

School of Continuing Education & Workforce Development

Short Term Certificate Programs

Adobe Dreamweaver Certificate

Program Overview: The Adobe Dreamweaver Certificate can offers opportunities in the areas of web design, digital design and motion graphics. Courses are design to enhance the design skills and enable students to utilize Dreamweaver as a design tool in a personal or professional setting. Prerequisites: Students must have experience using Microsoft Office and Microsoft Windows.

- ✓ **DREAMWEAVER CREATIVE SUITE 4- LEVEL I:** Participants will be introduced to the Dreamweaver environment and learn about workspace and panel groups. Adding links and images to web pages, adding content to tables, and using tables in Standard and Layout views will also be covered.
 - ✓ **DREAMWEAVER CREATIVE SUITE 4- LEVEL II:** Participants will learn the concept of forms and form processing, designing and creative form objects, and adding behavior to forms. Additional topics covered will include applying CCS attributes to a template, creating image maps and navigation bars and understanding the concept of layers.
 - ✓ **DREAMWEAVER CREATIVE SUITE 4 – LEVEL III:** Participants will learn to create a website using frames, modifying frame/frameset properties, and adding flash buttons for navigation. The use of linear and non-linear timelines to create animation, and adding media objects such as Flash, Shockwave, Java applets, sound and video will also covered.
