necessary to support the surgical team in diverse operative environments. Building upon foundational concepts, students will deepen their understanding of surgical practices essential for safe, efficient, and high-quality patient care.

SUR 140 4 C/75 CH**Surgical Pharmacology**

Prerequisites: ENG 119, ENG 120, BIO 155, BIO 240, BIO 250, BIO 295, PSY 101, ALH 110, SUR 100, SUR 110, SUR 120

Corequisites: SUR 130, SUR 145

Surgical Pharmacology is a comprehensive course designed to provide students with a thorough understanding of anesthesia principles, pharmacological agents and their effects during surgical procedures, and perioperative patient care. Through didactic and theoretical study, students will gain the knowledge and skills necessary to support and ensure patient safety from proper administration of pharmacological agents from the surgical field.

SUR 145 4 C/222 CH**Surgical Technology Clinical Practicum I**

Prerequisites: ENG 119, ENG 120, BIO 155, BIO 240, BIO 250, BIO 295, PSY 101, ALH 110, SUR 100, SUR 110, SUR 120, SUR 125

Corequisites: SUR 130, SUR 140

Surgical Technology Clinical Practicum I provides students with supervised clinical experience in a surgical setting, building on skills and knowledge acquired in prior coursework. This practicum allows students to apply core competencies in real-world scenarios, including assisting in surgical procedures, upholding patient safety protocols, and working collaboratively as part of a multidisciplinary healthcare team. Through hands-on participation, students further develop their technical abilities, professional communication, and understanding of the surgical environment.

Continued on next page.

*Surgical Technology (SUR) continued***SUR 155** **5 C/237 CH****Surgical Technology Clinical Practicum II**

Prerequisites: ENG 119, ENG 120, BIO 155, BIO 240, BIO 250, BIO 295, PSY 101, ALH 110, SUR 100, SUR 110, SUR 125, SUR 130, SUR 140, SUR 145

Corequisites: SUR 160

Surgical Technology Clinical Practicum II is a supervised clinical course that builds upon prior practicum experiences, providing students with continued exposure to advanced surgical procedures and responsibilities within the operating room. Students further develop their clinical competencies through active participation in surgical cases, with a strong emphasis on maintaining aseptic technique, ensuring patient safety, and collaborating as effective members of the surgical team. The inclusion of 15 hours of lecture supports the integration of clinical experiences with advanced theoretical concepts, reinforcing decision-making, critical thinking, and professional reflection in preparation for entry into the field. The 30 hours of dedicated lab will be used for student competency checkoffs on campus.

SUR 160 **4 C/60 CH****Surgical Seminar/Certification Preparation**

Prerequisites: ENG 119, ENG 120, BIO 155, BIO 240, BIO 250, BIO 252, BIO 295, PSY 101, ALH 110, SUR 100, SUR 110, SUR 120, SUR 125, SUR 130, SUR 140, SUR 145

Corequisites: SUR 155

The Surgical Seminar/Certification Preparation course is a comprehensive course designed to review and prepare surgical technology students with the essential knowledge, exercises and techniques to prepare students to sit for the National Certification examination offered by National Board of Surgical Technologists and Surgical Assistants (NBSTSA) as a condition of graduation.

SUSTAINABLE ENVIRONMENTAL DESIGN (SED)**SED 101****3 C/45 CH****Principles of Sustainability**

This course will provide a broad-based introduction to sustainability that is applicable to all majors. This course examines the historical context and advancement of sustainability as a concept in society and explores the three principles of sustainability: environmental awareness, social justice, and economic opportunity. The ethical and scientific basis for sustainable design in the built environment will be examined. Students will also gain general knowledge on how to shape the consumer culture in applying more sustainable practices in our society through marketing.

TEACHER EDUCATION (ED)**ED 110****4 C/60 CH****Introduction to Education**

This course provides a foundation for teaching in public and private schools. Topics and issues are addressed which provide a historic background of our present day educational system, understanding of school organization and the role of schools in society, duties, responsibilities, and expectations of teachers; working with parents and community members; fiscal considerations; and of diversity/equity issues. Opportunities are also provided for students to gain understandings of the State of Michigan approved Entry-Level Standards for Michigan Teachers (ELSMT), school curricula and instruction (teaching methods), Michigan Curriculum Framework (MCF), and Grade Level Content Expectations (GLCE and HSCE) for elementary and high school students. Field trips (Service Learning) to related education settings are included and required in the class.

ED 202**5 C/75 CH****Earth Science for Teachers***Prerequisite: ED 110, Program Admission*

This is a lecture and practicum course dealing with earth science concepts and teaching methods in the teaching of grades K-8. The National Science Teachers Association (2003), Standards for Science Teachers Preparation guidelines (B3) will acquaint the student with techniques of teaching basic earth science concepts. Students will participate in school based assignments (field experiences) based on integral parts of the course. Emphasis is on the pedagogical approaches widely used in elementary classrooms. The science specialist should have all of the competencies described for the elementary generalist, but also should be prepared in earth and space science. This class requires 30 hours of lecture and 45 hours of practicum per semester.

VIDEO GAME DESIGN AND ANIMATION (VGD)

VGD 268**3 C/45 CH****Computer Games Foundations**

This course is designed as a first course for computer Game Design and Development Concentrations which will introduce the vocabulary and concepts of game development. This course is a very comprehensive overview electronic game development process and underlines the historical context, content creation strategies, and future trends in the industry. The student will learn how games are produced, tested and released. The game industry is the fastest growing segment of the entertainment market and an excellent field for career advancement.

VGD 269**4 C/60 CH****Introduction to 3D Modeling, Pipeline, and Workflow**

This course is an introduction to 3D modeling. This course is an advanced design concept course in the Video Game Design concentration. It is designed to give students an in-depth understanding of gaming and game development. Especially for when creating assets that are used with industry standard software. The contents of this course will focus on the understanding of pipelines and workflow for 3D modeling and how it leads to animation, while examining and discussing future trends in the Video Game Industry. Modeling techniques like Hard-surface, soft-surface, production modeling, low poly, and UV-unwrap will be covered in the course while using Maya Autodesk.

VGD 270**4 C/60 CH****Texturing Fundamentals and Design***Prerequisite: VGD 268**Corequisite: VGD 269*

This course teaches how to create an emotional atmosphere through photo realistic and fantasy-like textures. This course will cover topics such as materials, shaders, light, surfaces, and texturing methods. In this course the students will learn about image maps, procedural maps, normal mapping, image editing, and rendering full models with textures and lighting applied to their models.

Continued on next page.

Video Game Design and Animation (VGD)
continued

VGD 271 **5 C/75 CH**

Introduction to 3D Animation and Character

Prerequisite: VGD 270, 269

Corequisite: VGD 272

Students will become familiar with a variety of 3D characters, and build an understanding for animation techniques and applications. Students will learn the basic principles of animation and develop the industry skills needed for animation in video games, and similar fields alike. This course will cover animation with key frames, skeleton structure, Bones, control rigs, and character animation. Students are expected to have previous knowledge of modeling from prerequisite courses so that this course serves to build on existing skills.

VGD 272 **5 C/75 CH**

Advance 3D Character Animation

Corequisite: VGD 271

Students will develop an advanced understanding of animation, and character animation. From the previous course in the VGD program, students will further build their understanding and skills in this course. Within this course students will produce rendered scenes of characters, environments, and fantasy-like props. In addition to this, students will learn how to import their full character, or environment into a game engine like Unreal Engine. Students will learn how to work within Unreal and set-up their animation within the Unreal Engine.

VGD 999

2 C/30 CH

Computer Video Game Project

Prerequisite: Program approval

Students will develop a Computer Game concept, turn it into a design, implement the programming and art required and produce it on the committed schedule. Go/no go milestones and final “publisher” acceptance reviews will mimic the Industry. The students will have a deliverable for their portfolio that can be used for employment purposes.

WATER AND ENVIRONMENTAL TECHNOLOGY (WET)

WET 101

3 C/45 CH

Water Treatment Technologies

This course will cover the conventional water treatment processes. Topics to be explored will include: preliminary treatment, coagulation and flocculation, sedimentation and clarification, filtration, and disinfection.

WET 102

3 C/45 CH

Waste Water Treatment Technologies

This course will provide an introduction to the cause of water pollution, the reason for treating polluted waters and the fundamentals of Wastewater treatment. Students will study the basic principles of treatment plant operation and the processes commonly used in pollution control facilities.

WET 210 **3 C/45 CH**
Advanced Waste Water Treatment Technologies

Discusses wastewater treatment technologies beyond conventional processes. Includes the processes and techniques commonly used for advanced wastewater treatment, disinfection, solids stabilization and disposal, nutrient reduction and toxics removal. Includes field tours and discussion of safety and health, sampling procedures, record keeping, data preparation and report writing, and analytical procedures used to determine optimal plant operation and compliance with regulatory requirement.

WET 212 **3 C/45 CH**
Advance Water Treatment

Considers drinking water treatment technologies beyond conventional processes. Includes softening, ion exchange, activated carbon absorption, aeration, air stripping, and membrane processes. Includes participation in field tours and discussions on safety and health, sampling procedures, record keeping, data preparation, report writing and the analytical procedures used to determine and measure drinking water quality.

WET 215 **3 C/45 CH**
Water Quality Analysis and WET Instrumentation

Investigates conventional water and wastewater laboratory test procedures, with particular emphasis on those analytical techniques that require an understanding and practical use of laboratory instrumentation. Water Quality Lab tests include BOD, TSS, temperature, DO, pH, conductivity, TDS, total and volatile solids, alkalinity, TRC, and others common to the daily operation of both drinking water and wastewater plants; includes discussions of basic stream ecology and applied environmental science principles. Instrumentation Lab includes the use of pH, millivolt and specific ion meters and probes and an introduction to Spectrophotometry, atomic absorption (AA), and gas chromatography/mass

spectrometry (GC/MS). Includes field tours of municipal water, wastewater treatment facility labs and related field study discussions.

WET 220 **3 C/45 CH**
Water Quality Analysis and Microbiology

Investigates more advanced water quality analytical techniques and the microbiology of water, including microscopic examination and identification of microorganisms commonly found in water supplies, water and wastewater treatment processes and polluted bodies of water. Water Quality Analysis lab work involves more advanced analytical procedures to determine nutrients, heavy metals and toxic materials. Focuses on lab health and safety, proper lab technique, representative sampling procedures, record keeping, data preparation and handling and report writing. Continues field studies and analysis using Atomic Absorption and/or Gas Chromatography/ Mass Spectrometer instruments. Includes lab work involving organisms commonly found in water and wastewater samples with specific bacteriological analytical techniques.

WET 224 **2 C/30 CH**
Water/Wastewater Utility Equipment Maintenance

Provides the student with basic knowledge of mechanical equipment and repair techniques used in both water and wastewater facilities. Uses shop drawings and blueprints during disassembly and reassembly of a variety of mechanical devices. Studies pumps, valves, piping systems, and chlorination equipment

Continued on next page.

Water and Environmental Technology (WET)
continued

WET 265 **3 C/45 CH**
Practicum in Water/Wastewater Treatment

Must be taken during final semester with permission of program director. Provides opportunities to perform technical procedures through structured field experience in water and wastewater treatment plants. Emphasizes gaining experience under plant managers and operating personnel with goal of developing organizational skills and responsibility necessary for entry-level employment. Uses rotation through assigned areas of experience in water treatment.

WELDING (WLT)

WLT 101 **5 C/75 CH**
Arc/Oxygen – Acetylene Welding

Corequisite: WLT 103

Lab Fees

This introductory course in arc welding covers theory and practice, and proper procedures for various welding positions. Topics include AC and DC welding, electrode identification, classification and proper applications to typical operations. This course is also designed for students who need knowledge of oxy-acetylene welding and a degree of skill required by the industry. Also, an introduction into CNC plasma cutting (programming), silver soldering, plastic and spot welding is presented.

WLT 102 **5 C/75 CH**
Arc Welding

Prerequisite: WLT 101

Lab Fees

Instruction is provided in arc welding using both AC and DC arc welding equipment. Emphasis is on out-of-position welded joints in mild steel,

testing procedures, and beveling and fabricating various welded joints. Related theory, codes and standards are included.

WLT 103 **5C/75 CH**
Gas Tungsten Arc Welding (GTAW)

Corequisite: WLT 101

Lab Fees

This course provides instruction on Gas Tungsten Arc Welding (GTAW). Students will be able to identify high quality welds in ferrous and non-ferrous metals and apply them to the five basic welding joints.

WLT 104 **5C/75 CH**
Tungsten Inert Gas Welding (TIG)

Prerequisites: WLT 101, WLT 103

Lab Fees

This course is designed for advanced gas tungsten arc welding (GTAW). This process of metal fusion is capable of producing high quality welds in cold rolled, stainless and aluminum. Emphasis will be on out-of-position welding, where students will be able to perform out-of-position welds using ferrous and non-ferrous metals.

WLT 105 **5 C/75 CH**
MIG/Flux-Core/Plasma Welding

Prerequisite: WLT 101

Lab Fees

This course involves MIG welding/flux-core welding with plasma torch cutting and manual programming. Technical theory directly related to MIG welding, including the composition and properties of metals is included; MIG and Flux-core welding for production or fabrication intent are also covered.

WLT 106 3 C/45 CH**Welding Fabrication***Prerequisites: WLT 101, WLT 103, WLT 104, WLT 105**Lab Fees*

In this course, emphasis will be on the development of fabrication techniques, including design, mock-ups, material selection, layout, grid, material preparation and use of fixtures. Welding skills developed in WLT101, WLT103, WLT104 and WLT105 will be applied. There will be an opportunity for students to further investigate other industrial welding processes.

WLT 107 3 C/45 CH**Welding Fabrication II***Prerequisite: WLT 106**Lab Fees*

Building on the techniques and processes learned in WLT 106, this class offers additional instruction on fabrication and the opportunity for advanced fabrication techniques to be explored.

WLT 110 4 C/60 CH**Introduction to Metal Sculpture***Lab Fees*

This course is designed for the artistic development through metal sculpture. Students will learn basic safety, set-up and operation of Oxy-Acetylene cutting, MIG welding, TIG welding as well as Plasma cutting and fabrication equipment. Artistic development will be encouraged through fabrication techniques, critiques and lectures.

WLT 111 4 C/60 CH**Advanced Metal Sculpture***Prerequisite: WLT 110**Lab Fees*

This course is designed as a capstone class for the Artistic Welding program. Emphasis will be on the development of metal sculpture through different welding and fabrication techniques. Students will develop a body of work that is cohesive in concept, material and/or subject. An Artist statement and presentation of work during critiques will help the student become confident and prepared to display or sell work.

WLT 112 3 C/45 CH**Troubleshooting and Repair***Corequisites: WLT 101, WLT 103, WLT 104, WLT 105**Lab Fees*

This course covers basic mechanical troubleshooting and repair of welding equipment. Included in the course is a business start-up plan covering tools, materials and equipment needed for a successful welding business.

WLT 201 3 C/45 CH**Specialized Welding Process***Prerequisite: WLT 101**Lab Fees*

This introductory course in various weld processes covers theory and practice, as well as proper procedures for various welding processes. Topics include sweat soldering, silver soldering, brazing, plastic, PVC and spot welding.

WLT 202 3 C/45 CH**Quality Testing – Welding***Prerequisites: WLT 101, WLT 102, WLT 103, WLT 104, WLT 105**Lab Fees*

Welding quality and inspection procedures form the basis of this course. Students are exposed to equipment used for weld quality testing and procedures for determining a proper weld.\

Continued on next page.

*Welding (WLT) continued***WLT 208** **5 C/75 CH****Pipe Welding***Prerequisites:* WLT 101, WLT 102, WLT 103, WLT 104, WLT 105*Lab Fees*

This course covers the advanced processes utilized in the modern industry. Pipe joint welding in accordance with American Welding Society codes and specifications, including processed metallic inert gas, tungsten inert gas, shielded metal arc and soldering

WLT 209 **5 C/75 CH****Advanced Pipe Welding***Prerequisite:* WLT 208*Lab Fees*

This course is an advanced pipe welding class with topics involving welding of pipe using the shielded metal arc welding (SMAW) process. Topics include Multi-pass/hot-pass/cover-pass and out-of-position welding to finish weld coupons from WLT208. Samples will be taken for face and root bendi

WLT 210 **5 C/75 CH****Welding Certification***Prerequisites:* WLT 101, WLT 102, WLT 103, WLT 104, WLT 105*Lab Fees*

This course covers advanced theory and hands-on application of skills necessary to pass American Welding Society procedures. Practice and theory in shielded metal arc, tungsten inert, metallic inert gas welding in piping, tubing and plate in common alloy metals.

SHORT-TERM CERTIFICATES

Short-Term Certificate Requirements (SCERT)

The short-term certificate programs are designed for students who are seeking job-entry skills and for those who wish to improve their performance on their present job or who wish to qualify for advancement. In order to receive a short-term certificate, students must have a minimum grade point average of 2.0 in the short-term certificate upon completion.

• Short-Term Certificate: Minimum 16 credits, Maximum 29 credits*

1. American Sign Language Interpretation (SCERT-ASL)	<u>28</u> credit hours
2. Automotive Service Technology: Automatic Transmission and Transaxle (SCERT-AUTO)	<u>19</u> credit hours
3. Automotive Service Technology: Brakes (SCERT-BRKS)*	<u>18</u> credit hours
4. Automotive Service Technology: Engine Performance (SCERT-EP)*	<u>24</u> credit hours
5. Automotive Service Technology: Engine Repair (SCERT-E/REP)*	<u>19</u> credit hours
6. Automotive Service Technology: Heating and Air Conditioning (SCERT-HAC)*	<u>18</u> credit hours
7. Automotive Service Technology: Manual Drive Train and Axle *	<u>17</u> credit hours
8. Automotive Service Technology: Suspension and Steering (SCERT-SUSP)*	<u>17</u> credit hours
9. Bookkeeping (SCERT-BOK)	<u>20</u> credit hours
10. Business Administration: Retail Management (RTM-SCERT)	<u>24</u> credit hours
11. Computer Information Systems (CIS): Cloud Computing (SCERT-CLD)	<u>22</u> credit hours
12. Computer Information Systems (CIS): Computer Support Specialist (SCERT-CSS)	<u>27</u> credit hours
13. Computer Information Systems (CIS): Network Administrator (CIS-NTWK-ADM-SCERT)	<u>27</u> credit hours
14. Computer Numerical Control: 5-Axis Milling Operation and Programming (SCERT)	<u>24</u> credit hours
15. Computer Information Systems (CIS): Security+ (SCERT-SEC)	<u>16</u> credit hours
16. Computer Numerical Control: Programming and Operation (CNC-SCERT)	<u>24</u> credit hours
17. Craft Brewing (BRW-SCERT)	<u>21</u> credit hours
18. Digital Marketing (SCERT-DM)	<u>18</u> credit hours
19. Early Childhood Education: CDA (ECE-SCERT)	<u>19+</u> credit hours
20. Fire Protection Technology (SCERT-FPT)	<u>21</u> credit hours
21. Heating Ventilation, Air Conditioning (HVAC): 3rd Class Refrigeration (SCERT-HVAC-TCR)	<u>28</u> credit hours
22. Heating, Ventilation, Air Conditioning (HVAC): Residential Air Conditioning and Commercial Refrigeration (HRES-SCERT)	<u>16</u> credit hours
23. Informatics (INF-SCERT)	<u>27</u> credit hours
24. Home Health Care Aide (SCERT-HHA)	<u>18</u> credit hours
25. IT Project Management (ITPRM-SCERT)	<u>22</u> credit hours
26. Light Rail Technology: Railroad Rules and Safety (SCERT-RRS)	<u>16</u> credit hours
27. Manufacturing Technology: Metrology (SCERT-MANT)	<u>18</u> credit hours
28. Medical Office Specialist (SCERT-MES)	<u>27</u> credit hours
29. Nursing: Care Coordination and Transition Management (CCM-SCERT)	<u>20</u> credit hours
30. Office Information Systems: E-Business (SCERT-EUS)	<u>27</u> credit hours
31. Patient Care Technology (SCERT-PCT)	<u>25</u> credit hours
32. Phlebotomy Technician (SCERT-PLT)	<u>22</u> credit hours
33. Product Development Prototyping: Introduction to Rapid Prototyping (PDP-SCERT)	<u>24</u> credit hours
34. Product Development Prototyping: Advanced Rapid Prototyping (APDP-SCERT)	<u>21</u> credit hours
35. Programmable Logic Controllers (ROB-SCERT)	<u>23</u> credit hours
36. Surgical Technology: Central Service Technician (SCERT-SURT)	<u>17</u> credit hours
37. Welding Technology: Advanced - Level 2 (SCERT-WLTAW)	<u>29</u> credit hours
38. Welding Technology: Specialized - Level 3 (SCERT-WLTSW)	<u>28</u> credit hours

*Refer to Academic Schedule

CERTIFICATES OF ACHIEVEMENT

Certificates of Achievement (ACERT) are short-term certificates designed to provide in-demand skills to meet industry needs. Our stackable Certificates of Achievement can also provide a pathway to a full degree at your convenience. Certificates of Achievement combine courses from our currently offered degree programs and coursework in preparation to meet industry credential standards. Students must have a minimum grade point average of 2.0 in their overall courses upon completion to receive a Certificate of Achievement.

1. Automotive Service Technology: Electrical/Electronic Systems (ACERT-EES)*	<u>12</u> credit hours
2. Business Administration: Business Supervisor (BAD-ACERT)	<u>12</u> credit hours
3. CIS: Artificial Intelligence Prompt Engineering (AIPE-ACERT)	<u>14</u> credit hours
4. CIS: Video Game Assistant (VGDA-ACERT)	<u>14</u> credit hours
5. CIS: Video Game Design-Virtual Reality (VGVR-ACERT)	<u>13</u> credit hours
6. CIS: Certified Ethical Hacker (ACERT-CEH)	<u>13</u> credit hours
7. CIS: Network+ (ACERT-NTWK)	<u>10</u> credit hours
8. CIV: Civil Engineering Basic Construction Material Testing Preparation (CIV-ACERT)	<u>10</u> credit hours
9. Computer Numerical Control: Operation (CNC-OP-ACERT)	<u>12</u> credit hours
10. Computer Numerical Control: Programming (CNC-PR-ACERT)	<u>12</u> credit hours
11. Criminal Justice: Corrections (CJRC-ACERT)	<u>15</u> credit hours
12. Digital Photography Technology: Commercial Photography (CDPT-ACERT)	<u>12</u> credit hours
13. Digital Photography Technology: Journalism Photography (JDPT-ACERT)	<u>12</u> credit hours

COMPLIANCE STATEMENTS

EQUAL OPPORTUNITY/ NONDISCRIMINATION POLICY

In compliance with relevant federal and state laws, including Title VI of the Civil Rights Act of 1964, Title IX of the Education Amendments of 1972, Section 504 of the Rehabilitation Act of 1973, the Age Discrimination Act of 1975, the Age Discrimination in Employment Act of 1967, the Vietnam-Era Veterans Readjustment Act of 1974, the Americans for Disabilities Act of 1990, the Elliot-Larsen Civil Rights Act, and the Persons with Disabilities Act, it is the policy of Wayne County Community College District that no person, on the basis of race, color, religion, national origin, age, sex, height, weight, marital status, disability, or political affiliation or belief, shall be discriminated against, excluded from participation in, denied the benefits of, or otherwise be subjected to discrimination in employment or in any program or activity for which it is responsible or for which it receives financial assistance from the U.S. Department of Education.

Questions or concerns regarding the above should be directed to the Equal Employment/Nondiscrimination Coordinator at:

Director of Human Resources
801 W. Fort Street
Detroit, MI 48226
Telephone: (313) 496-2765

SEXUAL HARASSMENT POLICY

Sexual harassment is an infringement on an employee's right to work and a student's right to learn in an environment free from unlawful sexual pressure. It is the policy of Wayne County Community College District to prohibit unlawful sexual harassment of employees and students.

Sexual harassment consists of overt activity of a sexual nature, which has a substantial adverse effect on a person in both the workplace and in the academic setting. It may include, but is not limited to, the following:

1. Demands for sexual favors accompanied by threats concerning an individual's employment or academic status;
2. Demands for sexual favors accompanied by promises of preferential treatment concerning an individual's employment or academic status;
3. Verbal, written or graphic communication of a sexual nature;
4. Patting, pinching, or other unnecessary body contact with another employee or student.

Any employee or student should report, in writing or orally, any and all incidents of such activity. Complaints may be directed to the employee's

supervisor or the Director of Human Resources. Student complainants should report, in writing, or orally, any and all incidents to the appropriate Campus Provost.

There will be no retaliation against an employee or student for making a complaint or taking part in the investigation of a complaint under this policy. To the extent it can, the College will keep matters confidential. The Director of Human Resources shall promptly investigate all incidents of sexual harassment and direct a report with recommendations to the Board of Trustees following the report of an employee. The Campus Provost shall promptly investigate all incidents of sexual harassment and direct a report with recommendations to the Vice President for Educational Affairs following the report of a student. Violation of this policy shall subject the offending party to appropriate disciplinary action up to and including discharge from employment. (Policy adopted by the Wayne County Community College District Board of Trustees 03/25/87, revised 03/27/91, 03/25/92)

GRIEVANCE PROCEDURES

If any student believes that Wayne County Community College District or any part of the school organization has not applied the principles and/or regulations of (1) Title VI of the Civil Rights Act of 1964 (2) Title IX of the Education Amendment of 1972; (3) Section 504 of the Rehabilitation Act of 1973, the student may bring forward a complaint, (which shall be referred to as a grievance through this text) to the local Equal Opportunity Compliance Coordinator at the following address:

Director of Human Resources
Wayne County Community College District
Human Resources Department
801 W. Fort Street
Detroit, MI 48226

The appropriate grievance procedures must be followed by the student in order for his/her complaint to be thoroughly reviewed for merit. The full grievance procedure is provided in the Student Handbook, which available online at www.wcccd.edu, or at any campus.

DRUG-FREE WORKPLACE POLICY

Wayne County Community College District will make every reasonable effort to provide a drug-free workplace and environment. The College expressly prohibits the unlawful manufacture, distribution, dispensation, possession, or use of any controlled substance in the workplace. The term "controlled substance" shall mean a controlled substance in schedules I through V, of Section 202 of the Controlled Substance Act (21 U.S.C. 812).

COMPLIANCE STATEMENTS

Any individual found to be in violation of this policy is engaged in gross misconduct and subject to disciplinary action, up to and including termination.

All employees will, as a condition of their employment, abide by the terms in this policy. In addition, employees engaged in the performance of a federal grant or contract will notify their supervisor and/or personnel department of any criminal drug statute conviction occurring in the workplace no later than five (5) days after such conviction. (Policy adopted by the Wayne County Community College District Board of Trustees 06/28/89, revised 09/23/92)

SMOKE-FREE WORKPLACE POLICY

Wayne County Community College District and its facilities are smoke-free in compliance with the Dr. Ron Davis Law. (Policy adopted by the Wayne County Community College District Board of Trustees 05/26/93)

WORKPLACE VIOLENCE

It shall be the policy of the Board of Trustees that the College will provide a safe environment for its employees. Threats, threatening behavior, or acts of violence against employees, visitors, guests, or other individuals by anyone on Wayne County Community College District's property will not be tolerated. Violations of this policy will lead to disciplinary action which may include dismissal, arrest and prosecution.

Any person who makes substantial threats, exhibits threatening behavior, or engages in violent acts on Wayne County Community College District property shall be removed from the premises as quickly as safety permits, and shall remain off Wayne County Community College District premise pending the outcome of an investigation. Wayne County Community College District will initiate a decisive and appropriate response. This response may include, but is not limited to, suspension and/or termination of employment, and/or seeking arrest and prosecution of the person or persons involved.

In carrying out this policy, it is essential that all personnel understand that no existing College policy, practice or procedure shall be interpreted to prohibit decisions designed to prevent a threat from being carried out, a violent act from occurring or a life threatening situation from developing.

All College personnel are responsible for notifying the designated management representative of any threats which they have witnessed, received, or have been told that another person has witnessed or received. Even without an actual threat, personnel should also report any behavior they have witnessed which they regard as threatening or violent when that behavior is job-related or might be carried out on a College-controlled site, or is connected to College employment.

Employees are responsible for making this report regardless of the relationship behavior between the individuals who initiated the threat or threatening behavior and the person or persons who were threatened or were the focus of the threatening behavior.

This policy also requires all individuals who apply for, or obtain a protective or restraining order which lists College locations as being protected areas, to provide to the designated management representative a copy of the petition and declarations used to seek the order, a copy of any temporary protective or restraining order which is granted, and a copy of any protective or restraining order which is made permanent. The designated management representative for central administration shall be the Director of Human Resources and the Provost for each campus. (approved: 3/27/96)

GRIEVANCE PROCEDURE:

The person who believes he/she has a valid basis for a grievance shall discuss the grievance informally on a verbal basis with the Equal Opportunity Compliance Coordinator, who shall in turn investigate the complaint and reply with an answer to the grievant.

The student may begin formal procedures according to the following steps.

Step 1

A written statement of the grievance signed by the student shall be submitted to the Equal Opportunity Compliance Coordinator written five (5) business days of receipt of the answers to the informal grievance. The coordinator shall further investigate the matters of grievance and reply in writing to the student within five (5) business days.

Any complaint submitted under this procedure shall be filed at Step 1 within twenty (20) business days after the student became aware, or reasonably should have become aware of the complaint. If the complaint is not served within that time, the complaint will not be considered. Failure by the student to appeal the complaint from Step 1 to Step 2 within the time limit procedure shall also nullify the complaint.

Step 2

If the student wishes to appeal the decision of the Equal Opportunity Compliance Coordinator, the student may submit an appeal to the President of the College within five (5) business days after receipt of the Coordinator's response. The president (or his designee) shall meet with all parties involved within (10) ten business days to formulate a conclusion, and response in writing to the student within ten (10) business days.

COMPLIANCE STATEMENTS

Step 3

If at this point the grievance has not been satisfactorily settled further appeal may be made to the Office of Civil Rights, Department of Education, Washington, D.C. 20201.

Any complaint submitted under this procedure shall be filed at Step 1 within twenty (20) business days after the student became aware, or reasonably should have become aware of the complaint. If the complaint is not served within that time, the complaint will not be considered. Failure by the student to appeal the complaint from Step 1 to Step 2 within the time limit procedure shall also nullify the complaint.

CLERY ACT

In compliance with the Student Right-to-Know and Campus Security Act enacted Nov. 8, 1990, later formally renamed the Jeanne Clery Disclosure of Campus Security Policy and Campus Crime Statistics Act, and commonly referred to as simply the Clery Act. The Wayne County Community College District Campus Safety Department collects and publishes specific information on campus crime statistics, security policies and services. The WCCCD Campus Safety Department is service-oriented, trained in professional standards and dedicated to the safety and comfort of our students, faculty, staff and visitors. Our primary concern is to protect life and property and to allow the educational process to evolve safely.

All criminal incidents and emergency situations are to be immediately reported to the campus safety officer located at the security station at each of the District's campus facilities. Depending on the nature of the situation, appropriate police authorities will be contacted. Incident reports are prepared and reviewed by District administrative personnel, and, if warranted, further actions are taken as governed by law, employee labor contracts, and student conduct policies. All staff, faculty, students, and visitors are encouraged to report any suspicious persons, activities, events, as well as actual incidents and emergency situations to the District security personnel immediately.

THE FAMILY EDUCATIONAL RIGHTS AND PRIVACY ACT

The Family Educational Rights and Privacy Act of 1974, FERPA is a federal law that states (a) that a written institutional policy must be established and (b) that a statement of adopted procedures covering the privacy rights of students be made available. The law provides that the institution will maintain the confidentiality of student educational/financial records.

WCCCD accords all the rights under the law to students who are declared independent. No one outside the institution shall have access to, nor will the institution disclose, any information from the student's educational/financial records without the written consent of the student except to personnel within the institution, to officials of other institutions in which the student seeks to enroll, to persons or organizations providing the student with financial aid, to accrediting agencies carrying out their accreditation function, to persons in compliance with a judicial order, and to persons in an emergency in order to protect the health or safety of students or other persons. All these exceptions are permitted under the Act.

Within the WCCCD community, only those members, individually or collectively, acting in the student's educational interest are allowed access to student educational records. These members include personnel in the Offices of Admissions and Records, Student Services, and academic personnel within the limitations of their need to know.

At its discretion, the institution may provide Directory Information in accordance with the provisions of the Act to include: student name, address, telephone number, email address, date and place of birth, major field of study, dates of attendance, degrees and awards received, the most recent previous educational agency or institution attended by the student, participation in officially recognized activities and sports, and weight and height of members of athletic teams. Students may withhold Directory Information by notifying the Vice Chancellor of Student Services in writing within two weeks after the first day of class for the semester.

Requests for nondisclosure will be honored by the institution for only one academic year. Therefore, authorization to withhold Directory Information must be filed annually with the Vice Chancellor of Student Services. Forms utilized to make this request are available in the Office of Admissions and Records at all campus locations.

For additional information regarding the Family Education Rights and Privacy Act please visit our website at www.wcccd.edu and reference the Student Handbook.

SOCIAL SECURITY NUMBER PRIVACY ACT

The State of Michigan has recently enacted the Social Security Number Privacy Act that requires all public and private businesses and institutions to enact a policy regarding the protection and disclosure of social security numbers. In compliance with this law

and in furtherance of Wayne County Community College District's commitment to protect the privacy of its students, a Social Security Number Protection Policy has been adopted by the District.

In accordance with this policy, all students should be aware that their social security number will not be publicly displayed with more than four (4) sequential digits, or used as a primary account number by the District. Furthermore, students will not be required to supply their social security number to gain access to any computer system, internet websites or networks administered by the District.

Additionally, in order to avoid inadvertent disclosure, no document will be mailed or electronically transmitted by the District that contains more than four (4) sequential digits of a student's social security number unless required by state or federal law, a court order or under the other conditions expressly stated in the District's Policy. Also as part of its Social Security Number Protection Policy, the District has adopted disposal procedures that require all documents that contain a student's social security number be either eradicated or destroyed.

If students have any questions about this policy, or need clarification on any of the District's procedures concerning social security numbers, please either consult the District's Policy Manual online at www.wcccd.edu or contact the Administration.

STUDENT RIGHTS AND RESPONSIBILITIES

The District publishes a document – the Student Handbook which includes the Student Code of Conduct and expects that every student will become familiar with this information. This document is designed to help you successfully navigate through the educational process at WCCCD and outlines our expectations for student behavior. It is the student's responsibility to become familiar with this publication and refer to it as needed. You may obtain a copy of the Student Handbook on our website at www.wcccd.edu.
