

GENETICS

Workshop

with

DR. TERRI YOUNG

Monday, February 24, 2020

12:00 NOON - 1:30 P.M.

Northwest Campus

**Larry K. Lewis Education Building
8200 Outer Drive, Detroit, MI 48219**

Terri L. Young, MD, MBA, is a Peter A. Duehr Endowed Professor of Ophthalmology, Pediatrics, and Medical Genetics, and Chair of the University of Wisconsin Department of Ophthalmology and Visual Sciences. She is an internationally renowned physician-scientist pediatric ophthalmologist and geneticist, and has more than 220 peer reviewed journal publications, book chapters and specialty articles. She has received Honor Awards from numerous organizations including the Alpha Omega Alpha Society and the American Academy of Ophthalmology.

Genetic Testing for Inherited Eye Diseases

Participants in this workshop will be able to:

1. Understand the importance and downstream effects of gene mutation identification for a disease.
2. Relate the difference between causality and susceptibility based on the type of genetic study.
3. Adopt an algorithm of which type of diagnostic genetic testing would be appropriate.

THIS PROGRAM IS BROUGHT TO YOU BY THE EASTERN CAMPUS
