Facility Maintenance

ABOUT THE PROGRAM

The Facility Maintenance Associate of Applied Science degree and College Certificate program prepares the student for immediate employment as a facility maintenance technician, maintenance and stationary engineer, and facility maintenance manager at health care institutions, large office towers, apartment complexes, professional buildings, multi-use facilities, plants, government and educational building, etc.

Students will be able to perform work pertaining to carpentry, plumbing, ground maintenance, electrical, general maintenance of heating, ventilation and air conditioning and refrigeration, (HVA/R) and operation and complete maintenance of boiler plants. The program prepares students to take local and State of Michigan examinations for obtaining license(s) as Mechanical Maintenance and Mechanics Education and Certification for Health Care (MECH) State of Michigan. The certificate will fulfill the competency requirements for the Joint Commission on Accreditation of Hospital Organization (JCAHO) for facility maintenance training.

WHAT DO FACILITY MAINTENANCE TECHNICIANS DO?

General maintenance and repair workers maintain and repair machines, mechanical equipment, and buildings. They work on plumbing, electrical, and air-conditioning and heating systems.

WHERE DO THEY WORK?

General maintenance and repair workers often carry out many different tasks in a single day. They could work at any number of locations, both indoor and outdoor. They may work inside a single building, such as a hotel or hospital, or be responsible for the maintenance of many buildings, such as those in an apartment complex or college campus.

PAY

The median annual wage for general maintenance and repair workers was \$39,080 in May 2019.

JOB OUTLOOK

Employment of general maintenance and repair workers is projected to grow 6 percent from 2018 to 2028, about as fast as the average for all occupations. Demand will increase as the building and real estate industries continue to recover.
