Virtual Classroom (Videoconferencing)
The Center offers video conferencing through a more stable, faster, and higher quality digital video experience than most “free” conferencing websites. Videoconferencing allows for:
- Meetings
- Public Service Announcements (PSAs)
- Prerecorded seminar viewing
- Employment Services (video conference interviewing)
- Classes and guest speakers

Meeting Space
The Center provides technology-enhanced meeting space for faculty, staff, and community members.

Professional Development
The Center creates and coordinates professional development opportunities for WCCCD staff and faculty and provides workforce development training for business and industry that can be delivered through multiple distance learning modalities.

Instructional Design
The Center provides guidance and support for online programs and course development which fosters best practices while contributing creative ideas and solutions for enhancing teaching and learning.

Onsite Technical Support
The Center provides technical support for faculty, staff, students and community members by facilitating distance learning and technology-based formats.

Digital Repository
The Center houses a digital repository of learning resources which allows faculty, staff, and community members to “shop” within the repository to meet their lecture, meeting, or professional development needs. The repository includes:
- Webinars
- Links to continuing education courses
- Workforce development training modules
- Faculty-developed instructional videos (lecture capture)

Video/Audio Production
The Center will offer full production opportunities including video/audio production and a complete editing suite for digital video taping. Faculty, staff and community members will have the ability to produce broadcast-quality lectures, interviews, meetings, webinars, and continuing education courses all at one location.

Proctoring
The Center coordinates and facilitates the needs of WCCCD students, as well as those from other educational institutions, in the proctoring of examinations that accompany various distance learning modalities.
